Data inputter to enter their initials here HB

Question 1

Respondent's Name and/or Organisation Hadlow Estate

Question 2

Agent's Name and Organisation (if applicable) Turnberry

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

STRATEGIC POLICIES

Policy STR1 The Development Strategy

We support the broad development strategy for Tunbridge Wells set out in the policy and in particular part 3b which promotes the creation of a new garden settlement at Tudeley Village. Further detail in support of this allocation is provided in Section 5 of this document.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy STR4 Ensuring Comprehensive Development

We support the principle of this policy, which requires masterplans for the urban expansion of Paddock Wood and Tudeley Village. Despite this in principle support for masterplans, we would question the need for a detailed SPD for Tudeley Village given that the land is entirely within the ownership of the Hadlow Estate, ensuring that development will come forward comprehensively and following significant public consultation in accordance with a masterplan.

There is an ability to bring forward and adopt a masterplan for the site without the requirement to undertake the full SPD process. This would be consistent with paragraph 126 of the NPPF which states, in relation to design guides and SPDs, that their level of detail and degree of prescription should be tailored to the circumstances in each place and should allow a suitable degree of variety where this would be justified.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy STR5 Infrastructure and Connectivity

We support this policy as proposed, however request for clarity that the text or supporting text be amended to clearly state that Capel/ Paddock Wood will be exempt from CIL.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy STR6 Transport and Parking

Part b1 of this policy commits to the establishment of rapid bus/transport links, including from Paddock Wood to Tonbridge (via Tudeley Village). While we support the establishment of such transport links, we request that the policy wording is amended to refer to "regular" or "frequent" links rather than "rapid", as this is what is no doubt intended and can be justified in policy terms.

The policy also proposed the incorporation of electric car charging points (or any new technology requirements) into new developments. While this is supported in principle, and indeed encouraged by paragraphs 105 and 110 of the NPPF, the policy should reference the practicality of universal electric charging points in new development and factor in the constraints of grid capacity where applicable. Wording should be inserted into the policy acknowledging that limitations on grid capacity may restrict developers' ability to provide universal ECV infrastructure.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy STR7 Climate Change

We support this policy, however we would suggest additional wording to part 2 where the policy states that decentralised heating and cooling networks will be given particular consideration in the largest strategic development locations. While we support this in principle, additional text should be added to the policy to make clear that this will only be considered where initial feasibility studies have concluded it is a workable solution.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's

understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Hadlow Estate

Question 2

Agent's Name and Organisation (if applicable) Turnberry

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy STR9 Green Belt

The policy notes that the Council will seek improvements to the environmental quality and accessibility of the surrounding Green Belt from all relevant development within the Green Belt, including if appropriate in the form of financial contributions. This approach is compliant with paragraph 138 of the NPPF which states that Plans should set out ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt land.

While we do not object to the principle of this policy, it will be crucial to define what this means in relation to Tudeley Village and the type and scale of compensatory measures required, particularly in relation to financial contributions.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy STR/SS 3 The Strategy for Tudeley Village

Housing

We support the revised delivery figures for Tudeley Village, which now confirm that 2,100 of the total allocate dwellings are to be delivered within the Plan period. Further to this, we support the policy requirements for high quality layout and design and good levels of permeability to encourage more sustainable modes of transport.

Transport

Paragraph 5.190 of the Plan states that the Five Oak Green bypass is largely required to alleviate issues caused by strategic development at Tudeley Village and the viability assessment shows that this can be delivered wholly by the Tudeley Village Garden Settlement. The supporting text should clarify that highway modelling will need to be updated to take into account the change in location of the proposed secondary school from that contained in the Regulation 18 Plan and the closer proximity to Paddock Wood will result in a greater share of increased traffic coming from this area such that the funding/ delivery strategy for the bypass will draw proportionately having regard to the impacts caused by each development.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy EN1 Sustainable Design

We support this policy and its ambitions, although for clarity request that point 8 should be amended to refer to "low to zero carbon technology" rather than "low and zero carbon technology".

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy 20 Agricultural Land

We restate our earlier position that the assumption that land is classified as best and most versatile in the absence of site specific ALC studies should be deleted from the policy.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy EN21 Air Quality

We support the principle of the policy, but we question the description of Electric Vehicle Charging (ECV) infrastructure as a "small-scale mitigation measure". While this may be true in some cases, it is clear that in developments such as Tudeley Village the introduction of ECV infrastructure will have significant implications in terms of grid capacity and is likely to require reinforcement. It is clear in this context that the installation of ECV infrastructure at Tudeley does not constitute a small-scale measure.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 26 Sustainable Drainage

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy EN26 Sustainable Drainage

We support the inclusion of a policy for sustainable drainage provision, but the text should be expanded to specifically note that integrated drainage design is not always possible where it conflicts with objectives to provide high-quality urban design.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful

modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy H3 Affordable Housing

As stated previously in our submission to the Reg 18 Plan, we do not consider this Policy to be justified or effective as it is overly prescriptive in terms of the phasing of affordable housing and the type of tenures anticipated. Further viability evidence will be required to justify the approach taken. Moreover, the use of the higher accessibility standard on all affordable dwellings is not proportionate and will mean those dwellings will have to be designed differently to their market housing neighbours which cuts across the aspiration for being tenure blind in the preceding part of the Policy.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy TP3 Parking Standards

As we have previously stated, we are concerned that this policy is going beyond specifying standards and will inhibit the design process with immovable redlines such as:

- . Banning tandem parking unless no on-street parking is available; and
- . Specifying how many open sides a parking barn must have.

The Policy is going beyond guidance to stipulating a design response which will not result in positive planning. It also fails to acknowledge the principle of using design to steer people towards a pattern of use or activity that is more beneficial. For instance, a lack of use of tandem spaces may increase onstreet parking which is desirable in terms of providing 'side-friction' which in turn, slows down drivers. If there is insufficient parking then residents have the choice to utilise their tandem driveways. Excessive, convenient parking can have the contrary effect of increasing speed along roads with limited 'side-friction' and reducing the definition of front boundaries. The current policy is worded negatively and excludes positive design outcomes. It is therefore unsound. We suggest these matters are best left to a supplementary guidance document on parking/ design which can explore good and bad examples of the issues identified above.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy TP5 Safeguarding Railway Land

We support the principle of this policy but suggest that specific reference is added to Tudeley Village.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We suggest the addition of the following wording: "Where identified in accordance with the Masterplan to be developed in respect of Policy STR/SS 3 The Strategy for Tudeley Village, land either side of the railway line within Tudeley Village will be safeguarded for potential bridge crossings and a potential rail halt and shall not be made available for other uses unless specifically identified in the Masterplan".

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful

modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

TP6 Safeguarding Roads

We support the amended text of this policy relating to the A228 strategic link which confirms that work undertaken since the Draft Local Plan has indicated that this entirely off-line route is not necessary to mitigate the impacts of strategic growth at Paddock Wood and east Capel, and at Tudeley Village. Rather, as detailed in Policy STR 6 Transport and Parking, a part off-line new section of highway running to the north of a collection of houses along the A288, together with other on-line improvements to the A228 to the west, and a new highway link bypassing Five Oak Green, is proposed.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Vivien Halley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HA 1 Land at the White House, Highgate Hill

Policy AL/HA2 Brook House Cranbrook Road

Policy AL/HA3 Former Site of Springfield Nurseries, Cranbrook Road, Hawkhurst

Policy AL/HA4 Land to the north of Copthall Avenue and Highgate Hill, Hawkhurst

Policy AL/CRS1 Land at Brick Kiln Farm, Cranbrook Road

Policy AL/CRS3 Turnden Farm, Hartley Road, Cranbrook

[TWBC: this representation has been input against Policies AL/HA1, AL/HA2, AL/HA3, AL/HA4, AL/CRS1 and AL/CRS3 – see Comment Numbers PSLP_1822, PSLP_1829, PSLP_1830, PSLP_1831, PSLP_1832 and PSLP_1833]

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- . I strongly support the removal of the Hawkhurst Golf Course site and the overall reduction in the allocation of housing numbers within the village and therefore the reduction to the harmful impact to an Area of Outstanding Natural Beauty.
- . The Local Plan has not taken into account the 28 houses in Heartenoak Road that are currently under construction and which will have a significant impact on the inadequate infrastructure and constant traffic congestion within Hawkhurst and especially at the village crossroads and along Queens Road, Heartenoak Road and Ockley Road.
- . I do not consider that the remaining housing development numbers set out in policies AL/HA1 (White House), AL/HA2 (Brook House), AL/HA3 (Springfield Nurseries), AL/HA4 (Copthall Avenue) and in Cranbrook policies AL/CRS1 (Brick Kiln Farm) and AL/CRS3 (Turnden Farm) are justified because no assessment has been undertaken of the cumulative impact of allocations on the Flimwell junction, village crossroads and the increase in traffic using minor roads and lanes to avoid the congested crossroads. The recent planning application at Copthall was refused due to the impact on the crossroads and the AONB.
- . I do not consider that the remaining numbers set out in policies AL/HA2 (Brook House) and AL/HA3 (Springfield Nurseries) are justified because no assessment has been undertaken of the cumulative impact of the significant recent developments in Hawkhurst in the areas of Heartenoak Road, thus creating more traffic congestion and pollution at the crossroads in the village or more traffic using the local narrow roads and lanes in order to avoid queuing at the crossroads. It has been well documented that the crossroads in the village are already functioning over their capacity so an increase in traffic cannot be justified. When residents from Cranbrook return home for example from shopping in the village, instead of waiting at the crossroads they will resort to finding alternative routes and turn local narrow roads such as Queens Road, Heartenoak Road, Ockley Road, Winchester Road, Woodbury Road and Vale Road into speeding rat runs, causing

constant disruption, traffic noise and pollution to local residents and also damage to parked vehicles.

- . I do not consider that policies AL/HA1 (White House), AL/HA2 (Brook House), AL/HA3 (Springfield Nurseries), AL/HA4 (Copthall Avenue) and in Cranbrook policies AL/CRS1 (Brick Kiln Farm) and AL/CRS3 (Turnden Farm) are consistent with national policy because they do not focus development in sustainable locations and will not limit the need to rely on private car trips (NPPF paragraphs 103 and 104).
- . I consider the policies will fail to preserve or enhance the AONB (contrary to the NPPF paragraph 172).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- . Removal of policies AL/HA2 (Brook House), AL/HA3 (Springfield Nurseries), AL/HA4 (Copthall Avenue) and in Cranbrook policies AL/CRS1 (Brick Kiln Farm) and AL/CRS3 (Turnden Farm).
- . Modify the Local Plan to reflect the reduction in the overall housing numbers in Hawkhurst and Cranbrook as a result of the removal of the above policies and give consideration to the 28 houses currently under construction in Heartenoak Road.
- . Should any further housing development be undertaken in Hawkhurst and especially in the Cranbrook Road area, it would be essential to reduce the possibility for people to drive through local roads (i.e. rat runs) in order to avoid the queues at the crossroads. Car drivers travelling towards the A229 towards Maidstone from the A268 (from the direction of Sandhurst) should be prevented from driving down Queens Road, into Heartenoak Road, into Ockley Road and then into Winchester Road, in order to join the A229 and thus avoiding the crossroads. This could be achieved by blocking off this "rat run" at the junction between Ockley Road and Winchester Road. Adapting existing roads so they have pedestrian access only, has already been successfully implemented in other areas of Hawkhurst to prevent through traffic along the following roads:
 - . Northgrove Road
 - . Western Road
 - . Copthall Avenue/All Saints Road
- . The introduction of traffic calming measures in Queens Road and Heartenoak Road to prevent speeding traffic, improve safety and improve the quality of life of residents living along these extremely busy roads.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

(Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- . Removal of policies AL/HA2 (Brook House), AL/HA3 (Springfield Nurseries), AL/HA4 (Copthall Avenue) and in Cranbrook policies AL/CRS1 (Brick Kiln Farm) and AL/CRS3 (Turnden Farm).
- . Modify the Local Plan to reflect the reduction in the overall housing numbers in Hawkhurst and Cranbrook as a result of the removal of the above policies and give consideration to the 28 houses currently under construction in Heartenoak Road.
- . Should any further housing development be undertaken in Hawkhurst and especially in the Cranbrook Road area, it would be essential to reduce the possibility for people to drive through local roads (i.e. rat runs) in order to avoid the queues at the crossroads. Car drivers travelling towards the A229 towards Maidstone from the A268 (from the direction of Sandhurst) should be prevented from driving down Queens Road, into Heartenoak Road, into Ockley Road and then into Winchester Road, in order to join the A229 and thus avoiding the crossroads. This could be achieved by blocking off this "rat run" at the junction between Ockley Road and Winchester Road. Adapting existing roads so they have pedestrian access only, has already been successfully implemented in other areas of Hawkhurst to prevent through traffic along the following roads:
 - . Northgrove Road
 - . Western Road
 - . Copthall Avenue/All Saints Road
- . The introduction of traffic calming measures in Queens Road and Heartenoak Road to prevent speeding traffic, improve safety and improve the quality of life of residents living along these extremely busy roads.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Vivien Halley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HA 1 Land at the White House, Highgate Hill

Policy AL/HA2 Brook House Cranbrook Road

Policy AL/HA3 Former Site of Springfield Nurseries, Cranbrook Road, Hawkhurst

Policy AL/HA4 Land to the north of Copthall Avenue and Highgate Hill, Hawkhurst

Policy AL/CRS1 Land at Brick Kiln Farm, Cranbrook Road

Policy AL/CRS3 Turnden Farm, Hartley Road, Cranbrook

[TWBC: this representation has been input against Policies AL/HA1, AL/HA2, AL/HA3, AL/HA4, AL/CRS1 and AL/CRS3 – see Comment Numbers PSLP_1822, PSLP_1829, PSLP_1830, PSLP_1831, PSLP_1832 and PSLP_1833]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- ☐ I strongly support the removal of the Hawkhurst Golf Course site and the overall reduction in the allocation of housing numbers within the village and therefore the reduction to the harmful impact to an Area of Outstanding Natural Beauty.
- ☐ The Local Plan has not taken into account the 28 houses in Heartenoak Road that are currently under construction and which will have a significant impact on the inadequate infrastructure and constant traffic congestion within Hawkhurst and especially at the village crossroads and along Queens Road, Heartenoak Road and Ockley Road.
- ☐ I do not consider that the remaining housing development numbers set out in policies AL/HA1 (White House), AL/HA2 (Brook House), AL/HA3 (Springfield Nurseries), AL/HA4 (Copthall Avenue) and in Cranbrook policies AL/CRS1 (Brick Kiln Farm) and AL/CRS3 (Turnden Farm) are justified because no assessment has been undertaken of the cumulative impact of allocations on the Flimwell junction, village crossroads and the increase in traffic using minor roads and lanes to avoid the congested crossroads. The recent planning application at Copthall was refused due to the impact on the crossroads and the AONB.
- ☐ I do not consider that the remaining numbers set out in policies AL/HA2 (Brook House) and AL/HA3 (Springfield Nurseries) are justified because no assessment has been undertaken of the cumulative impact of the significant recent developments in Hawkhurst in the areas of Heartenoak Road, thus creating more traffic congestion and pollution at the crossroads in the village or more traffic using the local narrow roads and lanes in order to avoid queuing at the crossroads. It has been well documented that the crossroads in the village are already functioning over their capacity so an increase in traffic cannot be justified. When residents from Cranbrook return home for example from shopping in the village, instead of waiting at the crossroads they will resort to finding alternative routes and turn local narrow roads such as Queens Road, Heartenoak Road, Ockley Road, Winchester Road, Woodbury Road and Vale Road into speeding rat runs, causing

constant disruption, traffic noise and pollution to local residents and also damage to parked vehicles.

- . I do not consider that policies AL/HA1 (White House), AL/HA2 (Brook House), AL/HA3 (Springfield Nurseries), AL/HA4 (Copthall Avenue) and in Cranbrook policies AL/CRS1 (Brick Kiln Farm) and AL/CRS3 (Turnden Farm) are consistent with national policy because they do not focus development in sustainable locations and will not limit the need to rely on private car trips (NPPF paragraphs 103 and 104).
- . I consider the policies will fail to preserve or enhance the AONB (contrary to the NPPF paragraph 172).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- . Removal of policies AL/HA2 (Brook House), AL/HA3 (Springfield Nurseries), AL/HA4 (Copthall Avenue) and in Cranbrook policies AL/CRS1 (Brick Kiln Farm) and AL/CRS3 (Turnden Farm).
- . Modify the Local Plan to reflect the reduction in the overall housing numbers in Hawkhurst and Cranbrook as a result of the removal of the above policies and give consideration to the 28 houses currently under construction in Heartenoak Road.
- . Should any further housing development be undertaken in Hawkhurst and especially in the Cranbrook Road area, it would be essential to reduce the possibility for people to drive through local roads (i.e. rat runs) in order to avoid the queues at the crossroads. Car drivers travelling towards the A229 towards Maidstone from the A268 (from the direction of Sandhurst) should be prevented from driving down Queens Road, into Heartenoak Road, into Ockley Road and then into Winchester Road, in order to join the A229 and thus avoiding the crossroads. This could be achieved by blocking off this "rat run" at the junction between Ockley Road and Winchester Road. Adapting existing roads so they have pedestrian access only, has already been successfully implemented in other areas of Hawkhurst to prevent through traffic along the following roads:
 - . Northgrove Road
 - . Western Road

Submission to Regulation 19 Local Plan consultation

The landowners welcome the inclusion of site 231 as a residential allocation assigned policy reference Policy AL/SP 1 within the Regulation 19 Local Plan. The plan has been prepared in accordance with all legal and procedural requirements, and the plan meets the prescribed tests of soundness.

Associated commentary on general matters is presented under suitably-titled headings below.

1. Delivery of a small-scale site in a sustainable location

The final version of the revised NPPF (2019) requires Local Planning Authorities to accommodate at least 10% of their housing requirement on 'small and medium sized sites' (up to one hectare) through their development plans and brownfield land registers.

Speldhurst is a sustainable settlement that can, and should, accommodate a proportionate amount of growth to ensure its vitality is maintained into the future. Specifically, site 231 benefits from being within convenient walking distance of local services and facilities, to include a community shop that includes a post office and general store, a doctor's surgery, a primary school and a children's nursery, village hall, and a church and a further chapel. In terms of access to public transport, Speldhurst benefits from a service linking the village with Royal Tunbridge Wells on weekdays and Saturdays. There is also a school bus service that runs to the Weald of Kent Grammar School in Tonbridge. The allocation of site 231, therefore, is guided by both the Development Strategy for the Local Plan, alongside the requirement for small and medium sized sites to contribute towards the overall mix of housing sites.

The Housing Supply and Trajectory Topics Paper profiles the delivery of units on site 231 across 2023/24 and 2024/25. In November 2020 the landowners entered into an Option Agreement with a prestigious local developer, Calverley Estates Ltd, and so a high degree of confidence can be placed in the delivery of residential dwellings on site 231. Indeed, based on conversations between the two parties involved, it is expected that the first occupation in the 2023 calendar year would represent a realistic expectation.

It is important that the local planning authority is provided up-to-date and accurate profiling of anticipated site build out rates in order to maintain certainty over the forward housing supply position in the context of the 5-year housing land supply, and in this regard Site 231 shall make a meaningful contribution towards the reported annual position across the period that occupations occur.

2. Change of speed limit to Langton Road on the approach from the west

The landowners are cognisant that some local residents have raised concerns through a number of channels (for example representations made into the emerging Local Plan and via meetings of the Speldhurst Parish Council Highways Committee) regarding the speed at which vehicles users are moving through the Langton Road 20mph zone.

As part of the supporting evidence to the promotion of the site in conjunction with the emerging Local Plan, the landowners have previously commissioned two traffic surveys to record speeds at the proposed point of access for a period of a week during what is a traffic neutral period accepted by the local highway authority. The traffic survey data captured details of vehicle type, speed and volume. The speed data was used to calculate the visibility splay requirements, and a satisfactory access can be achieved without any intervention to the local speed limit regime. Visibility splay calculations over-provide for vehicle stopping distances, as the standardised values applied by local highway authorities do not account for the demonstrable improvements in vehicle braking technology over the past few decades. It is expected that Manual for Streets is soon to be updated to bring, amongst other things, visibility splay information 'in sync' with the latest vehicle technology.

Although a suitable and safe highway access to serve the site can be formed with no changes to the existing speed limit regime, the implementation of the site for residential use could reasonably require the implementation of necessary traffic calming measures to Langton Road in accordance with the relevant criteria of policy AL/SP1, as repeated below.

[TWBC: Respondent has quoted wording of policy AL/SP1]

3. Open space, amenity and play space

Policy OSSR 2 of the emerging Local Plan establishes the criteria for the provision of publicly accessible open space and recreation. The policy directs that for new housing or mixed use development sites, the Local Planning Authority will seek to deliver the following categories of publicly accessible open space, sports, and recreation provision in accordance with the specified minimum standards, as set out below.

[TWBC: Respondent has quoted data from policy OSSR 2]

The standards require no on-site provision for developments of up to 19 dwellings. In accordance with policy AL/SP1 the site is allocated for between 10-12 dwellings, with a median value of 11 dwellings. The site would, therefore, fall within the category of not requiring on-site provision. It is noted that improvements to existing (off-site) provision might be required in accordance with Policy OSSR 2.

4. Biodiversity net gain

One of the landowners attended the full meeting of Speldhurst Parish Council held virtually on Wednesday 5th May 2021, and the draft minutes of that meeting are enclosed to this correspondence. One issue discussed at some length during the public open session was biodiversity net gain and the practical requirements of meeting the associated target through allocations set out in the Regulation 19 Version of the Local Plan. Concern was expressed by certain members of the Parish Council as to the compliance of the Local Plan with the National Planning Policy Framework (NPPF) in respect of biodiversity net gain, and the associated implications for site 231 and the Local Plan more broadly.

In response the landowners contend that the Regulation 19 Local Plan contains extensive coverage of Biodiversity Net Gain as set out in paragraphs 6.131 to 6.142. Paragraph 6.134 establishes further work to be undertaken by the Council, as follows:

[TWBC: Respondent has quoted wording from paragraph 6.134]

The wording of Policy EN9 'Biodiversity Net Gain' of the Regulation 19 Local Plan is presented below.

[TWBC: Respondent has quoted wording of policy EN9]

Within England under the National Planning Policy Framework (NPPF), biodiversity net gain is strongly encouraged. As the government moves towards including a mandatory net gain requirement as part of the new Environment Bill, which will introduce changes to the Town and Country Planning Act 1990, Biodiversity Net Gain will move from a best practice ideal to a legal requirement in England. The Regulation 19 Local Plan makes provision for arrangements until such time that an SPD is adopted, as set out in paragraph 6.139.

[TWBC: Respondent has quoted wording from paragraph 6.139]

It is contended that the Local Plan provides full and appropriate consideration of Biodiversity Net Gain.

Moreover, the Regulation 19 Local Plan comprises a suite of evidence base documents that provide extensive coverage of the biodiversity interest of the sites to be allocated.

Paragraph 5.20.9 of the Grassland Assessment Survey prepared by consultants Greenspace Ecological Solutions Ltd on behalf of Tunbridge Wells Borough Council clarifies:

*"The site Speldhurst SP1 supports grassland of **Low** botanical interest and is considered of **Low** ecological importance."*

The landowners shall work proactively with the developer in order to ensure a future scheme of development is in full adherence with policy EN9 of the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In accordance with the response to point 7, I would only seek to participate in hearing sessions if there were relevant matters, issues and questions raised by the appointed inspector(s) relating to the site allocation made in accordance with policy AL/SP 1, or otherwise PolicyPSTR/SP 1. I would be satisfied to submit written representations to the examination.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Submission to Regulation 19 Local Plan consultation

The landowners welcome the inclusion of site 231 as a residential allocation assigned policy reference Policy AL/SP 1 within the Regulation 19 Local Plan. The plan has been prepared in accordance with all legal and procedural requirements, and the plan meets the prescribed tests of soundness.

Associated commentary on general matters is presented under suitably-titled headings below.

1. Delivery of a small-scale site in a sustainable location

The final version of the revised NPPF (2019) requires Local Planning Authorities to accommodate at least 10% of their housing requirement on 'small and medium sized sites' (up to one hectare) through their development plans and brownfield land registers.

Speldhurst is a sustainable settlement that can, and should, accommodate a proportionate amount of growth to ensure its vitality is maintained into the future. Specifically, site 231 benefits from being within convenient walking distance of local services and facilities, to include a community shop that includes a post office and general store, a doctor's surgery, a primary school and a children's nursery, village hall, and a church and a further chapel. In terms of access to public transport, Speldhurst benefits from a service linking the village with Royal Tunbridge Wells on weekdays and Saturdays. There is also a school bus service that runs to the Weald of Kent Grammar School in Tonbridge. The allocation of site 231, therefore, is guided by both the Development Strategy for the Local Plan, alongside the requirement for small and medium sized sites to contribute towards the overall mix of housing sites.

The Housing Supply and Trajectory Topics Paper profiles the delivery of units on site 231 across 2023/24 and 2024/25. In November 2020 the landowners entered into an Option Agreement with a prestigious local developer, Calverley Estates Ltd, and so a high degree of confidence can be placed in the delivery of residential dwellings on site 231. Indeed, based on conversations between the two parties involved, it is expected that the first occupation in the 2023 calendar year would represent a realistic expectation.

It is important that the local planning authority is provided up-to-date and accurate profiling of anticipated site build out rates in order to maintain certainty over the forward housing supply position in the context of the 5-year housing land supply, and in this regard Site 231 shall make a meaningful contribution towards the reported annual position across the period that occupations occur.

2. Change of speed limit to Langton Road on the approach from the west

The landowners are cognisant that some local residents have raised concerns through a number of channels (for example representations made into the emerging Local Plan and via meetings of the Speldhurst Parish Council Highways Committee) regarding the speed at which vehicles users are moving through the Langton Road 20mph zone.

As part of the supporting evidence to the promotion of the site in conjunction with the emerging Local Plan, the landowners have previously commissioned two traffic surveys to record speeds at the proposed point of access for a period of a week during what is a traffic neutral period accepted by the local highway authority. The traffic survey data captured details of vehicle type, speed and volume. The speed data was used to calculate the visibility splay requirements, and a satisfactory access can be achieved without any intervention to the local speed limit regime. Visibility splay calculations over-provide for vehicle stopping distances, as the standardised values applied by local highway authorities do not account for the demonstrable improvements in vehicle braking technology over the past few decades. It is expected that Manual for Streets is soon to be updated to bring, amongst other things, visibility splay information 'in sync' with the latest vehicle technology.

Although a suitable and safe highway access to serve the site can be formed with no changes to the existing speed limit regime, the implementation of the site for residential use could reasonably require the implementation of necessary traffic calming measures to Langton Road in accordance with the relevant criteria of policy AL/SP1, as repeated below.

[TWBC: Respondent has quoted wording of policy AL/SP1]

3. Open space, amenity and play space

Policy OSSR 2 of the emerging Local Plan establishes the criteria for the provision of publicly accessible open space and recreation. The policy directs that for new housing or mixed use development sites, the Local Planning Authority will seek to deliver the following categories of publicly accessible open space, sports, and recreation provision in accordance with the specified minimum standards, as set out below.

[TWBC: Respondent has quoted data from policy OSSR 2]

The standards require no on-site provision for developments of up to 19 dwellings. In accordance with policy AL/SP1 the site is allocated for between 10-12 dwellings, with a median value of 11 dwellings. The site would, therefore, fall within the category of not requiring on-site provision. It is noted that improvements to existing (off-site) provision might be required in accordance with Policy OSSR 2.

4. Biodiversity net gain

One of the landowners attended the full meeting of Speldhurst Parish Council held virtually on Wednesday 5th May 2021, and the draft minutes of that meeting are enclosed to this correspondence. One issue discussed at some length during the public open session was biodiversity net gain and the practical requirements of meeting the associated target through allocations set out in the Regulation 19 Version of the Local Plan. Concern was expressed by certain members of the Parish Council as to the compliance of the Local Plan with the National Planning Policy Framework (NPPF) in respect of biodiversity net gain, and the associated implications for site 231 and the Local Plan more broadly.

In response the landowners contend that the Regulation 19 Local Plan contains extensive coverage of Biodiversity Net Gain as set out in paragraphs 6.131 to 6.142. Paragraph 6.134 establishes further work to be undertaken by the Council, as follows:

[TWBC: Respondent has quoted wording from paragraph 6.134]

The wording of Policy EN9 'Biodiversity Net Gain' of the Regulation 19 Local Plan is presented below.

[TWBC: Respondent has quoted wording of policy EN9]

Within England under the National Planning Policy Framework (NPPF), biodiversity net gain is strongly encouraged. As the government moves towards including a mandatory net gain requirement as part of the new Environment Bill, which will introduce changes to the Town and Country Planning Act 1990, Biodiversity Net Gain will move from a best practice ideal to a legal requirement in England. The Regulation 19 Local Plan makes provision for arrangements until such time that an SPD is adopted, as set out in paragraph 6.139.

[TWBC: Respondent has quoted wording from paragraph 6.139]

It is contended that the Local Plan provides full and appropriate consideration of Biodiversity Net Gain.

Moreover, the Regulation 19 Local Plan comprises a suite of evidence base documents that provide extensive coverage of the biodiversity interest of the sites to be allocated.

Paragraph 5.20.9 of the Grassland Assessment Survey prepared by consultants Greenspace Ecological Solutions Ltd on behalf of Tunbridge Wells Borough Council clarifies:

*"The site Speldhurst SP1 supports grassland of **Low** botanical interest and is considered of **Low** ecological importance."*

The landowners shall work proactively with the developer in order to ensure a future scheme of development is in full adherence with policy EN9 of the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In accordance with the response to point 7, I would only seek to participate in hearing sessions if there were relevant matters, issues and questions raised by the appointed inspector(s) relating to the site allocation made in accordance with policy AL/SP 1, or otherwise PolicyPSTR/SP 1. I would be satisfied to submit written representations to the examination.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Hams Travel
Question 2	
Agent's Name and Organisation (if applicable)	Evolution Town Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: Report attached as Supplementary Information]

Question 4

Do you consider that the Local Plan:

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Having reviewed the broad strategy contained in this policy, we note that the Council continues to be heavily reliant on delivery of housing around Paddock Wood, which includes an entire new settlement at Tudeley Village on the Hadlow Estate, between Tonbridge and Paddock Wood. Tunbridge Wells, the largest settlement in the district, is only allocated 1,416 to 1,536 new homes.

Meanwhile allocations in smaller sustainable settlements are restricted even more significantly. Benenden has received allocations for 87-95 (plus 23 which already have planning permission), which is decrease from the previously drafted allocated allowance of 119-129 new homes, due to the decision to drop one site from the allocations because it has already been delivered.

The Pre-submission Draft Local Plan policy STR1 identifies development allocations as follows:

- . **Paddock Wood and surrounding area** (around 4,000 new homes at Paddock Wood and an entire new settlement at Tudeley Village on the Hadlow Estate of 2,800 of which 2,100 are to come forward during the plan period).
- . **Tunbridge Wells**, the largest settlement in the district, is only allocated 1,416 to 1,536 new homes
- . **Other settlements** have been allocated sites at various levels in accordance with their sustainability credentials and opportunities. For example, Cranbrook and Sissinghurst have

received allocations for 415-429 new dwellings, whereas Bidborough has not received any allocations. Benenden has received allocations for 87-95 new homes (a reduction on the previous draft plan).

We are not persuaded that this strategy is likely to ensure delivery at the levels the NPPF requires. NPPF states at paragraph 59 that the government's objective is to 'significantly boost the supply of homes' and elsewhere the NPPF makes clear that it is not just the allocation of sites, but their delivery which is crucial. In this regard we have concerns that such a large proportion of the Borough's housing allocations have been concentrated in such a small part of the Borough and on large sites. Since large sites are known to be vulnerable and volatile to non-delivery in economic down turns, this approach seems to be flawed and likely to place the strategy at risk.

The NPPF (paragraph 68) states that '*small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly.*' In supporting small and medium sites to come forward, the NPPF requires LPAs to ensure that (a) at least 10% of their housing requirement is on sites no larger than one hectare; and (c) '*support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using sustainable sites within existing settlements for homes*'.

By relying on a few large sites for such a large proportion of the housing supply in the Paddock Wood market (over 50% of the Borough's 7,221 housing allocations required), we remain concerned that this strategy is likely to prove highly vulnerable to obstacles to delivery, should the market experience a downturn or volatility. This is not consistent with the aims of NPPF.

Whilst we do not object to the allocation of these larger sites, to guard against non-delivery the Council should consider allocating far more small and medium sized sites and scheduling to expect a slower rate of delivery on these large sites, in accordance with national planning policy. This will effectively allow for some dips in the market and downturns, in such a way that delivery of the overall housing target is not compromised. We also consider that the policy fails by not providing sufficient support to windfall development, as is required by paragraph 68 (c) of the NPPF, and is therefore in **conflict with the NPPF** on this point.

We consider that the Local Plan is comprised and at risk of being found to be unsound, without an increase in small and medium sized sites being allocated and less reliance on the large sites around Paddock Wood and without more support being provided for windfall development.

See attached report for a full explanation of these reasons.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested Amendments

We object to point 2 of policy STR 1, which states that the Local Plan '*Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan.*' We consider that this clause could be improved to offer greater flexibility for the consideration of windfall development on brownfield sites in locations outside of the Built Development of settlements, if it were expanded to state:

*'Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan. **Where there is a***

housing need, or housing delivery is falling below the required housing supply, windfall development will be supported on brownfield sites outside of the Limits to Built Development’.

In terms of the wording of the policy, we also object to point 9 of policy STR 1, which states that the Local Plan ‘normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary.’

We believe that, in the light of the Council’s heavy reliance on large sites in the Paddock Wood area for the vast majority of housing delivery, the overall soundness of the policy will be improved if the clause were expanded to state the following:

*‘normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary. **Where there is a housing need, or housing delivery is falling below the required housing supply, windfall development will be supported on brownfield sites outside of the Limits to Built Development’.***

We consider that, given the undersupply in the Borough, the LPA should consider including circumstances in which windfall housing development would be supported outside of the existing development limits. Given the encouragement of brownfield development within the NPPF, we consider that the LPA should include a clause which supports such development, in circumstances where housing delivery falls below the required supply, as suggested above.

This would open up development options on brownfield sites in accordance with NPPF’s preference for brownfield delivery and would assist against concerns regarding the non-delivery of large allocated sites in an economic downturn.

Regarding paragraph 8 of policy STR1, we note that the Local Plan will aim to ‘*limit development within the High Weald Area of Outstanding Natural Beauty to that which can be accommodated whilst still conserving its key characteristics, this being mostly small-scale, only promoting larger proposals where exceptional circumstances are demonstrated*’. We support this change from the previous draft of this policy. Given the scale of the housing crisis and the need to ensure delivery of housing across the Borough, we welcome that this clause has been amended to be more flexible and to be explicitly supportive of developments which are not ‘major’ developments. We consider that the paragraph could be further improved by stating that brownfield developments will be especially supported.

We suggest a revision as follows:

*‘limit development within the High Weald Area of Outstanding Natural Beauty to that which can be accommodated whilst still conserving its key characteristics, this being mostly small-scale (**less than 20 homes**), only promoting larger proposals where exceptional circumstances are demonstrated **and/or where development is on brownfield land**’.*

We consider that these suggested revisions will bring the plan more into line with the NPPF which requires Local Plans to support brownfield development, ensure the delivery of housing (not simply allocated sufficient sites) and be ‘positively prepared’, ‘justified’, ‘effective’ and ‘consistent with national policy’ (paragraph 33). Such amendments will place the plan in a better position for its Examination.

Summary

We would also support policy STR1, if it were amended to include less reliance on the new settlement and Paddock Wood sites and a greater proportion of smaller sites across the Borough. However, in addition we have also recommended the following amendments, to ensure that the plan is positively prepared and effective, even if the Council continues to rely on such large sites to deliver its housing strategy:

*‘(2) Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan. **Where there is a housing need, or housing delivery is falling below the required housing supply, windfall development will be supported on brownfield sites outside of the Limits to Built Development’.***

*‘(8) limit development within the High Weald Area of Outstanding Natural Beauty to that which can be accommodated whilst still conserving its key characteristics, this being mostly small-scale (**less than 20 homes**), only promoting larger proposals where exceptional circumstances are demonstrated **and/or where development is on brownfield land**’.*

*'(9) Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary. **Where there is a housing need, or housing delivery is falling below the required housing supply, windfall development will be supported on brownfield sites outside of the Limits to Built Development**'.*

These amendments would help guard against non-delivery of the larger sites that the plan relies on, should there be a downturn in the housing market. These suggestions will improve the deliverability of the Council's housing targets. We also consider that these amendments will bring the policy more into line with the NPPF (particularly paragraph 68 (c)) and without this change the policy risks being in **conflict with the NPPF**.

Overall, we consider that the Local Plan is comprised and at risk of being found to be **unsound**, without an increase in small and medium sized sites being allocated and less reliance on the large sites around Paddock Wood and without more support being provided for windfall development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Hams Travel has an excellent site to be considered locally and since there is a legally challenge in place on their site in Flimwell, any updates on that site may add to the strength of the case for the allocation of the Benenden site.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 1, AL/BE 2, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_1669, PSLP_1672, PSLP_1673, PSLP_1674 and PSLP_1675. Report attached as Supplementary Information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We object to policy **PSTR/BE 1** and suggest revisions and the decisions made regarding housing allocations. Benenden has received allocations for 87-95 (plus 23 which already have planning permission), which is decrease from the previously drafted allocated allowance of 119-129 new homes, due to the decision to drop one site (Land at Walkhurst Road) from the allocations. Land at Walkhurst Road was dropped from the allocations because it has already been delivered. Dropping this site from the allocations has led to a reduction in the Parish of Benenden and we consider that the allocation should have been replaced with an entirely new allocation, in order to maintain a good supply of housing in the Parish. Moreover, we object to the remaining allocations in the Parish.

We note that the remote site of Benenden Hospital at East End, a significant distance from Benenden, has received allocations for up to 22-25 new homes on the southern site and 22-25 homes on the northern site, which is in addition to the 23 dwellings which already have planning permission. This is around 75 new homes in total, and the site is poorly connected with the village. We object to this since nearer sites have been discounted on the basis of them being 'too remote', but the Benenden Hospital more remote site, yet it has been allocated.

Objections to policy PSTR/BE 1 and AL/BE 1, AL/BE 2, AL/BE 2 and AL/BE 4

Having reviewed the strategy for site allocation in Benenden Parish our main objection is a continued reliance on greenfield sites, when brownfield sites are available. We also object to the heavy reliance on one large site, which is extremely remote from the main village of Benenden (albeit we note that this has been split into two sites following previous representations).

The NPPF is clear that LPAs have a responsibility to make an effective use of land, prioritising brownfield land to make 'as much use as possible' of brownfield opportunities: *'Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land'* (paragraph 117).

The NPPF continues that LPAs should *'give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land'* (paragraph 118).

We have assessed each of the allocations in and around Benenden and set out our comments and objections below:

- **AL/BE 1 Land adjacent to New Pond Road – Objection.** This site is allocated for 18-20 dwellings, of which 40% should be affordable. This is a greenfield site including arboricultural, SSSI ecological interests and possible archaeological constraints. We consider it to be a less suitable site for development than Hams Travel's Coach Yard. Indeed, we question whether the rear part of the site with the most valuable trees and potential for archaeological interest is suitable for development at all. This should not be allocated in advance of brownfield opportunities, such as the Hams Travel site.

- **AL/BE 2 Feoffee Cottage and land, Walkhurst Road – Objection.** This site is allocated for 25 dwellings, of which 48% should be affordable. This is a greenfield site and lies adjacent to ancient woodland and a Listed Building. It therefore has a number of constraints and should not be allocated in advance of brownfield sites, lacking any such constraints. We therefore do not consider that this site should be allocated in advance of the Hams Travel's Coach Yard, which contains fewer constraints and is a brownfield opportunity.

- **AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units (in addition to the 23 new dwellings that have already been granted approval at this site), of which 30 percent shall be affordable housing. Combined with AL/BE4 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. We do not consider that the proposal for a *'an active travel link between the site and Benenden village'* will prove to be sustainable for a development of this scale and it is unlikely that an allocation of this size (even with the hospital population) would be sufficient to support the proposed retail outlet proposed.

- **AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units, of which 30 percent shall be affordable housing. Combined with AL/BE3 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. Moreover, since other brownfield sites are available in closer proximity to the settlement – such as the Hams Travel site, we do not consider it to be the most sustainable brownfield option available. It therefore should not be allocated in advance of brownfield sites, nearer to the settlement such as Hams Coach Yard.

Since the previous regulation 18 consultation, the original 'Policy AL/BE 1 – Land at Walkhurst Road' has been dropped as an allocation. This is because the site has already been developed. Whilst we support the Council in dropping this allocation (since it has been developed), we consider that the LPA have missed an opportunity to allocate a new site for the parish which could have reduced the risk of non-delivery and would have assisted in meeting local need. Rather than allocating a new site for development, the Local Plan has split the previous Benenden hospital site into two allocations. This is deceptive, as in reality, the Parish now has one less site for development. As a result, the Local Plan now effectively relies on just three sites (as site AL/BE3 and AL/BE4 were the same allocation in the previous Local Plan), exposing the village to a greater chance of non-delivery, and risking the housing need not being met. We consider that it would have been preferable to allocate an additional site, so as to reduce the reliance of a few large sites in the Parish for development.

We consider that a preferable approach would have been to allocate the Hams Coach Yard, since this is largely brownfield, is surplus to requirements and is **much nearer** to Benenden village than the only other brownfield allocation at Benenden Hospital. This site was put forward during the regulation 18 consultation and has been assessed by the LPA. We consider this assessment in the following chapter, and maintain that the site should have been allocated as the assessment is inconsistent with the approach taken on Benenden Hospital Site.

Development of the Hams Travel Site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which gives 'substantial weight' to the allocation of brownfield sites and which uses as much brownfield land as possible. We provide full details of this site's opportunities for development at section 4.

The Hams Travel Coach Yard could have provided this 5th housing allocation in the Benenden area, as set out in the following chapter, and offered a genuine replacement for the dropped 'Policy AL/BE 1 – Land at Walkhurst Road' site.

Whilst our preference would have been for the Council to include the Hams Travel Coach Yard within the allocations, we consider that our objection could be overcome, if the policy were amended to allow for brownfield development beyond the built development boundaries of Benenden. Unfortunately, amendments to the policy since the regulation 18 consultation have reduced the policy's flexibility, rather than increased the usefulness and flexibility of the policy. This risks the policy being found to be **unsound**.

See attached report for a full explanation of these reasons.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Amendments to general policy provided by policy PSTR/BE 1 (previously STR/BE1)

If 'the Strategy for Benenden parish' (policy PSTR/BE 1) and allocations are not amended to include the Hams Travel site, we set out additional amendments, which we consider will assist in ensuring that the plan is both flexible, deliverable and will protect against non-delivery. These amendments will improve the soundness of the policy and bring the policy into line with the NPPF.

Given the over reliance on housing delivery in and around Paddock Wood, we consider that these amendments will assist in protecting the plan against non-delivery in a housing market slow down (a major risk with a strategy dependent on large sites and a single housing market), by enabling the development of a wider range of brownfield sites around Benenden.

We note that clause 2 of regulation 18 draft policy has been removed. This had stated:

'Additional housing may be delivered through the redevelopment of appropriate sites and other windfall development in accordance with Policy STR 1'.

We had previously recommended that this clause be extended to state:

*'Additional housing may be delivered through the redevelopment of appropriate sites and other suitable windfall developments **including brownfield sites outside of the Limits to Built Development**.'*

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing. Without such a clause, the policy is less flexible, weaker and ultimately **unsound**, since it does not comply with national planning policy which requires support for windfall

delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clause 2, with our previous suggested amendment, were reinstated, as set out above.

Likewise, we note that clause 3 of regulation 18 draft policy has been removed. This clause had stated:

'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape'

We had recommended that this clause should have been retained and amended to read:

*'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape. **The redevelopment of redundant brownfield sites will be considered positively. Particularly where proposals will make a positive contribution towards the objectives of managing the AONB and where they can be demonstrated to have visual improvements.***

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing and development within the AONB. Without such a clause, the policy is less flexible, weaker and ultimately unsound, since it does not comply with national planning policy which requires support for windfall delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clauses 2 and 3, with our suggested amendments, are reinstated. In addition, we note that clause 2 of the new policy (Policy STR/BE 1), as currently worded cross references to Policy STR 1. We have already provided comments with regard to STR 1 in section 2, and we would only support this cross referring to that policy if the policy is amended to support the development of brownfield sites outside of the Limits to Built Development, as already set out.

Summary

In response to policy PSTR/BE 1 (and policies AL/BE 1- AL/BE 4), we have submitted that we do not support the allocation of any of the sites proposed, since these are greenfield sites (some remote) and with significant constraints. We do not consider that these should have been allocated in advance of brownfield sites, such as the Hams Travel site, which offers opportunity for improvement to the AONB. As such, these allocations are inconsistent with the NPPF, which favours brownfield allocations (Paragraph 118 (c)). We particularly object to the loss of the allocation 'Land at Walkhurst Road' and the failure of the LPA to adequately replace this site with a new allocation, because this has led to an overall reduction in housing numbers allocated in Benenden.

Hams Coach Yard is largely brownfield, is surplus to requirements and is nearer to Benenden than the only other brownfield allocation at Benenden Hospital. Development of the Hams Travel site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which uses as much brownfield land as possible (Paragraph 118 (c)) and this approach has not been adopted in Benenden. As such, we strongly consider that the Hams Travel site should have been allocated in preference to greenfield sites and the more remote site of Benenden Hospital.

We also object to the removal of clauses 2 and 3 of policy STR/BE1 which should have been retained and improved by making clear that the development of redundant brownfield sites will be considered positively should a need arise.

We note that clause 2 of the new policy (Policy STR/BE 1) cross refers to Policy STR 1 and we only support this cross reference if policy STR 1 is also amended.

Without these amendments, we consider that the policy risks being found **unsound and inconsistent with national planning policy**.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Hams Travel has an excellent site to be considered locally and since there is a legally challenge in place on their site in Flimwell, any updates on that site may add to the strength of the case for the allocation of the Benenden site.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 1, AL/BE 2, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_1669, PSLP_1672, PSLP_1673, PSLP_1674 and PSLP_1675. Report attached as Supplementary Information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We object to policy **PSTR/BE 1** and suggest revisions and the decisions made regarding housing allocations. Benenden has received allocations for 87-95 (plus 23 which already have planning permission), which is decrease from the previously drafted allocated allowance of 119-129 new homes, due to the decision to drop one site (Land at Walkhurst Road) from the allocations. Land at Walkhurst Road was dropped from the allocations because it has already been delivered. Dropping this site from the allocations has led to a reduction in the Parish of Benenden and we consider that the allocation should have been replaced with an entirely new allocation, in order to maintain a good supply of housing in the Parish. Moreover, we object to the remaining allocations in the Parish.

We note that the remote site of Benenden Hospital at East End, a significant distance from Benenden, has received allocations for up to 22-25 new homes on the southern site and 22-25 homes on the northern site, which is in addition to the 23 dwellings which already have planning permission. This is around 75 new homes in total, and the site is poorly connected with the village. We object to this since nearer sites have been discounted on the basis of them being 'too remote', but the Benenden Hospital more remote site, yet it has been allocated.

Objections to policy PSTR/BE 1 and AL/BE 1, AL/BE 2, AL/BE 2 and AL/BE 4

Having reviewed the strategy for site allocation in Benenden Parish our main objection is a continued reliance on greenfield sites, when brownfield sites are available. We also object to the heavy reliance on one large site, which is extremely remote from the main village of Benenden (albeit we note that this has been split into two sites following previous representations).

The NPPF is clear that LPAs have a responsibility to make an effective use of land, prioritising brownfield land to make 'as much use as possible' of brownfield opportunities: *'Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land'* (paragraph 117).

The NPPF continues that LPAs should *'give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land'* (paragraph 118).

We have assessed each of the allocations in and around Benenden and set out our comments and objections below:

- **AL/BE 1 Land adjacent to New Pond Road – Objection.** This site is allocated for 18-20 dwellings, of which 40% should be affordable. This is a greenfield site including arboricultural, SSSI ecological interests and possible archaeological constraints. We consider it to be a less suitable site for development than Hams Travel's Coach Yard. Indeed, we question whether the rear part of the site with the most valuable trees and potential for archaeological interest is suitable for development at all. This should not be allocated in advance of brownfield opportunities, such as the Hams Travel site.

- **AL/BE 2 Feoffee Cottage and land, Walkhurst Road – Objection.** This site is allocated for 25 dwellings, of which 48% should be affordable. This is a greenfield site and lies adjacent to ancient woodland and a Listed Building. It therefore has a number of constraints and should not be allocated in advance of brownfield sites, lacking any such constraints. We therefore do not consider that this site should be allocated in advance of the Hams Travel's Coach Yard, which contains fewer constraints and is a brownfield opportunity.

- **AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units (in addition to the 23 new dwellings that have already been granted approval at this site), of which 30 percent shall be affordable housing. Combined with AL/BE4 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. We do not consider that the proposal for a *'an active travel link between the site and Benenden village'* will prove to be sustainable for a development of this scale and it is unlikely that an allocation of this size (even with the hospital population) would be sufficient to support the proposed retail outlet proposed.

- **AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units, of which 30 percent shall be affordable housing. Combined with AL/BE3 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. Moreover, since other brownfield sites are available in closer proximity to the settlement – such as the Hams Travel site, we do not consider it to be the most sustainable brownfield option available. It therefore should not be allocated in advance of brownfield sites, nearer to the settlement such as Hams Coach Yard.

Since the previous regulation 18 consultation, the original 'Policy AL/BE 1 – Land at Walkhurst Road' has been dropped as an allocation. This is because the site has already been developed. Whilst we support the Council in dropping this allocation (since it has been developed), we consider that the LPA have missed an opportunity to allocate a new site for the parish which could have reduced the risk of non-delivery and would have assisted in meeting local need. Rather than allocating a new site for development, the Local Plan has split the previous Benenden hospital site into two allocations. This is deceptive, as in reality, the Parish now has one less site for development. As a result, the Local Plan now effectively relies on just three sites (as site AL/BE3 and AL/BE4 were the same allocation in the previous Local Plan), exposing the village to a greater chance of non-delivery, and risking the housing need not being met. We consider that it would have been preferable to allocate an additional site, so as to reduce the reliance of a few large sites in the Parish for development.

We consider that a preferable approach would have been to allocate the Hams Coach Yard, since this is largely brownfield, is surplus to requirements and is **much nearer** to Benenden village than the only other brownfield allocation at Benenden Hospital. This site was put forward during the regulation 18 consultation and has been assessed by the LPA. We consider this assessment in the following chapter, and maintain that the site should have been allocated as the assessment is inconsistent with the approach taken on Benenden Hospital Site.

Development of the Hams Travel Site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which gives 'substantial weight' to the allocation of brownfield sites and which uses as much brownfield land as possible. We provide full details of this site's opportunities for development at section 4.

The Hams Travel Coach Yard could have provided this 5th housing allocation in the Benenden area, as set out in the following chapter, and offered a genuine replacement for the dropped 'Policy AL/BE 1 – Land at Walkhurst Road' site.

Whilst our preference would have been for the Council to include the Hams Travel Coach Yard within the allocations, we consider that our objection could be overcome, if the policy were amended to allow for brownfield development beyond the built development boundaries of Benenden. Unfortunately, amendments to the policy since the regulation 18 consultation have reduced the policy's flexibility, rather than increased the usefulness and flexibility of the policy. This risks the policy being found to be **unsound**.

See attached report for a full explanation of these reasons.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Amendments to general policy provided by policy PSTR/BE 1 (previously STR/BE1)

If 'the Strategy for Benenden parish' (policy PSTR/BE 1) and allocations are not amended to include the Hams Travel site, we set out additional amendments, which we consider will assist in ensuring that the plan is both flexible, deliverable and will protect against non-delivery. These amendments will improve the soundness of the policy and bring the policy into line with the NPPF.

Given the over reliance on housing delivery in and around Paddock Wood, we consider that these amendments will assist in protecting the plan against non-delivery in a housing market slow down (a major risk with a strategy dependent on large sites and a single housing market), by enabling the development of a wider range of brownfield sites around Benenden.

We note that clause 2 of regulation 18 draft policy has been removed. This had stated:

'Additional housing may be delivered through the redevelopment of appropriate sites and other windfall development in accordance with Policy STR 1'.

We had previously recommended that this clause be extended to state:

*'Additional housing may be delivered through the redevelopment of appropriate sites and other suitable windfall developments **including brownfield sites outside of the Limits to Built Development**.'*

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing. Without such a clause, the policy is less flexible, weaker and ultimately **unsound**, since it does not comply with national planning policy which requires support for windfall

delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clause 2, with our previous suggested amendment, were reinstated, as set out above.

Likewise, we note that clause 3 of regulation 18 draft policy has been removed. This clause had stated:

'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape'

We had recommended that this clause should have been retained and amended to read:

*'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape. **The redevelopment of redundant brownfield sites will be considered positively. Particularly where proposals will make a positive contribution towards the objectives of managing the AONB and where they can be demonstrated to have visual improvements.***

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing and development within the AONB. Without such a clause, the policy is less flexible, weaker and ultimately unsound, since it does not comply with national planning policy which requires support for windfall delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clauses 2 and 3, with our suggested amendments, are reinstated. In addition, we note that clause 2 of the new policy (Policy STR/BE 1), as currently worded cross references to Policy STR 1. We have already provided comments with regard to STR 1 in section 2, and we would only support this cross referring to that policy if the policy is amended to support the development of brownfield sites outside of the Limits to Built Development, as already set out.

Summary

In response to policy PSTR/BE 1 (and policies AL/BE 1- AL/BE 4), we have submitted that we do not support the allocation of any of the sites proposed, since these are greenfield sites (some remote) and with significant constraints. We do not consider that these should have been allocated in advance of brownfield sites, such as the Hams Travel site, which offers opportunity for improvement to the AONB. As such, these allocations are inconsistent with the NPPF, which favours brownfield allocations (Paragraph 118 (c)). We particularly object to the loss of the allocation 'Land at Walkhurst Road' and the failure of the LPA to adequately replace this site with a new allocation, because this has led to an overall reduction in housing numbers allocated in Benenden.

Hams Coach Yard is largely brownfield, is surplus to requirements and is nearer to Benenden than the only other brownfield allocation at Benenden Hospital. Development of the Hams Travel site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which uses as much brownfield land as possible (Paragraph 118 (c)) and this approach has not been adopted in Benenden. As such, we strongly consider that the Hams Travel site should have been allocated in preference to greenfield sites and the more remote site of Benenden Hospital.

We also object to the removal of clauses 2 and 3 of policy STR/BE1 which should have been retained and improved by making clear that the development of redundant brownfield sites will be considered positively should a need arise.

We note that clause 2 of the new policy (Policy STR/BE 1) cross refers to Policy STR 1 and we only support this cross reference if policy STR 1 is also amended.

Without these amendments, we consider that the policy risks being found **unsound and inconsistent with national planning policy**.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Hams Travel has an excellent site to be considered locally and since there is a legally challenge in place on their site in Flimwell, any updates on that site may add to the strength of the case for the allocation of the Benenden site.

We object to policy **PSTR/BE 1** and suggest revisions and the decisions made regarding housing allocations. Benenden has received allocations for 87-95 (plus 23 which already have planning permission), which is decrease from the previously drafted allocated allowance of 119-129 new homes, due to the decision to drop one site (Land at Walkhurst Road) from the allocations. Land at Walkhurst Road was dropped from the allocations because it has already been delivered. Dropping this site from the allocations has led to a reduction in the Parish of Benenden and we consider that the allocation should have been replaced with an entirely new allocation, in order to maintain a good supply of housing in the Parish. Moreover, we object to the remaining allocations in the Parish.

We note that the remote site of Benenden Hospital at East End, a significant distance from Benenden, has received allocations for up to 22-25 new homes on the southern site and 22-25 homes on the northern site, which is in addition to the 23 dwellings which already have planning permission. This is around 75 new homes in total, and the site is poorly connected with the village. We object to this since nearer sites have been discounted on the basis of them being 'too remote', but the Benenden Hospital more remote site, yet it has been allocated.

Objections to policy PSTR/BE 1 and AL/BE 1, AL/BE 2, AL/BE 2 and AL/BE 4

Having reviewed the strategy for site allocation in Benenden Parish our main objection is a continued reliance on greenfield sites, when brownfield sites are available. We also object to the heavy reliance on one large site, which is extremely remote from the main village of Benenden (albeit we note that this has been split into two sites following previous representations).

The NPPF is clear that LPAs have a responsibility to make an effective use of land, prioritising brownfield land to make 'as much use as possible' of brownfield opportunities: *'Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land'* (paragraph 117).

The NPPF continues that LPAs should *'give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land'* (paragraph 118).

We have assessed each of the allocations in and around Benenden and set out our comments and objections below:

• **AL/BE 1 Land adjacent to New Pond Road – Objection.** This site is allocated for 18-20 dwellings, of which 40% should be affordable. This is a greenfield site including arboricultural, SSSI ecological interests and possible archaeological constraints. We consider it to be a less suitable site for development than Hams Travel's Coach Yard. Indeed, we question whether the rear part of the site with the most valuable trees and potential for archaeological interest is suitable for development at all. This should not be allocated in advance of brownfield opportunities, such as the Hams Travel site.

• **AL/BE 2 Feoffee Cottage and land, Walkhurst Road – Objection.** This site is allocated for 25 dwellings, of which 48% should be affordable. This is a greenfield site and lies adjacent to ancient woodland and a Listed Building. It therefore has a number of constraints and should not be allocated in advance of brownfield sites, lacking any such constraints. We therefore do not consider that this site should be allocated in advance of the Hams Travel's Coach Yard, which contains fewer constraints and is a brownfield opportunity.

• **AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units (in addition to the 23 new dwellings that have already been granted approval at this site), of which 30 percent shall be affordable housing. Combined with AL/BE4 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. We do not consider that the proposal for a *'an active travel link between the site and Benenden village'* will prove to be sustainable for a development of this scale and it is unlikely that an allocation of this size (even with the hospital population) would be sufficient to support the proposed retail outlet proposed.

• **AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units, of which 30 percent shall be affordable housing. Combined with AL/BE3 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. Moreover, since other brownfield sites are available in closer proximity to the settlement – such as the Hams Travel site, we do not consider it to be the most sustainable brownfield option available. It therefore should not be allocated in advance of brownfield sites, nearer to the settlement such as Hams Coach Yard.

Since the previous regulation 18 consultation, the original 'Policy AL/BE 1 – Land at Walkhurst Road' has been dropped as an allocation. This is because the site has already been developed. Whilst we support the Council in dropping this allocation (since it has been developed), we consider that the LPA have missed an opportunity to allocate a new site for the parish which could have reduced the risk of non-delivery and would have assisted in meeting local need. Rather than allocating a new site for development, the Local Plan has split the previous Benenden hospital site into two allocations. This is deceptive, as in reality, the Parish now has one less site for development. As a result, the Local Plan now effectively relies on just three sites (as site AL/BE3 and AL/BE4 were the same allocation in the previous Local Plan), exposing the village to a greater chance of non-delivery, and risking the housing need not being met. We consider that it would have been preferable to allocate an additional site, so as to reduce the reliance of a few large sites in the Parish for development.

We consider that a preferable approach would have been to allocate the Hams Coach Yard, since this is largely brownfield, is surplus to requirements and is **much nearer** to Benenden village than the only other brownfield allocation at Benenden Hospital. This site was put forward during the regulation 18 consultation and has been assessed by the LPA. We consider this assessment in the following chapter, and maintain that the site should have been allocated as the assessment is inconsistent with the approach taken on Benenden Hospital Site.

Development of the Hams Travel Site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which gives 'substantial weight' to the allocation of brownfield sites and which uses as much brownfield land as possible. We provide full details of this site's opportunities for development at section 4.

The Hams Travel Coach Yard could have provided this 5th housing allocation in the Benenden area, as set out in the following chapter, and offered a genuine replacement for the dropped 'Policy AL/BE 1 – Land at Walkhurst Road' site.

Whilst our preference would have been for the Council to include the Hams Travel Coach Yard within the allocations, we consider that our objection could be overcome, if the policy were amended to allow for brownfield development beyond the built development boundaries of Benenden. Unfortunately, amendments to the policy since the regulation 18 consultation have reduced the policy's flexibility, rather than increased the usefulness and flexibility of the policy. This risks the policy being found to be **unsound**.

See attached report for a full explanation of these reasons.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Amendments to general policy provided by policy PSTR/BE 1 (previously STR/BE1)

If 'the Strategy for Benenden parish' (policy PSTR/BE 1) and allocations are not amended to include the Hams Travel site, we set out additional amendments, which we consider will assist in ensuring that the plan is both flexible, deliverable and will protect against non-delivery. These amendments will improve the soundness of the policy and bring the policy into line with the NPPF.

Given the over reliance on housing delivery in and around Paddock Wood, we consider that these amendments will assist in protecting the plan against non-delivery in a housing market slow down (a major risk with a strategy dependent on large sites and a single housing market), by enabling the development of a wider range of brownfield sites around Benenden.

We note that clause 2 of regulation 18 draft policy has been removed. This had stated:

'Additional housing may be delivered through the redevelopment of appropriate sites and other windfall development in accordance with Policy STR 1'.

We had previously recommended that this clause be extended to state:

*'Additional housing may be delivered through the redevelopment of appropriate sites and other suitable windfall developments **including brownfield sites outside of the Limits to Built Development**.'*

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing. Without such a clause, the policy is less flexible, weaker and ultimately **unsound**, since it does not comply with national planning policy which requires support for windfall

delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clause 2, with our previous suggested amendment, were reinstated, as set out above.

Likewise, we note that clause 3 of regulation 18 draft policy has been removed. This clause had stated:

'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape'

We had recommended that this clause should have been retained and amended to read:

*'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape. **The redevelopment of redundant brownfield sites will be considered positively. Particularly where proposals will make a positive contribution towards the objectives of managing the AONB and where they can be demonstrated to have visual improvements.***

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing and development within the AONB. Without such a clause, the policy is less flexible, weaker and ultimately unsound, since it does not comply with national planning policy which requires support for windfall delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clauses 2 and 3, with our suggested amendments, are reinstated. In addition, we note that clause 2 of the new policy (Policy STR/BE 1), as currently worded cross references to Policy STR 1. We have already provided comments with regard to STR 1 in section 2, and we would only support this cross referring to that policy if the policy is amended to support the development of brownfield sites outside of the Limits to Built Development, as already set out.

Summary

In response to policy PSTR/BE 1 (and policies AL/BE 1- AL/BE 4), we have submitted that we do not support the allocation of any of the sites proposed, since these are greenfield sites (some remote) and with significant constraints. We do not consider that these should have been allocated in advance of brownfield sites, such as the Hams Travel site, which offers opportunity for improvement to the AONB. As such, these allocations are inconsistent with the NPPF, which favours brownfield allocations (Paragraph 118 (c)). We particularly object to the loss of the allocation 'Land at Walkhurst Road' and the failure of the LPA to adequately replace this site with a new allocation, because this has led to an overall reduction in housing numbers allocated in Benenden.

Hams Coach Yard is largely brownfield, is surplus to requirements and is nearer to Benenden than the only other brownfield allocation at Benenden Hospital. Development of the Hams Travel site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which uses as much brownfield land as possible (Paragraph 118 (c)) and this approach has not been adopted in Benenden. As such, we strongly consider that the Hams Travel site should have been allocated in preference to greenfield sites and the more remote site of Benenden Hospital.

We also object to the removal of clauses 2 and 3 of policy STR/BE1 which should have been retained and improved by making clear that the development of redundant brownfield sites will be considered positively should a need arise.

We note that clause 2 of the new policy (Policy STR/BE 1) cross refers to Policy STR 1 and we only support this cross reference if policy STR 1 is also amended.

Without these amendments, we consider that the policy risks being found **unsound and inconsistent with national planning policy**.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Hams Travel has an excellent site to be considered locally and since there is a legally challenge in place on their site in Flimwell, any updates on that site may add to the strength of the case for the allocation of the Benenden site.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 2	
Agent's Name and Organisation (if applicable)	Evolution Town Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 1, AL/BE 2, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_1669, PSLP_1672, PSLP_1673, PSLP_1674 and PSLP_1675. Report attached as Supplementary Information]

Question 4

Do you consider that the Local Plan:

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We object to policy **PSTR/BE 1** and suggest revisions and the decisions made regarding housing allocations. Benenden has received allocations for 87-95 (plus 23 which already have planning permission), which is decrease from the previously drafted allocated allowance of 119-129 new homes, due to the decision to drop one site (Land at Walkhurst Road) from the allocations. Land at Walkhurst Road was dropped from the allocations because it has already been delivered. Dropping this site from the allocations has led to a reduction in the Parish of Benenden and we consider that the allocation should have been replaced with an entirely new allocation, in order to maintain a good supply of housing in the Parish. Moreover, we object to the remaining allocations in the Parish.

We note that the remote site of Benenden Hospital at East End, a significant distance from Benenden, has received allocations for up to 22-25 new homes on the southern site and 22-25 homes on the northern site, which is in addition to the 23 dwellings which already have planning permission. This is around 75 new homes in total, and the site is poorly connected with the village. We object to this since nearer sites have been discounted on the basis of them being 'too remote', but the Benenden Hospital more remote site, yet it has been allocated.

Objections to policy PSTR/BE 1 and AL/BE 1, AL/BE 2, AL/BE 2 and AL/BE 4

Having reviewed the strategy for site allocation in Benenden Parish our main objection is a continued reliance on greenfield sites, when brownfield sites are available. We also object to the heavy reliance on one large site, which is extremely remote from the main village of Benenden (albeit we note that this has been split into two sites following previous representations).

The NPPF is clear that LPAs have a responsibility to make an effective use of land, prioritising brownfield land to make 'as much use as possible' of brownfield opportunities: *'Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land'* (paragraph 117).

The NPPF continues that LPAs should *'give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land'* (paragraph 118).

We have assessed each of the allocations in and around Benenden and set out our comments and objections below:

• **AL/BE 1 Land adjacent to New Pond Road – Objection.** This site is allocated for 18-20 dwellings, of which 40% should be affordable. This is a greenfield site including arboricultural, SSSI ecological interests and possible archaeological constraints. We consider it to be a less suitable site for development than Hams Travel's Coach Yard. Indeed, we question whether the rear part of the site with the most valuable trees and potential for archaeological interest is suitable for development at all. This should not be allocated in advance of brownfield opportunities, such as the Hams Travel site.

• **AL/BE 2 Feoffee Cottage and land, Walkhurst Road – Objection.** This site is allocated for 25 dwellings, of which 48% should be affordable. This is a greenfield site and lies adjacent to ancient woodland and a Listed Building. It therefore has a number of constraints and should not be allocated in advance of brownfield sites, lacking any such constraints. We therefore do not consider that this site should be allocated in advance of the Hams Travel's Coach Yard, which contains fewer constraints and is a brownfield opportunity.

• **AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units (in addition to the 23 new dwellings that have already been granted approval at this site), of which 30 percent shall be affordable housing. Combined with AL/BE4 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. We do not consider that the proposal for a *'an active travel link between the site and Benenden village'* will prove to be sustainable for a development of this scale and it is unlikely that an allocation of this size (even with the hospital population) would be sufficient to support the proposed retail outlet proposed.

• **AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units, of which 30 percent shall be affordable housing. Combined with AL/BE3 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. Moreover, since other brownfield sites are available in closer proximity to the settlement – such as the Hams Travel site, we do not consider it to be the most sustainable brownfield option available. It therefore should not be allocated in advance of brownfield sites, nearer to the settlement such as Hams Coach Yard.

Since the previous regulation 18 consultation, the original 'Policy AL/BE 1 – Land at Walkhurst Road' has been dropped as an allocation. This is because the site has already been developed. Whilst we support the Council in dropping this allocation (since it has been developed), we consider that the LPA have missed an opportunity to allocate a new site for the parish which could have reduced the risk of non-delivery and would have assisted in meeting local need. Rather than allocating a new site for development, the Local Plan has split the previous Benenden hospital site into two allocations. This is deceptive, as in reality, the Parish now has one less site for development. As a result, the Local Plan now effectively relies on just three sites (as site AL/BE3 and AL/BE4 were the same allocation in the previous Local Plan), exposing the village to a greater chance of non-delivery, and risking the housing need not being met. We consider that it would have been preferable to allocate an additional site, so as to reduce the reliance of a few large sites in the Parish for development.

We consider that a preferable approach would have been to allocate the Hams Coach Yard, since this is largely brownfield, is surplus to requirements and is **much nearer** to Benenden village than the only other brownfield allocation at Benenden Hospital. This site was put forward during the regulation 18 consultation and has been assessed by the LPA. We consider this assessment in the following chapter, and maintain that the site should have been allocated as the assessment is inconsistent with the approach taken on Benenden Hospital Site.

Development of the Hams Travel Site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which gives 'substantial weight' to the allocation of brownfield sites and which uses as much brownfield land as possible. We provide full details of this site's opportunities for development at section 4.

The Hams Travel Coach Yard could have provided this 5th housing allocation in the Benenden area, as set out in the following chapter, and offered a genuine replacement for the dropped 'Policy AL/BE 1 – Land at Walkhurst Road' site.

Whilst our preference would have been for the Council to include the Hams Travel Coach Yard within the allocations, we consider that our objection could be overcome, if the policy were amended to allow for brownfield development beyond the built development boundaries of Benenden. Unfortunately, amendments to the policy since the regulation 18 consultation have reduced the policy's flexibility, rather than increased the usefulness and flexibility of the policy. This risks the policy being found to be **unsound**.

See attached report for a full explanation of these reasons.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Amendments to general policy provided by policy PSTR/BE 1 (previously STR/BE1)

If 'the Strategy for Benenden parish' (policy PSTR/BE 1) and allocations are not amended to include the Hams Travel site, we set out additional amendments, which we consider will assist in ensuring that the plan is both flexible, deliverable and will protect against non-delivery. These amendments will improve the soundness of the policy and bring the policy into line with the NPPF.

Given the over reliance on housing delivery in and around Paddock Wood, we consider that these amendments will assist in protecting the plan against non-delivery in a housing market slow down (a major risk with a strategy dependent on large sites and a single housing market), by enabling the development of a wider range of brownfield sites around Benenden.

We note that clause 2 of regulation 18 draft policy has been removed. This had stated:

'Additional housing may be delivered through the redevelopment of appropriate sites and other windfall development in accordance with Policy STR 1'.

We had previously recommended that this clause be extended to state:

*'Additional housing may be delivered through the redevelopment of appropriate sites and other suitable windfall developments **including brownfield sites outside of the Limits to Built Development**.'*

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing. Without such a clause, the policy is less flexible, weaker and ultimately **unsound**, since it does not comply with national planning policy which requires support for windfall

delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clause 2, with our previous suggested amendment, were reinstated, as set out above.

Likewise, we note that clause 3 of regulation 18 draft policy has been removed. This clause had stated:

'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape'

We had recommended that this clause should have been retained and amended to read:

*'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape. **The redevelopment of redundant brownfield sites will be considered positively. Particularly where proposals will make a positive contribution towards the objectives of managing the AONB and where they can be demonstrated to have visual improvements.***

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing and development within the AONB. Without such a clause, the policy is less flexible, weaker and ultimately unsound, since it does not comply with national planning policy which requires support for windfall delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clauses 2 and 3, with our suggested amendments, are reinstated. In addition, we note that clause 2 of the new policy (Policy STR/BE 1), as currently worded cross references to Policy STR 1. We have already provided comments with regard to STR 1 in section 2, and we would only support this cross referring to that policy if the policy is amended to support the development of brownfield sites outside of the Limits to Built Development, as already set out.

Summary

In response to policy PSTR/BE 1 (and policies AL/BE 1- AL/BE 4), we have submitted that we do not support the allocation of any of the sites proposed, since these are greenfield sites (some remote) and with significant constraints. We do not consider that these should have been allocated in advance of brownfield sites, such as the Hams Travel site, which offers opportunity for improvement to the AONB. As such, these allocations are inconsistent with the NPPF, which favours brownfield allocations (Paragraph 118 (c)). We particularly object to the loss of the allocation 'Land at Walkhurst Road' and the failure of the LPA to adequately replace this site with a new allocation, because this has led to an overall reduction in housing numbers allocated in Benenden.

Hams Coach Yard is largely brownfield, is surplus to requirements and is nearer to Benenden than the only other brownfield allocation at Benenden Hospital. Development of the Hams Travel site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which uses as much brownfield land as possible (Paragraph 118 (c)) and this approach has not been adopted in Benenden. As such, we strongly consider that the Hams Travel site should have been allocated in preference to greenfield sites and the more remote site of Benenden Hospital.

We also object to the removal of clauses 2 and 3 of policy STR/BE1 which should have been retained and improved by making clear that the development of redundant brownfield sites will be considered positively should a need arise.

We note that clause 2 of the new policy (Policy STR/BE 1) cross refers to Policy STR 1 and we only support this cross reference if policy STR 1 is also amended.

Without these amendments, we consider that the policy risks being found **unsound and inconsistent with national planning policy**.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Hams Travel has an excellent site to be considered locally and since there is a legally challenge in place on their site in Flimwell, any updates on that site may add to the strength of the case for the allocation of the Benenden site.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 1, AL/BE 2, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_1669, PSLP_1672, PSLP_1673, PSLP_1674 and PSLP_1675. Report attached as Supplementary Information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We object to policy **PSTR/BE 1** and suggest revisions and the decisions made regarding housing allocations. Benenden has received allocations for 87-95 (plus 23 which already have planning permission), which is decrease from the previously drafted allocated allowance of 119-129 new homes, due to the decision to drop one site (Land at Walkhurst Road) from the allocations. Land at Walkhurst Road was dropped from the allocations because it has already been delivered. Dropping this site from the allocations has led to a reduction in the Parish of Benenden and we consider that the allocation should have been replaced with an entirely new allocation, in order to maintain a good supply of housing in the Parish. Moreover, we object to the remaining allocations in the Parish.

We note that the remote site of Benenden Hospital at East End, a significant distance from Benenden, has received allocations for up to 22-25 new homes on the southern site and 22-25 homes on the northern site, which is in addition to the 23 dwellings which already have planning permission. This is around 75 new homes in total, and the site is poorly connected with the village. We object to this since nearer sites have been discounted on the basis of them being 'too remote', but the Benenden Hospital more remote site, yet it has been allocated.

Objections to policy PSTR/BE 1 and AL/BE 1, AL/BE 2, AL/BE 2 and AL/BE 4

Having reviewed the strategy for site allocation in Benenden Parish our main objection is a continued reliance on greenfield sites, when brownfield sites are available. We also object to the heavy reliance on one large site, which is extremely remote from the main village of Benenden (albeit we note that this has been split into two sites following previous representations).

The NPPF is clear that LPAs have a responsibility to make an effective use of land, prioritising brownfield land to make 'as much use as possible' of brownfield opportunities: *'Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land'* (paragraph 117).

The NPPF continues that LPAs should *'give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land'* (paragraph 118).

We have assessed each of the allocations in and around Benenden and set out our comments and objections below:

• **AL/BE 1 Land adjacent to New Pond Road – Objection.** This site is allocated for 18-20 dwellings, of which 40% should be affordable. This is a greenfield site including arboricultural, SSSI ecological interests and possible archaeological constraints. We consider it to be a less suitable site for development than Hams Travel's Coach Yard. Indeed, we question whether the rear part of the site with the most valuable trees and potential for archaeological interest is suitable for development at all. This should not be allocated in advance of brownfield opportunities, such as the Hams Travel site.

• **AL/BE 2 Feoffee Cottage and land, Walkhurst Road – Objection.** This site is allocated for 25 dwellings, of which 48% should be affordable. This is a greenfield site and lies adjacent to ancient woodland and a Listed Building. It therefore has a number of constraints and should not be allocated in advance of brownfield sites, lacking any such constraints. We therefore do not consider that this site should be allocated in advance of the Hams Travel's Coach Yard, which contains fewer constraints and is a brownfield opportunity.

• **AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units (in addition to the 23 new dwellings that have already been granted approval at this site), of which 30 percent shall be affordable housing. Combined with AL/BE4 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. We do not consider that the proposal for a *'an active travel link between the site and Benenden village'* will prove to be sustainable for a development of this scale and it is unlikely that an allocation of this size (even with the hospital population) would be sufficient to support the proposed retail outlet proposed.

• **AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End – Objection.** This site is allocated for residential development providing 22-25 residential units, of which 30 percent shall be affordable housing. Combined with AL/BE3 this allocation is the largest allocation listed as part of Benenden and yet the site is considerably remote from the settlement of Benenden and is not really part of Benenden at all. Moreover, since other brownfield sites are available in closer proximity to the settlement – such as the Hams Travel site, we do not consider it to be the most sustainable brownfield option available. It therefore should not be allocated in advance of brownfield sites, nearer to the settlement such as Hams Coach Yard.

Since the previous regulation 18 consultation, the original 'Policy AL/BE 1 – Land at Walkhurst Road' has been dropped as an allocation. This is because the site has already been developed. Whilst we support the Council in dropping this allocation (since it has been developed), we consider that the LPA have missed an opportunity to allocate a new site for the parish which could have reduced the risk of non-delivery and would have assisted in meeting local need. Rather than allocating a new site for development, the Local Plan has split the previous Benenden hospital site into two allocations. This is deceptive, as in reality, the Parish now has one less site for development. As a result, the Local Plan now effectively relies on just three sites (as site AL/BE3 and AL/BE4 were the same allocation in the previous Local Plan), exposing the village to a greater chance of non-delivery, and risking the housing need not being met. We consider that it would have been preferable to allocate an additional site, so as to reduce the reliance of a few large sites in the Parish for development.

We consider that a preferable approach would have been to allocate the Hams Coach Yard, since this is largely brownfield, is surplus to requirements and is **much nearer** to Benenden village than the only other brownfield allocation at Benenden Hospital. This site was put forward during the regulation 18 consultation and has been assessed by the LPA. We consider this assessment in the following chapter, and maintain that the site should have been allocated as the assessment is inconsistent with the approach taken on Benenden Hospital Site.

Development of the Hams Travel Site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which gives 'substantial weight' to the allocation of brownfield sites and which uses as much brownfield land as possible. We provide full details of this site's opportunities for development at section 4.

The Hams Travel Coach Yard could have provided this 5th housing allocation in the Benenden area, as set out in the following chapter, and offered a genuine replacement for the dropped 'Policy AL/BE 1 – Land at Walkhurst Road' site.

Whilst our preference would have been for the Council to include the Hams Travel Coach Yard within the allocations, we consider that our objection could be overcome, if the policy were amended to allow for brownfield development beyond the built development boundaries of Benenden. Unfortunately, amendments to the policy since the regulation 18 consultation have reduced the policy's flexibility, rather than increased the usefulness and flexibility of the policy. This risks the policy being found to be **unsound**.

See attached report for a full explanation of these reasons.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Amendments to general policy provided by policy PSTR/BE 1 (previously STR/BE1)

If 'the Strategy for Benenden parish' (policy PSTR/BE 1) and allocations are not amended to include the Hams Travel site, we set out additional amendments, which we consider will assist in ensuring that the plan is both flexible, deliverable and will protect against non-delivery. These amendments will improve the soundness of the policy and bring the policy into line with the NPPF.

Given the over reliance on housing delivery in and around Paddock Wood, we consider that these amendments will assist in protecting the plan against non-delivery in a housing market slow down (a major risk with a strategy dependent on large sites and a single housing market), by enabling the development of a wider range of brownfield sites around Benenden.

We note that clause 2 of regulation 18 draft policy has been removed. This had stated:

'Additional housing may be delivered through the redevelopment of appropriate sites and other windfall development in accordance with Policy STR 1'.

We had previously recommended that this clause be extended to state:

*'Additional housing may be delivered through the redevelopment of appropriate sites and other suitable windfall developments **including brownfield sites outside of the Limits to Built Development**.'*

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing. Without such a clause, the policy is less flexible, weaker and ultimately **unsound**, since it does not comply with national planning policy which requires support for windfall

delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clause 2, with our previous suggested amendment, were reinstated, as set out above.

Likewise, we note that clause 3 of regulation 18 draft policy has been removed. This clause had stated:

'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape'

We had recommended that this clause should have been retained and amended to read:

*'Where a site is within the AONB, it should be demonstrated that the proposal will make a positive contribution towards achieving the objectives of the most recent AONB Management Plan and show how relevant guidance from the AONB Joint Advisory Committee has been considered to meet the high standards required of the other policies in this Plan for the High Weald AONB landscape. **The redevelopment of redundant brownfield sites will be considered positively. Particularly where proposals will make a positive contribution towards the objectives of managing the AONB and where they can be demonstrated to have visual improvements.***

We object to the removal of this clause, as the policy should provide a basis from which to assess proposals for additional housing and development within the AONB. Without such a clause, the policy is less flexible, weaker and ultimately unsound, since it does not comply with national planning policy which requires support for windfall delivery (paragraph 68 (c)). We consider that our objection to this policy could be overcome if clauses 2 and 3, with our suggested amendments, are reinstated. In addition, we note that clause 2 of the new policy (Policy STR/BE 1), as currently worded cross references to Policy STR 1. We have already provided comments with regard to STR 1 in section 2, and we would only support this cross referring to that policy if the policy is amended to support the development of brownfield sites outside of the Limits to Built Development, as already set out.

Summary

In response to policy PSTR/BE 1 (and policies AL/BE 1- AL/BE 4), we have submitted that we do not support the allocation of any of the sites proposed, since these are greenfield sites (some remote) and with significant constraints. We do not consider that these should have been allocated in advance of brownfield sites, such as the Hams Travel site, which offers opportunity for improvement to the AONB. As such, these allocations are inconsistent with the NPPF, which favours brownfield allocations (Paragraph 118 (c)). We particularly object to the loss of the allocation 'Land at Walkhurst Road' and the failure of the LPA to adequately replace this site with a new allocation, because this has led to an overall reduction in housing numbers allocated in Benenden.

Hams Coach Yard is largely brownfield, is surplus to requirements and is nearer to Benenden than the only other brownfield allocation at Benenden Hospital. Development of the Hams Travel site also offers opportunities for visual improvements of the AONB. NPPF supports an approach which uses as much brownfield land as possible (Paragraph 118 (c)) and this approach has not been adopted in Benenden. As such, we strongly consider that the Hams Travel site should have been allocated in preference to greenfield sites and the more remote site of Benenden Hospital.

We also object to the removal of clauses 2 and 3 of policy STR/BE1 which should have been retained and improved by making clear that the development of redundant brownfield sites will be considered positively should a need arise.

We note that clause 2 of the new policy (Policy STR/BE 1) cross refers to Policy STR 1 and we only support this cross reference if policy STR 1 is also amended.

Without these amendments, we consider that the policy risks being found **unsound and inconsistent with national planning policy**.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Hams Travel has an excellent site to be considered locally and since there is a legally challenge in place on their site in Flimwell, any updates on that site may add to the strength of the case for the allocation of the Benenden site.

PSTR/BM1	
PSTR/HOI	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy PSTR/ BM1 Brenchley and Matfield Overview

5.479 Not enough weight is given to the Parish being within the High Weald AONB. Although it states a little more than 75% is in the AONB it is not highlighted as being an extremely important consideration for any planning application or proposed development. It should be stressed much more strongly as a major constraint. It should be worded "more than 75% is within the AONB"

PSTR/HOI Strategy for Horsmonden

Land w. of Fernandez Drive and South of Brenchley

5.482 This is an undeveloped site in the countryside. It is grassed fields and there are no buildings on the site.

5.484 It is IMMEDIATELY adjacent to The High Weald AONB boundary and is also next to Sprivers - an historic park and garden which is open to the public (not closed as stated)

5.591 It is completely wrong to propose to develop this site with 80-100 houses and a new village hall.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To press the case that Brenchley and Matfield parish are more than 75% AONB and development is generally undesirable and inappropriate.

I am the owner of The Wagon Lodge, Postern Lane, Tonbridge TN11 0QT. My house, which previously belonged to my mother from 1995 is currently rented out.

I know from experience how marginal the position is as to whether mine and other houses in The Postern Park hamlet of houses are flooded. Water can come from the Medway or more directly from the flooded excavated gravel pits to the North of the Postern Park houses. In times of heavy rain the water from the gravel pits can back up and overwhelm the drainage of our sewage systems. It is really imperative then in my mind that the landscape all around us is maintained as countryside and fields to maximise drainage in the area. By contrast a large area of hard surfacing such as would happen should the Tudeley village development be given consent, could significantly increase the risk of our houses being flooded.

Beyond this, the proposed village would multiply by many times the number of people living in Tudeley. This would not be an organic growth of an attractive friendly village surrounded by green fields in an area of Green belt and great beauty. The development proposed would destroy the nature of the existing village forever and obviate the reasons why current residents moved here.

My feeling then is that the proposed development would increase the risk of flood to mine and my neighbours' houses; also it is insensitive to the nature of our village as it currently is. The proposal could not be described as an organic and natural development of Tudeley

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am a retired Australian civil engineer now residing in Tonbridge. I have viewed with a professional interest this proposal for the TBBC Planning Scheme with a particular interest in the locality adjoining where I live.

I am concerned that Council has elected to ignore in the main, its own Principles and Policies as well as National Policies, in an attempt to achieve an outcome required by the National Government. These policies referenced in my submission attached.

I have also been discussing the draft plan with local people who will be more directly impacted than myself, although the increase in traffic density that Tonbridge will inherit will impact on me personally. I am disturbed that council has failed to address the legitimate concerns of these citizens.

I am therefore of the opinion that the Local Plan is not sound and Council has not complied with its Duty to Cooperate.

I am particularly concerned that Council has ignored the National Policy with regard to preserving the Green Belt. In light of the current international momentum towards responding to climate change, I consider Council's attitude towards the green belt in this plan to be not in the National Interest.

Comprising on the Green Belt policy sets a dangerous precedent for future decisions. This is clearly not in the interests of the Local Community and National Policy, and must be avoided at all costs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modifications to the plan should include.

- 1 Preserving the Green Belt to stay consistent with National Policy.
- 2 Decreasing the proposed housing density to a level that will not impact the local amenity so dramatically.
- 3 Decreasing the population density will allow Engineers more freedom to manage stormwater run off without the risk of flood damage to current or future residents.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I understand that TWBC has to update its planning scheme and needs to identify potential areas for sustainable housing development.
 In this particular case I am of the opinion that Council is grasping at any solution to resolve the issue. By this I mean it is prepared to surrender all its previously set values on the Green Belt, Stormwater Flooding, and Amenity in order to achieve an outcome - any outcome.
 The proposal clearly fits into the "overdeveloped" basket and should be reconsidered.
 It is conceivable that a lesser density development could fit well in this area and this aspect should be encouraged, with the cooperation of the Local Community.

[TWBC: the following comment received by email on 20 May 2021]:

I wish to state my strong objections to the completely ridiculous ideas laid out in your plans for Paddock Wood. Whilst urging people in roadside banners to "shop local" you are proposing a high street with no traffic allowed to pass through it and to shut the bridge which is the main route into Paddock Wood for anyone living that side or in surrounding villages.

By doing so, people will simply get in their cars and go elsewhere which will destroy the village and the lovely independent shops we have here as without allowing vehicle access, people will not shop local! You also state only buses will be allowed to go over the bridge, what about emergency vehicles? The bus service is so dire here, it's beyond expensive and stops ridiculously early so is really not feasible to expect people not to drive!!

Please see some sense, we have numerous amazing country lanes for people to cycle in, doing this stupid and crazy plan will cause people to actually travel further in their cars, as they will just avoid the area, thus increasing pollution further.

A petition has been started against your ridiculous plan on facebook and within a few hours has amassed nearly 200 signatures, this will continue to grow and you need to take people living in the village opinions into account, not just focus on funding!!

[TWBC: the following representation received by email on 24 May 2021]:

The plan to close the High Street in Paddock Wood and the railway bridge to all vehicles except buses has not been thought through at all. It is a completely ridiculous suggestion quite frankly. Given that the reason, according to your strategy for housing development paragraph 4.4, is that Paddock Wood has been chosen for over 3500 additional houses because of it's "main road links", you are now proposing to close one of these off completely!

Under your proposed scheme anyone living the other side of Paddock Wood will no longer be able to enter via the railway bridge into the town but will instead be sent on a good couple of miles detour and end up down Badsell Road (which will already be suffering from clogged up traffic due to all the new housing being put in there) This is going to cause traffic chaos with cars being backed up to the Colts Hill roundabout and surely the whole point of this "Active walking/cycling plan" is to reduce pollution, here you are just creating it by having people travel further to get to where they want to go and engines idling in built up traffic as there will be only one route into and out of Paddock Wood.

The closure of Paddock Wood High Street to traffic will be the death of all of the local independent shops we have and where the council have put signs up around the town encouraging everyone to "shop local" it is somewhat of a farce when you are now suggesting the only way to visit these shops is to walk. There are numerous elderly people who can't walk that far to collect their prescriptions, pick up a paper, visit the butcher or hardware store and even I as an able person, if I cannot shop and take the stuff easily back to my car to take home, will just travel elsewhere, again defeating the object as more miles and more pollution.

To suggest people travel by bus when there is only one bus an hour from Paddock Wood to Tonbridge and it stops at 18.05 is beyond ridiculous. Added to this is the sheer cost of public transport. A bus journey is nearly £4, do you seriously expect a family of 4 to forgoe their car at at cost of £2 for them all to travel to Tonbridge, to catch the once hourly bus and pay £16 for the privilege??

We have already lost a florist, Chinese, Indian takeaway and a hairdresser on the High Street to make way for yet more housing, we will lose all our shops if people cannot easily visit them and park nearby, maybe this is part of your plan so you can just turn the whole of Paddock Wood into a concrete housing jungle but I feel it is very sad for the village.

It is bad enough that we are having to take all these extra houses without any infrastructure in place to deal with it, that we are constantly having to put up with roadworks, traffic lights and utility problems whilst the workmen put in what is required, without then penalising us further by shutting the main routes into and out of Paddock Wood.

There are numerous country lanes available for cyclists and walkers and seen as they do not contribute towards the roads in terms of road tax, I do not see why their needs are more important. In an ideal world everyone would walk everywhere but we all lead busy lives, trying to get to work, nip to the shops etc and therefore cars are sadly required.

Please see some sense in your unfeasible and ill thought out plans as all these will do is close our lovely high street shops and cause traffic build up and pollution which is definitely not what the aim of this funding was!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

HSOF comments re Turnden (AL/CRS3) for Pre-submission Local Plan (PSLP)

Hartley: Save Our Fields ("HSOF") is a group of local residents working to ensure that people are informed of major planning applications and what decisions are being made that will impact Hartley and Cranbrook

There is strong local opposition to any development on this sensitive and historic proposed allocation AL/CRS3 and many reasons why this site should never be developed. The main issues remain:

AONBAL/CRS3 would constitute a major development in the AONB, despite there being weighty national and local protections for AONBs permitting major development only in exceptional circumstances. These exceptional circumstances are not evidenced in the Pre-submission Local Plan (PSLP). It is stated in the PSLP, however, as per NPPF Paragraph 172, that the scale and extent of development in AONBs should be '*limited*'.

- Turnden Phase 2 (165 dwellings) and phase 1 (36 dwellings) along with the adjacent Brick Kiln/Corn Hall site (AL/CRS 1/2) will generate over 400 dwellings in total. This will have a considerable impact on the setting of Cranbrook, its conservation area, the High Weald AONB, the Crane Valley and the historic, rural landscape. By no stretch of the imagination can this be said to be 'limited'. Why are TWBC allowing allocation of AL/CRS3 to go ahead knowing that it will irrevocably damage the AONB landscape and its setting?

The PSLP describes the High Weald AONB as a '*small-scale landscape, having an absence of large-scale urban extension*' with '*large tracts of land in particular making important contributions to the landscape and scenic beauty of the AONB*'.

- If allocated, development on AL/CRS3 will demolish acres of these 'large tracts' of AONB land destroying historic settlement patterns in its wake and causing untold damage to biodiversity. This allocation will categorically not 'conserve and enhance' the landscape and scenic beauty in the High Weald AONB. According to numerous government statements, AONB should have the highest status of protection and be preserved for future generations? Why is this not happening?

Much smaller applications (e.g. 31 homes in Sissinghurst **19/03359/OUT** and the recent Gate Farm appeal) have been refused by TWBC because development would '*fail to respect the existing settlement pattern, result in a harmful level of encroachment into the countryside and cause harm to the setting of the HW AONB*'.

- This allocation is more than 6 times bigger so why do the same arguments not apply?

SustainabilityAL/CRS3 fails on all 3 strands of sustainable development:

Economy

- Urbanisation of the landscape, 165 dwellings and 342 parking spaces would result in the destruction of more than 60 acres of grade 3 agricultural land, thus negatively impacting on agriculture which is the actual local economy of this Parish.
- The loss of the rural character of this ancient landscape and its relationship to the conservation area of Cranbrook town with the added aggravation of a congested road network leading to the parish will adversely impact the second main revenue for the town: tourism.
-

TWBC Sustainability Appraisal states that '*The relationship between the balance of the economic, social and environmental priorities is a fundamental theme running through the Sustainability Appraisal.*'

o It would appear, however, that in the case of AL/CRS3, there is no balance. There is very little economic benefit in the allocation of the site apart from temporary employment generated during the build.

Social

• TWBC Sustainability Appraisal states '6.540 *Significant new development will be focused on those locations in the borough which are sustainable and/or will be of such a scale that they provide access to employment, shopping, leisure, education and other activities, and a choice of transport modes. An integrated and comprehensive approach to transport provision has been developed through discussion with highways authorities and other transport providers, which offers choice and prioritises active travel and then public transport, as an alternative means of transport to the private car, particularly for single occupancy and short journeys.*'

o The proposed allocation of AL/CRS3 is a car centric development as employment opportunities lie predominantly outside the town, requiring access to Staplehurst or other railway stations by car or by car journeys to the areas of the Borough where employment is targeted such as North Farm, or to major towns out of the Borough such as Maidstone or Tunbridge Wells. o The distance and location of local facilities necessitates the use of private cars to access them. o What is the social benefit of building an edge of town major development?

Environmental

• AL/CRS3 scores negatively on many aspects of TWBC's own Sustainability Appraisal: e.g. heritage, landscape, air quality, biodiversity etc. • AL/CRS3 and AL/CRS1 and 2 will have a devastating impact and generate severe environmental damage to the Parish. • Historic flooding at St David's Bridge and the cumulative effects of the impact of congestion and air quality do not appear to have been assessed or taken into account. • Detrimental damage to ancient woodland is foreseen due to insufficient buffer as advised by Kent Woodland Trust. • There is absolutely no environmental benefit for allocation of this site.

Transport

• Should the allocation of AL/CRS3 proceed, there will be 6 points of access within 200m on to the A229, serving over 400 houses and the High Street. The A229 is already a very busy and dangerous road with vehicles frequently travelling in excess of the current speed limit of 40mph. Development of AL/CRS3 will considerably increase the risk of accidents. • AL/CRS3 will generate significant additional traffic along the A229 and around Cranbrook town. The Hawkhurst crossroads which link with the A229 at Cranbrook has already been designated an Air Quality Management Area with unsafe air quality levels. Any development in Cranbrook will potentially lead to increased levels of air pollution and a risk to public health. Additionally there will be increased congestion on the A262 and associated raised air quality levels at Goudhurst. • In addition to the A229 being dangerous itself, any development will also require considerable signage which will be distracting and will detract from the rural approach to the town. • Requests by the Community Advisory group AND the Parish council to masterplan non-car routes to the town hub and essential services with the developers of the adjacent sites have been ignored. The alternative is for pedestrians and cyclists to emerge onto the A229 and experience the same 'significant and demonstrable harm to road safety' as cited by the planning officer in the recent Hartley Gate Farm Appeal.

. The site is unsustainable. Milestone measured the walking time from AL/CRS3 to the Primary School as 18 minutes. This was verified at 6pm one January evening, and walking at considerable speed, meeting no one on the pavement nor waiting to cross the road it was just possible to achieve this from Orchard Way. With a small child going to Primary school from AL/CRS3 and possibly a buggy, this is impossible.

Design AL/CRS3 is a car dependent, major development and together with Brick Kiln Farm, it will form a substantial urban extension to Cranbrook.

The recent proposal from Berkeley Homes does not conserve or enhance the distinctiveness and the architectural quality of the High Weald AONB. Its layout and design are not compatible with nor reinforce the landscape character of the High Weald AONB. It does not set the high design standards that reflect traditional features and there is no innovation in sustainable construction and so it fails to address the real challenges of climate change.

Their proposals reflect exactly what we see all around us in Paddock Wood, Tunbridge Wells, Marden, all delivered by volume housebuilders. The local community knows and appreciates the special qualities of the present Turnden site and for such a sensitive location their proposal is underwhelming and mediocre.

Cranbrook provides the historic setting with its wealth of listed and non-designated buildings, the conservation areas and heritage assets. The Design and Access statement shows a lack of analysis of local grain, texture and pattern and it does not respect the character and historical development of Cranbrook. The repetitious use of housing typologies does not relate to the principles set out in the High Weald AONB Design Guide. There is a conflict in the design principles between the urban style and the rural location that remains unresolved.

The character areas of The Green, The Yards, and The Rural Village Edge seem to have been plucked from the air and placed at Turnden. They have a random reference to the countryside but bear no relation to the landscape and architecture. The proposed apartment blocks with their squeezed interior spaces, might well increase housing density but their scale and design are incongruous within the AONB landscape. This suburbanisation is out of character and despite the green frontage, the coalescence of Cranbrook with Hartley will be promoted which the AONB states is to be avoided.

The proposal does not use any locally sourced materials, and it provides the bare minimum to support climate change initiatives with photovoltaic panels only on market houses and not on affordable housing.

The High Weald AONB is a nationally treasured landscape affording the highest status of protection, exemplifying the very best of distinctive and beautiful places in England. For that reason, it is worthy of the very best of distinctive and beautiful architecture and it is therefore astonishing that TWBC would consider the application by Berkeley Homes to be in any way acceptable.

Additional Points• AL/CRS3 has never been interrogated as an allocation by a planning inspector

- TWBC could have found alternatives to AL/CRS3 not situated within the AONB.
- TWBC was aware of evidence from the local community showing a preference for small-scale developments and infill (with alternative sites proposed) rather than large-scale developments on greenfield sites such as AL/CRS3
- Allocation of AL/CRS3 does not conform to the policies in the High Weald Management Plan, nor to some of TWBC's own policies in the PSLP.
- Despite numerous objections from the community, Parish Council as well as notable statutory consultees AL/CRS3 remains allocated by TWBC. Why is this?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

RE: Policy AL1 RTW 19:

2 Access...

Proposals should include localised widening and highway improvement as required

3 Improvement...

To facilitate the additional flow of traffic

A HAA's Historical Background in the Area

1. HAA's origins: The 'Marlpits site' at the corner of Halls Hole Road and High Woods Lane was leased to the Council for allotments by Mr B H Collins, owner of the Dunorlan estate, on 29th September 1891. It was then designated by the Council as being a Statutory Site, which meant that any change of use could be imposed only with the agreement of the Secretary of State.

2 HAA's unique status: It is the largest and only allotment site in RTW administered by a Committee of volunteers. We manage approximately 313 plots held by 202 tenants.

3 Hawkenbury Allotments was recently named *Designated Green Space 223*

B HAA's Response

Proposals to localised widening and highway improvements as required to facilitate the additional flow of traffic

- . We are concerned that these proposals could affect those of our ploholders who for many years have regularly parked alongside our hedge bordering the east side of High Woods Lane. Many of these individuals are elderly with some mobility issues and would be unable to manage accessing their plots from the parking areas off *HALLS HOLE ROAD* which we have recently created.
- . Examination of the spaces for parking on the new sports ground plan suggests they are entirely inadequate. With **22** youngsters on the two teams playing on **six** pitches, there is a potential of **132 parental cars** arriving to transport the youngsters on tournament days.
- . We suggest this due to long experience of the consequent extensive parking along Forest Road, Frant Road and Saint Marks Road on days of rugby tournament at the rugby ground at the top of Frant Road. And there are many more young footballers than rugby players in the town.
- . We recognise the need for upgraded facilities for young footballers, but the current proposals appear not only inadequately designed for youngsters but likely to have a negative effect on elderly allotment holders.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Hawkenbury Allotment Holders' Association (HAHA) Historical Background in the Area

HAHA's origins lie in the establishment by Tunbridge Wells Borough Council on 29th September 1891 of the 'Marlpits' allotments site at the corner of Halls Hole Road and High Woods Lane. The land was leased for allotments by Mr B H Collins, owner of the Dunorlann estate. It was then designated by the Council as a **Statutory Site**, which meant that any change of use could be imposed only with the agreement of the Secretary of State.

It is now the largest allotments site within the borough and is unique in being administered by a Committee of volunteers since 1991. They currently manage 313 plots held by 202 tenants.

Hawkenbury Allotments was recently named *Designated Green Space 223*.

I – together with our elected Committee and significant numbers of allotment holders – maintain that our long experience of the parking situation in Halls Hole Road and High Woods Lane gives us a unique insight into the potential problems which will result if the current plans for parking in the new football ground are carried out.

Because as time has gone by since 1895, when virtually all plotholders arrive on foot and were resident within Hawkenbury, it is now the case that the vast majority now arrive by car.

While we have been forced to create (very limited) parking space off via our two entrances off Halls Hole Road, there is no possibility of doing so from High Woods Lane, as there are working plots right up to the perimeter hedge. Many plotholders are elderly, may have mobility issues and need nearby parking.

The advent of the numbers of parents etc who will arrive with the youngsters coming for training and even more so for matches will far outstrip the very limited spaces provided in the draft plan. This will cause a massive overflow affecting a much greater area than High Woods Lane; but that is our principal concern.

Our claim is supported by evidence of the effect on Forest Road, St Marks Road etc whenever there is a match at the rugby pitch near the junction of Forest Road and St Marks Road. Both roads are filled with cars until the match finishes. Yet Forest Road can accommodate a far greater number of cars than the dozen or so that would fill High Woods Lane.

Because the numbers of youngsters who play football far outweigh those who play rugby, we predict the effect will be far greater.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We suggest that removing the two very small pitches and using them for parking would go some way toward addressing the problem. Just because children are small does not mean they would accept being relegated to the tiny pitches that are designated for their use.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I believe that I have 30 years' unique experience relating to the problem I have identified relating to specific detail of **Policy AL! RTW 19**

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Development/Allocations STR 1 - Hawkhurst Parish Council welcomes the reduced level of development within the AONB, both in Hawkhurst and more widely. However, we disagree that all of the remaining site allocations are justified by exceptional circumstances (STR 1 point 8), for instance, AL/HA4 and also AL/CRS 3 in Cranbrook.

Question 7

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Traffic/Transport

HPC regards the requirement for development proposals to establish the impact on Hawkhurst crossroads and the Flimwell crossroads (5.285 and 5.358) as a positive aspect of this Plan. However, there has been no strategic assessment carried out of the traffic impacts on the Hawkhurst crossroads and the Flimwell junction. The borough-wide transport assessment does not consider these impacts. Therefore, the Plan is not "sound".

Any mitigation measures need to be effective and be based on evidence. To date, the approach has been a contribution to KCC for buses. HPC has been unable to obtain any evidence that this money has been spent on Hawkhurst. Indeed, we have been told that it has not. We have seen no evidence to suggest that this approach has had any impact on the traffic situation in the village (paragraph 5.359).

Paragraph 5.357 indicates that a "relief" road was considered, together with the closure of the northern arm of the Hawkhurst crossroads. We welcome TWBC's decision that this was not supportable in the context of national policy to limit development in AONBs. However, we feel that it is important to emphasise that HPC and the residents of Hawkhurst object strongly to the suggestion that this would have been a "relief" road. It would, in fact, have been an access road for a large housing development that would have had a negative impact on traffic congestion on the other three arms of the crossroads and the Flimwell junction. This would have also impacted the wider highway network, not just in Hawkhurst but in the surrounding villages.

HPC also want to draw attention to the fact that the Sustainability Appraisal concludes that the proposed allocations will have a negative impact on traffic.

Air Quality

Hawkhurst Parish Council welcomes the inclusion of the requirement to assess the impact of developments on air quality on the Cranbrook Road arm of the crossroads (STR/CRS1 4 & STR/HA1 5). However, it should be noted that the Parish Council and our Borough Councillors have significant concerns relating to the level of pollution on the other arms of the crossroads. TWBC has recently introduced additional monitoring tubes, but this data will not be available until at least 2022.

Consequently, we request that the results of this monitoring will be fed into the Local Plan when it becomes available.

Again, we note that the Sustainability Appraisal indicates that the level of development proposed will have a negative impact on air quality. This is concerning for Hawkhurst and its residents and it is vital that this impact is minimised.

Infrastructure

Paragraph 5.361 states that additional wastewater capacity **may** be required. There is no doubt that this will be required for the level of development proposed in the Plan. Hawkhurst's sewage treatment works are already operating overcapacity. In this respect, the Plan continues to fail to address the need to ensure that developments are only allowed to proceed when the planning authority is satisfied that the associated services and utilities are adequate to support them. For example, there is reference to the need for additional capacity at water waste treatment works (page 53 and STR5) and a claim that regulatory bodies "have been consulted" (page 55) but developers are merely required to collaborate with service providers without sanction for non-delivery. Our experience with Southern Water gives no confidence that the statutory providers will either co-operate effectively, or comply with any undertaking once given. It should be made clear that planning permission will not be given in the absence of effective and binding undertakings relating to the provision of the necessary services, and that construction will not be permitted until those services and utilities are in place.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Strategic assessment carried out of the traffic impacts on the Hawkhurst crossroads and the Flimwell junction.

Strengthening of the requirements for infrastructure to be in place prior to construction commencing.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

AL/HA4 - This allocation should be removed from the Local Plan as it was refused at planning committee. Moreover, KCC Highways have objected to this site on Highways grounds so it does not comply with paragraph 5.358. Therefore, we request that this allocation is removed from the Plan and HA1 is adjusted to reflect the overall amended numbers.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Removal of AL/HA4 and adjustment to numbers in HA1.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Hawkhurst Parish Council
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HA 5 Land to the north of Birchfield Grove

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

AL/HA5 - HPC recognises that there is a need for a new medical centre, However, this is not an appropriate site due to the impact on the AONB and the unacceptable level of traffic through Birchfield Grove.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Removal of AL/HA5.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

AL/HA7 & AL/HA8 - The Sustainability Appraisal indicates that these two sites will have a negative impact on air quality and travel. It seems feasible that these allocations will result in increased passage of HGVs through the village. Therefore, as with other allocations, we would request that there is a need for an impact assessment on Hawkhurst crossroads both in terms of traffic congestion and air quality.

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

“3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.” This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Heidi Brigitte Hawley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

Paragraphs 5.410 to 5.470

Policy AL/BE3 and AL/BE4

Policies Map 17 and 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_160, PSLP_161 and PSLP_162]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

“3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.” This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Heidi Brigitte Hawley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

Paragraphs 5.410 to 5.470

Policy AL/BE3 and AL/BE4

Policies Map 17 and 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_160, PSLP_161 and PSLP_162]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

*“3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. **Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.” This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance.** Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.*

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mr Peter Hay
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/HA 1 The Strategy for Hawkhurst parish

Policy AL/HA1 - Land at the White House, Highgate Hill

Policy AL/HA2 - Brook House, Cranbrook Road

Policy AL/HA3 - Former Site of Springfield Nurseries, Cranbrook Road, Hawkhurst

Policy AL/HA4 - Land off Copthall Avenue and Highgate Hill

Policy STR/CS1 - The Strategy for Cranbrook and Sissinghurst Parish

Policy AL/CRS1 Land off Brick Kiln Farm, Cranbrook Road

Policy AL/CR3 - Turnden Farm, Hartley Road, Cranbrook

[TWBC: this representation has been input against Policies STR/HA 1, AL/HA1, AL/HA2, AL/HA3, AL/HA4, STR/CS1, AL/CRS1 and AL/CR3 – see Comment Numbers PSLP_359 and PSLP_370-376]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I very much strongly support the removal of Hawkhurst Gold Club Site and overall reduction in housing allocation within the village and also the reduction in harm to AONB. In addition, I do not consider the remaining numbers, HA/1, HA/4 along with Cranbrook CRS/1 and CRS/4 are justified as no assessment has been undertaken of the cumulative effect upon the junction at Flimwell and the village crossroads. Note: The recent planning application South of Copthall Avenue was recently refused partly because of this impact and AONB.

Also, I do not consider that HA/1, HA/3, CRS/1 and CRS/4 are consistent with National Policy as neither focus on sustainable locations for development and the use of private cars will always remain – NPPF 103 and 104 refers. This is plain to see.

I would also say that the policies will fail to preserve or enhance the AONB contrary to NPPF Para 172

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1. Removal of Copthall allocation HA/4 (plans are incorrect anyway)
2. To modify HA/1 to reflect reduced overall numbers of housing in Hawkhurst following removal of HA/1
3. To modify CRS/1 to reflect overall reduction in housing numbers in Cranbrook as a result of the removal of CRS/1
4. To modify HA/2 and HA/3 to include wording from Local Plan AL/HA/1 to ensure Area of Landscape Importance is retained and reinforced as part of any new proposal for planning permission.
5. Modify HA/1 and make it clearer that any development outside LBD will not be permitted (unless there is an exception specifically identified elsewhere in the plan)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/HA 1 The Strategy for Hawkhurst parish

Policy AL/HA1 - Land at the White House, Highgate Hill

Policy AL/HA2 - Brook House, Cranbrook Road

Policy AL/HA3 - Former Site of Springfield Nurseries, Cranbrook Road, Hawkhurst

Policy AL/HA4 - Land off Copthall Avenue and Highgate Hill

Policy STR/CS1 - The Strategy for Cranbrook and Sissinghurst Parish

Policy AL/CRS1 Land off Brick Kiln Farm, Cranbrook Road

Policy AL/CR3 - Turnden Farm, Hartley Road, Cranbrook

[TWBC: this representation has been input against Policies STR/HA 1, AL/HA1, AL/HA2, AL/HA3, AL/HA4, STR/CS1, AL/CRS1 and AL/CR3 – see Comment Numbers PSLP_359 and PSLP_370-376]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I very much strongly support the removal of Hawkhurst Gold Club Site and overall reduction in housing allocation within the village and also the reduction in harm to AONB. In addition, I do not consider the remaining numbers, HA/1, HA/4 along with Cranbrook CRS/1 and CRS/4 are justified as no assessment has been undertaken of the cumulative effect upon the junction at Flimwell and the village crossroads. Note: The recent planning application South of Copthall Avenue was recently refused partly because of this impact and AONB.

Also, I do not consider that HA/1, HA/3, CRS/1 and CRS/4 are consistent with National Policy as neither focus on sustainable locations for development and the use of private cars will always remain – NPPF 103 and 104 refers. This is plain to see.

I would also say that the policies will fail to preserve or enhance the AONB contrary to NPPF Para 172

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1. Removal of Copthall allocation HA/4 (plans are incorrect anyway)
2. To modify HA/1 to reflect reduced overall numbers of housing in Hawkhurst following removal of HA/1
3. To modify CRS/1 to reflect overall reduction in housing numbers in Cranbrook as a result of the removal of CRS/1
4. To modify HA/2 and HA/3 to include wording from Local Plan AL/HA/1 to ensure Area of Landscape Importance is retained and reinforced as part of any new proposal for planning permission.
5. Modify HA/1 and make it clearer that any development outside LBD will not be permitted (unless there is an exception specifically identified elsewhere in the plan)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Mr Peter Hay
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/HA 1 The Strategy for Hawkhurst parish

Policy AL/HA1 - Land at the White House, Highgate Hill

Policy AL/HA2 - Brook House, Cranbrook Road

Policy AL/HA3 - Former Site of Springfield Nurseries, Cranbrook Road, Hawkhurst

Policy AL/HA4 - Land off Copthall Avenue and Highgate Hill

Policy STR/CS1 - The Strategy for Cranbrook and Sissinghurst Parish

Policy AL/CRS1 Land off Brick Kiln Farm, Cranbrook Road

Policy AL/CR3 - Turnden Farm, Hartley Road, Cranbrook

[TWBC: this representation has been input against Policies STR/HA 1, AL/HA1, AL/HA2, AL/HA3, AL/HA4, STR/CS1, AL/CRS1 and AL/CR3 – see Comment Numbers PSLP_359 and PSLP_370-376]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I very much strongly support the removal of Hawkhurst Gold Club Site and overall reduction in housing allocation within the village and also the reduction in harm to AONB. In addition, I do not consider the remaining numbers, HA/1, HA/4 along with Cranbrook CRS/1 and CRS/4 are justified as no assessment has been undertaken of the cumulative effect upon the junction at Flimwell and the village crossroads. Note: The recent planning application South of Copthall Avenue was recently refused partly because of this impact and AONB.

Also, I do not consider that HA/1, HA/3, CRS/1 and CRS/4 are consistent with National Policy as neither focus on sustainable locations for development and the use of private cars will always remain – NPPF 103 and 104 refers. This is plain to see.

I would also say that the policies will fail to preserve or enhance the AONB contrary to NPPF Para 172

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1. Removal of Copthall allocation HA/4 (plans are incorrect anyway)
2. To modify HA/1 to reflect reduced overall numbers of housing in Hawkhurst following removal of HA/1
3. To modify CRS/1 to reflect overall reduction in housing numbers in Cranbrook as a result of the removal of CRS/1
4. To modify HA/2 and HA/3 to include wording from Local Plan AL/HA/1 to ensure Area of Landscape Importance is retained and reinforced as part of any new proposal for planning permission.
5. Modify HA/1 and make it clearer that any development outside LBD will not be permitted (unless there is an exception specifically identified elsewhere in the plan)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)

[TWBC: this representation has been input against Policies STR/SS3, STR/CA1 and STR/PW1 – see Comment Numbers PSLP_1757, PSLP_ and PSLP_]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have received an email from one of my Borough Councillors, Matt Boughton, containing a copy of a letter from him and fellow councillors Jon Botten and James Lark of Medway Ward on Tonbridge and Malling Borough Council to Tunbridge Wells Borough Council dated 02/06/2021 regarding the TWBC Local Plan Regulation 19 Consultation and encouraging me to respond also.

My comments apply primarily to "The Strategy for Tudeley Village" (Policy STR/SS3) and also to "The Strategy for Capel Parish" (Policy STR/CA1) and "The Strategy for Paddock Wood" (Policy STR/PW1).

Whilst I agree wholeheartedly with the points they raise and ask that the validity therein be both recognised, accepted and acted upon, I wish to take this opportunity to stress that their objections hardly scratch the surface in reflecting the horror many people in Tonbridge feel at the vandalism that these proposals will wreak upon their locality.

Unlike the councillors I needn't be polite and diplomatic. I needn't couch my words or be overly judicious. I needn't tread lightly, one step at a time and defer to my colleagues and fellow public servants. I have no "duty to co-operate".

In a previous email to you I outlined my objections in minute detail but since none has apparently been addressed, and it seems that many original problems have been exacerbated (the proposed permanent closure of Hartlake Road springs to mind) I feel my only recourse is to be angry and forthright and say unequivocally that it is disgraceful and shameful that TWBC are planning to rape the natural environment in such a blatant way, that an intolerable burden is to be casually shifted onto the infrastructure of an already overstretched area that isn't in their jurisdiction and that dangerous flooding issues are to be disregarded in what can only be described as a wilful act of destruction at best and a greedy, self-interested land grab at worst.

It's that simple.

Or is it?

It may be that those on TWBC who support the plan in its current form are just the "idle-minded overlings" to whom Kipling once referred?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Eddie Haydock
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

Policy STR/CA1 The Strategy for Capel Parish

Policy STR/PW1 The Strategy for Paddock Wood

[TWBC: this representation has been input against Policies STR/SS3, STR/CA1 and STR/PW1 – see Comment Numbers PSLP_1757, PSLP_1759 and PSLP_1760]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have received an email from one of my Borough Councillors, Matt Boughton, containing a copy of a letter from him and fellow councillors Jon Botten and James Lark of Medway Ward on Tonbridge and Malling Borough Council to Tunbridge Wells Borough Council dated 02/06/2021 regarding the TWBC Local Plan Regulation 19 Consultation and encouraging me to respond also.

My comments apply primarily to "The Strategy for Tudeley Village" (Policy STR/SS3) and also to "The Strategy for Capel Parish" (Policy STR/CA1) and "The Strategy for Paddock Wood" (Policy STR/PW1).

Whilst I agree wholeheartedly with the points they raise and ask that the validity therein be both recognised, accepted and acted upon, I wish to take this opportunity to stress that their objections hardly scratch the surface in reflecting the horror many people in Tonbridge feel at the vandalism that these proposals will wreak upon their locality.

Unlike the councillors I needn't be polite and diplomatic. I needn't couch my words or be overly judicious. I needn't tread lightly, one step at a time and defer to my colleagues and fellow public servants. I have no "duty to co-operate".

In a previous email to you I outlined my objections in minute detail but since none has apparently been addressed, and it seems that many original problems have been exacerbated (the proposed permanent closure of Hartlake Road springs to mind) I feel my only recourse is to be angry and forthright and say unequivocally that it is disgraceful and shameful that TWBC are planning to rape the natural environment in such a blatant way, that an intolerable burden is to be casually shifted onto the infrastructure of an already overstretched area that isn't in their jurisdiction and that dangerous flooding issues are to be disregarded in what can only be described as a wilful act of destruction at best and a greedy, self-interested land grab at worst.

It's that simple.

Or is it?

It may be that those on TWBC who support the plan in its current form are just the "idle-minded overlings" to whom Kipling once referred?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I'm agreeable to some new housing but to start the Mascall's site and Church Road Site at the same time as Green Lane site, the Hop Pocket old pub site and lose the orchards and fields down to the old Elm Tree pub. The site of the fish and chip shop on Maidstone Road, the development on the site of the old police station, the corner detached house in Church Road are all being made into several properties. Every space with fields, orchards and the oxygen we get from the trees are being destroyed. They cut down the old oak trees on church road and hacked through the ancient hedgerows before the ecologist was present. I'm sure she was only present as several of us demanded to know why they were destroying habitats with foxes, owls, rabbits and badgers and bird life including 2 small egrets that live near the Church Lane site.

No infrastructure pre builds, no school, no extra GP practices, no fire station ready as it is a retained station and then no police station.

The train station car park is always full pre building works. The trains are full by the time they get to Paddock Wood so how will the thousands of new people in the new builds get to work on the shortened train service, also they took away the trolley service on the trains.

The building of the retirement buildings behind Barsley's has meant another car park taken away. We have already lost the Barclays Bank and the HSBC Bank in the small high street/ Commercial Road.

The bus service is extremely irregular and very expensive.

They also want to build on the Memorial Park again concreting again for a car park and leaving millions of pounds in debts payable over a huge amount of years.

Why are they placing out of borough, London borough social housing in the Green Lane site when the have approximately 1000 people on the social housing list?

The fields that are being built on had orchards which soaked up excess water after heavy rain and also flooded parts of Paddock Wood pre new builds. Now the fields and orchard are gone the water table and Earth had flooded and they are building these houses on flood zones.

The idea of keeping the country green is a contradiction of cutting down everything on the green spaces and fields, approx it's possible that a paddock wood may have 3000/4000 more cars on the roads making it dangerous for children and adults with asthma, copd, and other lung conditions causing increased harm when the country is meant to be going green. The bottle neck of the Badsall Road housing is opposite a school with over 1200 pupils all walking to school and breathing in the additional car fumes, the babies and toddlers in prams and pushchairs level to the exhaust pipes.

I moved to Paddock Wood 17 years ago for its green spaces and small primary school and later the larger school.

I'm disgusted by the lack of accountability and decision making by the current conservative councillors voting for the developments when they are meant to be working with the local community who do not want this huge amount of housing placed in Paddock Wood and not spread out over Tunbridge Wells.

Why build over 50 percent of the housing in Paddock Wood and even more housing in Capel?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

I'm agreeable to some new housing but to start the Mascall's site and Church Road Site at the same time as Green Lane site, the Hop Pocket old pub site and lose the orchards and fields down to the old Elm Tree pub. The site of the fish and chip shop on Maidstone Road, the development on the site of the old police station, the corner detached house in Church Road are all being made into several properties. Every space with fields, orchards and the oxygen we get from the trees are being destroyed. They cut down the old oak trees on church road and hacked through the ancient hedgerows before the ecologist was present. I'm sure she was only present as several of us demanded to know why they were destroying habitats with foxes, owls, rabbits and badgers and bird life including 2 small egrets that live near the Church Lane site.

They closed Commercial Road to traffic with no consultation and placed later planters actually on the road with the two yellow lines covered potentially could cause an accident. I could not use my blue badge in the road and it isolated me in my home as well as shielding for 14 months as I am in group 4. My husband as well is in group 4.

My daughter too with medical problems which led her to have to sell her Land Rover as she sustained multiple fractures to her vertebrae.

I could not get a NHS placement in the local dentists as they had a long waiting list and were not taking new clients. The GP surgery as well finding the workload extremely busy pre any new houses being filled.

No infrastructure pre builds, no school, no extra GP practices, no fire station ready as it is a retained station and then no police station.

The train station car park is always full pre building works. The trains are full by the time they get to Paddock Wood so how will the thousands of new people in the new builds get to work on the shortened train service, also they took away the trolley service on the trains.

The building of the retirement buildings behind Barsley's has meant another car park taken away. We have already lost the Barclays Bank and the HSBC Bank in the small high street/ Commercial Road.

The bus service is extremely irregular and very expensive.

They also want to build on the Memorial Park again concreting again for a car park and leaving millions of pounds in debts payable over a huge amount of years.

Why are they placing out of borough, London borough social housing in the Green Lane site when they have approximately 1000 people on the social housing list?

The fields that are being built on had orchards which soaked up excess water after heavy rain and also flooded parts of Paddock Wood pre new builds. Now the fields and orchards are gone the water table and earth has flooded and they are building these houses on flood zones.

The idea of keeping the country green is a contradiction of cutting down everything on the green spaces and fields, approx it's possible that a paddock wood may have 3000/4000 more cars on the roads making it dangerous for children and adults with asthma, COPD, and other lung conditions causing increased harm when the country is meant to be going green. The bottle neck of the Badsall Road housing is opposite a school with over 1200 pupils all walking to school and breathing in the additional car fumes, the babies and toddlers in prams and pushchairs level to the exhaust pipes.

I moved to Paddock Wood 17 years ago for its green spaces and small primary school and later the larger school.

I'm disgusted by the lack of accountability and decision making by the current conservative councillors voting for the developments when they are meant to be working with the local community who do not want this huge amount of housing placed in Paddock Wood and not spread out over Tunbridge Wells.

Why build over 50 percent of the housing in Paddock wood and even more housing in Capel?

Then they also want to take the memorial land left to the people of Paddock Wood for exercise and fresh air and now the plan to build a new community centre with concreted car parks over the green spaces.

Why are the council agreeing to multiple sites in one small town.

Why are they not looking at the elderly and adults and children with special needs and taking away the cars from Commercial Road will mean no access for people with blue badges who can not take a hopper bus as they cannot travel on a bus when they have, like me, no bus stops near my home.

This surely is restrictive and against the Disability Discrimination Act.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the

explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards

and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance

when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Norman Heath [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED], [REDACTED] Ashford, [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Norman Heath [REDACTED]
Comment ID	PSLP_950
Response Date	27/05/21 14:17
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.2
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Norman Heath
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_949 and PSLP_950]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the

explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards

and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance

when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	

Respondent's Name and/or Organisation	Emma Heather
---------------------------------------	--------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

The Strategy for Paddock Wood paras 5.230 - 5.245Policy STR/PW 1

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Infrastructure

The current plan for building in Paddock Wood is in excess of the scale that the town can cope with. The current building works that have planning permission and are ongoing are just the tip of the iceberg when considering the entirety of the planned building TWBC has in store for Paddock Wood. However there has been little by way of changes to the current infrastructure to enable the town to cope with the current crop. The junction of Badsell road with the A228 and with Maidstone Road is already difficult during rush hour. The Colts Hill roundabout does not cope well with traffic leaving Paddock Wood in the morning rush hour. The additional traffic here from the new developments will exacerbate this issue. The junction at Maidstone Road and Badsell Road (I live on the corner here) is always busy. The morning rush including travel to Mascalls school makes it almost impossible for me to leave my driveway in the morning. The added traffic will only make this worse. In addition the proposed closure of the railway bridge to all but buses will put a heavier burden onto this junction as more people try to leave Paddock Wood via this route. This has not been properly considered by TWBC.

Services

There are limited services within Paddock Wood. The Dentist and woodlands Health Centre are oversubscribed already so the additional houses and occupants will make this worse. There appears to be no plan to improve the town centre for commercial premises; recent additions have been the approval of a nursing home with the removal of some commercial premises, the loss of a food outlet to be replaced by residential block and also a second funeral parlour. This does not equate to making the town centre a place for residents shopping requirements.

Whilst there is mention of the proposed community centre on the memorial field and additional amenities there is no real indication of how these will be implemented and if they will meet with the approval of the local residents.

Flooding

There is a well known ground water flooding issue in Paddock Wood in addition to Tudley Brook bursting its banks. My garden floods whenever there is heavy rain. My property is not in a recognised flood plain and as such it is my view that the building of properties throughout Paddock Wood will cause additional pressure on the current residents as well as those in the new builds without significant flood prevention planning that I do not believe has been carried out.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Infrastructure

It is my belief that the junctions on Badsell Road would not be able to cope with the proposed additional housing and the concomitant increase in traffic no matter what the modifications are. I believe that in order to cope with the current developments the junction at Badsell and Maidstone Road must be modified into a more free flowing junction to prevent congestion build up. I understand that this was part of the proposal for the site opposite however there appears to be no sign of this progressing or that it is a requirement in the local plan.

The railway bridge should not be closed to through traffic, this will prevent the additional pressure on the Badsell Road junction.

Services

I am unsure where the location of these are intended to be. There is no clear requirement or incentive for the developers to allow space for this and the town centre is apparently being filled with residential properties or unnecessary commercial ventures. Without the guarantee that these services can and will be supplied the local plan cannot work and is unsound.

Flooding

I cannot see a way to prevent flooding on a known flood plain in an area where there is a ground water problem. I understand that Southern/South East Water have failed to put the foul water system in place as they had planned. The building work to the South of Paddock Wood has already caused an increase in the flooding to my property and the water is significantly silted. I cannot see a way that the plan can be made sound regarding flooding.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you would like to attach a file in support of your comments, please upload it here. [flood.jpg](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 2	
Agent's Name and Organisation (if applicable)	The Rural Planning Practice
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 15 Local Green Space

Question 4

Do you consider that the Local Plan:

Is legally compliant

No

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please see accompanying representations document

[TWBC: the following text is from the representations document. For the full representation with references and appendices, please see supporting documents]

1. INTRODUCTION

1.1. These representations, in respect of the pre-submission version of Tunbridge Wells Borough Council's Local Plan, are made on behalf of our client, Mr Henley.

1.2. This document should be read in conjunction with all previously submitted representations made in respect of designation of the site known as Site 102 – Goudhurst Green Field (North of Church Road) as Local Green Space. For clarity and consistency, we will refer to the site as "Five Fields". Our representations are therefore accompanied by the following documents:

- . Regulation 14 consultation - Representations to Goudhurst NDP Steering Group by Bloomfields (November 2018)
- . Regulation 15 consultation - Representations to TWBC in respect of Goudhurst NDP pre-submission version (February 2021)
- . Site Location Plan

1.3. We are of the opinion that the allocation of Local Green Spaces around Goudhurst is unnecessary due to their location within the High Weald Area of Outstanding Natural Beauty which already provides high level of protection from development.

1.4. In strongest terms possible, we object to the Local Green Space designation of site no. 102 – Five Fields.

2. EXECUTIVE SUMMARY

2.1. Representations are made in respect of the pre-submission draft of Tunbridge Wells Borough Council's Local Plan.

2.2. Emerging Policy EN15 which deals with Local Green Spaces is not consistent with paragraphs 145 and 146 of the NPPF.

2.3. Furthermore, the pre-submission Local Plan makes Local Green Spaces allocations in rural villages where local community has access to open green spaces within minutes. It is demonstrated throughout in this document, that such allocations are not appropriate or necessary.

2.4. Furthermore, it is demonstrated within this document that the methodology for selection of sites is not appropriate as it is based on guidance for densely populated urban areas. Site selection appears to be heavily biased and inconsistent.

2.5. In Goudhurst, the proposed Local Green Spaces allocations effectively creates an area of Green Belt within the village which is contrary to the National Planning Policy Guidance.

2.6. We strongly object to allocation of site known as Five Fields as a Local Green Space. The site does not have qualities required by the paragraph 100 of the NPPF and therefore this allocation should be removed.

2.7. In its current form, the pre-submission Local Plan does not make any housing allocation in Goudhurst, which could respond to the growing local housing need within the plan period. As such, the spatial strategy for the area is neither effective, nor consistent with national policy which demands that Councils support the Government's objective of significantly boosting the supply of homes.

2.8. We are of the opinion that the pre-submission Local Plan is not sound.

3. DRAFT POLICY EN15 - LOCAL GREEN SPACES

3.1. Since November 2018 our client has strongly opposed the allocation of site known as the Site 102 – Five Fields as a Local Green Space. These representations re-iterate this position and outline reasons why the site does not comply with the assessment criteria.

3.2. Paragraph 0151 of the Planning Practice Guidance is clear that Local Green Space ('the LGS') designation should not be proposed as a "back door" way to try to achieve what would, in practice, amount to a new area of green belt by another name.

3.3. It is our case, that the proposed Policy EN15 is not robustly justified, and that the TWBC methodology for selection of sites was not correctly applied in respect of site no. 102 – Five Fields.

3.4. We are of the opinion that the wording of the Policy EN15 is overly restrictive and does not reflect the requirement of paragraph 101 of the NPPF which states that:

"Policies for managing development within a Local Green Space should be consistent with those for Green Belts".

3.5. If the Council is introducing a policy which is to be consistent with policies for managing Green Belts, any such consistency must be fully incorporated in the wording and must respect paragraphs 145 and 146 of the NPPF which provides specific guidance on what types of development are appropriate in the Green Belt.

3.6. However, this is not the case with the draft Policy EN15 which does not mention or incorporate any of the exceptions listed in paragraph 145 of the NPPF, or other forms of development listed in paragraph 146.

3.7. We therefore urge the Council to re-consider wording of the draft policy EN15 as follows:

"A Local Green Space is a designated area of green or open space that is demonstrably special to the local community it serves. Development within Local Green Spaces will be restricted to those types

of development which are deemed appropriate by the relevant Green Belt policies contained within the NPPF”.

Methodology and justification of the draft policy

3.8. Apart from wording of the draft policy itself, we would like to highlight that the methodology employed for selection and assessment of sites is based on, and underpinned by the ‘Accessible Natural Green Space Standards in Towns and Cities: Review and Toolkit for their Implementation’². This document was produced in 2003 in order to assure that people in urban areas have opportunities to experience nature.

3.9. The document follows recommendations made by English Nature that provision should be made of at least 2ha of accessible natural green space per 1,000 population. The English Nature document also recommended an introduction of a tiered system which outlined distances from the nearest area of natural greenspace, and its desired size to serve its purpose as an area of natural green space.

3.10. While a tiered system is appropriate for an assessment of size of natural green spaces in large and densely developed urban areas, it is wholly inappropriate for assessment of size of natural green spaces in small villages that are surrounded by an open countryside.

3.11. We would suggest that Goudhurst as a settlement has a good network of public rights of way (figure 1 below) which assures that open countryside can be accessed within minutes. It is therefore questionable whether the designation of Local Green Spaces within Goudhurst is at all appropriate in this context.

[TWBC: for maps, please see full representation attached as a supporting document]

3.12. TWBC’s methodology clearly states in paragraph 2.6 that **sites with existing protections are to generally be considered sufficiently protected in managing development**. However, in paragraph 2.8 it is stated that:

“The Green Belt, as well as AONB, protection relates to the majority of the borough and so while considering the high level of housing and other needs within the borough, the Council has decided to not exclude considered LGS sites from possible designation (subject to the Council’s designation methodology) already protected by these designations”

3.13. The above statement does not clearly outline the Council’s approach. The sentence is not logical and does not explain why further policy protections are needed.

3.14. We strongly object to any additional levels of protection being imposed on sites which already benefit from protection of national landscape and policy designations, as this overly protective approach is in direct conflict with paragraph 99 of the NPPF, and further conflicts with the NPPG.

Incorrect application of methodology and national guidance

3.15. Apart from the incorrect employment of methodology, we suggest that the Council’s assessment of potential Local Green Spaces sites has been inconsistent and in conflict with its own methodology.

3.16. Appended to these representations is a relevant section of the Local Green Space Assessment (amended version dated February 2021). This document lists all potential sites within Goudhurst Parish.

3.17. Unfortunately, the pre-submission version of policies maps does not include the Local Green Spaces layer. As such, extracts from previous LGS assessment documents are used.

3.18. It is clear from the figure 2 below, that the proposed LGS designations in Goudhurst appear to create large areas which effectively create a ‘green belt’ between two areas of Goudhurst. Such approach is in clear conflict with the paragraph 15 of the Planning Practice Guidance with states that:

*“There are no hard and fast rules about how big a Local Green Space can be because places are different and a degree of judgment will inevitably be needed. However, paragraph 100 of the National Planning Policy Framework is clear that Local Green Space designation should only be used where the green area concerned is not an extensive tract of land. Consequently **blanket designation of open countryside adjacent to settlements will not be appropriate. In particular, designation should not be proposed as a ‘back door’ way to try to achieve what would amount to a new area of Green Belt by another name.**”* (our emphasis)

[TWBC: for map, please see full representation attached as a supporting document]

3.19. We note that the total of no.17 sites were considered for LGS designation in the area. From these:

- . 2no. sites were assessed as being sufficiently protected by existing national designations and policies (such as Conservation Area and AONB areas);
- . 3no. sites were previously proposed for designation in Reg 18 Draft Local Plan, but in accordance with the revised methodology, were considered sufficiently protected under other national designations and policies (such as Conservation Area);
- . 4no. sites were discounted due to insufficient evidence that they are “*Demonstrably Special*”, two of which were previously proposed for designation in the Reg. 18 Draft Local Plan
- . 8no. sites are considered to satisfy the selection criteria and are proposed for LGS designation in the pre-submission draft Local Plan 3.20.

3.20 There are significant differences and inconsistencies with assessment of individual sites and their compliance with selection criteria. For example:

- . Site no. 97 (St. Mary’s churchyard) has existing local and national designations which protect it from development. It was previously proposed for as an LGS designation, but it is now considered to be sufficiently protected. Despite accommodating a historic churchyard and burial grounds, the site is not noted to be “*demonstrably special*” to the local community.
- . sites heavily used by local community for both formal and informal recreation are not designated as Local Green Spaces, particularly sites AS-23 (Playground adjacent to Back Lane), AS-24 (Chequer Field) and AS-17 (Informal Green Space Adjacent to Bankfield Way).
- . Sites in control of Parish Council which were previously considered for LGS designation are now considered to be sufficiently protected. This could be perceived as a strong bias against the privately owned land seen as being in ‘higher danger of development’
- . Five Fields site is the only privately owned site within the central area of Goudhurst which is proposed to be further ‘protected’ from development, despite already being restricted by its location within Conservation Area, and an AONB.
- . Five Fields site does not allow access for any form of recreational facilities, yet it is to be further restricted by the LGS designation, while other sites which are regularly used for recreational activities are now excluded from the LGS designation

[TWBC: for map and images, please see full representation attached as a supporting document]

3.21. Overall, we are of the opinion that the pre-submission policy EN15 is not robustly justified and not supported by appropriate, and consistent technical evidence.

3.22. Local Green Spaces allocation in smaller settlements such as Goudhurst are unnecessary and inappropriate as the majority of local population does not suffer from the lack of access to green spaces or open countryside.

4. SITE NO. 102 – FIVE FIELDS

4.1. Our client strongly opposes the allocation of this site as a Local Green Space.

4.2. Objections were previously submitted on the grounds that the site does not have qualities which would justify its designation. These are appended to this document (Appendix 2 and 3).

4.3. Paragraph 100 of the NPPF states that LGS designation should only be used where the green space is:

a) *In reasonably close proximity to the community it serves;*

b) *Demonstrably special to a local community and holds a particular local significance for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and*

c) *Local in character and is not an extensive tract of land.*

4.4. It is agreed that the site is in close proximity to Goudhurst and that, in this respect, it **complies with criterion a).**

4.5. However, it is strongly disputed that the site is demonstrably special or locally significant as required by criteria b).

Is the site beautiful?

4.6. The site is an agricultural field. It is regularly ploughed to grow feed crops, and for grazing. There are no special features within the site itself which would distinguish it from any other agricultural field in this locality.

4.7. Long-distance views into the surrounding countryside are only available from the footpath which crosses the site (as indicated below). In contrast, the views into the site from the A262 are of no distinguishable quality (figures 3 and 4) and may be blocked entirely should the landowner stop maintaining or replanted the existing, or introduced a new boundary hedge. It is likely that the existing hedge (once fully mature) will enclose the visual openness of the site from the A262.

Is the site historically significant?

4.8. The site forms part of the Goudhurst Conservation Area but is not afforded any special mention as a site of historic significance. The Goudhurst and Kilndown Conservation Area Appraisal (dated June 2006) does not make any specific references to the site itself, or its importance to the setting and the character of the Conservation Area.

4.9. The Conservation Area Appraisal does not support the assertion of “*visually important undeveloped space that contributes to the character/setting and local visual amenity of the settlement*”.

Does the site have a recreational value?

4.10. The PROW crossing the site is regularly used as an alternative pedestrian route between settlements.

4.11. The footpath WC28 forms the northern boundary of the site as seen on the map overleaf (figure 1). However, in practical terms it also separates two fields which have a common ownership and are both used for agricultural purposes.

4.12. As such, no recreational activities are permitted, or indeed possible, within the site itself or the field directly north. This is due to their continuous agricultural use and occasional presence of grazing animals.

4.13. The playing fields used for recreational activities are located elsewhere in the village (sites AS-24, AS-22, AS-19, and sites no. 101 and 98). As mentioned in the paragraph 3.20 overleaf, some of the playing fields have been discounted from the assessment and were not considered to be designated as LGS.

Is the site tranquil?

4.14. The presence of A262 has an undeniable impact on the village as a whole. In fact, the Goudhurst Neighbourhood Plan identifies traffic issues and the growing number of HGV on A262 as an ongoing problem.

4.15. The traffic noise and emissions generated by the passing vehicles can be significant in busy times. This clearly indicates that site within this locality cannot be seen as demonstrably tranquil in character.

Is the site known for its richness of wildlife?

4.16. The site is actively used for agricultural uses and for grazing of sheep. It is regularly ploughed planted with feed crops. The soil is regularly turned over and beet is planted for grazing. As such, the presence of wildlife, or potential of valuable habitats, will be limited by these activities.

4.17. There is no technical evidence presented/available which would demonstrate that the site is rich in wildlife, or that it accommodates valuable habitats.

4.18. Overall, it is concluded that it has not been robustly demonstrated that the site holds any particular local significance which would warrant its designation as LGS. As such, **criterion b) of paragraph 100 of the NPPF is not satisfied.**

4.19. It is acknowledged that the site is local in character, but it is no more local in character than any other agricultural field in the vicinity of the village.

4.20. Furthermore, at approximately 1.05ha in size, the site is of a significant size when compared with other selected sites. It is an extensive tract of land, particularly if combined with the Old Cricket Field (site no. 99) to the west.

4.21. As such the **criterion c) of paragraph 100 of the NPPF is also not satisfied.**

4.22. It is therefore asserted that the designation of the site known as 'Five Fields' does not comply with the criteria of paragraph 100 of the NPPF, and therefore cannot be designated as a Local Green Space.

4.23. Attached to these representations is Council's SHELAA assessment of Five Fields site which was undertaken in 2020. Number of issues and policy layers are clearly stated.

4.24. Overall, the assessment concluded that the site is considered unsuitable as a potential site allocation. The reason given was stated as:

"The introduction of built form in this location would have a significant adverse impact upon the landscape setting, settlement pattern and historic character of the village and surrounding area, located within the AONB."

4.25. It simply cannot be the case that the Council assesses a site as "unsuitable for development", but then proceeds to increase the level of its 'protection' by an additional policy constraint such as LGS designation. Such approach is in direct conflict with paragraph 16 f) of the NPPF which demands the Plans should avoid unnecessary duplication of policies that apply to a particular area. The subject site is already protected by policies relating to Conservation Areas and AONBs.

4.26. It is therefore respectfully requested that the site is **either removed from the LGS** designation all together (as it clearly benefits from a sufficient protection from development), **or that it is acknowledged that the site is suitable for residential development** due to its sustainable and logical location between two built up areas of Goudhurst.

4.27. In any case, the Five Field site is already protected from inappropriate development by national and local policies regarding development in open countryside. Any potential for development is further restricted by the site's location within the High Weald AONB and the Goudhurst Conservation Area both of which offer higher planning policy constraint to development than that of a Local Green Space policy which has to be consistent with Green Belt ones.

5. ACHIEVING SUSTAINABLE DEVELOPMENT IN GOUDHURST

5.1. Section 3 of the National Planning Policy Framework is concerned with plan-making and provides comprehensive framework, including clear guidance on how both strategic and non-strategic are to be prepared.

5.2. Paragraph 15 of the National Planning Policy Framework states that *"The planning system should be genuinely plan-led. Succinct and up-to-date plans should provide a positive vision for the future of each area; a framework for addressing housing needs and other economic, social and environmental priorities; and platform for local people to shape their surroundings."* (our underlining)

5.3. Paragraph 16 specifies that Plans should:

- a) *Be prepared with the objective of contributing to the achievement of sustainable development;*
- b) *Be prepared positively in a way that is aspirational be deliverable;*
- c) *Be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;*
- d) *Contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;*
- e) *Be accessible through the use of digital tools to assist public involvement and policy presentation;*
and
- f) *Serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant)*

5.4. Firstly, we note that the pre-submission Local Plan does not seek to achieve sustainable development in Goudhurst area. It does not direct development within the Parish to appropriate or sustainable locations, but simply amends the existing development boundary to include recently permitted development.

5.5. We have previously raised our objection to the Goudhurst Neighbourhood Plan which also fails to make any allocations to accommodate new housing, and which simply defers to the Tunbridge Wells Borough Council to do so. However, the pre-submission draft Local Plan fails to provide for any new housing within Goudhurst Parish over the plan period.

5.6. As a result, the pre-submission Local Plan appears to have no aspiration to support local housing for future generation, or for its own ageing population.

5.7. As indicated in Table 4 (distribution of housing allocations) (page 42), only 25no. dwellings are allocated in Goudhurst over the Plan period. All of the 25no. dwellings are to be delivered imminently at sites known as Land at Triggs Farm (LPA Ref.: 17/02765/OUT and PINS Ref.: APP/M2270/W/18/3196553) and Land east of Blacombes Hill (LPA Ref.: 19/00280/F).

5.8. We note that the dwelling mix resulting from the above permissions will deliver only 10no. smaller dwellings, and both deliver policy compliant affordable housing provision. However, once these permissions are implemented, no further development is planned within this area until 2038.

5.9. Goudhurst NDP Steering Group have identified the need for 18no. affordable houses, and 22no. small market homes, noting that there is an imbalance in the local housing stock which will need to be managed to meet current and future demand.³ However, there is no provision within the pre-submission draft Local Plan to deliver such units.

5.10. Goudhurst village has a post office, convenience store, cafes and specialist shops. There are several pubs in the village, as well as a primary school, doctors' surgery and pharmacy. Further need for community learning and primary education facilities have been identified, as was need for improvements for existing medical facilities.

5.11. However, without further development sites being allocated in the village, the possibility of securing sufficient amount of developer contributions to improve the existing facilities, or provision of new ones (as outlined in the emerging policy PSTR/GO1) will be negligible.

5.12. As such, we would suggest that the spatial strategy and emerging policies for Goudhurst area are in direct conflict with paragraphs 61, 62 and 63 of the NPPF.

5.13. In this context, we would suggest that the "Five Fields" site should be considered as a potential residential development site which could deliver well designed units satisfying the local identified need for smaller and affordable units.

5.14. The site could also be suitable as an exception site for delivery of affordable housing in various forms/tenures, including the newly introduced First Homes initiative.

6. PLAN MAKING – TESTS OF SOUNDNESS

6.1. In order to formally adopt the Tunbridge Wells Borough Council Local Plan its policies must contribute to the achievement of sustainable development. This means that the Local Plan needs to deliver three overarching objectives, which are interdependent and need to be pursued in mutually supportive ways.

6.2. These objectives – economic, social and environmental – should, according to paragraph 9 of the NPPF, be delivered through the preparation and implementation of plans and application of the policies in the NPPF.

6.3. The pre-submission draft Local Plan is a strategic plan and as such it is vitally important that the plan is sound. Paragraph 35 of the NPPF states that Plans are '*sound*' if they are:

- . *positively prepared,*
- . *justified,*
- . *effective, and*
- . *consistent with national policy.*

6.4. In its current form the pre-submission draft Local Plan cannot be considered to be sound.

Is the Plan positively prepared?

6.5. We note that while the Plan is attempting to divert development away from the AONB area. Majority of proposed residential development is located in areas outside the AONB, and strategic allocation are secured by releasing land within the Metropolitan Green Belt.

6.6. While we generally support the protection of AONB, we are of the opinion that insufficient land for housing is provided within sustainable settlements such as Goudhurst.

6.7. The Goudhurst NDP Steering Group clearly identified that the existing Goudhurst population is ageing with the number of residents of over 65 rapidly increasing. At the same time, it was acknowledged that the Parish has a large proportion of detached dwellings and that there is a growing need to provide

smaller and more affordable housing options to support younger families and for those who wish to downsize. However, the TWBC Local Plan does not make any allocations for such development to take place over the plan period.

6.8. We highlighted in section 3 above, that the pre-submission draft Local Plan introduces unnecessary policy level in form of Local Green Spaces designations (Policy EN15) of sites which are already sufficiently protected by other local and national policies. This clearly conflicts with all criteria of paragraph 16 of the NPPF.

6.9. Paragraph 100 of the National Planning Policy Framework is clear that any such designation should only be used where the green area concerned is not an extensive tract of land. Furthermore, the National Planning Practice Guidance further specifies that LGS should not create new areas of 'green belt' by another name. Consequently, the designation of open countryside adjacent to Goudhurst settlement – particularly sites no. 99 (The Old Cricket Pitch) and no. 102 (Five Fields) - is neither appropriate nor acceptable.

6.10. Furthermore, the wording of pre-submission policy EN15 is not consistent with wording of paragraphs 145 and 146 of the NPPF which specify which development is and would be appropriate within Green Belt. As such, the current wording of the policy is not clear and is highly ambiguous and overly restrictive.

6.11. Throughout our representations we highlighted numerous instances how the pre-submission Local Plan policies fails to positively plan for identified needs of Goudhurst Parish, and fails to boost housing delivery in line with requirement of paragraph 59 of the NPPF.

Is the TWBC Local Plan justified?

6.12. As discussed throughout our representations, the pre-submission draft Local Plan Policy EN15 is not based on appropriate methodology.

6.13. The assessment of sites is inconsistent with the methodology selected. As such, we are of the opinion that this Policy is not robustly justified.

6.14. Furthermore, insufficient justification is provided to explain the Plan's lack of housing allocations in Goudhurst to allow for housing and economic growth over the entire length of plan period.

Is the TWBC Local Plan effective?

6.15. To be effective, the Local Plan has to be deliverable over the plan period and be based on effective joint working on cross boundary strategic matter that have been dealt with rather than deferred.

6.16. We note that no strategy is in place to respond to increasing demand for smaller and affordable housing in Goudhurst Parish over the plan period.

6.17. Furthermore, we suggest that in its current form the pre-submission Local Plan is only effective in preventing sustainable development in Goudhurst. Designation of sustainable sites which are well related to the settlement as Local Green Spaces will sterilise the village and only exacerbate existing housing imbalance. As such further sites for housing and economic development should be found.

Is the TWBC Local Plan consistent with national policy?

6.18. It has been highlighted throughout this document that the pre-submission draft Local Plan fails to boost the supply of housing, including affordable housing, in villages such as Goudhurst. As such, the document is in direct conflict with requirements of paragraphs 59, 60, 61, 62 and 63 of the National Planning Policy Framework.

6.19. Failure to allocate any sites for housing is also in direct conflict with paragraphs 68, and 69 of the NPPF which highlight that small and medium sites can make an important contribution to meeting the housing requirement of an area, and that neighbourhood groups should consider allocating such sites in their areas.

6.20. It is most disappointing that instead of providing space for both economic and housing growth on sites which could be sustainably located close to the existing settlement boundaries, the pre-submission Local Plan only copies the Goudhurst NDP Local Green Space designations of large swathes of land, effectively creating an area of Green Belt around the village.

6.21. It is strongly asserted that the designation of Five Fields site as an LGS is contrary to paragraph 100 of the NPPF as the site does not comply with the designation criteria. Such approach is not only

in conflict with the national planning policy (paragraphs 99 and 100), but also creates unnecessary layers of policy which are neither justified nor effective.

7. CONCLUSION

7.1. Our representations clearly demonstrate that the pre-submission version of the Tunbridge Wells Borough Council Local Plan is not positively prepared, as prohibitive policies are introduced which add unnecessary layers of policy to prevent development of sites that could otherwise be suitable for development.

7.2. Local Green Spaces designations within the High Weald AONB are unnecessary and inappropriate as the level of protection afforded by the Local Green Space designation is lower than that of existing local and national policies.

7.3. In its current form the emerging Policy EN15 is not justified as the methodology is based on inappropriate technical evidence, and assessment of sites is inconsistent with national criteria. It also appears to focus the LGS designations in Goudhurst on sites in private ownership to prevent future development on these sites.

7.4. We object, in the strongest possible terms, to the LGS designation of site no. 102 – Five Fields. The site clearly does not comply with criteria b) and c) of paragraph 100 of the NPPF and therefore its allocation is not justified and should be immediately removed.

7.5. As demonstrated in throughout, the emerging Local Plan is not positively prepared. Robust justification needs to be presented to support its policies. The plan is not effective, and if adopted in its current form, it will result in unnecessary confusion for the future decision makers.

We trust that that our comments are of assistance and await confirmation of receipt of our representations in due course.

8. APPENDICES

8.1. Regulation 14 consultation - Representations to Goudhurst NDP Steering Group by Bloomfields (November 2018)

8.2. Regulation 15 consultation - Representations to TWBC in respect of Goudhurst NDP pre-submission version (February 2021)

8.3. Site Ref. DPC 24 - SHELAA Assessment - January 2021

8.4. Extract from Local Green space Assessment - February 2021

[TWBC: for appendices, please see full representation attached as a supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Wording of emerging policy EN15 does not comply with paragraphs 145 and 146 of the NPPF

Please see the accompanying documents for details

[TWBC: the following extracts are from the representation document, for the full representation please see supporting documents]

3.4. We are of the opinion that the wording of the Policy EN15 is overly restrictive and does not reflect the requirement of paragraph 101 of the NPPF which states that:

“Policies for managing development within a Local Green Space should be consistent with those for Green Belts”.

3.5. If the Council is introducing a policy which is to be consistent with policies for managing Green Belts, any such consistency must be fully incorporated in the wording and must respect paragraphs 145 and 146 of the NPPF which provides specific guidance on what types of development are appropriate in the Green Belt.

3.6. However, this is not the case with the draft Policy EN15 which does not mention or incorporate any of the exceptions listed in paragraph 145 of the NPPF, or other forms of development listed in paragraph 146.

3.7. We therefore urge the Council to re-consider wording of the draft policy EN15 as follows:

“A Local Green Space is a designated area of green or open space that is demonstrably special to the local community it serves. Development within Local Green Spaces will be restricted to those types of development which are deemed appropriate by the relevant Green Belt policies contained within the NPPF”.

4.26. It is therefore respectfully requested that the site is **either removed from the LGS** designation all together (as it clearly benefits from a sufficient protection from development), **or that it is acknowledged that the site is suitable for residential development** due to its sustainable and logical location between two built up areas of Goudhurst.

5.12. As such, we would suggest that the spatial strategy and emerging policies for Goudhurst area are in direct conflict with paragraphs 61, 62 and 63 of the NPPF.

5.13. In this context, we would suggest that the “Five Fields” site should be considered as a potential residential development site which could deliver well designed units satisfying the local identified need for smaller and affordable units.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We wish to participate during sessions which are considering the emerging policy EN15, as well as sessions which will be considering the spatial strategy of Goudhurst

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1931 Rural Planning Practice for Henley SI Representation with Appendices Redacted.pdf](#)

Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am a resident of neighbouring Tonbridge & Malling and have lived in north Tonbridge for the last seven years. During this time I have gotten to know the areas that will be impacted by these policies well and appreciate their immense natural beauty and biodiversity as well as understanding some of the challenges that are already present: namely frequent and severe winter flooding as well as rat-running along small, windy country lanes. I have read arguments that much of the land is agricultural, heavily sprayed and therefore does not support wildlife, but this isn't true. The many trees in the fruit orchards are home to large numbers of overwintering redlist birds, the summer arable fields are frequented by significant numbers of nesting skylarks and the Medway Valley is an incredible wildlife corridor, which is enhanced by adjacent lakes created by past quarrying, ancient woodland (laden with wildflowers such as English bluebells, wood anemones) and hedgerows.

I believe the proposed draft plan is unsound on many levels and am most concerned by the loss of greenbelt / productive farmland, the adverse impact on the AONB, increased traffic and knockon effects on neighbouring Tonbridge. The impact of several thousand more cars commuting to and from Tonbridge's schools and to the railway station should not be underestimated. Already in the 7 years since I've lived here the time to drive along Hadlow Road to Tonbridge Station / schools has increased from 6 mins to 20 mins or more during the morning peak. This is pre-pandemic, but seeing as we don't yet know the long-term impact to working patterns I will stick to this as my frame of reference and without factoring in the impact of Tonbridge's own local plan - which will add many more houses to the town.

It is also my belief that this proposed development will do nothing to address the UK's housing crisis, it will merely create a new dormitory settlement that locks families into using their cars and to long commutes to London to generate the level of income which will be needed to afford mortgage payments on the types of homes which will be built. It will remove valuable agricultural land at a time when it's likely that food insecurity will increase and pave over more of our irreplaceable green space.

I think the proposed development is an opportunistic, ill-considered, lazy plan which TWBC have grasped onto because of its convenience, without rigorously and properly investigating alternatives which would be better served by existing infrastructure.

Building on this scale here will deprive everyone of immensely valuable natural assets and I do not believe the plan has been developed with appropriate input from local people. Neither do I believe that it is based on current figures of housing need. My opinion is that TWBC assumes everyone hates development, so they might as well pick one almighty fight in one place, then battle lots of communities over several 500 home developments around existing towns and villages. But this means they're not really interested in consultation. It's been presented as a fait accompli with anyone who objects portrayed as a NIMBY or anti-development. I am neither of these things.

People need good quality, affordable homes and they need clean air, food, and a healthy ecosystem. We need to stop making this binary and instead use the constraints of limited space and incomes to come up with truly innovative solutions to the UK's housing crisis, not just continue building housing

estates on green fields because it's easy - we've been doing this for decades and the evidence is that it's not the right solution.

Returning to the theme of consultation, it is my view that the exercise conducted in summer 2020 by the Hadlow Group was highly disingenuous. I registered, but declined to complete the survey as, having experience of marketing and research projects, I felt the survey was deliberately set up to create an illusion of favourable support from the local community for the options presented.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

This is utter nonsense. Building on this scale on pristine, unspoiled greenbelt can not possibly be construed as in any way sustainable. It is entirely at odds with the climate crisis and I believe it's irresponsible.

Question 4

Do you consider that the Local Plan:

Is sound	No
----------	----

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Having been a resident of Five Oak Green for 7 years, living on the B2017, I am greatly concerned that the proposed development of Tudeley Garden Village will result in a significant uplift in the volume of traffic on this rural road. Bus provision is very limited, cycling along the B2017 is extremely dangerous and there is no pavement or path for walkers apart from in the village itself. The B2017 is designated 'Unsuitable for Heavy Goods Vehicles' so unless new roads (with Provision for walkers and cyclists) are fully constructed before any building starts it will spell disaster for the area. At present most of the village children can walk to school along the B2017 but increased air pollution will enganger their health and development, as has now been proven in London.

As there is now hard evidence of Global Warming and climate change we, as a nation, should be doing everything in our power to put a halt to this. This massive development proposed for Tudeley will see Green Belt land devastated, flood plains built upon and much needed quality farmland destroyed. Whilst there is obviously a need for new housing, this would be better sited near existing amenities where there is already infrastructure in place. There are a number of Brownfield and other under used sites in the borough that should be utilised before considering ripping up precious Green Belt land.

If the new proposed development goes ahead, it will not serve the needs of the local population, but would attract residents from London seeking to get 'more for their money'. Rail commuters in this area already face the prospect of standing all the way to the city and my understanding is that Tonbridge station is near capacity with no prospect of increasing this.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Heyworth Properties Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Heyworth Properties Ltd have an option and "promotion agreement" on the land at Quaker Lane, which was allocated within the Reg 18 Draft Local Plan, but not carried forward within the Reg 19 Local Plan. This is a matter in which we return to. The land is owned by KCC and the County Authority are looking to replace the existing nursery building/facility and to generate a capital receipt for re-investment in other facilities locally.

1.1.3 In addition to this, Heyworth Properties are looking to deliver a high quality scheme that accords with the draft Policy in the Regulation 18 Plan, including the delivery of much needed affordable housing.

[TWBC: for Figure 1: Site Location (Courtesy of Kent Design Partnership) see full representation attached]

1.1.4 The 2.3hectare site is located some 630 metres to the north of the centre of Cranbrook, with residential development to the north and west, a school to the south and school sports fields to the east. The site appears as part of the somewhat "sub-urban" character of this part of Cranbrook and is a very natural extension to the settlement that can be achieved without material harm to the character and appearance of the AONB.

1.1.5 The surrounding area to the north contains the Cranbrook Rugby Club and beyond that open agricultural land. To the south lies the main built-up area of Cranbrook.

1.1.6 According to Tunbridge Wells Borough Council Policy Map, the site falls entirely within the High Weald Area of Outstanding Natural Beauty (AONB) and currently lies outside the Limits to Built Development.

1.1.7 Based on the current national and local planning context, we consider the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High

Weald Area of Outstanding Natural Beauty ('AONB'). Moreover we consider that deletion at Regulation 19 stage was without reason, and that the site was removed from the Local Plan, and other "replacement" sites, included without evidential base and justification. Such action has meant that sites have not been selected on a consistent basis and that the replacement sites have been added at Regulation 19 stage without due consideration.

1.1.8 We also take this opportunity to comment on wider aspects of the Local Plan, a plan which we consider fails the tests of "soundness".

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the Borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes. On the face of it we consider it unlikely that the plan should be able to be considered "sound".

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3 Vision and Strategic Objectives

1.3.1 The pre-submission plan is underpinned by a "vision and strategic objectives". The vision states:
[TWBC: PSLP Vision wording has been duplicated here - see full representation attached]

1.3.2 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Policy Strategic Objectives wording has been duplicated here - see full representation attached]

1.3.3 Response

1.3.4 Our client supports the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Heyworth Properties Ltd in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

[TWBC: the full representation attached has been divided into Policy STR/CRS1 (PSLP_2032), Vision and Strategic Objectives (PSLP_2034) and Policy STR1 (PSLP_2036)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Heyworth Properties Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Heyworth Properties Ltd have an option and "promotion agreement" on the land at Quaker Lane, which was allocated within the Reg 18 Draft Local Plan, but not carried forward within the Reg 19 Local Plan. This is a matter in which we return to. The land is owned by KCC and the County Authority are looking to replace the existing nursery building/facility and to generate a capital receipt for re-investment in other facilities locally.

1.1.3 In addition to this, Heyworth Properties are looking to deliver a high quality scheme that accords with the draft Policy in the Regulation 18 Plan, including the delivery of much needed affordable housing.

[TWBC: for Figure 1: Site Location (Courtesy of Kent Design Partnership) see full representation attached]

1.1.4 The 2.3hectare site is located some 630 metres to the north of the centre of Cranbrook, with residential development to the north and west, a school to the south and school sports fields to the east. The site appears as part of the somewhat "sub-urban" character of this part of Cranbrook and is a very natural extension to the settlement that can be achieved without material harm to the character and appearance of the AONB.

1.1.5 The surrounding area to the north contains the Cranbrook Rugby Club and beyond that open agricultural land. To the south lies the main built-up area of Cranbrook.

1.1.6 According to Tunbridge Wells Borough Council Policy Map, the site falls entirely within the High Weald Area of Outstanding Natural Beauty (AONB) and currently lies outside the Limits to Built Development.

1.1.7 Based on the current national and local planning context, we consider the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High

Weald Area of Outstanding Natural Beauty ('AONB'). Moreover we consider that deletion at Regulation 19 stage was without reason, and that the site was removed from the Local Plan, and other "replacement" sites, included without evidential base and justification. Such action has meant that sites have not been selected on a consistent basis and that the replacement sites have been added at Regulation 19 stage without due consideration.

1.1.8 We also take this opportunity to comment on wider aspects of the Local Plan, a plan which we consider fails the tests of "soundness".

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the Borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes. On the face of it we consider it unlikely that the plan should be able to be considered "sound".

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4 Development Strategy and Strategic Policies (Policy STR1)

1.4.1 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.4.2 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.3 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.4.4 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.5 At Regulation 18 stage the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version and as such

requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: PSLP Figure 5 Key Diagram has been duplicated here - see full representation attached]

1.4.6 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 wording has been duplicated here - see full representation attached]

1.4.7 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.8 Cranbrook is said to be an attractive, vibrant rural town located within the High Weald AONB in the eastern part of the borough. The local architecture and features, such as the Cranbrook Windmill and nearby Sissinghurst Castle, give it a distinctive character. Cranbrook also benefits from a good range of independent shops, a supermarket, secondary schools, a sports centre, and other local services and facilities.

1.4.9 Cranbrook and Hawkhurst both provide a range of services for their surrounding rural areas. They may grow in line with maintaining their roles, but this needs to be very sensitive to the high quality of their natural and built environments, as highlighted by their setting within the High Weald AONB and the conservation area designations of their historic cores.

1.4.10 The full proposed distribution of development is set out below.

[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached]

Response

1.4.11 Our client agrees that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.4.12 In respect of the wider strategy, our client supports the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area.

1.5 AONB Release

1.5.1 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.5.2 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;

(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and (3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.5.3 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.5.4 With the above criteria in mind, our clients consider there to be clear evidence of an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the

previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.5.5 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.5.6 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

- Ancient Woodland (approximately 16% of the borough)- Circa 60 Local Wildlife Sites (approximately 11% of the borough)- Ten Sites of Special Scientific Interest (SSSI)- Five Local Nature Reserves (including one Community Woodland)- One Regionally Important Geological Site, at Scotney Castle Quarry.

1.5.7 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.5.8 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.5.9 Given the above constraints, planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.6 Housing Delivery

1.6.1 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.6.2 It is a fact that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about whether a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.6.3 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area. Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for Housing completion rates 2010 to 2015 see full representation attached]

1.6.4 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.6.5 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached]

1.6.6 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.6.7 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents.

1.6.8 Taking Paragraph 68 of the NPPF into account, which is clear that small and medium sized sites make an important contribution to meeting the housing requirements of an area and are often built out quickly, we consider the site in discussion needs to be carefully considered, especially when noting the LPA's shortfall of housing delivery.

1.7 Case for the Site

1.7.1 The site was allocated within the Tunbridge Wells draft Local Plan (August 2019) for residential development (Policy AL/CRS 5), 'providing 35-45 dwellings, replacement children's nursery, and safeguarding of land for future primary school expansion'.

1.7.2 While we note that the site was recently removed at Regulation 19 stage, we understand that this was solely due to concerns in respect of an assessment that access arrangements could give rise to a harmful visual impact and erode the sylvan quality of Angley Road.

1.7.3 Planning application ref: 21/00519/FULL was submitted 25th February 2021 and notwithstanding the recent refusal we consider that the proposal as presented can be delivered without material harm to the AONB.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Heyworth Properties Ltd in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Heyworth Properties Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Heyworth Properties Ltd have an option and "promotion agreement" on the land at Quaker Lane, which was allocated within the Reg 18 Draft Local Plan, but not carried forward within the Reg 19 Local Plan. This is a matter in which we return to. The land is owned by KCC and the County Authority are looking to replace the existing nursery building/facility and to generate a capital receipt for re-investment in other facilities locally.

1.1.3 In addition to this, Heyworth Properties are looking to deliver a high quality scheme that accords with the draft Policy in the Regulation 18 Plan, including the delivery of much needed affordable housing.

[TWBC: for Figure 1: Site Location (Courtesy of Kent Design Partnership) see full representation attached]

1.1.4 The 2.3hectare site is located some 630 metres to the north of the centre of Cranbrook, with residential development to the north and west, a school to the south and school sports fields to the east. The site appears as part of the somewhat "sub-urban" character of this part of Cranbrook and is a very natural extension to the settlement that can be achieved without material harm to the character and appearance of the AONB.

1.1.5 The surrounding area to the north contains the Cranbrook Rugby Club and beyond that open agricultural land. To the south lies the main built-up area of Cranbrook.

1.1.6 According to Tunbridge Wells Borough Council Policy Map, the site falls entirely within the High Weald Area of Outstanding Natural Beauty (AONB) and currently lies outside the Limits to Built Development.

1.1.7 Based on the current national and local planning context, we consider the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). Moreover we consider that deletion at Regulation 19 stage was without reason, and that the site was removed from the Local Plan, and other "replacement" sites, included without evidential base and justification. Such action has meant that sites have not been selected on a consistent basis and that the replacement sites have been added at Regulation 19 stage without due consideration.

1.1.8 We also take this opportunity to comment on wider aspects of the Local Plan, a plan which we consider fails the tests of "soundness".

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the Borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes. On the face of it we consider it unlikely that the plan should be able to be considered "sound".

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.7 Case for the Site

1.7.1 The site was allocated within the Tunbridge Wells draft Local Plan (August 2019) for residential development (Policy AL/CRS 5), 'providing 35-45 dwellings, replacement children's nursery, and safeguarding of land for future primary school expansion'.

1.7.2 While we note that the site was recently removed at Regulation 19 stage, we understand that this was solely due to concerns in respect of an assessment that access arrangements could give rise to a harmful visual impact and erode the sylvan quality of Angley Road.

1.7.3 Planning application ref: 21/00519/FULL was submitted 25th February 2021 and notwithstanding the recent refusal we consider that the proposal as presented can be delivered without material harm to the AONB.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Heyworth Properties Ltd in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

STR/SS1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These comments apply to both STR/SS1 and STR/SS3 but have been submitted separately to ensure they are applied to both.

My initial comment is to express my disgust at the cavalier attitude displayed by TWBC to the residents of Capel and the surrounding area by utterly ignoring the overwhelming 97% opposition to the plan at Reg18 stage. So much for democracy and listening to the concerns of local people. TWBC is seeking to force Capel Ward - one out of 20 in the Borough, to take 51% of the housing target where the need for this amount of housing in the area has not been demonstrated.

The development in East Capel is part of the supersizing of Paddock Wood but this allocation is entirely on a flood plain.

With reference to the Green Belt, the whole point of this was to prevent urban sprawl but this plan is designed to drive a coach and horses through that. The extension of Paddock Wood in Capel Parish will see development adjacent to the A228. The B2017 from the roundabout to Five Oak Green contains ribbon development so the new development will cause coalescence of what were previously 2 separate built areas, exactly what the Green Belt was designed to avoid. There is no evidence of NEED for housing on this scale in this area. On March 3rd 2021 the Prime Minister answered a question from Mike Wood, Conservative MP for Dudley South regarding development and the Green Belt to which he replied "Indeed, Mr Speaker, we will protect our green belt, our vital green belt, and which constitutes, I think, 12.4% of our land, but we can build our homes, as my Right Honourable friend rightly suggests, 300,000 of them on brownfield sites across the country". As far as I can see, TWBC has not demonstrated that the exceptional circumstances required to justify development of the Green Belt exist. TWBC are blighting this part of the borough by dumping 50% of their housing target in one ward, ignoring the brownfield sites which are available and re-purposing of empty buildings. The cinema site in the centre of Tunbridge Wells has been derelict for years and there are numerous empty buildings in the Town Centre which could be re-purposed.

Biodiversity – bland statements about net gains for biodiversity. How on earth do you replace hundreds of years of nature building habitats for flora and fauna by planting a few urban street trees and sticking in a few green wedges. The whole concept is laughable except I see nothing to laugh about. I know just from what I see in my own garden, that this area is home to protected species – native slow worms, grass snakes, common lizards etc., never mind all the birds and mammals and yet ancient woodlands are seen as disposable by this Council. How does the removal of woodland help the fight against climate change and improvement in air quality. Planting new trees will not be effective in this respect for many years to come.

New roads are proposed, a link road to the new Tudeley town and a Colts Hill by-pass which will take up more farmland. I struggle to understand why good quality farming land both for the Colts Hill bypass and Tudeley new town is considered suitable for housing. Surely the aim of reducing our carbon footprint is better served by growing food locally. Once you have destroyed this land it cannot be returned to food production.

Provision of suitable housing – when left to developers, profit is king. The big expensive houses they want to build do not fulfil the needs of the community and will they sell? There are two new 4 bed detached houses in Five Oak Green which took nearly 2 years to sell. If the demand was there, why have they not sold? Is it perhaps because at £850k we can't afford them?

When the time comes in the not too distant future when I want to move into more suitable accommodation, I want a small affordable bungalow in the local area, something which is in very short supply and unlikely to be provided by these new developments. The overpriced retirement apartments with their no doubt high service charges which are springing up all over Tunbridge Wells are something I shall never consider buying.

Affordable housing is not something that developers want to provide, the need cannot be met by the market because it does not provide the profits required.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Rosemarie Hicken
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My initial comment is to express my disgust at the cavalier attitude displayed by TWBC to the residents of Capel and the surrounding area by utterly ignoring the overwhelming 97% opposition to the plan at Reg18 stage. A record number of comments were received at this stage (1174 comments from 804 people) objecting to the Garden village strategy but these have simply been brushed aside. So much for democracy and listening to the concerns of local people. TWBC is seeking to force Capel Ward - one out of 20 in the Borough, to take 51% of the housing target where the need for this amount of housing in the area has not been demonstrated.

When the Issues & Options document was prepared and issued for consultation, the majority of responses favoured a growth corridor approach over the garden village concept. The site at Castle Hill which has been put forward for development fits with the growth corridor approach and is more relevant now that the £200 million Kingstanding Way Business Park has been given the go ahead. It benefits from being adjacent to the A21 unlike the Tudeley development which is on the B2017. This site is also more suitable as it is closer to a main line station - High Brooms as opposed to Paddock Wood or Tonbridge. The architects of Tudeley new town optimistically include a station but Network Rail have not stated that they have any plans to provide one.

With reference to the Green Belt, the whole point of this was to prevent urban sprawl but this plan is designed to drive a coach and horses through that. Putting in a new town at Tudeley and the extension of Paddock Wood in Capel Parish by releasing Green belt land will open the door to further development. The Garden of England will rapidly become the back yard of London as there is no evidence of NEED for housing on this scale in this area. On March 3rd 2021 the Prime Minister answered a question from Mike Wood, Conservative MP for Dudley South regarding development and the Green Belt to which he replied "Indeed, Mr Speaker, we will protect our green belt, our vital green belt, and which constitutes, I think, 12.4% of our land, but we can build our homes, as my Right Honourable friend rightly suggests, 300,000 of them on brownfield sites across the country". As far as I can see, TWBC has not demonstrated that the exceptional circumstances required to justify development of the Green Belt exist. They have merely taken the easy route of accepting the offer of land from one landowner to dump 50% of their housing target in one ward, ignoring the brownfield sites which are available and re-purposing of empty buildings. The old cinema site in the centre of Tunbridge Wells which has been derelict for years being a prime example.

Biodiversity – bland statements about net gains for biodiversity. How on earth do you replace hundreds of years of nature building habitats for flora and fauna by planting a few urban street trees and sticking in a few green wedges. The whole concept is laughable except I see nothing to laugh about. I know just from what I see in my own garden, that this area is home to protected species – native slow worms, grass snakes, common lizards etc., never mind all the birds and mammals and yet ancient woodlands are seen as disposable by this Council.

New roads are proposed, a link road to the new Tudeley town and a Colts Hill by-pass which will take up more farmland. I struggle to understand why good quality farming land both for the Colts Hill bypass and Tudeley new town is considered suitable for housing. Surely the aim of reducing our carbon

footprint is better served by growing food locally. Once you have destroyed this land it cannot be returned to food production.

Provision of suitable housing – when left to developers, profit is king. The big expensive houses they want to build do not fulfil the needs of the community and will they sell? There are two new 4 bed detached houses in Five Oak Green which took nearly 2 years to sell. If the demand was there, why have they not sold? Is it perhaps because at £850k we can't afford them?

When the time comes in the not too distant future when I want to move into more suitable accommodation, I want a small affordable bungalow in the local area, something which is in very short supply and unlikely to be provided by these new developments. The overpriced retirement apartments with their no doubt high service charges which are springing up all over Tunbridge Wells are something I shall never consider buying.

Affordable housing is not something that developers want to provide, the need cannot be met by the market because it does not provide the profits required.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many sites have been put forward for housing in the area which have been rejected by the Council in their pursuit of a single strategy of building on the farmland around existing built areas. The housing targets need to be distributed across the borough to serve the needs of local people not to provide relatively lower cost housing to the residents of London and Sevenoaks.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/PW 1 The Strategy for Paddock Wood	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Page 167-168 mention infrastructure. The current three developments are proceeding however the plans around water infrastructure / flood control have not been closed out. I believe that discussions with the water company were not effectively closed out before the start of building. Given the well-known issues with flooding in areas of Paddock Wood, the infrastructure plan must be reviewed and a consolidated plan of works put in place before any further works (or phases of build) are allowed. The situation that has been allowed to develop indicates roles and responsibilities (and accountability) for the successful execution of a full remediation with the water company and building firms need urgently reviewed.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The infrastructure work (water – waste – flood prevention) needs to be completed prior to any further work being allowed. The work must not utilise existing pipework given it is not “fit for purpose” and needs resolving prior to any further build work commencing.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In terms transport, previously the rail firms had considered having trains run “fast” and not stop at stations such as Paddock Wood. This would have a serious impact on sustainability. It would also suggest that potential new stations at Capel would not be a serious option.

HWAONB Unit Representation on STR1 – The Development Strategy

1.0 General Comments

1.1 The High Weald AONB Unit acknowledges that Tunbridge Wells Borough Council has sought to address the Unit's previous representations in its preparation of the Regulation 19 Local Plan. In particular we welcome the following:

- The assessment of whether potential allocation sites in the AONB constitute major development, and whether they meet the NPPF 172 tests;
- The reduction in the number of major development sites in the AONB and the reduction in the scale of some of the sites retained; and
- The amendments to a number of development management policies in response to the Unit's comments at Regulation 18 stage.

1.2 However, the Unit remains concerned about the overall level of development being proposed within the AONB and the impact of the retained major development sites. Whilst it appreciates the additional evidence the Borough Council has produced to justify these sites (such as the Landscape and Visual Impact Assessment, the AONB Setting Analysis Report and the Grassland Survey) it has significant issues with the assumptions and outcomes of these studies. The following statement sets out why the Unit believes that this approach is not justified and is contrary to national policy and guidance. It also explains why it believes that the proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated.

2.0 The High Weald AONB

2.1 The High Weald was designated in 1983 as an Area of Outstanding Natural Beauty. It is an exceptionally beautiful medieval landscape covering 564 square miles across the counties of East and West Sussex, Kent and Surrey.

2.2 The High Weald AONB Joint Advisory Committee was established in 1989 and is a partnership of 15 local authorities, Defra, Natural England and organisations representing farming, woodland, access and community interests. The JAC is responsible for publishing and monitoring the statutory AONB Management Plan. The JAC is supported by a small, dedicated staff team, the High Weald AONB Unit, which provides advice on how to conserve and enhance the AONB. The advice provided by the AONB Unit assists public bodies and statutory undertakers to meet their duty as set out in Section 85 of the Countryside and Rights of Way Act 2000 to have regard to the purpose of conserving and enhancing the natural beauty of AONBs in making decisions that affect it.

2.3 The High Weald AONB Unit is an advisory body not a local planning authority and it has no statutory powers. The AONB Unit is not a statutory consultee on planning matters, but offers advice based on the statutory High Weald AONB Management Plan, which has been adopted by all partner authorities, as 'their policy for the management of the area and for the carrying out of their functions in relation to it'.

3.0 National Policy and Guidance in Relation to AONBs

3.1 The National Planning Policy Framework (NPPF) paragraph 172 requires great weight to be given to conserving and enhancing landscape and scenic beauty in Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty. The conservation of wildlife and cultural heritage are important considerations in all these areas. The scale and extent of development within these designated areas should be limited.

3.2 In the event that the decision-maker concludes that development is 'major' in terms of its impact on the AONB, paragraph 172 of the NPPF states that "Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of:

a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated".

3.3 Footnote 55 says: "For the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined".

3.4 NPPF paragraph 11 explains the presumption in favour of sustainable development. It says that local planning authorities should provide for objectively assessed needs for housing and other uses, as well as any unmet needs from neighbouring areas, unless **"the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"**. The assets referred to are listed in footnote 6 and include Areas of Outstanding Natural Beauty. The most relevant policy in the Framework for AONBs is paragraph 172 as above.

3.5 Planning Practice Guidance, revised July 2019, states "The National Planning Policy Framework makes clear that the scale and extent of development in these areas should be limited, in view of the importance of conserving and enhancing their landscapes and scenic beauty. Its policies for protecting these areas may mean that it is not possible to meet objectively assessed needs for development in full through the plan-making process, and they are unlikely to be suitable areas for accommodating unmet needs from adjoining (non-designated) areas. Effective joint working between planning authorities covering designated and adjoining areas, through the preparation and maintenance of statements of common ground, is particularly important in helping to identify how housing and other needs can best be accommodated..." Paragraph: 041 Reference ID: 8-041-20190721.

3.6 On 16 December 2020 the government announced how it would be responding to widespread concern about its proposals to amend the standard method for calculating housing need. This response confirmed that the Government would not be progressing these changes, but rather would be retaining the existing standard method for most local planning authorities and boosting supply by increasing the housing numbers of the 20 largest cities in England by 35%. The Government's response included the following statements:

"we heard suggestions in the consultation that in some places the numbers produced by the standard method pose a risk to protected landscapes and Green Belt. **We should be clear that meeting housing need is never a reason to cause unacceptable harm to such places.** But harm or homes is not a binary choice. We can plan for well designed, beautiful homes, with access to the right infrastructure in the places where people need and want to live while also protecting the environment and green spaces communities most value".

"Many respondents to the consultation were concerned that the 'targets' provided by the standard method were not appropriate for individual local authority areas. **Within the current planning system**

the standard method does not present a ‘target’ in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints. In order to make this policy position as clear as possible, we will explore how we can make changes through future revisions to the National Planning Policy Framework, including whether a renaming of the policy could provide additional clarity”. 3.7 The above statements do not change existing policy, but reaffirm the existing situation in the NPPF that the housing need numbers produced by the standard method are just a starting point and not a target. 70% of Tunbridge Wells borough is within the High Weald AONB, and yet, the Regulation 19 Local Plan is predicated on the Borough Council meeting its full housing need figure of 678 dwellings per year, or some 12,200 over the plan period of 2020 to 2038. This has severe repercussions for the AONB and prevents the Local Plan from conserving and enhancing its natural beauty.

5.0 Major Development in the High Weald AONB

The Major Development Sites

5.1 Appendix 2 and 3 of the Development Strategy Topic Paper provides the justification for why some of the proposed allocation sites have been considered ‘major development’ in the terms of paragraph 172 of the NPPF and some are not. This assessment has been carried out in a transparent way, and the NPPF makes it clear that whether a development is major or not is a matter for the decision-maker.

5.2 The sites identified as major are as follows:

AL/RTW16 Land at Spratsbrook Farm	120 dwellings	(As the developable part of the site is outside the AONB it is considered that this should be treated as a site in the setting of the AONB rather than major development within it)
AL/RTW17 Longfield Road, Tunbridge Wells	80,000sqm	employment
AL/CRS1&2 Brick Kiln Farm & Corn Valley	215-225 dwellings	AL/CRS3 Turnden, Cranbrook
200-204 dwellings	AL/HA1 The White House, Hawkhurst	43
apartments	AL/HA4 Copthall Avenue, Hawkhurst	70-79 dwellings
AL/BM1 Maidstone Road, Brenchley	45 dwellings	AL/PE1,2&3 Pembury
	210-220 dwellings	Total
903-936 dwellings		

5.3 Some of the above sites already have status in the planning system as follows:

- AL/CRS1&2 Brick Kiln Farm & Corn Valley: These sites were allocated in the 2016 DPD and 180 dwellings at Brick Kiln Farm has outline planning permission;
- AL/CRS3 Turnden, Cranbrook: 36 dwellings already granted full planning permission on the farmstead part of the site;
- AL/HA1 The White House, Hawkhurst: planning permission already granted for 43 retirement apartments;
- AL/BM1 Maidstone Road, Brenchley: outline and reserved matters permission already granted for 45 dwellings.

5.4 The dwellings proposed on major development sites in the AONB with no current planning status are:

- AL/CRS3 Turnden, Cranbrook 164-168 dwellings
 - AL/HA4 Copthall Avenue, Hawkhurst 70-79 dwellings
 - AL/PE1,2&3 Pembury 210-220 dwellings
 - **Total**
- 444-467 dwellings**

5.5 It should be noted that option GS2 in the Sustainability Appraisal assumes that reducing development below the housing need to one that does not involve any major development in the High Weald AONB would result in the scale of housing being reduced by between 1,600 - 2000 dwellings (17% of housing need for 11,526). It is not clear where this number comes from. It is the Unit's understanding that sites already allocated in an adopted Plan or granted outline or full planning permission would go ahead even if all major development sites in the AONB were removed from this Local Plan. Therefore the reduction in housing numbers would be 444-467 dwellings, or about 4% of 11,526.

The Major Development Tests

5.6 As quoted in paragraph 3.2 above, NPPF 172 says that “Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest” and provides a number of tests for the consideration of

such applications. Whilst the wording of this paragraph does not refer to allocations at the plan-making stage, if these tests are not applied at this stage there is a significant risk that allocations will not be deliverable, which would conflict with the test of soundness on effectiveness.

5.7 The Unit believes that the proposed major development allocations fail the NPPF 172 tests for the following reasons:

- **The need for the development:** the Borough Council argues that the high housing need for the area necessitates major development in the AONB. However, this argument is circular. If the conservation and enhancement of the AONB was given great weight as required by NPPF 172 then the housing requirement figure for the Borough would be adjusted downwards to reflect the fact that 70% of the area is AONB, and there would be no 'necessity' to locate large amounts of development within the AONB.

- **Developing outside the designated area, or meeting the need for it in some other way:** Even if it is necessary to allocate some development within the AONB that does not mean that such provision should be in the form of major development sites. As explained below, the High Weald landscape is small scale in character and can accommodate small scale development successfully without damaging its natural beauty.

- **Any detrimental effect on the environment:** this is explored in more detail below.

The Impact of Major Development on the AONB

5.8 National policy and legislation requires decision-makers to have regard and give great weight to conserving and enhancing the natural beauty of AONBs. In the High Weald this natural beauty is defined in the AONB Management Plan's Statement of Significance, which identifies five defining components of character that have made the High Weald a recognisably distinct and homogenous area for at least the last 700 years.

1. Geology, landform and water systems – a deeply incised, ridged and faulted landform of clays and sandstone with numerous gill streams. 2. Settlement – dispersed historic settlement including high densities of isolated farmsteads and late Medieval villages founded on trade and non-agricultural rural industries. 3. Routeways – a dense network of historic routeways (now roads, tracks and paths). 4. Woodland – abundance of ancient woodland, highly interconnected and in smallholdings. 5. Field and Heath – small, irregular and productive fields, bounded by hedgerows and woods, and typically used for livestock grazing; with distinctive zones of lowland heaths, and inned river valleys.

Other equally important characteristics are also identified in the Management Plan under sections on the land-based economy and related rural life and 'other qualities'.

5.9 The objectives for the settlement component are:

- Objective S1: To reconnect settlements, residents and their supporting economic activity with the surrounding countryside;
- Objective S2: To protect the historic pattern and character of settlement;
- and • Objective S3: To enhance the architectural quality of the High Weald and ensure development reflects the character of the High Weald in its scale, layout and design.

5.10 One of the actions for objective S2 is to "Seek to prioritise the delivery of new housing primarily through small-scale development and a mix of housing sizes that responds to local needs". Small scale carefully designed development can be accommodated successfully in this landscape whilst retaining its character, but large-scale developments are much more challenging to integrate successfully without detrimental effects. It is the view of the High Weald AONB Unit that major development cannot be accommodated within the AONB without damaging the essentially human scale character of the area or the purposes of the designation.

5.11 The 5 core components derive from the natural geology, topography and soils of the area and how people have used them over the centuries. Unlike the historically communally farmed landscapes of the Midlands which the national planning system is based on, the High Weald does not have nucleated towns and villages that are separated by open unoccupied countryside where any development would be 'isolated'. Instead it is based on a high density of medieval farmsteads most of which were farmed 'in severalty' – that is by individual families rather than as part of wider estates or communal systems. They were dispersed across the High Weald, surrounded by enough land to support a family and managed as mixed farms to suit the soil conditions and topography and to maximise self-sufficiency. Trees and hedges were an important component of the farming systems and fields were often carved out of woodland by hand (assarts) resulting in their characteristic small and irregular

shape. The challenging topography and soil conditions, which are suited to growing trees and grass rather than crops, mean that the High Weald has retained its Medieval character, with its small fields and woodland shaws, and its high density of historic routeways.

5.12 This history is important because it explains the human scale of the landscape components which comprise the natural beauty of the High Weald and the importance of the dispersed settlement pattern created by the farmsteads. Hamlets, villages and small towns evolved in the late Medieval period and onwards at the intersection of routeways and around commons to facilitate trading between farmsteads and the creation of small industries and crafts. Whilst these settlements are more consolidated, many have farmsteads on their outskirts and it is particularly important to maintain the separation between these two different settlement types so that the historic landscape remains legible for future generations. Continually adding to the larger villages and towns threatens this historic character, especially when it subsumes these adjacent farmsteads. Large-scale developments sit uncomfortably in this landscape because they overlap historic field systems and dominate the small scale historic settlement pattern. Whilst retaining field boundaries and historic features within new developments is important, it cannot overcome the basic incompatibility of locating large scale development within such a small scale landscape. It therefore inevitably fails to conserve and enhance the natural beauty of the AONB.

Landscape and Visual Impact Assessment

5.13 Following the Regulation 18 consultation the Borough Council commissioned Hankinson Duckett Associates to undertake a Landscape and Visual Impact Assessment of 21 potential allocation sites in the AONB. The AONB Unit was consulted on the brief to these consultants but not on the outcome of the work.

5.14 Appendix B to this submission identifies the detailed concerns with this work. Whilst it has a particular focus on the proposed site at Turnden, the concerns about the overall approach apply to all of the major development sites proposed in the AONB in the Regulation 19 Plan. These can be broadly summarised as follows:

- The Assessment consistently downgrades impact on the AONB;
- The imprecise method encourages operator bias and its opaque nature discourages scrutiny;
- The site assessments are inconsistent, partial, unsubstantiated and peppered with loaded phrases;
- There is a visual bias across the assessments with the impact on landscape as a resource being significantly underplayed;
- The cumulative effects of development under each site assessment section do not deal in specifics and when they do they focus almost entirely on visual effects – separation, viewpoints and planting – rather than landscape effects such as the loss of soils; field systems and their potential for biodiversity or food production; rurality, dark skies, tranquillity or other perceptual qualities.

5.15 For the reasons detailed above and in Appendix B it is considered that this LVIA should not be relied upon and it should be accepted that major development within the AONB will have a severe detrimental impact on the natural beauty of the High Weald.

6.0 Development in the Setting of the AONB

6.1 Even if Growth Strategy 2 was followed and the uncommitted major development sites in the AONB removed from the Local Plan, the remaining growth proposed would still have a significant impact on the designated area. This is because only 30% of the Borough is outside of the AONB so attempting to meet all or nearly all of the housing need figure puts tremendous pressure on this area, including where it abuts or is close to the AONB boundary. Developments outside but affecting the AONB include:

- Paddock Wood / land east of Capel Parish 3,490-3,590 dwellings
- Tudeley Garden Village 2,800 dwellings
- Horsmonden 240-320 dwellings
- Spratsbrook Farm, Tunbridge Wells 120 dwellings
- Benenden Hospital 47-50 dwellings

6.2 The Borough Council commissioned Hankinson Duckett Associates to produce an 'AONB Setting Analysis Report'. Whilst the work that has gone into this study is appreciated, the Unit was not consulted on its methodology or outcomes. The study focuses primarily on the inter-visibility of developments and direct impacts and does not address the wider impacts of accommodating this level of growth so close to the boundary of the AONB. These impacts include:

- Increased visitor numbers to the AONB placing pressure on its recreational facilities and infrastructure;
- Increased traffic travelling through the AONB to access the new developments and the highway 'improvements' required to accommodate this;
- Loss of tranquillity arising from the above;
- Increase

in air pollution arising from the above;• Light pollution from developments on the edge of the AONB and from highway improvements which require to be lit.

6.3 The above impacts would be reduced if the overall housing number was reduced to reflect the 70% of the Borough which lies within the AONB rather than trying to meet the full housing need by squeezing as much as possible into the remaining area. This statement focuses on the impact of this strategy on the AONB because that is the Unit's remit. However, this does not mean we are blind to the devastating impact of the planned level of growth on the area outside of the AONB, much of which is Green Belt and/or Low Weald countryside which is highly valued by its residents.

7.0 Conclusion

7.1 The High Weald AONB Unit believes that the overall level of development proposed and the major development sites allocated in the AONB are not justified and are contrary to national policy and guidance. The proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated and would fail to conserve and enhance this national asset. It is therefore recommended that there is a reduction in the overall housing figure and that all the major development sites in the AONB be deleted from the Local Plan.

[TWBC: see supporting document attached]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Reduction in overall housing figure to reflect the need to limit development due to the high proportion of the Borough in the AONB and the deletion of all major development sites in the AONB.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.0 The Sustainability Appraisal

4.1 The Sustainability Appraisal is the main tool by which the Borough Council assesses the options for the level of growth and its distribution, and selects its development strategy. NPPF paragraph 32 says that "Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements" and paragraph 35 says that Plans are 'sound' if they meet the tests, including "Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence".

4.2 The Sustainability Appraisal for the Regulation 19 Local Plan assesses a number of growth options against sustainability objectives. Appendix A to this statement shows the scores and commentary for two of these options:

- GS13 - The strategy reflected in the Regulation 19 Local Plan; and
- GS2 - A strategy which reduces development below the housing need to one that does not involve any major development in the High Weald AONB.

This exercise has been carried out to understand the reasoning behind the selection of the Local Plan strategy compared to the option that most closely aligns to the AONB Unit's position, albeit it doesn't address its concerns about the impact of overall levels of growth on the setting of the AONB.

4.3 Appendix 1 demonstrates the following:

- That the economic objectives are double-counted in the assessment by the application of two objectives on business growth and employment and no account is taken of the benefit the AONB brings to the tourism industry;
- That the perceived impact of strategies on areas of deprivation is double-counted in the assessment by the application of two objectives on health and deprivation and no account is taken of the need for such areas to have good access to the countryside which would be lost to major development under GS13;
- That the assessment of the impact of option GS2 on climate change is clearly incorrect and conflicts with the commentary. This option will be much more positive for the climate change objective than GS13, not just because of reductions in transport and carbon emissions from new dwellings but due to the carbon sequestration function of soils and natural habitats;
- The heritage score for GS2 should be positive to reflect the heritage value of the landscape itself (medieval field systems etc) which would be impacted less under GS2 than GS13. Heritage is not just about listed buildings and conservation areas;
- Whilst it is agreed that GS2 would have a less positive impact on housing than GS13, the suggestion that building more dwellings in the AONB would reduce house prices is unsubstantiated and goes against known evidence. To meet housing needs in the AONB requires more genuinely affordable housing not more £300k+ houses. It is also noted in paragraph 5.5 below that the reduction in housing numbers for this option appears to have been over-estimated, which would affect the relative scores for this objective;
- Landuse - this objective is supposed to be about protecting soils, and reusing previously developed land and buildings. Instead the scoring seems to focus on impacts on the greenbelt. Since most of the major development sites in the AONB are on greenfield land GS2 should score much more positively than GS13;
- The landscape score for GS2 should be much more positive because it significantly reduces the harm to the AONB, which has the highest planning status in respect of landscape and scenic beauty. This is the only objective which mentions the AONB, and does so alongside all other landscape impacts, diluting its importance in the overall assessment of sustainability whereas the NPPF requires that AONBs be given 'great weight';
- Travel - As the only difference between GS2 and GS13 is the omission of major development sites in the AONB, which as the commentary says will be in areas where alternative transport modes are not popular or viable, the score for GS2 should be more positive for the travel objective than GS13 rather than the opposite as shown.
- Water - If the score is not significantly affected by reduction in growth in the AONB as per the commentary then it should be the same for GS2 and GS13.

4.4 If the above inaccuracies and inconsistencies in the scoring were corrected then GS2 would score more positively overall than the strategy selected for the Regulation 19 Local Plan.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Do you consider that the Local Plan:	

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

HWAONB Unit Representation on AL/CRS3 for 164-168 additional dwellings at Turnden Farm, Hartley Road, Cranbrook

1.0 Introduction

1.1 The principle of major development in the AONB is discussed in the AONB Unit's submission on STR1 – The Development Strategy – and is not repeated here. This submission focuses on the Landscape and Visual Impact Assessment carried out on potential major development sites in the AONB and the specific impacts of the proposed allocation at Turnden.

2.0 Landscape and Visual Impact Assessment

2.1 Following the Regulation 18 consultation the Borough Council commissioned Hankinson Duckett Associates to undertake a Landscape and Visual Impact Assessment of 21 potential allocation sites in the AONB, including the site at Turnden. The AONB Unit was consulted on the brief to these consultants but not on the outcome of the work.

2.2 Appendix B to the AONB Unit's submission on STR1 identifies the detailed concerns with this work. The concerns about the overall approach apply to all of the major development sites proposed in the AONB in the Regulation 19 Plan. These can be broadly summarised as follows:

- The Assessment consistently downgrades impact on the AONB;
- The imprecise method encourages operator bias and its opaque nature discourages scrutiny;
- The site assessments are inconsistent, partial, unsubstantiated and peppered with loaded phrases;
- There is a visual bias across the assessments with the impact on landscape as a resource being significantly underplayed;
- The cumulative effects of development under each site assessment section do not deal in specifics and when they do they focus almost entirely on visual effects – separation, viewpoints and planting – rather than landscape effects such as the loss of soils; field systems and their potential for biodiversity or food production; rurality, dark skies, tranquillity or other perceptual qualities.

2.3 In relation to the Turnden site, the assessment emphasises perceived negative traits but fails to acknowledge the following positive features:

- The variety and quality of birdsong and the perception of rural tranquillity experienced by users of the footpath through the site;
- The extensive long views from the footpath out to the Greensand ridge over 10 miles away;
- The valuable relatively undisturbed nature of the soils and species diversity of the grassland.

2.4 Unsubstantiated claims are made about the Turnden site such as:

- 'the proposals are in keeping with Cranbrook's existing settlement pattern';
- 'the proposals would result in a significant increase in woodland cover';
- 'the proposed development has the potential to

open up access to new areas of the AONB' (even though a footpath already exists providing public access across the site, part of a well- used circular walk from the village).

2.5 Benefits are claimed without a balancing view of what will be lost. For example, new woodland screening would be 'beneficial' for people using the rights of way when, in reality, the planting will obscure sweeping views across the site and out to the Greensand ridge over 10 miles distant. Similarly, new woodland and wildflower meadow would 'replace disused pony paddocks' when the pony paddocks already have a range of species supporting a wealth of invertebrates, birds, bats, amphibians and mammals.

2.6 The negative adjectives appear again in the conclusions along with claims of unsubstantiated benefits. Unsurprisingly, the conclusion is that development would not result in significant effects.

2.7 The cumulative effects of CRS 4 (Turnden) in conjunction with the adjacent Brick Kiln Farm allocation are not analysed but, nevertheless, a conclusion is reached. The effects are described as 'detrimental or beneficial' and not likely to be significant adverse if the designs are linked (para 6.6.7.4). It is hard to see how a neutral evaluation could come to this conclusion about the impact of 400+ houses and associated access/ parking on a small-scale medieval landscape. This is an example of a narrative constructed with an ideological bias in favour of development.

3.0 The Landscape Character of the Turnden Site

3.1 The High Weald AONB is a nationally important landscape because of the high survival of ancient countryside and its associated rich natural environment across a large area. The pattern of this small-scale landscape has changed very little over the last 700 years; it is one of the best surviving medieval landscape in North West Europe. It should be recognised that the traditional separation in planning between landscape and heritage issues is not appropriate in the context of the High Weald where the historic character and cultural heritage is an intrinsic element of its landscape quality.

3.2 The setting of Cranbrook in which Turnden lies is typical of the AONB with individual family farms surrounded by small fields, hedges and woodlands. Some of the oldest human-made features are the routeways, including the droveway, now Hartley Road, which were in use from the early medieval period and are likely to pre-date the pastures, or Jutish 'dens', from which Turnden took its name. The ancient nature of Hartley Road is indicated by map evidence and on the ground through the remains of banks supporting ancient woodland indicator species such as Wood anemone. Turnden was first mentioned in the written records in 1232, and early in the next century Cranbrook was granted a market charter. For at least the last 700 years, people have been walking this route (now the Hartley Road) for trade, to go to market or church, and for leisure. During those centuries, opening up to the south of Hartley Road was the rural fieldscape of Turnden bounded by the Crane brook. Together these form part of a green wedge extending into, and still abutting - 700 hundred years later - the historic centre of Cranbrook.

3.3 The proposed development will change this historic landscape forever. Instead of a rural fieldscape, there will be a suburban vista extending from Cranbrook to the early medieval hamlet of Hartley, eroding the separation which characterises villages and their surrounding farmsteads in the High Weald AONB.

3.4 Any genuine analysis of the landscape history and character of this area would not conclude this as the small scale, intimate pattern of features and the landscape history is incompatible with the development of hundreds of houses. This is a fundamental issue with the proposal which cannot be overcome by following the more detailed advice on layout and buildings in the Design Guide.

4.0 Conclusion

4.1 The allocation of the site at Turnden for 164-168 additional dwellings will not conserve and enhance the High Weald AONB but rather will have a significant detrimental impact on the purposes for which it was designated. The proposed allocation is major development which is not justified by exceptional circumstances or in the national interest as explained in the Unit's representation on STR1. It is therefore unjustified development contrary to NPPF 172 and the allocation should be deleted from the Local Plan.

[TWBC: see supporting document attached]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Deletion of the allocation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see representation on STR1.

[TWBC: as follows]

HWAONB Unit Representation on STR1 – The Development Strategy

1.0 General Comments

1.1 The High Weald AONB Unit acknowledges that Tunbridge Wells Borough Council has sought to address the Unit's previous representations in its preparation of the Regulation 19 Local Plan. In particular we welcome the following:

- The assessment of whether potential allocation sites in the AONB constitute major development, and whether they meet the NPPF 172 tests;
- The reduction in the number of major development sites in the AONB and the reduction in the scale of some of the sites retained; and
- The amendments to a number of development management policies in response to the Unit's comments at Regulation 18 stage.

1.2 However, the Unit remains concerned about the overall level of development being proposed within the AONB and the impact of the retained major development sites. Whilst it appreciates the additional evidence the Borough Council has produced to justify these sites (such as the Landscape and Visual Impact Assessment, the AONB Setting Analysis Report and the Grassland Survey) it has significant issues with the assumptions and outcomes of these studies. The following statement sets out why the Unit believes that this approach is not justified and is contrary to national policy and guidance. It also explains why it believes that the proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated.

2.0 The High Weald AONB

2.1 The High Weald was designated in 1983 as an Area of Outstanding Natural Beauty. It is an exceptionally beautiful medieval landscape covering 564 square miles across the counties of East and West Sussex, Kent and Surrey.

2.2 The High Weald AONB Joint Advisory Committee was established in 1989 and is a partnership of 15 local authorities, Defra, Natural England and organisations representing farming, woodland, access and community interests. The JAC is responsible for publishing and monitoring the statutory AONB Management Plan. The JAC is supported by a small, dedicated staff team, the High Weald AONB Unit, which provides advice on how to conserve and enhance the AONB. The advice provided by the AONB Unit assists public bodies and statutory undertakers to meet their duty as set out in Section 85 of the Countryside and Rights of Way Act 2000 to have regard to the purpose of conserving and enhancing the natural beauty of AONBs in making decisions that affect it.

2.3 The High Weald AONB Unit is an advisory body not a local planning authority and it has no statutory powers. The AONB Unit is not a statutory consultee on planning matters, but offers advice based on the statutory High Weald AONB Management Plan, which has been adopted by all partner authorities, as 'their policy for the management of the area and for the carrying out of their functions in relation to it'.

3.0 National Policy and Guidance in Relation to AONBs

3.1 The National Planning Policy Framework (NPPF) paragraph 172 requires great weight to be given to conserving and enhancing landscape and scenic beauty in Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty. The conservation of wildlife and cultural heritage are important considerations in all these areas. The scale and extent of development within these designated areas should be limited.

3.2 In the event that the decision-maker concludes that development is 'major' in terms of its impact on the AONB, paragraph 172 of the NPPF states that "Planning permission should be refused for major development⁵⁵ other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of:

a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated".

3.3 Footnote 55 says: "For the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined".

3.4 NPPF paragraph 11 explains the presumption in favour of sustainable development. It says that local planning authorities should provide for objectively assessed needs for housing and other uses, as well as any unmet needs from neighbouring areas, unless **"the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"**. The assets referred to are listed in footnote 6 and include Areas of Outstanding Natural Beauty. The most relevant policy in the Framework for AONBs is paragraph 172 as above.

3.5 Planning Practice Guidance, revised July 2019, states "The National Planning Policy Framework makes clear that the scale and extent of development in these areas should be limited, in view of the importance of conserving and enhancing their landscapes and scenic beauty. Its policies for protecting these areas may mean that it is not possible to meet objectively assessed needs for development in full through the plan-making process, and they are unlikely to be suitable areas for accommodating unmet needs from adjoining (non-designated) areas. Effective joint working between planning authorities covering designated and adjoining areas, through the preparation and maintenance of statements of common ground, is particularly important in helping to identify how housing and other needs can best be accommodated..." Paragraph: 041 Reference ID: 8-041-20190721.

3.6 On 16 December 2020 the government announced how it would be responding to widespread concern about its proposals to amend the standard method for calculating housing need. This response confirmed that the Government would not be progressing these changes, but rather would be retaining the existing standard method for most local planning authorities and boosting supply by increasing the housing numbers of the 20 largest cities in England by 35%. The Government's response included the following statements:

"we heard suggestions in the consultation that in some places the numbers produced by the standard method pose a risk to protected landscapes and Green Belt. **We should be clear that meeting housing need is never a reason to cause unacceptable harm to such places.** But harm or homes is not a binary choice. We can plan for well designed, beautiful homes, with access to the right infrastructure in the places where people need and want to live while also protecting the environment and green spaces communities most value".

"Many respondents to the consultation were concerned that the 'targets' provided by the standard method were not appropriate for individual local authority areas. **Within the current planning system**

the standard method does not present a ‘target’ in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints. In order to make this policy position as clear as possible, we will explore how we can make changes through future revisions to the National Planning Policy Framework, including whether a renaming of the policy could provide additional clarity”. 3.7 The above statements do not change existing policy, but reaffirm the existing situation in the NPPF that the housing need numbers produced by the standard method are just a starting point and not a target. 70% of Tunbridge Wells borough is within the High Weald AONB, and yet, the Regulation 19 Local Plan is predicated on the Borough Council meeting its full housing need figure of 678 dwellings per year, or some 12,200 over the plan period of 2020 to 2038. This has severe repercussions for the AONB and prevents the Local Plan from conserving and enhancing its natural beauty.

5.0 Major Development in the High Weald AONB

The Major Development Sites

5.1 Appendix 2 and 3 of the Development Strategy Topic Paper provides the justification for why some of the proposed allocation sites have been considered ‘major development’ in the terms of paragraph 172 of the NPPF and some are not. This assessment has been carried out in a transparent way, and the NPPF makes it clear that whether a development is major or not is a matter for the decision-maker.

5.2 The sites identified as major are as follows:

AL/RTW16 Land at Spratsbrook Farm	120 dwellings (As the developable part of the site is outside the AONB it is considered that this should be treated as a site in the setting of the AONB rather than major development within it)
AL/RTW17 Longfield Road, Tunbridge Wells	80,000sqm employment
AL/CRS1&2 Brick Kiln Farm & Corn Valley	215-225 dwellings
AL/CRS3 Turnden, Cranbrook	200-204 dwellings
AL/HA1 The White House, Hawkhurst	43
AL/HA4 Copthall Avenue, Hawkhurst	70-79 dwellings
AL/BM1 Maidstone Road, Brenchley	210-220 dwellings
AL/PE1,2&3 Pembury	45 dwellings
903-936 dwellings	

5.3 Some of the above sites already have status in the planning system as follows:

- AL/CRS1&2 Brick Kiln Farm & Corn Valley: These sites were allocated in the 2016 DPD and 180 dwellings at Brick Kiln Farm has outline planning permission;
- AL/CRS3 Turnden, Cranbrook: 36 dwellings already granted full planning permission on the farmstead part of the site;
- AL/HA1 The White House, Hawkhurst: planning permission already granted for 43 retirement apartments;
- AL/BM1 Maidstone Road, Brenchley: outline and reserved matters permission already granted for 45 dwellings.

5.4 The dwellings proposed on major development sites in the AONB with no current planning status are:

- AL/CRS3 Turnden, Cranbrook 164-168 dwellings
- AL/HA4 Copthall Avenue, Hawkhurst 70-79 dwellings
- AL/PE1,2&3 Pembury 210-220 dwellings
- **Total 444-467 dwellings**

5.5 It should be noted that option GS2 in the Sustainability Appraisal assumes that reducing development below the housing need to one that does not involve any major development in the High Weald AONB would result in the scale of housing being reduced by between 1,600 - 2000 dwellings (17% of housing need for 11,526). It is not clear where this number comes from. It is the Unit's understanding that sites already allocated in an adopted Plan or granted outline or full planning permission would go ahead even if all major development sites in the AONB were removed from this Local Plan. Therefore the reduction in housing numbers would be 444-467 dwellings, or about 4% of 11,526.

The Major Development Tests

5.6 As quoted in paragraph 3.2 above, NPPF 172 says that “Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest” and provides a number of tests for the consideration of

such applications. Whilst the wording of this paragraph does not refer to allocations at the plan-making stage, if these tests are not applied at this stage there is a significant risk that allocations will not be deliverable, which would conflict with the test of soundness on effectiveness.

5.7 The Unit believes that the proposed major development allocations fail the NPPF 172 tests for the following reasons:

- **The need for the development:** the Borough Council argues that the high housing need for the area necessitates major development in the AONB. However, this argument is circular. If the conservation and enhancement of the AONB was given great weight as required by NPPF 172 then the housing requirement figure for the Borough would be adjusted downwards to reflect the fact that 70% of the area is AONB, and there would be no 'necessity' to locate large amounts of development within the AONB.

- **Developing outside the designated area, or meeting the need for it in some other way:** Even if it is necessary to allocate some development within the AONB that does not mean that such provision should be in the form of major development sites. As explained below, the High Weald landscape is small scale in character and can accommodate small scale development successfully without damaging its natural beauty.

- **Any detrimental effect on the environment:** this is explored in more detail below.

The Impact of Major Development on the AONB

5.8 National policy and legislation requires decision-makers to have regard and give great weight to conserving and enhancing the natural beauty of AONBs. In the High Weald this natural beauty is defined in the AONB Management Plan's Statement of Significance, which identifies five defining components of character that have made the High Weald a recognisably distinct and homogenous area for at least the last 700 years.

1. Geology, landform and water systems – a deeply incised, ridged and faulted landform of clays and sandstone with numerous gill streams. 2. Settlement – dispersed historic settlement including high densities of isolated farmsteads and late Medieval villages founded on trade and non-agricultural rural industries. 3. Routeways – a dense network of historic routeways (now roads, tracks and paths). 4. Woodland – abundance of ancient woodland, highly interconnected and in smallholdings. 5. Field and Heath – small, irregular and productive fields, bounded by hedgerows and woods, and typically used for livestock grazing; with distinctive zones of lowland heaths, and inned river valleys.

Other equally important characteristics are also identified in the Management Plan under sections on the land-based economy and related rural life and 'other qualities'.

5.9 The objectives for the settlement component are:

- Objective S1: To reconnect settlements, residents and their supporting economic activity with the surrounding countryside;
- Objective S2: To protect the historic pattern and character of settlement;
- and • Objective S3: To enhance the architectural quality of the High Weald and ensure development reflects the character of the High Weald in its scale, layout and design.

5.10 One of the actions for objective S2 is to "Seek to prioritise the delivery of new housing primarily through small-scale development and a mix of housing sizes that responds to local needs". Small scale carefully designed development can be accommodated successfully in this landscape whilst retaining its character, but large-scale developments are much more challenging to integrate successfully without detrimental effects. It is the view of the High Weald AONB Unit that major development cannot be accommodated within the AONB without damaging the essentially human scale character of the area or the purposes of the designation.

5.11 The 5 core components derive from the natural geology, topography and soils of the area and how people have used them over the centuries. Unlike the historically communally farmed landscapes of the Midlands which the national planning system is based on, the High Weald does not have nucleated towns and villages that are separated by open unoccupied countryside where any development would be 'isolated'. Instead it is based on a high density of medieval farmsteads most of which were farmed 'in severalty' – that is by individual families rather than as part of wider estates or communal systems. They were dispersed across the High Weald, surrounded by enough land to support a family and managed as mixed farms to suit the soil conditions and topography and to maximise self-sufficiency. Trees and hedges were an important component of the farming systems and fields were often carved out of woodland by hand (assarts) resulting in their characteristic small and irregular

shape. The challenging topography and soil conditions, which are suited to growing trees and grass rather than crops, mean that the High Weald has retained its Medieval character, with its small fields and woodland shaws, and its high density of historic routeways.

5.12 This history is important because it explains the human scale of the landscape components which comprise the natural beauty of the High Weald and the importance of the dispersed settlement pattern created by the farmsteads. Hamlets, villages and small towns evolved in the late Medieval period and onwards at the intersection of routeways and around commons to facilitate trading between farmsteads and the creation of small industries and crafts. Whilst these settlements are more consolidated, many have farmsteads on their outskirts and it is particularly important to maintain the separation between these two different settlement types so that the historic landscape remains legible for future generations. Continually adding to the larger villages and towns threatens this historic character, especially when it subsumes these adjacent farmsteads. Large-scale developments sit uncomfortably in this landscape because they overlap historic field systems and dominate the small scale historic settlement pattern. Whilst retaining field boundaries and historic features within new developments is important, it cannot overcome the basic incompatibility of locating large scale development within such a small scale landscape. It therefore inevitably fails to conserve and enhance the natural beauty of the AONB.

Landscape and Visual Impact Assessment

5.13 Following the Regulation 18 consultation the Borough Council commissioned Hankinson Duckett Associates to undertake a Landscape and Visual Impact Assessment of 21 potential allocation sites in the AONB. The AONB Unit was consulted on the brief to these consultants but not on the outcome of the work.

5.14 Appendix B to this submission identifies the detailed concerns with this work. Whilst it has a particular focus on the proposed site at Turnden, the concerns about the overall approach apply to all of the major development sites proposed in the AONB in the Regulation 19 Plan. These can be broadly summarised as follows:

- The Assessment consistently downgrades impact on the AONB;
- The imprecise method encourages operator bias and its opaque nature discourages scrutiny;
- The site assessments are inconsistent, partial, unsubstantiated and peppered with loaded phrases;
- There is a visual bias across the assessments with the impact on landscape as a resource being significantly underplayed;
- The cumulative effects of development under each site assessment section do not deal in specifics and when they do they focus almost entirely on visual effects – separation, viewpoints and planting – rather than landscape effects such as the loss of soils; field systems and their potential for biodiversity or food production; rurality, dark skies, tranquillity or other perceptual qualities.

5.15 For the reasons detailed above and in Appendix B it is considered that this LVIA should not be relied upon and it should be accepted that major development within the AONB will have a severe detrimental impact on the natural beauty of the High Weald.

6.0 Development in the Setting of the AONB

6.1 Even if Growth Strategy 2 was followed and the uncommitted major development sites in the AONB removed from the Local Plan, the remaining growth proposed would still have a significant impact on the designated area. This is because only 30% of the Borough is outside of the AONB so attempting to meet all or nearly all of the housing need figure puts tremendous pressure on this area, including where it abuts or is close to the AONB boundary. Developments outside but affecting the AONB include:

- Paddock Wood / land east of Capel Parish 3,490-3,590 dwellings
- Tudeley Garden Village 2,800 dwellings
- Horsmonden 240-320 dwellings
- Spratsbrook Farm, Tunbridge Wells 120 dwellings
- Benenden Hospital 47-50 dwellings

6.2 The Borough Council commissioned Hankinson Duckett Associates to produce an 'AONB Setting Analysis Report'. Whilst the work that has gone into this study is appreciated, the Unit was not consulted on its methodology or outcomes. The study focuses primarily on the inter-visibility of developments and direct impacts and does not address the wider impacts of accommodating this level of growth so close to the boundary of the AONB. These impacts include:

- Increased visitor numbers to the AONB placing pressure on its recreational facilities and infrastructure;
- Increased traffic travelling through the AONB to access the new developments and the highway 'improvements' required to accommodate this;
- Loss of tranquillity arising from the above;
- Increase

in air pollution arising from the above; • Light pollution from developments on the edge of the AONB and from highway improvements which require to be lit.

6.3 The above impacts would be reduced if the overall housing number was reduced to reflect the 70% of the Borough which lies within the AONB rather than trying to meet the full housing need by squeezing as much as possible into the remaining area. This statement focuses on the impact of this strategy on the AONB because that is the Unit's remit. However, this does not mean we are blind to the devastating impact of the planned level of growth on the area outside of the AONB, much of which is Green Belt and/or Low Weald countryside which is highly valued by its residents.

7.0 Conclusion

7.1 The High Weald AONB Unit believes that the overall level of development proposed and the major development sites allocated in the AONB are not justified and are contrary to national policy and guidance. The proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated and would fail to conserve and enhance this national asset. It is therefore recommended that there is a reduction in the overall housing figure and that all the major development sites in the AONB be deleted from the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see representation on STR1 [TWBC: As follows]

4.0 The Sustainability Appraisal

4.1 The Sustainability Appraisal is the main tool by which the Borough Council assesses the options for the level of growth and its distribution, and selects its development strategy. NPPF paragraph 32 says that "Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements" and paragraph 35 says that Plans are 'sound' if they meet the tests, including "Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence".

4.2 The Sustainability Appraisal for the Regulation 19 Local Plan assesses a number of growth options against sustainability objectives. Appendix A to this statement shows the scores and commentary for two of these options:

- GS13 - The strategy reflected in the Regulation 19 Local Plan; and
- GS2 - A strategy which reduces development below the housing need to one that does not involve any major development in the High Weald AONB.

This exercise has been carried out to understand the reasoning behind the selection of the Local Plan strategy compared to the option that most closely aligns to the AONB Unit's position, albeit it doesn't address its concerns about the impact of overall levels of growth on the setting of the AONB.

4.3 Appendix 1 demonstrates the following:

- That the economic objectives are double-counted in the assessment by the application of two objectives on business growth and employment and no account is taken of the benefit the AONB brings to the tourism industry;
- That the perceived impact of strategies on areas of deprivation is double-counted in the assessment by the application of two objectives on health and deprivation and no account is taken of the need for such areas to have good access to the countryside which would be lost to major development under GS13;
- That the assessment of the impact of option GS2 on climate change is clearly incorrect and conflicts with the commentary. This option will be much more positive for the climate change objective than GS13, not just because of reductions in transport and carbon emissions from new dwellings but due to the carbon sequestration function of soils and natural habitats;
- The heritage score for GS2 should be positive to reflect the heritage value of the landscape itself (medieval field systems etc) which would be impacted less under GS2 than GS13. Heritage is not just about listed buildings and conservation areas;
- Whilst it is agreed that GS2 would have a less positive impact on housing than GS13, the suggestion that building more dwellings in the AONB would reduce house prices is unsubstantiated and goes against known evidence. To meet housing needs in the AONB requires more genuinely affordable housing not more £300k+ houses. It is also noted in paragraph 5.5 below that the reduction in housing numbers for this option appears to have been over-estimated, which would affect the relative scores for this objective;
- Landuse - this objective is supposed to be about protecting soils, and reusing previously developed land and buildings. Instead the scoring seems to focus on impacts on the greenbelt. Since most of the major development sites in the AONB are on greenfield land GS2 should score much more positively than GS13;
- The landscape score for GS2 should be much more positive because it significantly reduces the harm to the AONB, which has the highest planning status in respect of landscape and scenic beauty. This is the only objective which mentions the AONB, and does so alongside all other landscape impacts, diluting its importance in the overall assessment of sustainability whereas the NPPF requires that AONBs be given 'great weight';
- Travel - As the only difference between GS2 and GS13 is the omission of major development sites in the AONB, which as the commentary says will be in areas where alternative transport modes are not popular or viable, the score for GS2 should be more positive for the travel objective than GS13 rather than the opposite as shown.
- Water - If the score is not significantly affected by reduction in growth in the AONB as per the commentary then it should be the same for GS2 and GS13.

4.4 If the above inaccuracies and inconsistencies in the scoring were corrected then GS2 would score more positively overall than the strategy selected for the Regulation 19 Local Plan.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	High Weald AONB Unit
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/PE 1 Land rear of High Street and west of Chalket Lane

[TWBC: this representation has been input against Policies STR 1, AL/HA 4, AL/PE 1, AL/PE 2 and AL/PE 3 – see Comment Numbers PSLP_1434, PSLP_1440, PSLP_1441, PSLP_1442 and PSLP_1443]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not justified
.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see representation on STR1.

[TWBC: as follows]

HWAONB Unit Representation on STR1 – The Development Strategy

1.0 General Comments

1.1 The High Weald AONB Unit acknowledges that Tunbridge Wells Borough Council has sought to address the Unit's previous representations in its preparation of the Regulation 19 Local Plan. In particular we welcome the following:

- The assessment of whether potential allocation sites in the AONB constitute major development, and whether they meet the NPPF 172 tests;
- The reduction in the number of major development sites in the AONB and the reduction in the scale of some of the sites retained; and
- The amendments to a number of development management policies in response to the Unit's comments at Regulation 18 stage.

1.2 However, the Unit remains concerned about the overall level of development being proposed within the AONB and the impact of the retained major development sites. Whilst it appreciates the additional evidence the Borough Council has produced to justify these sites (such as the Landscape and Visual Impact Assessment, the AONB Setting Analysis Report and the Grassland Survey) it has significant issues with the assumptions and outcomes of these studies. The following statement sets out why the Unit believes that this approach is not justified and is contrary to national policy and guidance. It also explains why it believes that the proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated.

2.0 The High Weald AONB

2.1 The High Weald was designated in 1983 as an Area of Outstanding Natural Beauty. It is an exceptionally beautiful medieval landscape covering 564 square miles across the counties of East and West Sussex, Kent and Surrey.

2.2 The High Weald AONB Joint Advisory Committee was established in 1989 and is a partnership of 15 local authorities, Defra, Natural England and organisations representing farming, woodland, access and community interests. The JAC is responsible for publishing and monitoring the statutory AONB Management Plan. The JAC is supported by a small, dedicated staff team, the High Weald AONB Unit, which provides advice on how to conserve and enhance the AONB. The advice provided by the AONB Unit assists public bodies and statutory undertakers to meet their duty as set out in Section 85 of the Countryside and Rights of Way Act 2000 to have regard to the purpose of conserving and enhancing the natural beauty of AONBs in making decisions that affect it.

2.3 The High Weald AONB Unit is an advisory body not a local planning authority and it has no statutory powers. The AONB Unit is not a statutory consultee on planning matters, but offers advice based on the statutory High Weald AONB Management Plan, which has been adopted by all partner authorities, as 'their policy for the management of the area and for the carrying out of their functions in relation to it'.

3.0 National Policy and Guidance in Relation to AONBs

3.1 The National Planning Policy Framework (NPPF) paragraph 172 requires great weight to be given to conserving and enhancing landscape and scenic beauty in Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty. The conservation of wildlife and cultural heritage are important considerations in all these areas. The scale and extent of development within these designated areas should be limited.

3.2 In the event that the decision-maker concludes that development is 'major' in terms of its impact on the AONB, paragraph 172 of the NPPF states that "Planning permission should be refused for major development⁵⁵ other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of:

a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated".

3.3 Footnote 55 says: "For the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined".

3.4 NPPF paragraph 11 explains the presumption in favour of sustainable development. It says that local planning authorities should provide for objectively assessed needs for housing and other uses, as well as any unmet needs from neighbouring areas, unless **"the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"**. The assets referred to are listed in footnote 6 and include Areas of Outstanding Natural Beauty. The most relevant policy in the Framework for AONBs is paragraph 172 as above.

3.5 Planning Practice Guidance, revised July 2019, states "The National Planning Policy Framework makes clear that the scale and extent of development in these areas should be limited, in view of the importance of conserving and enhancing their landscapes and scenic beauty. Its policies for protecting these areas may mean that it is not possible to meet objectively assessed needs for development in full through the plan-making process, and they are unlikely to be suitable areas for accommodating unmet needs from adjoining (non-designated) areas. Effective joint working between planning authorities covering designated and adjoining areas, through the preparation and maintenance of statements of common ground, is particularly important in helping to identify how housing and other needs can best be accommodated..." Paragraph: 041 Reference ID: 8-041-20190721.

3.6 On 16 December 2020 the government announced how it would be responding to widespread concern about its proposals to amend the standard method for calculating housing need. This response confirmed that the Government would not be progressing these changes, but rather would be retaining the existing standard method for most local planning authorities and boosting supply by increasing the housing numbers of the 20 largest cities in England by 35%. The Government's response included the following statements:

"we heard suggestions in the consultation that in some places the numbers produced by the standard method pose a risk to protected landscapes and Green Belt. **We should be clear that meeting housing need is never a reason to cause unacceptable harm to such places.** But harm or homes is not a binary choice. We can plan for well designed, beautiful homes, with access to the right infrastructure in the places where people need and want to live while also protecting the environment and green spaces communities most value".

"Many respondents to the consultation were concerned that the 'targets' provided by the standard method were not appropriate for individual local authority areas. **Within the current planning system**

the standard method does not present a ‘target’ in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints. In order to make this policy position as clear as possible, we will explore how we can make changes through future revisions to the National Planning Policy Framework, including whether a renaming of the policy could provide additional clarity”. 3.7 The above statements do not change existing policy, but reaffirm the existing situation in the NPPF that the housing need numbers produced by the standard method are just a starting point and not a target. 70% of Tunbridge Wells borough is within the High Weald AONB, and yet, the Regulation 19 Local Plan is predicated on the Borough Council meeting its full housing need figure of 678 dwellings per year, or some 12,200 over the plan period of 2020 to 2038. This has severe repercussions for the AONB and prevents the Local Plan from conserving and enhancing its natural beauty.

5.0 Major Development in the High Weald AONB

The Major Development Sites

5.1 Appendix 2 and 3 of the Development Strategy Topic Paper provides the justification for why some of the proposed allocation sites have been considered ‘major development’ in the terms of paragraph 172 of the NPPF and some are not. This assessment has been carried out in a transparent way, and the NPPF makes it clear that whether a development is major or not is a matter for the decision-maker.

5.2 The sites identified as major are as follows:

AL/RTW16 Land at Spratsbrook Farm	120 dwellings	(As the developable part of the site is outside the AONB it is considered that this should be treated as a site in the setting of the AONB rather than major development within it)
AL/RTW17 Longfield Road, Tunbridge Wells	80,000sqm	employment
AL/CRS1&2 Brick Kiln Farm & Corn Valley	215-225 dwellings	AL/CRS3 Turnden, Cranbrook
200-204 dwellings	AL/HA1 The White House, Hawkhurst	43
apartments	AL/HA4 Copthall Avenue, Hawkhurst	70-79 dwellings
AL/BM1 Maidstone Road, Brenchley	45 dwellings	AL/PE1,2&3 Pembury
	210-220 dwellings	Total
903-936 dwellings		

5.3 Some of the above sites already have status in the planning system as follows:

- AL/CRS1&2 Brick Kiln Farm & Corn Valley: These sites were allocated in the 2016 DPD and 180 dwellings at Brick Kiln Farm has outline planning permission;
- AL/CRS3 Turnden, Cranbrook: 36 dwellings already granted full planning permission on the farmstead part of the site;
- AL/HA1 The White House, Hawkhurst: planning permission already granted for 43 retirement apartments;
- AL/BM1 Maidstone Road, Brenchley: outline and reserved matters permission already granted for 45 dwellings.

5.4 The dwellings proposed on major development sites in the AONB with no current planning status are:

- AL/CRS3 Turnden, Cranbrook 164-168 dwellings
 - AL/HA4 Copthall Avenue, Hawkhurst 70-79 dwellings
 - AL/PE1,2&3 Pembury 210-220 dwellings
 - **Total**
- 444-467 dwellings**

5.5 It should be noted that option GS2 in the Sustainability Appraisal assumes that reducing development below the housing need to one that does not involve any major development in the High Weald AONB would result in the scale of housing being reduced by between 1,600 - 2000 dwellings (17% of housing need for 11,526). It is not clear where this number comes from. It is the Unit's understanding that sites already allocated in an adopted Plan or granted outline or full planning permission would go ahead even if all major development sites in the AONB were removed from this Local Plan. Therefore the reduction in housing numbers would be 444-467 dwellings, or about 4% of 11,526.

The Major Development Tests

5.6 As quoted in paragraph 3.2 above, NPPF 172 says that “Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest” and provides a number of tests for the consideration of

such applications. Whilst the wording of this paragraph does not refer to allocations at the plan-making stage, if these tests are not applied at this stage there is a significant risk that allocations will not be deliverable, which would conflict with the test of soundness on effectiveness.

5.7 The Unit believes that the proposed major development allocations fail the NPPF 172 tests for the following reasons:

- **The need for the development:** the Borough Council argues that the high housing need for the area necessitates major development in the AONB. However, this argument is circular. If the conservation and enhancement of the AONB was given great weight as required by NPPF 172 then the housing requirement figure for the Borough would be adjusted downwards to reflect the fact that 70% of the area is AONB, and there would be no 'necessity' to locate large amounts of development within the AONB.

- **Developing outside the designated area, or meeting the need for it in some other way:** Even if it is necessary to allocate some development within the AONB that does not mean that such provision should be in the form of major development sites. As explained below, the High Weald landscape is small scale in character and can accommodate small scale development successfully without damaging its natural beauty.

- **Any detrimental effect on the environment:** this is explored in more detail below.

The Impact of Major Development on the AONB

5.8 National policy and legislation requires decision-makers to have regard and give great weight to conserving and enhancing the natural beauty of AONBs. In the High Weald this natural beauty is defined in the AONB Management Plan's Statement of Significance, which identifies five defining components of character that have made the High Weald a recognisably distinct and homogenous area for at least the last 700 years.

1. Geology, landform and water systems – a deeply incised, ridged and faulted landform of clays and sandstone with numerous gill streams. 2. Settlement – dispersed historic settlement including high densities of isolated farmsteads and late Medieval villages founded on trade and non-agricultural rural industries. 3. Routeways – a dense network of historic routeways (now roads, tracks and paths). 4. Woodland – abundance of ancient woodland, highly interconnected and in smallholdings. 5. Field and Heath – small, irregular and productive fields, bounded by hedgerows and woods, and typically used for livestock grazing; with distinctive zones of lowland heaths, and inned river valleys.

Other equally important characteristics are also identified in the Management Plan under sections on the land-based economy and related rural life and 'other qualities'.

5.9 The objectives for the settlement component are:

- Objective S1: To reconnect settlements, residents and their supporting economic activity with the surrounding countryside;
- Objective S2: To protect the historic pattern and character of settlement;
- and • Objective S3: To enhance the architectural quality of the High Weald and ensure development reflects the character of the High Weald in its scale, layout and design.

5.10 One of the actions for objective S2 is to "Seek to prioritise the delivery of new housing primarily through small-scale development and a mix of housing sizes that responds to local needs". Small scale carefully designed development can be accommodated successfully in this landscape whilst retaining its character, but large-scale developments are much more challenging to integrate successfully without detrimental effects. It is the view of the High Weald AONB Unit that major development cannot be accommodated within the AONB without damaging the essentially human scale character of the area or the purposes of the designation.

5.11 The 5 core components derive from the natural geology, topography and soils of the area and how people have used them over the centuries. Unlike the historically communally farmed landscapes of the Midlands which the national planning system is based on, the High Weald does not have nucleated towns and villages that are separated by open unoccupied countryside where any development would be 'isolated'. Instead it is based on a high density of medieval farmsteads most of which were farmed 'in severalty' – that is by individual families rather than as part of wider estates or communal systems. They were dispersed across the High Weald, surrounded by enough land to support a family and managed as mixed farms to suit the soil conditions and topography and to maximise self-sufficiency. Trees and hedges were an important component of the farming systems and fields were often carved out of woodland by hand (assarts) resulting in their characteristic small and irregular

shape. The challenging topography and soil conditions, which are suited to growing trees and grass rather than crops, mean that the High Weald has retained its Medieval character, with its small fields and woodland shaws, and its high density of historic routeways.

5.12 This history is important because it explains the human scale of the landscape components which comprise the natural beauty of the High Weald and the importance of the dispersed settlement pattern created by the farmsteads. Hamlets, villages and small towns evolved in the late Medieval period and onwards at the intersection of routeways and around commons to facilitate trading between farmsteads and the creation of small industries and crafts. Whilst these settlements are more consolidated, many have farmsteads on their outskirts and it is particularly important to maintain the separation between these two different settlement types so that the historic landscape remains legible for future generations. Continually adding to the larger villages and towns threatens this historic character, especially when it subsumes these adjacent farmsteads. Large-scale developments sit uncomfortably in this landscape because they overlap historic field systems and dominate the small scale historic settlement pattern. Whilst retaining field boundaries and historic features within new developments is important, it cannot overcome the basic incompatibility of locating large scale development within such a small scale landscape. It therefore inevitably fails to conserve and enhance the natural beauty of the AONB.

Landscape and Visual Impact Assessment

5.13 Following the Regulation 18 consultation the Borough Council commissioned Hankinson Duckett Associates to undertake a Landscape and Visual Impact Assessment of 21 potential allocation sites in the AONB. The AONB Unit was consulted on the brief to these consultants but not on the outcome of the work.

5.14 Appendix B to this submission identifies the detailed concerns with this work. Whilst it has a particular focus on the proposed site at Turnden, the concerns about the overall approach apply to all of the major development sites proposed in the AONB in the Regulation 19 Plan. These can be broadly summarised as follows:

- The Assessment consistently downgrades impact on the AONB;
- The imprecise method encourages operator bias and its opaque nature discourages scrutiny;
- The site assessments are inconsistent, partial, unsubstantiated and peppered with loaded phrases;
- There is a visual bias across the assessments with the impact on landscape as a resource being significantly underplayed;
- The cumulative effects of development under each site assessment section do not deal in specifics and when they do they focus almost entirely on visual effects – separation, viewpoints and planting – rather than landscape effects such as the loss of soils; field systems and their potential for biodiversity or food production; rurality, dark skies, tranquillity or other perceptual qualities.

5.15 For the reasons detailed above and in Appendix B it is considered that this LVIA should not be relied upon and it should be accepted that major development within the AONB will have a severe detrimental impact on the natural beauty of the High Weald.

6.0 Development in the Setting of the AONB

6.1 Even if Growth Strategy 2 was followed and the uncommitted major development sites in the AONB removed from the Local Plan, the remaining growth proposed would still have a significant impact on the designated area. This is because only 30% of the Borough is outside of the AONB so attempting to meet all or nearly all of the housing need figure puts tremendous pressure on this area, including where it abuts or is close to the AONB boundary. Developments outside but affecting the AONB include:

- Paddock Wood / land east of Capel Parish 3,490-3,590 dwellings
- Tudeley Garden Village 2,800 dwellings
- Horsmonden 240-320 dwellings
- Spratsbrook Farm, Tunbridge Wells 120 dwellings
- Benenden Hospital 47-50 dwellings

6.2 The Borough Council commissioned Hankinson Duckett Associates to produce an 'AONB Setting Analysis Report'. Whilst the work that has gone into this study is appreciated, the Unit was not consulted on its methodology or outcomes. The study focuses primarily on the inter-visibility of developments and direct impacts and does not address the wider impacts of accommodating this level of growth so close to the boundary of the AONB. These impacts include:

- Increased visitor numbers to the AONB placing pressure on its recreational facilities and infrastructure;
- Increased traffic travelling through the AONB to access the new developments and the highway 'improvements' required to accommodate this;
- Loss of tranquillity arising from the above;
- Increase

in air pollution arising from the above; • Light pollution from developments on the edge of the AONB and from highway improvements which require to be lit.

6.3 The above impacts would be reduced if the overall housing number was reduced to reflect the 70% of the Borough which lies within the AONB rather than trying to meet the full housing need by squeezing as much as possible into the remaining area. This statement focuses on the impact of this strategy on the AONB because that is the Unit's remit. However, this does not mean we are blind to the devastating impact of the planned level of growth on the area outside of the AONB, much of which is Green Belt and/or Low Weald countryside which is highly valued by its residents.

7.0 Conclusion

7.1 The High Weald AONB Unit believes that the overall level of development proposed and the major development sites allocated in the AONB are not justified and are contrary to national policy and guidance. The proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated and would fail to conserve and enhance this national asset. It is therefore recommended that there is a reduction in the overall housing figure and that all the major development sites in the AONB be deleted from the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see representation on STR1 [TWBC: As follows]

4.0 The Sustainability Appraisal

4.1 The Sustainability Appraisal is the main tool by which the Borough Council assesses the options for the level of growth and its distribution, and selects its development strategy. NPPF paragraph 32 says that "Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements" and paragraph 35 says that Plans are 'sound' if they meet the tests, including "Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence".

4.2 The Sustainability Appraisal for the Regulation 19 Local Plan assesses a number of growth options against sustainability objectives. Appendix A to this statement shows the scores and commentary for two of these options:

- GS13 - The strategy reflected in the Regulation 19 Local Plan; and
- GS2 - A strategy which reduces development below the housing need to one that does not involve any major development in the High Weald AONB.

This exercise has been carried out to understand the reasoning behind the selection of the Local Plan strategy compared to the option that most closely aligns to the AONB Unit's position, albeit it doesn't address its concerns about the impact of overall levels of growth on the setting of the AONB.

4.3 Appendix 1 demonstrates the following:

- That the economic objectives are double-counted in the assessment by the application of two objectives on business growth and employment and no account is taken of the benefit the AONB brings to the tourism industry;
- That the perceived impact of strategies on areas of deprivation is double-counted in the assessment by the application of two objectives on health and deprivation and no account is taken of the need for such areas to have good access to the countryside which would be lost to major development under GS13;
- That the assessment of the impact of option GS2 on climate change is clearly incorrect and conflicts with the commentary. This option will be much more positive for the climate change objective than GS13, not just because of reductions in transport and carbon emissions from new dwellings but due to the carbon sequestration function of soils and natural habitats;
- The heritage score for GS2 should be positive to reflect the heritage value of the landscape itself (medieval field systems etc) which would be impacted less under GS2 than GS13. Heritage is not just about listed buildings and conservation areas;
- Whilst it is agreed that GS2 would have a less positive impact on housing than GS13, the suggestion that building more dwellings in the AONB would reduce house prices is unsubstantiated and goes against known evidence. To meet housing needs in the AONB requires more genuinely affordable housing not more £300k+ houses. It is also noted in paragraph 5.5 below that the reduction in housing numbers for this option appears to have been over-estimated, which would affect the relative scores for this objective;
- Landuse - this objective is supposed to be about protecting soils, and reusing previously developed land and buildings. Instead the scoring seems to focus on impacts on the greenbelt. Since most of the major development sites in the AONB are on greenfield land GS2 should score much more positively than GS13;
- The landscape score for GS2 should be much more positive because it significantly reduces the harm to the AONB, which has the highest planning status in respect of landscape and scenic beauty. This is the only objective which mentions the AONB, and does so alongside all other landscape impacts, diluting its importance in the overall assessment of sustainability whereas the NPPF requires that AONBs be given 'great weight';
- Travel - As the only difference between GS2 and GS13 is the omission of major development sites in the AONB, which as the commentary says will be in areas where alternative transport modes are not popular or viable, the score for GS2 should be more positive for the travel objective than GS13 rather than the opposite as shown.
- Water - If the score is not significantly affected by reduction in growth in the AONB as per the commentary then it should be the same for GS2 and GS13.

4.4 If the above inaccuracies and inconsistencies in the scoring were corrected then GS2 would score more positively overall than the strategy selected for the Regulation 19 Local Plan.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	High Weald AONB Unit
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/PE 2 Land at Hubbles Farm and south of Hastings Road

[TWBC: this representation has been input against Policies STR 1, AL/HA 4, AL/PE 1, AL/PE 2 and AL/PE 3 – see Comment Numbers PSLP_1434, PSLP_1440, PSLP_1441, PSLP_1442 and PSLP_1443]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not justified
.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see representation on STR1.

[TWBC: as follows]

HWAONB Unit Representation on STR1 – The Development Strategy

1.0 General Comments

1.1 The High Weald AONB Unit acknowledges that Tunbridge Wells Borough Council has sought to address the Unit's previous representations in its preparation of the Regulation 19 Local Plan. In particular we welcome the following:

- The assessment of whether potential allocation sites in the AONB constitute major development, and whether they meet the NPPF 172 tests;
- The reduction in the number of major development sites in the AONB and the reduction in the scale of some of the sites retained; and
- The amendments to a number of development management policies in response to the Unit's comments at Regulation 18 stage.

1.2 However, the Unit remains concerned about the overall level of development being proposed within the AONB and the impact of the retained major development sites. Whilst it appreciates the additional evidence the Borough Council has produced to justify these sites (such as the Landscape and Visual Impact Assessment, the AONB Setting Analysis Report and the Grassland Survey) it has significant issues with the assumptions and outcomes of these studies. The following statement sets out why the Unit believes that this approach is not justified and is contrary to national policy and guidance. It also explains why it believes that the proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated.

2.0 The High Weald AONB

2.1 The High Weald was designated in 1983 as an Area of Outstanding Natural Beauty. It is an exceptionally beautiful medieval landscape covering 564 square miles across the counties of East and West Sussex, Kent and Surrey.

2.2 The High Weald AONB Joint Advisory Committee was established in 1989 and is a partnership of 15 local authorities, Defra, Natural England and organisations representing farming, woodland, access and community interests. The JAC is responsible for publishing and monitoring the statutory AONB Management Plan. The JAC is supported by a small, dedicated staff team, the High Weald AONB Unit, which provides advice on how to conserve and enhance the AONB. The advice provided by the AONB Unit assists public bodies and statutory undertakers to meet their duty as set out in Section 85 of the Countryside and Rights of Way Act 2000 to have regard to the purpose of conserving and enhancing the natural beauty of AONBs in making decisions that affect it.

2.3 The High Weald AONB Unit is an advisory body not a local planning authority and it has no statutory powers. The AONB Unit is not a statutory consultee on planning matters, but offers advice based on the statutory High Weald AONB Management Plan, which has been adopted by all partner authorities, as 'their policy for the management of the area and for the carrying out of their functions in relation to it'.

3.0 National Policy and Guidance in Relation to AONBs

3.1 The National Planning Policy Framework (NPPF) paragraph 172 requires great weight to be given to conserving and enhancing landscape and scenic beauty in Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty. The conservation of wildlife and cultural heritage are important considerations in all these areas. The scale and extent of development within these designated areas should be limited.

3.2 In the event that the decision-maker concludes that development is 'major' in terms of its impact on the AONB, paragraph 172 of the NPPF states that "Planning permission should be refused for major development⁵⁵ other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of:

a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated".

3.3 Footnote 55 says: "For the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined".

3.4 NPPF paragraph 11 explains the presumption in favour of sustainable development. It says that local planning authorities should provide for objectively assessed needs for housing and other uses, as well as any unmet needs from neighbouring areas, unless **"the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"**. The assets referred to are listed in footnote 6 and include Areas of Outstanding Natural Beauty. The most relevant policy in the Framework for AONBs is paragraph 172 as above.

3.5 Planning Practice Guidance, revised July 2019, states "The National Planning Policy Framework makes clear that the scale and extent of development in these areas should be limited, in view of the importance of conserving and enhancing their landscapes and scenic beauty. Its policies for protecting these areas may mean that it is not possible to meet objectively assessed needs for development in full through the plan-making process, and they are unlikely to be suitable areas for accommodating unmet needs from adjoining (non-designated) areas. Effective joint working between planning authorities covering designated and adjoining areas, through the preparation and maintenance of statements of common ground, is particularly important in helping to identify how housing and other needs can best be accommodated..." Paragraph: 041 Reference ID: 8-041-20190721.

3.6 On 16 December 2020 the government announced how it would be responding to widespread concern about its proposals to amend the standard method for calculating housing need. This response confirmed that the Government would not be progressing these changes, but rather would be retaining the existing standard method for most local planning authorities and boosting supply by increasing the housing numbers of the 20 largest cities in England by 35%. The Government's response included the following statements:

"we heard suggestions in the consultation that in some places the numbers produced by the standard method pose a risk to protected landscapes and Green Belt. **We should be clear that meeting housing need is never a reason to cause unacceptable harm to such places.** But harm or homes is not a binary choice. We can plan for well designed, beautiful homes, with access to the right infrastructure in the places where people need and want to live while also protecting the environment and green spaces communities most value".

"Many respondents to the consultation were concerned that the 'targets' provided by the standard method were not appropriate for individual local authority areas. **Within the current planning system**

the standard method does not present a ‘target’ in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints. In order to make this policy position as clear as possible, we will explore how we can make changes through future revisions to the National Planning Policy Framework, including whether a renaming of the policy could provide additional clarity”. 3.7 The above statements do not change existing policy, but reaffirm the existing situation in the NPPF that the housing need numbers produced by the standard method are just a starting point and not a target. 70% of Tunbridge Wells borough is within the High Weald AONB, and yet, the Regulation 19 Local Plan is predicated on the Borough Council meeting its full housing need figure of 678 dwellings per year, or some 12,200 over the plan period of 2020 to 2038. This has severe repercussions for the AONB and prevents the Local Plan from conserving and enhancing its natural beauty.

5.0 Major Development in the High Weald AONB

The Major Development Sites

5.1 Appendix 2 and 3 of the Development Strategy Topic Paper provides the justification for why some of the proposed allocation sites have been considered ‘major development’ in the terms of paragraph 172 of the NPPF and some are not. This assessment has been carried out in a transparent way, and the NPPF makes it clear that whether a development is major or not is a matter for the decision-maker.

5.2 The sites identified as major are as follows:

AL/RTW16 Land at Spratsbrook Farm	120 dwellings	(As the developable part of the site is outside the AONB it is considered that this should be treated as a site in the setting of the AONB rather than major development within it)
AL/RTW17 Longfield Road, Tunbridge Wells	80,000sqm	employment
AL/CRS1&2 Brick Kiln Farm & Corn Valley	215-225 dwellings	AL/CRS3 Turnden, Cranbrook
200-204 dwellings	AL/HA1 The White House, Hawkhurst	43
apartments	AL/HA4 Copthall Avenue, Hawkhurst	70-79 dwellings
AL/HA4 Copthall Avenue, Hawkhurst	70-79 dwellings	AL/BM1 Maidstone Road, Brenchley
45 dwellings	AL/PE1,2&3 Pembury	210-220 dwellings
903-936 dwellings		

5.3 Some of the above sites already have status in the planning system as follows:

- AL/CRS1&2 Brick Kiln Farm & Corn Valley: These sites were allocated in the 2016 DPD and 180 dwellings at Brick Kiln Farm has outline planning permission;
- AL/CRS3 Turnden, Cranbrook: 36 dwellings already granted full planning permission on the farmstead part of the site;
- AL/HA1 The White House, Hawkhurst: planning permission already granted for 43 retirement apartments;
- AL/BM1 Maidstone Road, Brenchley: outline and reserved matters permission already granted for 45 dwellings.

5.4 The dwellings proposed on major development sites in the AONB with no current planning status are:

- AL/CRS3 Turnden, Cranbrook 164-168 dwellings
- AL/HA4 Copthall Avenue, Hawkhurst 70-79 dwellings
- AL/PE1,2&3 Pembury 210-220 dwellings
- **Total 444-467 dwellings**

5.5 It should be noted that option GS2 in the Sustainability Appraisal assumes that reducing development below the housing need to one that does not involve any major development in the High Weald AONB would result in the scale of housing being reduced by between 1,600 - 2000 dwellings (17% of housing need for 11,526). It is not clear where this number comes from. It is the Unit's understanding that sites already allocated in an adopted Plan or granted outline or full planning permission would go ahead even if all major development sites in the AONB were removed from this Local Plan. Therefore the reduction in housing numbers would be 444-467 dwellings, or about 4% of 11,526.

The Major Development Tests

5.6 As quoted in paragraph 3.2 above, NPPF 172 says that “Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest” and provides a number of tests for the consideration of

such applications. Whilst the wording of this paragraph does not refer to allocations at the plan-making stage, if these tests are not applied at this stage there is a significant risk that allocations will not be deliverable, which would conflict with the test of soundness on effectiveness.

5.7 The Unit believes that the proposed major development allocations fail the NPPF 172 tests for the following reasons:

- **The need for the development:** the Borough Council argues that the high housing need for the area necessitates major development in the AONB. However, this argument is circular. If the conservation and enhancement of the AONB was given great weight as required by NPPF 172 then the housing requirement figure for the Borough would be adjusted downwards to reflect the fact that 70% of the area is AONB, and there would be no 'necessity' to locate large amounts of development within the AONB.

- **Developing outside the designated area, or meeting the need for it in some other way:** Even if it is necessary to allocate some development within the AONB that does not mean that such provision should be in the form of major development sites. As explained below, the High Weald landscape is small scale in character and can accommodate small scale development successfully without damaging its natural beauty.

- **Any detrimental effect on the environment:** this is explored in more detail below.

The Impact of Major Development on the AONB

5.8 National policy and legislation requires decision-makers to have regard and give great weight to conserving and enhancing the natural beauty of AONBs. In the High Weald this natural beauty is defined in the AONB Management Plan's Statement of Significance, which identifies five defining components of character that have made the High Weald a recognisably distinct and homogenous area for at least the last 700 years.

1. Geology, landform and water systems – a deeply incised, ridged and faulted landform of clays and sandstone with numerous gill streams. 2. Settlement – dispersed historic settlement including high densities of isolated farmsteads and late Medieval villages founded on trade and non-agricultural rural industries. 3. Routeways – a dense network of historic routeways (now roads, tracks and paths). 4. Woodland – abundance of ancient woodland, highly interconnected and in smallholdings. 5. Field and Heath – small, irregular and productive fields, bounded by hedgerows and woods, and typically used for livestock grazing; with distinctive zones of lowland heaths, and inned river valleys.

Other equally important characteristics are also identified in the Management Plan under sections on the land-based economy and related rural life and 'other qualities'.

5.9 The objectives for the settlement component are:

- Objective S1: To reconnect settlements, residents and their supporting economic activity with the surrounding countryside;
- Objective S2: To protect the historic pattern and character of settlement;
- and • Objective S3: To enhance the architectural quality of the High Weald and ensure development reflects the character of the High Weald in its scale, layout and design.

5.10 One of the actions for objective S2 is to "Seek to prioritise the delivery of new housing primarily through small-scale development and a mix of housing sizes that responds to local needs". Small scale carefully designed development can be accommodated successfully in this landscape whilst retaining its character, but large-scale developments are much more challenging to integrate successfully without detrimental effects. It is the view of the High Weald AONB Unit that major development cannot be accommodated within the AONB without damaging the essentially human scale character of the area or the purposes of the designation.

5.11 The 5 core components derive from the natural geology, topography and soils of the area and how people have used them over the centuries. Unlike the historically communally farmed landscapes of the Midlands which the national planning system is based on, the High Weald does not have nucleated towns and villages that are separated by open unoccupied countryside where any development would be 'isolated'. Instead it is based on a high density of medieval farmsteads most of which were farmed 'in severalty' – that is by individual families rather than as part of wider estates or communal systems. They were dispersed across the High Weald, surrounded by enough land to support a family and managed as mixed farms to suit the soil conditions and topography and to maximise self-sufficiency. Trees and hedges were an important component of the farming systems and fields were often carved out of woodland by hand (assarts) resulting in their characteristic small and irregular

shape. The challenging topography and soil conditions, which are suited to growing trees and grass rather than crops, mean that the High Weald has retained its Medieval character, with its small fields and woodland shaws, and its high density of historic routeways.

5.12 This history is important because it explains the human scale of the landscape components which comprise the natural beauty of the High Weald and the importance of the dispersed settlement pattern created by the farmsteads. Hamlets, villages and small towns evolved in the late Medieval period and onwards at the intersection of routeways and around commons to facilitate trading between farmsteads and the creation of small industries and crafts. Whilst these settlements are more consolidated, many have farmsteads on their outskirts and it is particularly important to maintain the separation between these two different settlement types so that the historic landscape remains legible for future generations. Continually adding to the larger villages and towns threatens this historic character, especially when it subsumes these adjacent farmsteads. Large-scale developments sit uncomfortably in this landscape because they overlap historic field systems and dominate the small scale historic settlement pattern. Whilst retaining field boundaries and historic features within new developments is important, it cannot overcome the basic incompatibility of locating large scale development within such a small scale landscape. It therefore inevitably fails to conserve and enhance the natural beauty of the AONB.

Landscape and Visual Impact Assessment

5.13 Following the Regulation 18 consultation the Borough Council commissioned Hankinson Duckett Associates to undertake a Landscape and Visual Impact Assessment of 21 potential allocation sites in the AONB. The AONB Unit was consulted on the brief to these consultants but not on the outcome of the work.

5.14 Appendix B to this submission identifies the detailed concerns with this work. Whilst it has a particular focus on the proposed site at Turnden, the concerns about the overall approach apply to all of the major development sites proposed in the AONB in the Regulation 19 Plan. These can be broadly summarised as follows:

- The Assessment consistently downgrades impact on the AONB;
- The imprecise method encourages operator bias and its opaque nature discourages scrutiny;
- The site assessments are inconsistent, partial, unsubstantiated and peppered with loaded phrases;
- There is a visual bias across the assessments with the impact on landscape as a resource being significantly underplayed;
- The cumulative effects of development under each site assessment section do not deal in specifics and when they do they focus almost entirely on visual effects – separation, viewpoints and planting – rather than landscape effects such as the loss of soils; field systems and their potential for biodiversity or food production; rurality, dark skies, tranquillity or other perceptual qualities.

5.15 For the reasons detailed above and in Appendix B it is considered that this LVIA should not be relied upon and it should be accepted that major development within the AONB will have a severe detrimental impact on the natural beauty of the High Weald.

6.0 Development in the Setting of the AONB

6.1 Even if Growth Strategy 2 was followed and the uncommitted major development sites in the AONB removed from the Local Plan, the remaining growth proposed would still have a significant impact on the designated area. This is because only 30% of the Borough is outside of the AONB so attempting to meet all or nearly all of the housing need figure puts tremendous pressure on this area, including where it abuts or is close to the AONB boundary. Developments outside but affecting the AONB include:

- Paddock Wood / land east of Capel Parish 3,490-3,590 dwellings
- Tudeley Garden Village 2,800 dwellings
- Horsmonden 240-320 dwellings
- Spratsbrook Farm, Tunbridge Wells 120 dwellings
- Benenden Hospital 47-50 dwellings

6.2 The Borough Council commissioned Hankinson Duckett Associates to produce an 'AONB Setting Analysis Report'. Whilst the work that has gone into this study is appreciated, the Unit was not consulted on its methodology or outcomes. The study focuses primarily on the inter-visibility of developments and direct impacts and does not address the wider impacts of accommodating this level of growth so close to the boundary of the AONB. These impacts include:

- Increased visitor numbers to the AONB placing pressure on its recreational facilities and infrastructure;
- Increased traffic travelling through the AONB to access the new developments and the highway 'improvements' required to accommodate this;
- Loss of tranquillity arising from the above;
- Increase

in air pollution arising from the above; • Light pollution from developments on the edge of the AONB and from highway improvements which require to be lit.

6.3 The above impacts would be reduced if the overall housing number was reduced to reflect the 70% of the Borough which lies within the AONB rather than trying to meet the full housing need by squeezing as much as possible into the remaining area. This statement focuses on the impact of this strategy on the AONB because that is the Unit's remit. However, this does not mean we are blind to the devastating impact of the planned level of growth on the area outside of the AONB, much of which is Green Belt and/or Low Weald countryside which is highly valued by its residents.

7.0 Conclusion

7.1 The High Weald AONB Unit believes that the overall level of development proposed and the major development sites allocated in the AONB are not justified and are contrary to national policy and guidance. The proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated and would fail to conserve and enhance this national asset. It is therefore recommended that there is a reduction in the overall housing figure and that all the major development sites in the AONB be deleted from the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see representation on STR1 [TWBC: As follows]

4.0 The Sustainability Appraisal

4.1 The Sustainability Appraisal is the main tool by which the Borough Council assesses the options for the level of growth and its distribution, and selects its development strategy. NPPF paragraph 32 says that "Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements" and paragraph 35 says that Plans are 'sound' if they meet the tests, including "Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence".

4.2 The Sustainability Appraisal for the Regulation 19 Local Plan assesses a number of growth options against sustainability objectives. Appendix A to this statement shows the scores and commentary for two of these options:

- GS13 - The strategy reflected in the Regulation 19 Local Plan; and
- GS2 - A strategy which reduces development below the housing need to one that does not involve any major development in the High Weald AONB.

This exercise has been carried out to understand the reasoning behind the selection of the Local Plan strategy compared to the option that most closely aligns to the AONB Unit's position, albeit it doesn't address its concerns about the impact of overall levels of growth on the setting of the AONB.

4.3 Appendix 1 demonstrates the following:

- That the economic objectives are double-counted in the assessment by the application of two objectives on business growth and employment and no account is taken of the benefit the AONB brings to the tourism industry;
- That the perceived impact of strategies on areas of deprivation is double-counted in the assessment by the application of two objectives on health and deprivation and no account is taken of the need for such areas to have good access to the countryside which would be lost to major development under GS13;
- That the assessment of the impact of option GS2 on climate change is clearly incorrect and conflicts with the commentary. This option will be much more positive for the climate change objective than GS13, not just because of reductions in transport and carbon emissions from new dwellings but due to the carbon sequestration function of soils and natural habitats;
- The heritage score for GS2 should be positive to reflect the heritage value of the landscape itself (medieval field systems etc) which would be impacted less under GS2 than GS13. Heritage is not just about listed buildings and conservation areas;
- Whilst it is agreed that GS2 would have a less positive impact on housing than GS13, the suggestion that building more dwellings in the AONB would reduce house prices is unsubstantiated and goes against known evidence. To meet housing needs in the AONB requires more genuinely affordable housing not more £300k+ houses. It is also noted in paragraph 5.5 below that the reduction in housing numbers for this option appears to have been over-estimated, which would affect the relative scores for this objective;
- Landuse - this objective is supposed to be about protecting soils, and reusing previously developed land and buildings. Instead the scoring seems to focus on impacts on the greenbelt. Since most of the major development sites in the AONB are on greenfield land GS2 should score much more positively than GS13;
- The landscape score for GS2 should be much more positive because it significantly reduces the harm to the AONB, which has the highest planning status in respect of landscape and scenic beauty. This is the only objective which mentions the AONB, and does so alongside all other landscape impacts, diluting its importance in the overall assessment of sustainability whereas the NPPF requires that AONBs be given 'great weight';
- Travel - As the only difference between GS2 and GS13 is the omission of major development sites in the AONB, which as the commentary says will be in areas where alternative transport modes are not popular or viable, the score for GS2 should be more positive for the travel objective than GS13 rather than the opposite as shown.
- Water - If the score is not significantly affected by reduction in growth in the AONB as per the commentary then it should be the same for GS2 and GS13.

4.4 If the above inaccuracies and inconsistencies in the scoring were corrected then GS2 would score more positively overall than the strategy selected for the Regulation 19 Local Plan.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	High Weald AONB Unit
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/PE 3 Land north of the A21, south and west of Hastings Road

[TWBC: this representation has been input against Policies STR 1, AL/HA 4, AL/PE 1, AL/PE 2 and AL/PE 3 – see Comment Numbers PSLP_1434, PSLP_1440, PSLP_1441, PSLP_1442 and PSLP_1443]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not justified
.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see representation on STR1.

[TWBC: as follows]

HWAONB Unit Representation on STR1 – The Development Strategy

1.0 General Comments

1.1 The High Weald AONB Unit acknowledges that Tunbridge Wells Borough Council has sought to address the Unit's previous representations in its preparation of the Regulation 19 Local Plan. In particular we welcome the following:

- The assessment of whether potential allocation sites in the AONB constitute major development, and whether they meet the NPPF 172 tests;
- The reduction in the number of major development sites in the AONB and the reduction in the scale of some of the sites retained; and
- The amendments to a number of development management policies in response to the Unit's comments at Regulation 18 stage.

1.2 However, the Unit remains concerned about the overall level of development being proposed within the AONB and the impact of the retained major development sites. Whilst it appreciates the additional evidence the Borough Council has produced to justify these sites (such as the Landscape and Visual Impact Assessment, the AONB Setting Analysis Report and the Grassland Survey) it has significant issues with the assumptions and outcomes of these studies. The following statement sets out why the Unit believes that this approach is not justified and is contrary to national policy and guidance. It also explains why it believes that the proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated.

2.0 The High Weald AONB

2.1 The High Weald was designated in 1983 as an Area of Outstanding Natural Beauty. It is an exceptionally beautiful medieval landscape covering 564 square miles across the counties of East and West Sussex, Kent and Surrey.

2.2 The High Weald AONB Joint Advisory Committee was established in 1989 and is a partnership of 15 local authorities, Defra, Natural England and organisations representing farming, woodland, access and community interests. The JAC is responsible for publishing and monitoring the statutory AONB Management Plan. The JAC is supported by a small, dedicated staff team, the High Weald AONB Unit, which provides advice on how to conserve and enhance the AONB. The advice provided by the AONB Unit assists public bodies and statutory undertakers to meet their duty as set out in Section 85 of the Countryside and Rights of Way Act 2000 to have regard to the purpose of conserving and enhancing the natural beauty of AONBs in making decisions that affect it.

2.3 The High Weald AONB Unit is an advisory body not a local planning authority and it has no statutory powers. The AONB Unit is not a statutory consultee on planning matters, but offers advice based on the statutory High Weald AONB Management Plan, which has been adopted by all partner authorities, as 'their policy for the management of the area and for the carrying out of their functions in relation to it'.

3.0 National Policy and Guidance in Relation to AONBs

3.1 The National Planning Policy Framework (NPPF) paragraph 172 requires great weight to be given to conserving and enhancing landscape and scenic beauty in Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty. The conservation of wildlife and cultural heritage are important considerations in all these areas. The scale and extent of development within these designated areas should be limited.

3.2 In the event that the decision-maker concludes that development is 'major' in terms of its impact on the AONB, paragraph 172 of the NPPF states that "Planning permission should be refused for major development⁵⁵ other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of:

a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated".

3.3 Footnote 55 says: "For the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined".

3.4 NPPF paragraph 11 explains the presumption in favour of sustainable development. It says that local planning authorities should provide for objectively assessed needs for housing and other uses, as well as any unmet needs from neighbouring areas, unless **"the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"**. The assets referred to are listed in footnote 6 and include Areas of Outstanding Natural Beauty. The most relevant policy in the Framework for AONBs is paragraph 172 as above.

3.5 Planning Practice Guidance, revised July 2019, states "The National Planning Policy Framework makes clear that the scale and extent of development in these areas should be limited, in view of the importance of conserving and enhancing their landscapes and scenic beauty. Its policies for protecting these areas may mean that it is not possible to meet objectively assessed needs for development in full through the plan-making process, and they are unlikely to be suitable areas for accommodating unmet needs from adjoining (non-designated) areas. Effective joint working between planning authorities covering designated and adjoining areas, through the preparation and maintenance of statements of common ground, is particularly important in helping to identify how housing and other needs can best be accommodated..." Paragraph: 041 Reference ID: 8-041-20190721.

3.6 On 16 December 2020 the government announced how it would be responding to widespread concern about its proposals to amend the standard method for calculating housing need. This response confirmed that the Government would not be progressing these changes, but rather would be retaining the existing standard method for most local planning authorities and boosting supply by increasing the housing numbers of the 20 largest cities in England by 35%. The Government's response included the following statements:

"we heard suggestions in the consultation that in some places the numbers produced by the standard method pose a risk to protected landscapes and Green Belt. **We should be clear that meeting housing need is never a reason to cause unacceptable harm to such places.** But harm or homes is not a binary choice. We can plan for well designed, beautiful homes, with access to the right infrastructure in the places where people need and want to live while also protecting the environment and green spaces communities most value".

"Many respondents to the consultation were concerned that the 'targets' provided by the standard method were not appropriate for individual local authority areas. **Within the current planning system**

the standard method does not present a ‘target’ in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints. In order to make this policy position as clear as possible, we will explore how we can make changes through future revisions to the National Planning Policy Framework, including whether a renaming of the policy could provide additional clarity”. 3.7 The above statements do not change existing policy, but reaffirm the existing situation in the NPPF that the housing need numbers produced by the standard method are just a starting point and not a target. 70% of Tunbridge Wells borough is within the High Weald AONB, and yet, the Regulation 19 Local Plan is predicated on the Borough Council meeting its full housing need figure of 678 dwellings per year, or some 12,200 over the plan period of 2020 to 2038. This has severe repercussions for the AONB and prevents the Local Plan from conserving and enhancing its natural beauty.

5.0 Major Development in the High Weald AONB

The Major Development Sites

5.1 Appendix 2 and 3 of the Development Strategy Topic Paper provides the justification for why some of the proposed allocation sites have been considered ‘major development’ in the terms of paragraph 172 of the NPPF and some are not. This assessment has been carried out in a transparent way, and the NPPF makes it clear that whether a development is major or not is a matter for the decision-maker.

5.2 The sites identified as major are as follows:

AL/RTW16 Land at Spratsbrook Farm	120 dwellings	(As the developable part of the site is outside the AONB it is considered that this should be treated as a site in the setting of the AONB rather than major development within it)
AL/RTW17 Longfield Road, Tunbridge Wells	80,000sqm	employment
AL/CRS1&2 Brick Kiln Farm & Corn Valley	215-225 dwellings	AL/CRS3 Turnden, Cranbrook
200-204 dwellings	AL/HA1 The White House, Hawkhurst	43
apartments	AL/HA4 Copthall Avenue, Hawkhurst	70-79 dwellings
AL/BM1 Maidstone Road, Brenchley	45 dwellings	AL/PE1,2&3 Pembury
	210-220 dwellings	Total
903-936 dwellings		

5.3 Some of the above sites already have status in the planning system as follows:

- AL/CRS1&2 Brick Kiln Farm & Corn Valley: These sites were allocated in the 2016 DPD and 180 dwellings at Brick Kiln Farm has outline planning permission;
- AL/CRS3 Turnden, Cranbrook: 36 dwellings already granted full planning permission on the farmstead part of the site;
- AL/HA1 The White House, Hawkhurst: planning permission already granted for 43 retirement apartments;
- AL/BM1 Maidstone Road, Brenchley: outline and reserved matters permission already granted for 45 dwellings.

5.4 The dwellings proposed on major development sites in the AONB with no current planning status are:

- AL/CRS3 Turnden, Cranbrook 164-168 dwellings
- AL/HA4 Copthall Avenue, Hawkhurst 70-79 dwellings
- AL/PE1,2&3 Pembury 210-220 dwellings
- **Total**
- 444-467 dwellings**

5.5 It should be noted that option GS2 in the Sustainability Appraisal assumes that reducing development below the housing need to one that does not involve any major development in the High Weald AONB would result in the scale of housing being reduced by between 1,600 - 2000 dwellings (17% of housing need for 11,526). It is not clear where this number comes from. It is the Unit's understanding that sites already allocated in an adopted Plan or granted outline or full planning permission would go ahead even if all major development sites in the AONB were removed from this Local Plan. Therefore the reduction in housing numbers would be 444-467 dwellings, or about 4% of 11,526.

The Major Development Tests

5.6 As quoted in paragraph 3.2 above, NPPF 172 says that “Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest” and provides a number of tests for the consideration of

such applications. Whilst the wording of this paragraph does not refer to allocations at the plan-making stage, if these tests are not applied at this stage there is a significant risk that allocations will not be deliverable, which would conflict with the test of soundness on effectiveness.

5.7 The Unit believes that the proposed major development allocations fail the NPPF 172 tests for the following reasons:

- **The need for the development:** the Borough Council argues that the high housing need for the area necessitates major development in the AONB. However, this argument is circular. If the conservation and enhancement of the AONB was given great weight as required by NPPF 172 then the housing requirement figure for the Borough would be adjusted downwards to reflect the fact that 70% of the area is AONB, and there would be no 'necessity' to locate large amounts of development within the AONB.

- **Developing outside the designated area, or meeting the need for it in some other way:** Even if it is necessary to allocate some development within the AONB that does not mean that such provision should be in the form of major development sites. As explained below, the High Weald landscape is small scale in character and can accommodate small scale development successfully without damaging its natural beauty.

- **Any detrimental effect on the environment:** this is explored in more detail below.

The Impact of Major Development on the AONB

5.8 National policy and legislation requires decision-makers to have regard and give great weight to conserving and enhancing the natural beauty of AONBs. In the High Weald this natural beauty is defined in the AONB Management Plan's Statement of Significance, which identifies five defining components of character that have made the High Weald a recognisably distinct and homogenous area for at least the last 700 years.

1. Geology, landform and water systems – a deeply incised, ridged and faulted landform of clays and sandstone with numerous gill streams. 2. Settlement – dispersed historic settlement including high densities of isolated farmsteads and late Medieval villages founded on trade and non-agricultural rural industries. 3. Routeways – a dense network of historic routeways (now roads, tracks and paths). 4. Woodland – abundance of ancient woodland, highly interconnected and in smallholdings. 5. Field and Heath – small, irregular and productive fields, bounded by hedgerows and woods, and typically used for livestock grazing; with distinctive zones of lowland heaths, and inned river valleys.

Other equally important characteristics are also identified in the Management Plan under sections on the land-based economy and related rural life and 'other qualities'.

5.9 The objectives for the settlement component are:

- Objective S1: To reconnect settlements, residents and their supporting economic activity with the surrounding countryside;
- Objective S2: To protect the historic pattern and character of settlement;
- and • Objective S3: To enhance the architectural quality of the High Weald and ensure development reflects the character of the High Weald in its scale, layout and design.

5.10 One of the actions for objective S2 is to "Seek to prioritise the delivery of new housing primarily through small-scale development and a mix of housing sizes that responds to local needs". Small scale carefully designed development can be accommodated successfully in this landscape whilst retaining its character, but large-scale developments are much more challenging to integrate successfully without detrimental effects. It is the view of the High Weald AONB Unit that major development cannot be accommodated within the AONB without damaging the essentially human scale character of the area or the purposes of the designation.

5.11 The 5 core components derive from the natural geology, topography and soils of the area and how people have used them over the centuries. Unlike the historically communally farmed landscapes of the Midlands which the national planning system is based on, the High Weald does not have nucleated towns and villages that are separated by open unoccupied countryside where any development would be 'isolated'. Instead it is based on a high density of medieval farmsteads most of which were farmed 'in severalty' – that is by individual families rather than as part of wider estates or communal systems. They were dispersed across the High Weald, surrounded by enough land to support a family and managed as mixed farms to suit the soil conditions and topography and to maximise self-sufficiency. Trees and hedges were an important component of the farming systems and fields were often carved out of woodland by hand (assarts) resulting in their characteristic small and irregular

shape. The challenging topography and soil conditions, which are suited to growing trees and grass rather than crops, mean that the High Weald has retained its Medieval character, with its small fields and woodland shaws, and its high density of historic routeways.

5.12 This history is important because it explains the human scale of the landscape components which comprise the natural beauty of the High Weald and the importance of the dispersed settlement pattern created by the farmsteads. Hamlets, villages and small towns evolved in the late Medieval period and onwards at the intersection of routeways and around commons to facilitate trading between farmsteads and the creation of small industries and crafts. Whilst these settlements are more consolidated, many have farmsteads on their outskirts and it is particularly important to maintain the separation between these two different settlement types so that the historic landscape remains legible for future generations. Continually adding to the larger villages and towns threatens this historic character, especially when it subsumes these adjacent farmsteads. Large-scale developments sit uncomfortably in this landscape because they overlap historic field systems and dominate the small scale historic settlement pattern. Whilst retaining field boundaries and historic features within new developments is important, it cannot overcome the basic incompatibility of locating large scale development within such a small scale landscape. It therefore inevitably fails to conserve and enhance the natural beauty of the AONB.

Landscape and Visual Impact Assessment

5.13 Following the Regulation 18 consultation the Borough Council commissioned Hankinson Duckett Associates to undertake a Landscape and Visual Impact Assessment of 21 potential allocation sites in the AONB. The AONB Unit was consulted on the brief to these consultants but not on the outcome of the work.

5.14 Appendix B to this submission identifies the detailed concerns with this work. Whilst it has a particular focus on the proposed site at Turnden, the concerns about the overall approach apply to all of the major development sites proposed in the AONB in the Regulation 19 Plan. These can be broadly summarised as follows:

- The Assessment consistently downgrades impact on the AONB;
- The imprecise method encourages operator bias and its opaque nature discourages scrutiny;
- The site assessments are inconsistent, partial, unsubstantiated and peppered with loaded phrases;
- There is a visual bias across the assessments with the impact on landscape as a resource being significantly underplayed;
- The cumulative effects of development under each site assessment section do not deal in specifics and when they do they focus almost entirely on visual effects – separation, viewpoints and planting – rather than landscape effects such as the loss of soils; field systems and their potential for biodiversity or food production; rurality, dark skies, tranquillity or other perceptual qualities.

5.15 For the reasons detailed above and in Appendix B it is considered that this LVIA should not be relied upon and it should be accepted that major development within the AONB will have a severe detrimental impact on the natural beauty of the High Weald.

6.0 Development in the Setting of the AONB

6.1 Even if Growth Strategy 2 was followed and the uncommitted major development sites in the AONB removed from the Local Plan, the remaining growth proposed would still have a significant impact on the designated area. This is because only 30% of the Borough is outside of the AONB so attempting to meet all or nearly all of the housing need figure puts tremendous pressure on this area, including where it abuts or is close to the AONB boundary. Developments outside but affecting the AONB include:

- Paddock Wood / land east of Capel Parish 3,490-3,590 dwellings
- Tudeley Garden Village 2,800 dwellings
- Horsmonden 240-320 dwellings
- Spratsbrook Farm, Tunbridge Wells 120 dwellings
- Benenden Hospital 47-50 dwellings

6.2 The Borough Council commissioned Hankinson Duckett Associates to produce an 'AONB Setting Analysis Report'. Whilst the work that has gone into this study is appreciated, the Unit was not consulted on its methodology or outcomes. The study focuses primarily on the inter-visibility of developments and direct impacts and does not address the wider impacts of accommodating this level of growth so close to the boundary of the AONB. These impacts include:

- Increased visitor numbers to the AONB placing pressure on its recreational facilities and infrastructure;
- Increased traffic travelling through the AONB to access the new developments and the highway 'improvements' required to accommodate this;
- Loss of tranquillity arising from the above;
- Increase

in air pollution arising from the above; • Light pollution from developments on the edge of the AONB and from highway improvements which require to be lit.

6.3 The above impacts would be reduced if the overall housing number was reduced to reflect the 70% of the Borough which lies within the AONB rather than trying to meet the full housing need by squeezing as much as possible into the remaining area. This statement focuses on the impact of this strategy on the AONB because that is the Unit's remit. However, this does not mean we are blind to the devastating impact of the planned level of growth on the area outside of the AONB, much of which is Green Belt and/or Low Weald countryside which is highly valued by its residents.

7.0 Conclusion

7.1 The High Weald AONB Unit believes that the overall level of development proposed and the major development sites allocated in the AONB are not justified and are contrary to national policy and guidance. The proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated and would fail to conserve and enhance this national asset. It is therefore recommended that there is a reduction in the overall housing figure and that all the major development sites in the AONB be deleted from the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see representation on STR1 [TWBC: As follows]

4.0 The Sustainability Appraisal

4.1 The Sustainability Appraisal is the main tool by which the Borough Council assesses the options for the level of growth and its distribution, and selects its development strategy. NPPF paragraph 32 says that "Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements" and paragraph 35 says that Plans are 'sound' if they meet the tests, including "Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence".

4.2 The Sustainability Appraisal for the Regulation 19 Local Plan assesses a number of growth options against sustainability objectives. Appendix A to this statement shows the scores and commentary for two of these options:

- GS13 - The strategy reflected in the Regulation 19 Local Plan; and
- GS2 - A strategy which reduces development below the housing need to one that does not involve any major development in the High Weald AONB.

This exercise has been carried out to understand the reasoning behind the selection of the Local Plan strategy compared to the option that most closely aligns to the AONB Unit's position, albeit it doesn't address its concerns about the impact of overall levels of growth on the setting of the AONB.

4.3 Appendix 1 demonstrates the following:

- That the economic objectives are double-counted in the assessment by the application of two objectives on business growth and employment and no account is taken of the benefit the AONB brings to the tourism industry;
- That the perceived impact of strategies on areas of deprivation is double-counted in the assessment by the application of two objectives on health and deprivation and no account is taken of the need for such areas to have good access to the countryside which would be lost to major development under GS13;
- That the assessment of the impact of option GS2 on climate change is clearly incorrect and conflicts with the commentary. This option will be much more positive for the climate change objective than GS13, not just because of reductions in transport and carbon emissions from new dwellings but due to the carbon sequestration function of soils and natural habitats;
- The heritage score for GS2 should be positive to reflect the heritage value of the landscape itself (medieval field systems etc) which would be impacted less under GS2 than GS13. Heritage is not just about listed buildings and conservation areas;
- Whilst it is agreed that GS2 would have a less positive impact on housing than GS13, the suggestion that building more dwellings in the AONB would reduce house prices is unsubstantiated and goes against known evidence. To meet housing needs in the AONB requires more genuinely affordable housing not more £300k+ houses. It is also noted in paragraph 5.5 below that the reduction in housing numbers for this option appears to have been over-estimated, which would affect the relative scores for this objective;
- Landuse - this objective is supposed to be about protecting soils, and reusing previously developed land and buildings. Instead the scoring seems to focus on impacts on the greenbelt. Since most of the major development sites in the AONB are on greenfield land GS2 should score much more positively than GS13;
- The landscape score for GS2 should be much more positive because it significantly reduces the harm to the AONB, which has the highest planning status in respect of landscape and scenic beauty. This is the only objective which mentions the AONB, and does so alongside all other landscape impacts, diluting its importance in the overall assessment of sustainability whereas the NPPF requires that AONBs be given 'great weight';
- Travel - As the only difference between GS2 and GS13 is the omission of major development sites in the AONB, which as the commentary says will be in areas where alternative transport modes are not popular or viable, the score for GS2 should be more positive for the travel objective than GS13 rather than the opposite as shown.
- Water - If the score is not significantly affected by reduction in growth in the AONB as per the commentary then it should be the same for GS2 and GS13.

4.4 If the above inaccuracies and inconsistencies in the scoring were corrected then GS2 would score more positively overall than the strategy selected for the Regulation 19 Local Plan.

Respondent's Name and/or Organisation	High Weald AONB Unit
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 8 Outdoor Lighting and Dark Skies

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The High Weald AONB Unit supports policy EN8 Outdoor Lighting and Dark Skies as assisting with meeting objective OQ4 of the High Weald AONB Management Plan 'To protect and promote the perceptual qualities that people value'. These qualities include dark skies.

It would also support paragraph 6.125 in the supporting text which says "The whole of the borough, apart from the Main Urban Area of Royal Tunbridge Wells and Southborough, and Paddock Wood, should be treated as being in Zone E1 "intrinsically dark with natural surroundings" (as defined by Table 1 of the Institute of Lighting Professionals Guidance Note GN01: the Reduction of Obtrusive Light), where sky glow and building luminance should be zero. Particular consideration should be given to the dark skies of the High Weald AONB as set out in the High Weald AONB Management Plan". The ILP Guidance says that zone E1 Natural Dark (SQM 20 to 20.5) is suitable for "Relatively uninhabited rural areas, National Parks, Areas of Outstanding Natural Beauty, IDA buffer zones etc"

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

N/A

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Policy EN 19 The High Weald Area of Outstanding Natural Beauty

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The AONB Unit supports the intent of EN19 on the High Weald AONB Unit but considers that it could be strengthened in the following ways:

The reference to the AONB Management Plan is welcomed but this Plan is supplemented by Advice Notes which help to amplify its objectives and proposed actions. Of particular relevance to planning matters is the High Weald Housing Design Guide and the High Weald Colour Study.

The policy makes specific mention of some of the AONB's landscape character components, such as historic routeways, but not others. Notable by its absence is any reference to the essentially Medieval character of the landscape and, in particular, the importance of its small, irregularly shaped Medieval field systems. These are an important contributor to the overall landscape character and are under threat from development pressure and mass tree-planting schemes.

In addition, criterion 4 refers to the distinctiveness and characteristics of settlement but not to their settlement pattern which is an important aspect that needs to be conserved when any development takes place.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Unit recommend that the following amendments are made to the policy:

All development within, or affecting the setting of, the High Weald Area of Outstanding Natural Beauty (AONB) shall seek to conserve and enhance its landscape and scenic beauty, having particular regard to the impacts on its character components, as set out in the High Weald AONB Management Plan **and its supporting documents including the High Weald Housing Design Guide and the High Weald AONB Guidance on the selection and use of colour.**

Development in the AONB should be limited in scale and extent, appropriate in terms of its nature and location, and should demonstrate a positive contribution to the objectives of the AONB Management Plan. It will need to:

- 1 Be sensitive to the topography and landscape features of the location;

- 2 Improve where possible connections between settlements and countryside through the provision of high quality green infrastructure (see Policy EN 14: Green, Grey, and Blue Infrastructure);
- 3 **Conserve and enhance the historic characteristics of the landscape including its distinctive field systems and features and the** ~~Where present, protect, enhance, and restore~~ **key characteristics of historic routeways;**
- 4 Retain and support the distinctiveness of individual settlements, ~~and their key characteristics~~ **and their historic settlement pattern;**
- 5 Help restore the natural functioning of watercourses;
- 6 Improve the management of associated agricultural land, woodland, and heaths;
- 7 Where possible and appropriate, improve public access to the countryside, providing way marking and interpretation material to assist in the public enjoyment, appreciation, and understanding of the AONB.

Planning permission will be refused for 'major' development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest, in accordance with national policy.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Policy AL/CRS 1 Land at Brick Kiln Farm, Cranbrook Road

Paragraph Numbers: 5.288 - 5.294

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound Don't know

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation is submitted on behalf of Hill primarily in response to proposed Policy AL/CRS 1 which concerns Brick Kiln Farm, Cranbrook.

Hill is a family-owned company, representing one of the top 20 UK housebuilders. It has achieved the WhatHouse Housebuilder of the Year 3 years in a row and prides itself on providing high quality homes for local communities.

The Site was part of a wider area allocated for residential development within the Site Allocations Local Plan under Policy AL/CR4. The proposed Policy AL/CRS 1 intends to separate out the Brick Kiln Farm site as a standalone policy. Hill is supportive of this approach.

Policy AL/CRS 1 sets out 9No. requirements and we comment on these as follows:

1. The main vehicular access shall be taken from the A229 Hartley Road (as a priority junction), with provision of secondary/emergency access required

Hill supports this requirement.

2. Provision of pedestrian and cycle links to provide permeability through this site and adjacent sites (Policies AL/CRS 2 and AL/CRS 3), and to create an accessible, safe, non-vehicular route to the services provided at the centre of Cranbrook, Hartley, and surrounding residential areas and link into, and enhance, established Public Rights of Way

Hill supports this requirement and is actively engaged in pre-application discussions with officers to ensure that a landscape led scheme that maximises permeability come forward as part of the forthcoming Reserved Matters Application. In addition to this, the existing Public Rights of Way through the site will be enhanced to further facilitate permeability.

3. Development shall be located on the areas identified for residential use on the site layout plan

Hill generally supports this requirement, however, would suggest that the wording is changed slightly so that there is flexibility in the shape of the residential areas to ensure the best possible outcome for achieving a high quality development and landscape led scheme. The proposed modification to the wording of this point is set out further within the following section.

4. The design, layout, and final number of dwellings to be informed by a comprehensive landscape and visual impact assessment, ecological studies, and a heritage assessment (to include archaeology and landscape heritage), and consideration of cumulative effects of any other planned development in the vicinity

Hill supports this requirement.

5. Regard shall be given to existing hedgerows and mature trees on site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and landscape and visual impact assessment;

Hill supports this requirement and is actively engaged in pre-application discussions with officers to ensure that a landscape led scheme comes forward as part of the forthcoming Reserved Matters Application.

6. Extensive green infrastructure shall be provided, both on the areas shown indicatively in green on the site layout plan and through the non-green areas where relevant, in the form of:

a) a suitably designed green infrastructure link along the Crane Valley to link into the routes provided further south along the valley, providing an extended and improved green route into the centre of Cranbrook and Hartley, and creating links to the allocated sites to the south and east (Policies AL/CRS 2 and AL/CRS 3);

b) retained and improved meadows, woodlands, hedgerows, and water features;

c) landscape buffers to existing woodlands;

d) the reinstatement of historical field boundaries with hedgerows, shaws, and woodlands;e) retained and enhanced water bodies and watercourses

e) retained and enhanced water bodies and watercourses

Hill supports this requirement and is working in accordance with the green infrastructure plan approved as part of the outline planning application.

7. An archaeological assessment of the site, including field evaluations;

Hill supports this requirement and condition 39 attached to the outline planning permission controls this requirement.

8. Provision of on-site amenity/natural green space and children's play space;

Hill supports this requirement and these features will be included with the forthcoming Reserved Matters Application.

9. Contributions are to be provided to mitigate the impact of the development, in accordance with Policy STR/CRS 1.

Hill supports this requirement, noting that contributions have already been secured through the S106 accompanying the Outline Planning Permission.

As demonstrated above, Hill therefore considers this policy would be justified and sound in line with the NPPF, subject to the proposed modification below.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy AL/CRS 1 currently states as part of the wording:

3. Development shall be located on the areas identified for residential use on the site layout plan

Hill generally supports this requirement, however, would suggest that the wording is changed slightly so that there is flexibility in the shape of the residential areas to ensure the best possible outcome for achieving a high quality development and landscape led scheme.

We recommend that the wording of requirement 3 of this Policy is amended as follows:

3. Development shall be located in broad accordance with the areas indicatively identified for residential use on the site layout plan.

We consider this will ensure flexibility for detailed design of the residential parcels for appropriate orientation of dwellings, gardens or to provide more soft landscaping and habitat around these parcels and for this to be accommodated in agreement with Tunbridge Wells Borough Council through the development management process.

Subject to this modification we would consider the policy to be justified and sound in line with the NPPF.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? ☐ Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Hill considers this necessary as Brick Kiln Farm is an active site and the outcome of the hearing sessions will be important in the progress of a future Reserved Matters application.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: ☐ Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Peter Hills, xxx, Postern Lane [TWBC: part of postal address redacted for privacy]
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/ SS3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Postern Lane, on the border of Tonbridge and Tunbridge Wells for 9 years. I am extremely concerned about the impact of this development on the infrastructure (roads, shopping and public transport) of Tonbridge.

The development proposed for Tudeley will have a significant impact on the the neighbouring area of Tonbridge, being so close the border with Tonbridge and Malling Borough Council (TMBC). The plan shows insufficient evidence that an effective consultation has taken place with TMBC.

This strategic site has no significant proposals for public transport and assumes a significant decrease in car use when modeling transport projections. I believe these projections are unrealistic and the transport impacts on the neighbouring areas will be significant, highly detrimental and that there are no practical means of mitigation.

The landscape damage from this development would be significant and has not been properly assessed by TWBC.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Significantly more work is required to justify this strategic development. In the absence of this work the proposal should be removed from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

None

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As the Government's adviser on the historic environment Historic England is keen to ensure that the protection of the historic environment is fully taken into account at all stages of the planning process. This includes formulation of local development policy and plans, supplementary planning documents, area and site proposals, and the on-going review of policies and plans.

There are many issues and matters in the consultation document that are beyond the remit and concern of Historic England and our comments are, as required, limited to matters relating to the historic environment and heritage assets. In our previous comments (by letter dated 15 November 2019), Historic England focused on the objective of the National Planning Policy Framework to set out a positive strategy for the conservation, enjoyment and enhancement of the historic environment (NPPF, Paragraph 28); and contain policies to deliver the conservation and enhancement of the historic environment (NPPF, Paragraph 185).

Further to our comments on the Regulation 18 draft Local Plan, and the Council's response set out in a letter dated 23 April 2020, we entered a period of engagement to address the concerns and issues raised in that our representations. This included an exchange of correspondence and two meetings on 3 June 2020 and 4 May 2021. You shared with us also informal comments by a Planning Inspector on the wording of the heritage policies of the plan, which we discussed by email and at the latter meeting. In view of the changes made to the draft Local Plan we consider that our comments on the Regulation 18 stage draft Local Plan largely have been addressed in the current Pre-submission version or are, in our view, not now likely to affect the soundness of the Local Plan.

We welcome the inclusion of policies for the historic environment in the local plan that meet the obligation for preparing the positive strategy required by the NPPF. The key test of the soundness of the plan and the achievement of sustainable development as defined in the NPPF in respect of the elements that relate to the historic environment, in our view, have been met.

We note also the intention to prepare a separate development plan document for the Royal Tunbridge Wells town centre area, which we expect to address some of the issues relating to sites allocations and policy wording raised in our earlier Regulation 18 representations. We look forward to discussing this document with you in due course.

We should like to stress that this opinion is based on the information provided by the Council in its consultation. To avoid any doubt, this does not affect our obligation to provide further advice and, potentially, object to specific proposals which may subsequently arise where we consider that these would have an adverse effect upon the historic environment.

We hope that these comments are useful.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As the Government's adviser on the historic environment Historic England is keen to ensure that the protection of the historic environment is fully taken into account at all stages of the planning process. This includes formulation of local development policy and plans, supplementary planning documents, area and site proposals, and the on-going review of policies and plans.

There are many issues and matters in the consultation document that are beyond the remit and concern of Historic England and our comments are, as required, limited to matters relating to the historic environment and heritage assets. In our previous comments (by letter dated 15 November 2019), Historic England focused on the objective of the National Planning Policy Framework to set out a positive strategy for the conservation, enjoyment and enhancement of the historic environment (NPPF, Paragraph 28); and contain policies to deliver the conservation and enhancement of the historic environment (NPPF, Paragraph 185).

Further to our comments on the Regulation 18 draft Local Plan, and the Council's response set out in a letter dated 23 April 2020, we entered a period of engagement to address the concerns and issues raised in that our representations. This included an exchange of correspondence and two meetings on 3 June 2020 and 4 May 2021. You shared with us also informal comments by a Planning Inspector on the wording of the heritage policies of the plan, which we discussed by email and at the latter meeting. In view of the changes made to the draft Local Plan we consider that our comments on the Regulation 18 stage draft Local Plan largely have been addressed in the current Pre-submission version or are, in our view, not now likely to affect the soundness of the Local Plan.

We welcome the inclusion of policies for the historic environment in the local plan that meet the obligation for preparing the positive strategy required by the NPPF. The key test of the soundness of the plan and the achievement of sustainable development as defined in the NPPF in respect of the elements that relate to the historic environment, in our view, have been met.

We note also the intention to prepare a separate development plan document for the Royal Tunbridge Wells town centre area, which we expect to address some of the issues relating to sites allocations and policy wording raised in our earlier Regulation 18 representations. We look forward to discussing this document with you in due course.

We should like to stress that this opinion is based on the information provided by the Council in its consultation. To avoid any doubt, this does not affect our obligation to provide further advice and, potentially, object to specific proposals which may subsequently arise where we consider that these would have an adverse effect upon the historic environment.

We hope that these comments are useful.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Status	Processed
Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Ryan Holliday
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS1 for paddock wood and land at east capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Paddock Wood for over 10 years with my young family.

I feel that this development will have a very negative impact on paddock Wood residents. The traffic congestion this will cause via tudely and tonbridge will cause delays and pollution. The loss of green space after all the other green space lost to development makes this a bad choice of location for such a large development. Residents will have little space left to walk and enjoy nature.

This area is also prone to flooding, I have spent many times clearing the ditches to stop neighbours gardens becoming water logged. This development needs huge consideration.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Reconsider the area, build on brownfield. Don't ruin our beautiful countryside which has been a safe haven for so many during this past year.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	.	No, I do not wish to participate in examination hearing session(s)

I have been a Paddock Wood resident for over 10 years.

I believe that the proposal for Paddock Wood and Capel is not the right place for such a large scale development. We do not have the roads and infrastructure in place and we flood regularly. There are not enough primary schools and doctors surgeries to handle this amount of people.

Sadly Paddock Wood has already had a vast amount of development taking away a huge amount of green space, one which during the last year has been vital to our mental health. Taking these areas of green space leaves Paddock Wood with very little left and a huge loss to wildlife.

Question 7

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging

the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close

to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the

less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site’s historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites

158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Consultee	Mr Garry Holmes ([REDACTED])
Email Address	[REDACTED]
Address	[REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Garry Holmes ([REDACTED])
Comment ID	PSLP_2098
Response Date	04/06/21 12:26
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.2
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Garry Holmes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4, please see Comment Numbers PSLP_2095 and PSLP_2098]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging

the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close

to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the

less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites

158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1

Respondent's Name and/or Organisation Home Builders Federation

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: Representations made against STR 1, STR 5, EN2, EN 3, EN 9, H 3, H 6 and H 8 - See PSLP_885, PSLP_892, PSLP_894, PSLP_896, PSLP_897, PSLP_898, PSLP_900 & PSLP_901]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

STR 1 – The Development Strategy

This policy is unsound as it is insufficiently flexible to ensure needs will be met in full.

The housing requirement

2. Using the standard method, Tunbridge Wells Borough Council (TMBC) consider their local housing needs assessment (LHNA) to be 678 dwellings per annum (dpa). The HBF would agree that this is the minimum number of homes that the Council should be planning for. However, as established in paragraph 60 of the NPPF this is a minimum and there will be circumstances where Councils will need to set a housing requirement above the assessment of need resulting from the standard method. The first such scenario is set out in paragraph 60 itself which states that in addition to the LHNA any needs that cannot be met in neighbouring areas should also be taken in to account.

3. Whilst the Council have noted the difficulties faced by Sevenoaks in meeting their needs the Council do not appear to have noted in the Duty to Co-operate Statement the fact that there are unmet needs in Rother nor the wider regional concern that London will not meet its own housing needs over the next ten years. With regard to Rother the Council note at paragraph 2.45 of the Housing Needs Assessment Topic Paper that there is no indication of unmet needs in Rother on the basis that they are yet to undertake substantive work on a new local plan.

However, Rother's local plan was adopted in September 2014 and as such those policies relating to housing delivery in that plan must be considered out of date as it is older than five years and has not been reviewed. In this situation paragraph 68-005 of PPG applies which states that in such circumstances:

“...the 5-year housing land supply will be measured against the area's local housing need calculated using the standard method.”

As such the annual housing requirement for Rother moving forward is the local housing needs assessment as calculated using the standard method. As we will set out below the increased requirement in Rother will mean a shortfall in delivery that must be addressed. Using the standard method with a base period 2020 to 2030, will require Rother to deliver 728 dpa. Whilst we recognise the delivery of new homes in Rother is expected to increase from 2024/25, resulting in the delivery of an additional 4,384 homes between 2020 and the end of their plan period, there would still be a shortfall of 1,440 homes against their local housing needs assessment. In particular we are concerned that it is over the next 5 years during which this shortfall will arise.

4. The housing requirement for Rother over the next 5 years using the standard method is 3,640 homes. However, between 2020 and 2025 Rother only expect to deliver 2,386 homes. This is a shortfall of 1,254 homes during this five-year period which as far as we are aware is not being addressed elsewhere in the region. Whilst a new local plan for Rother could deliver an increase in housing to address unmet needs it is unlikely to do so in the next 5 years given the lack of urgency with which Rother is undertaking its planned review it is necessary for neighbouring areas to consider how these needs can be addressed.

5. Secondly, there appears to be no consideration as to the level of unmet needs arising in the Capital. During the preparation of the London Plan the Mayor, London Boroughs and Council's across the wider South East were adamant that London would 'consume its own smoke' with regard to housing needs. However, even on publication this was not the case with the London Plan showing a shortfall of some 10,000 homes between 2018 and 2028. This situation has now worsened as the examination of the London Plan highlighting significant shortcomings in the Mayor's estimations as to the supply development lands within the Capital, and in particular the outer London Boroughs.

6. The examination report on new London Plan was published in October 2019 and outlines in paragraph 174 that the overestimation of the contribution of small sites reduces the supply of new homes from 65,000 to 52,000 homes per annum. This means that there is a shortfall of some 140,000 homes between 2018 and 2028 in the capital against its own assessment that the capital needs to deliver 66,000 homes each year across the plan period to meet future need and address the current backlog. We could not find any reference to these needs in the Council's evidence and given London borders the housing market area within which TMBC is located it is essential that these be taken into account when setting the Council's housing requirement.

Housing supply

7. Over the plan period the Council expect to deliver 13,250 homes to meet their minimum need of 12,204 homes. Whilst this provides an additional supply of around 1,000 homes the HBF do not consider this to be sufficient for two reasons. The first reason that this is not sufficient given the level of affordable housing needs identified by TWBC and the second being the reliance on strategic sites from 2025 onwards could place delivery at risk should these sites be delayed.

8. With regard to meeting affordable housing needs Planning Practice Guidance (PPG) notes at paragraph 2a-024 that:

"The total affordable housing need can then be considered in the context of its likely delivery as a proportion of mixed market and affordable housing developments, taking into account the probable percentage of affordable housing to be delivered by eligible market housing led developments. An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes."

As such it is important that Councils consider whether further allocations are possible to better meet their need for affordable housing. The Council's Housing Needs Study from 2018 establishes that 443 new affordable homes to be provided each year to meet the need for such homes in Tunbridge Wells in future and address current backlog within five years. Meeting the backlog over the plan period affordable housing needs are estimated to be 391 dpa. However, the Council will not meet this either assessment of affordable housing need. The Council estimates, as set out in table 10 of the Housing Supply Topic Paper, that it expects to deliver 224 affordable homes per annum – some 170 homes short of stated needs. Further allocations of sustainable and suitable sites should therefore be considered if these would enable more affordable housing to be provided in the Borough.

9. Moving to overall supply, consideration needs to be given to the degree to which the Council are reliant on strategic sites to meet needs and whether there is sufficient flexibility should there be delays in the delivery of these sites. The HBF is supportive of the strategic allocations that have been included in this local plan. Strategic sites such as these provide opportunities to meet development well into the future. However, their scale and complexity does mean that timescales for delivery can slip and as such there can be a risk of the housing requirement not being met without a more substantial buffer in supply being provided.

10. In considering the speed at which sites can come forward it is helpful to examine the Lichfield report Start to Finish¹. The latest edition of this report outlines not only the timescales it takes for larger sites to commence and the rate at which such sites deliver new homes but also the variability between sites. With regard to when the first home will be delivered figure 4 from the report shows that the

average planning approval period for those sites of 2,000 or more units in the study was 6.1 years with 2.3 years between approval and first delivery. However, this is an average with some sites delivering more quickly and some being considerable slower to move through the planning process. Similarly build out rates vary significantly. Table 4 and Figure 8 of Start to Finish show that sites of more than 2,000 homes deliver on average 160 units per annum with average delivery ranging from 50 dpa to around 300 dpa.

11. It is therefore important to recognise that there is potential for the larger sites allocated by the Council to deliver at the rates suggested but there is also the possibility that delivery will commence later than expected and at lower build out rates. As outlined above this local plan expects supply to be some 1,000 homes more than needs, around an 8% buffer. However, from 2025 supply from the two strategic sites at Tudeley Village and Paddock Wood are expected to provide 64% of total supply. As such any delays as to when development commences on these sites, or slower than expected delivery, will compromise the Council's ability to meet needs in full. The NPPF establishes in paragraph 11 that local plans should be sufficiently flexible to adapt to rapid change and at present we do not consider this to be the case with regard to this local plan.

12. In order to provide the necessary flexibility required by the NPPF the HBF considers a 20% buffer between the housing requirement and expected supply over the plan period. This level of additional planned supply above the requirement would ensure that there is sufficient scope within the plan to take account of any unexpected delays in delivery. In particular it is important to ensure supply in the early years of the plan remains flexible and can take account of any delays so we suggest more smaller sites are allocated that will come forward in the first five years of the plan. A 20% buffer would also increase the potential for the Council to improve the level of affordable housing delivered in the plan period and better meet the needs of its residents.

13. The need for such a buffer to provide flexibility and increase the supply of affordable homes can also be considered as exceptional circumstances to support further amendments to the Green Belt boundary. The Council set out in the Development Strategy Topic Paper the exceptional circumstances required to support amendments to the Green Belt boundary and we would agree with their assessment. However, there is an acute need for affordable housing in Tunbridge Wells alongside the poor affordability of accommodation that we would consider to be sufficient to promote further amendments to allocate sites that would provide sustainable development opportunities to provide both market and affordable housing. Indeed, the principle of amending Green Belt boundaries to deliver housing growth beyond minimum requirements has been considered recently in Compton Parish Council & Ors v Guildford Borough Council & Ors. [Case Number: CO/2173/2019]. In this case it was concluded at paragraph 105 that an excess of housing supply, and the advantages of such supply above the minimum requirement, could contribute to exceptional circumstances.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

14. Given the unmet needs in London and the benefits of further allocations to support affordable housing delivery, consideration should be given as to whether the Council should apply the cap in relation to the standard method. As set out in paragraph 2a-007 of PPG the cap reduces the number generated by the standard methods but does not reduce the need itself. We note that the Council have considered this level of delivery in the SA and there are clearly benefits in using and meeting the uncapped housing requirement resulting from the standard method. However, even if the requirement is not adjusted, we consider its necessary for the Council identify additional allocations in the local plan to improve flexibility and better address the need for affordable housing within Tunbridge Wells.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

36. As such I can confirm that I wish to participate in the relevant hearing sessions in order to full represent our concerns which reflect the views of discussions with our membership who account of 80% of the market housing built in England and Wales.

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: Representations made against STR 1, STR 5, EN2, EN 3, EN 9, H 3, H 6 and H 8 - See PSLP_885, PSLP_892, PSLP_894, PSLP_896, PSLP_897, PSLP_898, PSLP_900 & PSLP_901]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

STR 5 – Infrastructure and connectivity

This policy is unsound as it is not consistent with national policy.

15. In addressing the impact of development on infrastructure it is important to ensure that all contributions are, as set out in the NPPF and paragraph 122 of the CIL Regulations 2010, necessary, directly related to the development and fairly and reasonably related in scale and kind to the development. However, regardless of the impact it would appear from part 1 of this policy that a significant contribution will be required. Such a statement is not consistent to the more proportionate approach set out in both legislation and policy.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

16. That the word “significant” is removed from part 1 of this policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

EN2 – Sustainable Design Standards

The policy is unsound as it is not consistent with national policy.

17. The HBF does not consider this policy to be consistent with national policy. The Council are advocating the use of just one approach within the policy whereas the paragraph 129 of NPPF makes no such prescription. The Council must be clear in policy that it encourages the use of a range of assessment frameworks and remove the specific reference in policy to the encouraged minimum design standards based on Homes Quality Mark and that it pays equal consideration to the outcome of any such assessment. In addition, the Council should remove the phrase until national policy allows otherwise. If national policy is to change to allow the implementation of alternative standards such as HQM through the local plan it will be for the Council to justify such a requirement through a focussed review of the local plan. Councils cannot seek to pre-empt national policy in this manner.

18. The Council should also amend the third paragraph which could cause confusion for applications and decisions makers as outlines the evidence required to demonstrate compliance with this policy. As outlined above paragraph 129 of the NPPF states that the Council can consider the outcome of any such assessment process, but it cannot dictate the assessment used nor require the assessment to be undertaken in the first place. High quality and sustainable development can arise without the use of such assessment tools.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

19. The Council should remove the specific encouragement to meet the HQM standards set out in the policy. In addition, given that the policy, as it relates to residential development, is one that seeks to encourage not require as such there is no need to demonstrate compliance with these standards. The paragraph should be amended to read:

Compliance with the sustainable design requirements for non-residential development should be demonstrated via the following certificates (or future equivalent): 1. 'Pre-assessment estimator' at application stage; 2. 'Design stage' certificates prior to construction; 3. Final certificates for all schemes six months post-completion

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

36. As such I can confirm that I wish to participate in the relevant hearing sessions in order to full represent our concerns which reflect the views of discussions with our membership who account of 80% of the market housing built in England and Wales.

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

EN3 Climate change mitigation and adaptation

The policy is unsound as it is not consistent with national policy.

20. The Government are expected to amend Building Regulations this year as part of the transition to the Future Homes Standard in 2025. The HBF recognises the need to reduce carbon emissions from new homes. As such we are working with our members and Government to provide an effective route map in achieving the necessary reductions whilst also maintaining the supply of housing required to meet the country's needs. To achieve improvements in energy efficiency whilst maintaining supply requires not only the housebuilding industry to adapt but also those industries supporting it to develop the necessary supply chains that will ensure the products required to meet these standards, such as ground and air source heat pumps, are available.

21. This transition will mean that all new homes will have to be built to achieve a 31% improvement on the 2013 Building Regulations and mean that the requirements in EN3 are redundant. In addition, Paragraph 16 of the NPPF requires policies to be clear in how a decision maker should react and we would suggest that there is the potential for confusion between the application of planning policy and the building regulations should the policy be retained.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

22. That the Energy reduction in new buildings part of EN3 is deleted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

36. As such I can confirm that I wish to participate in the relevant hearing sessions in order to full represent our concerns which reflect the views of discussions with our membership who account of 80% of the market housing built in England and Wales.

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

EN9 Biodiversity Net Gain

Part b of the policy is unsound as it is not consistent with national policy.

23. Firstly, the Council's policy approach to biodiversity net gain should not deviate from the Government's proposals on biodiversity gain as set out in the Environment Bill. This legislation will require development to achieve a 10% net gain for biodiversity. This is not set out as a minimum and to ensure clarity in decision making, we would suggest this prefix is deleted. It is the Government's opinion that 10% strikes the right balance between the ambition for development and reversing environmental decline. A 10% gain provides certainty in achieving environmental outcomes, deliverability of development and costs for developers. Removing the term minimum will not place a cap on the aspirations of developers who want to voluntarily go further but it will ensure that decision makers do not seek to go beyond 10%.

24. Secondly the Council cannot require a higher level of net gain through supplementary planning document (SPD). The relevant legislation defining the difference between Local Plans and SPDs is the Town and Country Planning Regulations (2012). This defines an SPD in regulation 2 as "any document of a description referred to in regulation 5 (except and adopted policies map or statement of community involvement) which is not a local plan." Therefore, it can be concluded that whilst SPDs are Local Development Documents they are not local plans. Regulation 5 in turn states:

5(1) For the purposes of section 17(7)(za)(1) of the Act the documents which are to be prepared as local development documents are—(a)any document prepared by a local planning authority individually or in cooperation with one or more other local planning authorities, which contains statements regarding one or more of the following—(i)the development and use of land which the local planning authority wish to encourage during any specified period;(ii)the allocation of sites for a particular type of development or use;(iii)any environmental, social, design and economic objectives which are relevant to the attainment of the development and use of land mentioned in paragraph (i); and(iv)development management and site allocation policies, which are intended to guide the determination of applications for planning permission;

25. Taken together these regulations mean that a local plan is a document that contains statements as to the:

- development and use of land which the local planning authority wish to encourage during any specified period;
- allocation of sites for a particular type of development or use; and
- development management

and site allocation policies, which are intended to guide the determination of applications for planning permission.

Therefore, any supplementary guidance being proposed cannot include anything that is intended to guide the determination of applications for planning permission – such as a level of biodiversity net gain above that required by legislation. Such policies can only be adopted in a local plan following the prescribed process.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

26. The phrase “or greater where required by supplementary planning guidance” should be deleted from policy EN9.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

36. As such I can confirm that I wish to participate in the relevant hearing sessions in order to full represent our concerns which reflect the views of discussions with our membership who account of 80% of the market housing built in England and Wales.

Question 1

Respondent's Name and/or Organisation Home Builders Federation

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy H 3 Affordable Housing

[TWBC: Representations made against STR 1, STR 5, EN2, EN 3, EN 9, H 3, H 6 and H 8 - See PSLP_885, PSLP_892, PSLP_894, PSLP_896, PSLP_897, PSLP_898, PSLP_900 & PSLP_901]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

H3 Affordable housing.

27. The Council will need to consider whether it would be appropriate to include the requirement that 25% of affordable homes are delivered as First Homes in this policy. Whilst the Written Ministerial Statement and PPG set out the transitional arrangements that do not require TWBC to include the 25% First Home requirement in their affordable housing policy PPG does state at paragraph 70-019 that inspector may wish to consider at the examination of a local plan whether an early update of the plan would be appropriate to take account of this change to national policy. Rather than include an early review of the local plan to amend policy H3 we would suggest that the requirement is included prior to the plan being submitted for examination.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

H6 Housing for older people and people with disabilities.

Parts 2 and 4 of this policy is unsound as it has not been justified.

28. Whilst it would appear likely that part M4(2) will be made mandatory through proposed changes to the Building Regulations this is still to be confirmed by the Government and as such it is important that the Council's requirement in H3 that all new homes are built to part M4(2) of the Building Regulations is justified. The HBF consider it the case that new homes built to the mandatory part M4(1) will be suitable for a significant proportion of the population throughout their lifetime. However, we recognise that there will be a need for some new homes to be built to higher accessibility standards.

29. The Council have provided evidence on the need for such homes in its Housing Needs Study and the consider this to be sufficient to support the proposal that all new homes should be built to part M4(2) of the Building Regulations. However, when considering the implementation of the optional standards it is important to note that footnote 46 in paragraph 147 in the NPPF states that policies on adaptable and accessible housing should be used "... where this would address an identified need ...". This would suggest that any policy should seek to address an identified need and there must be clear evidence as to how many such homes are needed.

30. The Housing Needs Study indicates that 30.8% of households contained at least one person with impaired mobility over the plan period. However, the study also states that only 8.1% of all households had a physical or mobility impairment and as such more likely to need a more accessible home. This position is not dissimilar to that seen nationally in the English Homes Survey. The study examined the need for adaptations in 2014/15 and noted that 9% of all households in England had one or more people with a long-term limiting illness or disability that required adaptations to their home. The survey also found that in 2014-15, 81% of households that required adaptations in their home, due to their long-term limiting disability, felt their current home was suitable for their needs and that only 10% of those households whose home required an adaptation were trying to move somewhere more suitable.

31. Therefore, whilst we recognise that with an ageing population there will be more people with mobility problems in future it does not necessarily lead to them needing a new home built to the M4(2) standard nor provide sufficient justification to require all new homes to be built to that standard. Indeed, for many older people a home built to current mandatory standard, which is significantly better than homes built prior to this standard, will be sufficient to meet their needs throughout their lifetime.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

32. That the proportion of new homes required to be built to part M4(2) be reduced

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

36. As such I can confirm that I wish to participate in the relevant hearing sessions in order to full represent our concerns which reflect the views of discussions with our membership who account of 80% of the market housing built in England and Wales.

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

H8 – Self-Build and Custom Housebuilding

Part of the policy is unsound as it is not effective.

33. The final paragraph of this policy states that following a six-month marketing period unsold plots it is advised that these then offered to the Council to increase the chance of plots being developed. It is not clear why these should be offered to the Council and why that would increase the chance of the plot being developed as a self-build home. If a plot remains unsold following the marketing period rather than extend the period that this plot remains vacant a more effective policy would be for this plot to be developed and come forward to the market as soon as possible.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

34. The final paragraph of policy H8 should be amended as follows:

If a plot/s has been marketed for six months, and a buyer has not been found, it is advisory that the plots are then offered to the Council to increase the chance of plots being developed. If a buyer is not found, then the owner of the plot can build for sale on the open market.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The councils proposal to shut access over the railway bridge to all vehicle apart from buses (which only come to Paddock Wood once an hour) would not deter any traffic going to Paddock Wood. It would only ensure longer journeys for anyone living in Paddock Wood as there are only two main routes in and out of Paddock Wood. The railway bridge being one of the two. It would effectively cut Paddock Wood town in half and cause considerable addition vehicle traffic along Maidstone Road for residents who need to go to Maidstone Hospital or who work outside Paddock Wood. It would send every vehicle on an additional 3 mile journey which would have extremely negative impact on the environment. Maidstone Road is used by pupils and parents walking to the primary school and pupils walking to the secondary school. By closing the railway bridge, each vehicle would instead of passing approximately 100 houses would send each vehicle on detour that passes 2 schools, 4 housing estates and the proposed new estate of approximately 3000 plus houses, causing more traffic jams and damage to the environment as well as additional pollution for the children walking to school. The council actually state that the bridge is the only access to Paddock Wood over the railway line. In addition there are two narrow lanes before the bridge, which do not have street lighting or road markings, these narrow country lines would therefore be used as a cut through if the bridge was closed, causing considerable inconvenience and pollution to the residents of these quiet lanes

In addition, there are several local villages where residents travel to Paddock Wood to shop or use the train station. Buy shutting the bridge these vehicles would either have to take 3 mile detour, causing congestion elsewhere or they wouldn't come to Paddock Wood at all and shop elsewhere, which would devastating for the local high street.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The only modification I can suggest is to not close the railway bridge.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As a resident of Paddock Wood it is necessary to have representatives at the hearing sessions who are aware of the negative impact the road closure would cause

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.• In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.• See EN 1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

• Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed* views that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC,

thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.

- The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.

- The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to ENI para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.

- Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

- The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* allocation. See HE's comments on the first draft LP (DLP 4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

2. The PSLP is not based on sound evidence • Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.

- In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.

- The TP A refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.

- The TP A says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- The TP A states that there are daily bus services along, GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- The TP A makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at somepoint be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TP A claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC

warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .. " This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

- **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments .. " This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy S SP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP' s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be overruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.

- **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_ 4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from

a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.

- **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans run counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

- **Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish

periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no cafe (BHS says its cafe was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP 3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP 3458 High Weald AONB Unit** (which objects to the Plan) : " ... *In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.* "

- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

- NPPF para 177 states: "*The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.*"

PSLP EN1 para 5. Biodiversity and geodiversity.AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3& 4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "showindicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.* " It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's cafe; for the creation of a

hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE 1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE 3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE 3 and Cleveland Farmhouse (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE 3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the newsite at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE 3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden

instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Colin Honnywell [REDACTED]
Address	[REDACTED] Bishopsden Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Colin Honnywell [REDACTED]
Comment ID	PSLP_158
Response Date	14/05/21 12:16
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Mr Colin Honnywell
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End)	
<i>[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_152, PSLP_158 and PSLP_159]</i>	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was

submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground.

AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS

and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling,

AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Clevelands Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1**
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*

. Also, the NPPF section 2 para 11
PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the

LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's

residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Colin Honnywell [REDACTED]
Address	[REDACTED] Bishopsden Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Colin Honnywell [REDACTED]
Comment ID	PSLP_159
Response Date	14/05/21 12:16
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Mr Colin Honnywell
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End)	
<i>[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_152, PSLP_158 and PSLP_159]</i>	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council,

that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
 - . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also

nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.

- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.
- The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.
- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports

facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists,

namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1**

- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*

- . Also, the NPPF section 2 para 11

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound

to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. The PSLP’s prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to

STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

. It is not effective

. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Policy AL/PE4: Land at Downingbury Farm, Maidstone Road, Pembury allocates land to the West of map 67 for residential development for approximately 25 dwellings (including 40% affordable housing) and safeguards land to the east for the expansion of the Hospice in the Weald (HitW). Our comments relate to both policy AL/PE4, map 67 and accompanying paragraph 5.691.

In our view the Plan is not sound due to Policy AL/PE4 (including map 67) and the reasoning in paragraph 5.691 not being justified, as an alternative, more appropriate and reasonable strategy for the site is available, as explained below. In addition, the plan is not effective due to the requirements in Policy AL/PE4 creating a barrier to deliver the crucial expansion of HitW facilities as detailed below.

We support the draft wording of the supporting text in paragraphs 5.688 – 5.696 in general terms, as it retains land within the allocation to be safeguarded for the HitW, but we strongly object to the reference in 5.691 and parts 5 and 8 of policy AL/PE4 (which are duplications), which state that the delivery of housing should be tied with the provision of land for the HitW expansion.

The HitW's interest and expertise lies in the specialist fields of health and palliative care. It does not extend to the needs and delivery of land for housing and/or the environmental merits or otherwise of introducing housing on the western land parcel of the draft allocation in AL/PE 4. As such, we consider the draft allocation AL/PE4 is ill-conceived in placing both the expansion of the hospice and new housing in jeopardy with the hospice's ability to respond quickly to health and palliative care needs potentially being bound into the vagaries of housing market. This will hinder the hospice's ability to provide the necessary care for patients and to unfold its growth plan at the optimal time. We consider, therefore, that the different land uses should be separate allocations. The housing proposed to the west of the draft allocation is not specialist housing linked to the hospice, it is market housing with an element of affordable housing, which will be developed and accessed independently of the safeguarded land to the East. The two pieces of land are proposed to be separated by a landscape bund, which provides a distinct boundary between the two parcels, and accessed independently.

Discussions between the HitW and the land owner of the safeguarded land are ongoing. The following submissions relate solely to the need / merits of an allocation to safeguard an area of land to support the future needs of the HitW.

At present the parcel of land to the north of the HitW lies within the Green Belt and part of the site is within the Area of Outstanding Natural Beauty. It is important, therefore, that in this period of review and in re-considering the development strategy for the Borough to the 2038 horizon, that all

interests are carefully considered and planned for in advance, including those of the stakeholders of draft allocated sites.

Key to this is foresight and flexibility. In this regard, Part (d) of paragraph 81 of the National Planning Policy Framework (NPPF) requires that planning policies, ‘...be flexible enough to accommodate needs not anticipated in the plan ... and enable a rapid response to changes in economic circumstances.’ Flexibility, therefore, and the ability of land use policies to be able to respond positively to changing physical, economic, social and political circumstances, quite rightly, lie at the heart of the Government’s Framework for growth and change. To these ends we are supportive of the objectives of draft Policy AL/PE4, which recognises the social importance of the HitW to the communities of Kent and East Sussex and directly responds to the unique physical constraints and limitations of the Hospice’s site in Pembury. That said, we have serious reservations of the need/benefit of the land’s inclusion as part of a housing allocation. In the interests of flexibility and to enable the hospice to respond to its medical needs it must be addressed through a separate policy allocation and not tied with a housing allocation. This has a very real potential to hinder and frustrate delivery of the HitW care facilities.

Some background on the HitW, and why the expansion is required:

The Pembury site of the HitW is the hospice’s main base for in-patient care, counselling, bereavement support and education/training – it is critically important too, to support and administer the hospice’s out-reach and medical care services, which cover West Kent and North East Sussex.

The core care facilities offered at Pembury have developed and expanded in response to local demand. Whilst the current operation of the site is manageable, in order to maintain the highest standards of care and provide more care to more people living across the Weald, it is essential that HitW has the facility to be able to expand responsibly and sensitively in Pembury – the village that has become its centre of operation. The current site has reached capacity and within the next 18 months the facilities on the site will need to be improved and expanded, with the possibility of introducing new, ancillary specialist services to provide support for seriously ill children, young people and their families.

There are a number of possibilities for the future of the safeguarded land including a Cottage Hospice, a Childrens Hospice and/or expanded care and service facilities. The introduction of any additional care facilities or a specialist children’s unit would benefit from the existing professional expertise, experienced highly trained staff and volunteers and common facilities such as servicing, storage, café, parking, etc on the main site. The integration of current and future uses, the promotion of dual use facilities and the economies of scale all support the continued and efficient running of the hospice’s core facilities. The Trustees of HitW have discussed the matter at length and confirmed their decision that the integration of facilities and services is key and can only be achieved efficiently through carefully planned expansion at Pembury. The safeguarding of the land to the north provides the flexibility and the facility to achieve this and the Trustees of HitW aim to be ready to make a planning submission within 6-months.

The physical constraints of the Pembury site are such that opportunities for growth are very limited or do not exist at all. The site is triangulated and is bound to the east by Maidstone Road and to the west by the rear gardens of properties fronting onto Elmhurst Avenue: the two converge at the southern-most end of the site. Other than relocating the entire facility or providing further facilities offsite elsewhere – both costly and inefficient solutions – the only growth avenue open to the hospice is to expand sensitively to the north. To that end we are supportive of the Council’s forward-thinking solution to safeguard part of site AL/PE 4 for future growth.

To this end, the inclusion of safeguarded land to the north of the HitW within draft policy AL/PE4 for the future expansion of the Hospice is fully supported. However, the HitW disagree that it should be a requirement of the policy to tie the delivery of housing to the west with the expansion of the Hospice. The two land uses are unrelated. It is essential therefore that one is not reliant on the other for delivery. In view of this, the requirement of parts 5 and 8 of the policy (which are duplications) and paragraph 5.691, to tie the delivery of both the housing and expansion of the Hospice together through a legal agreement, is wholly unreasonable and unnecessary and has the potential to frustrate/hinder the delivery of the HitW’s new facilities.

There is no justification to link the two developments. As such we propose a separate allocation of the land to the east of the allocation, along with associated modifications, as set out below.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposed Modification: Draft Policy AL/PE 4 to be revised (along with Map 67, the Pembury Policies Map – inset Map 29, and paragraph 5.691) to remove reference to the safeguarded hospice land and a new policy to be included within the Submission version of the Local Plan along with a map to accompany the policy relating specifically to the safeguarded land for the expansion of the HITW (as below). The suggested draft wording for such an additional policy could be as follows: (TWBC comment: map included as an attachment to comment)

Land north of Hospice in the Weald

The site, as defined on the Pembury Policies Map is allocated for the potential expansion of the Hospice in the Weald, as indicated on the block plan (in pink), above. Development on the site should accord with the following requirements:

1. Vehicle access is gained via the existing Hospice in the Weald site; 2. The layout and design of any scheme shall give full consideration to the site's edge of village location, being informed by a landscape and visual impact assessment and heritage assessment, providing a suitable and sensitive urban edge to the settlement, including provision of landscape buffers to the north and north west of the site, to protect neighbouring properties and retain existing hedgerows and mature trees. 3. The layout and design of the scheme shall take account of the impact on the setting of heritage assets, including adjacent listed buildings and the Downingbury Farm historic farmstead. 4. Regard should be given to the Groundwater Source Protection Zone affecting the site, in consultation with the Environment Agency.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To properly identify the need for the modifications and to answer any questions on the above comments, if necessary.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Introduction

As a local resident, I write to object strongly to TWBC's plans to build 3,450 new homes at Capel and Paddock Wood because the plans are not justified and unsound for the reasons set out below, particularly so alongside 2,800 new homes in a nearby planned 'garden settlement' in Tudeley. I also believe the plan will create considerable risks for and a major long term financial burden on TWBC.

Personal and Professional Background

I have lived in West Kent for almost all my life, living and going to school in Tonbridge and commuting from Tonbridge station. I have known Paddock Wood, Tudeley, Five Oak Green and Capel for nearly 60 years and we have owned a house in the area for some 35 years.

For over 10 years, I have been the Chief Investment Officer of a large, listed sustainable infrastructure group with some 300 infrastructure investments. These infrastructure investments include renewable energy and waste to energy plants, waste processing plants, hydropower, roads, wastewater treatment plants and affordable housing. So, I am experienced in assessing such plans and their risks, particularly from a long term financial view.

When I was a child, Paddock Wood and its environs was prime farming country with quiet country lanes, orchards and hop fields. Over the 60 years, the town and area have lost their farming focus with commuting from and within the area now predominating, with consequent traffic, parking and transport pressures. The lanes are no longer quiet. Tonbridge has grown substantially and similarly developed into a commuter focused town, as has Tunbridge Wells, both again experiencing the same increasing pressures.

Forecast Demand in the Borough

As explained below, many aspects of the Pre Submission Local Plan, the Infrastructure Delivery Plan, the Viability Assessment and the Sustainability Appraisal plus related Appendices prepared by TWBC are, from financial and risk viewpoints, **inadequately assessed and unsound**, some being based on unrealistic and arguably naive assumptions and if implemented could ultimately create contingent costs and long term financial burdens on TWBC and also significant additional burdens on Tonbridge and Malling BC.

This entire planning process is based on a forecast. The forecast annual demand across the Borough is for 678 houses. In my experience as an infrastructure investor, I have found forecasts are just that, in that they are rarely met, often missed, delayed, based on wrong or false assumptions and are almost always adversely impacted by factors which were either incorrectly assessed or not even considered at all. The same is highly likely to apply to this forecast and the above two development plans. The two plans are essentially large commercial construction projects and, to be implemented effectively, require major support and infrastructure investment from various public and private sector parties over the long term which might only partially be made or not at all.

I shall leave aside any argument about how the considerable potential development profits and potential costs are not shared appropriately with TWBC.

The Alternatives

Through these plans, TWBC are endeavouring to meet a 20 year forecast in two, large, simultaneous steps which is simply unnecessary if only 678 dwellings are required annually.

A more local series of small, incremental, Borough wide, sympathetically designed housing developments, which could include some further gradual development around Paddock Wood, would be much more financially sensible, prudent, more controllable and much lower risk for TWBC and all the other relevant parties and so in practice be more flexible and achievable. The two plans are **not justified** on these bases. The Times recently indicated that 106,000 homes were forecast to be required in the whole of South East England in the next five years, of which no less than 3.2% are proposed in one small area of just one Borough which seems excessive and not necessary.

East Capel and Paddock Wood

The plan for East Capel and Paddock Wood envisages 3,450 new dwellings, of which 40% will be affordable homes. With 2.26 people forecast per dwelling, this implies 7,800 new residents. The Tudeley plan envisages 2,800 new dwellings being built, implying 6,300 new residents, together totalling 14,000 new residents, comprising perhaps 4,000 children (1,800 at Tudeley and 2,200 at Capel/PW) and 10,000 adults, if both proceed. Similarly, in terms of cars, it is likely that these residents will own some 6,000 cars (3,300 at Capel/PW and 2,700 at Tudeley) as some families with a working parent may need two cars while some elderly people may not have cars.

These two capital intensive and high risk projects are concentrated in one small area of the Borough where the existing infrastructure is poor or non-existent at Capel and Tudeley and so completely new infrastructure or heavily upgraded infrastructure will be required. To succeed, all the relevant infrastructure providers will need to agree and coordinate their investment programmes but, because the two projects are so long term, I believe investment returns are unlikely to be considered sufficiently attractive in the first few years to justify the major investment required, casting doubt on their implementation and viability. With two projects, almost double the capital expenditure will be required but by being close to each other, both projects will impinge on the other, potentially slowing the rate of sales (and infrastructure returns) of each. Phasing of all the infrastructure investment will be important and if not done or only partially done, the viability of the projects will again be brought into doubt. **The plans are accordingly not effective and unsound.**

Because of their close proximity, the two plans and their impacts are intertwined hence I have felt obliged to refer to both in the following paragraphs which cover the principal elements of the Capel and Paddock Wood plan which are considered unsound.

Impact on Tonbridge

Neither the Capel and Paddock Wood plan nor the Tudeley plan makes little if any real reference to the impact on nearby Tonbridge or to any consultation about these plans with Tonbridge and Malling BC. Tonbridge is already under much pressure and, as a result of both developments, will experience much heavier congestion, much greater pressure on schools and facilities, greater numbers of commuters and incur considerable additional costs. Parking in Tonbridge is a particular issue already.

Tonbridge and Malling BC will bear much of the brunt of the practical issues arising from these developments. If both developments proceed, this will create a Tonbridge/Paddock Wood 'super town.' However, Tonbridge and Malling BC will receive no extra cash to cover these high additional costs.

There is no mention of how this development might impinge on, disrupt or possibly even support the plans of Tonbridge and Malling BC. This is an example of TWBC merely offloading issues and costs to third parties by not planning properly. Without detailed consultation with Tonbridge and Malling BC, of which there is little evidence, and further investment in Tonbridge, **the plan is not justified or effective and so is unsound.**

Education

With only two primary schools and an expansion of Mascalls proposed, the plans to meet the educational needs of 2,200 children from East Capel/PW are simply inadequate, ignoring the needs of the many children from the other current developments in Paddock Wood itself. The planned provision for nurseries is similarly inadequate. For the 1,800 children from Tudeley, it is proposed to establish one new secondary school and one new primary school and expand Capel Primary School. Even when built, common sense says this secondary school of perhaps 1,000 pupils, new primary school of say 200 children and expansion of the small Capel primary school will be inadequate, and particularly so if both proceed. The remaining children numbering perhaps 1,500/2,000 will need to be driven or bussed daily to either Tonbridge or Tunbridge Wells (at least 50 or 60 busses twice or more each day). There is already incredibly strong existing demand for places in the good local schools in Tonbridge and Tunbridge Wells. It is naïve to think that some 1,500/2,000 pupils will somehow be absorbed in the existing schools in these two towns - in practice many pupils will have to be driven or bussed far away to Maidstone or Sevenoaks, all adding to traffic and congestion.. In reality, another two or possibly three large schools will need to be built by KCC if both projects proceed. There will inevitably be children with special needs, the cost burden of which will fall on KCC and TWBC.

Again, TWBC will be simply be imposing these education costs elsewhere, displacing the education of children in other Boroughs and creating congestion, particularly in Tonbridge and Tunbridge Wells.

The plans make no assessment of these education and congestion costs or whether KCC can or will agree to fund these new schools. **So, the plans are not effective and are unsound.**

Healthcare

Regardless of whether one or other or both projects proceed, the number of new residents will necessitate new healthcare facilities, the plans envisaging one new GP surgery which will be particularly busy and will require some 6 to 8 doctors plus support staff. If both proceed, there will be 14,000 new residents ultimately requiring these healthcare services. There will be considerable extra pressure and costs imposed on Pembury Hospital which is already strained. As stated in the plan, a significant number of the adults are likely to be over 65 and elderly, some with special needs and as they age, increasing demands will be made on local health services. The same will apply to the up to 4,000 children. All this will impose significant additional and increasing social services costs on TWBC and medical provision costs on the local Health Trust.

The plans do not properly address these issues nor quantify these costs so are **not effective and are unsound** and will impose potentially large contingent costs on TWBC.

Traffic Congestion. Roads. Rail, Parking and Public Transport

With some 3,000 to 6,000 additional vehicles, existing traffic congestion will become appreciably worse. The already busy **A228 road** to Pembury will be heavily used by these new cars and will need widening at considerable cost, none of which appears to be included in the plans. The Capel plan implies only £Gm will spent on improving links to this road. At peak times, there is already considerable congestion on the A228 and the roundabout at Five Oak Green and around Pembury and Tonbridge which will all be exacerbated by these additional vehicles. As regularly evidenced by sirens, the A228 is a major route for ambulances going to and from Pembury Hospital and it is perfectly possible that this congestion will threaten lives.

The already busy Tonbridge/Five Oak Green **B2017 road** will be heavily used by these new cars and is already in poor condition, being originally a country lane. This will be one of two principal access roads to the Tudeley garden settlement (the other being the feeder road from the A228) and as it stands will be totally inadequate when used by 3,000 to 6,000 new cars plus busses plus cyclists plus waste lorries and heavy construction traffic (possibly over 20 years). It is bumpy, windy, narrow in parts, prone to surface water flooding and if a cyclist is in front, prone to delay as you cannot pass. The plans make much of increased cycling but that will become increasingly dangerous on this road.

The road has moved and settled over time, suggesting compaction and poor foundations. It will deteriorate further quite rapidly with increased daily use from up to 6,000 vehicles and heavy construction traffic. In other words, it will need to be both widened and effectively rebuilt. The Tudeley plan envisages only £3.1m being spent on widening which is totally inadequate. The proposed much shorter Capel by pass to the Tudeley garden settlement across open fields is estimated to cost £45m (only half the cost of which is included in the plans) which gives an indication of likely costs which could easily be a multiple of this figure.

The plans are **not effective** in this regard.

With 50% of the working adults likely to **commute to London**, inadequate **parking** at Paddock Wood Station and with parking at Tonbridge normally full, there will be a major increase in journeys and congestion from 'dropping people off from the developments in Paddock Wood High Street or by Tonbridge Station and much illegal street parking in Paddock Wood High Street or Waitrose Car Park waiting for commuter trains to arrive. There is no scope to significantly increase such parking. Similarly the plans say that no extra trains can be made available so about 1,000 new commuters will try to travel at peak times on the few existing trains (which number is equivalent to some two or three additional trains). This will create overcrowding and adverse, knock on effects on other passengers further up the main line.

The plans do not properly address these issues and so are **not effective and unsound** in this regard.

Parking on the East Capel development is inadequate and insufficient for visitors.

The plans refer to making increasing use of **public transport**. In the plans, private bus companies have stated they will not run services at a loss and the plans show £3m of total bus subsidies. If these are insufficient, the costs of the services will contingently and ultimately fall on TWBC. The plans refer to creating **bus lanes and cycle lanes**. These will again necessitate road works and widening at yet again considerable cost to KCC. Again, there is no indication that KCC will bear these costs, casting doubt on timing and viability.

The plans have not been properly assessed and so are **not effective and unsound** in respect to these two aspects.

The Capel/PW plan proposes £5m will be spent on cycling routes and improvements while the Tudeley plan proposes £17.5m. This investment makes big assumptions about the take up of cycling by 14,000 new residents which I think are likely to be overoptimistic given the demographics.

Water and Flooding

The plans acknowledge Kent suffers severe water stress. The water needs of 14,000 people will create further localised stress. The current water supply infrastructure in the area is already inadequate and certainly insufficient to supply 14,000 new residents. The Capel/PW plan envisages only £220,000 being spent on water connection and the Tudeley plan only £154,000. This is another example of both plans simply pushing the cost of building major infrastructure onto another party which may or may not do so in their own time. In the medium term, the water shortage can only be met properly by further investment at Bewl Water or new reservoirs as aquifer abstraction is already excessive. The plans refer to residents reducing water usage to 110 litres per person per day but this is likely to be an unrealistic and possibly naïve assumption as water consumption is currently much higher.

Paddock Wood already suffers from inadequate sewage and waste water systems, as demonstrated by several sewage floods to the East of the town over recent years. Because of the flat, low lying nature of East Capel, all water will need to be pumped in and away requiring yet more investment which yet again is not assessed or quantified. The Tudeley and Capel/PW plans have each budgeted only £450,000 for sewage and foul water works which is woefully inadequate for 14,000 people.

The plans are **not effective and unsound** in this regard.

With the River Medway, Kent's biggest river, **flooding** regularly, this has major ramifications for any development around Capel, Paddock Wood and Tudeley. I remember the severe floods of 1968 (with landing craft going down the sandbagged Tonbridge High Street) while other severe floods occurred in 2000, 2001, 2013, 2014 and 2019 despite the Leigh flood barrier being in operation (please refer to the web for pictures and videos). The Medway contains much treated sewage water so any such flooding has other effects.

Surface water flooding in the area is frequent, connected with overflowing streams, drainage and sewage. East Capel is particularly prone to flooding. The small streams are prone to blocking during

heavy rain which causes local flooding. Only in January 2021, Badsell Road was blocked by flooding, with an AA van parked nearby for two days to pull out cars from the flood. Nearby Five Oak Green is prone to surface water flooding and I clearly remember the Fire Brigade pumping out houses on occasion in the last few years. In heavy rain the B2017 can be dangerous from surface flooding as I have personally experienced while the A228 near Whetsted suffers similarly. The fields where the East Capel development is proposed are often waterlogged in Winter. The proposed North Paddock Wood development will be similarly liable to flooding.

Surface water flooding is a bigger problem than fluvial or sea flooding nationally and so the East Capel site is doubly prone. These are major problems which have not been properly considered and **so the plan is not effective and is unsound**. If the East Capel and Northern Paddock Wood development areas regularly flooded, that part cannot be sustainable so **the plan is inconsistent with national policy**.

In other words, the question is when, not if, will the inevitable flooding occur.

The following comments (a) to (g) relate to flooding at East Capel and Paddock Wood:

- . The plan indicates suitable steps will be taken to mitigate the risk of flooding but this will require major investment in bunds, flood gates and barriers, flood storage, drainage and pumps. The plans are not particularly clear referring to £991,000 to be spent on flood defences and a raised platform costing £5.3 million. This will be totally inadequate to protect 3,450 homes on a flood plain which is also prone to surface water flooding. Again the nature and costs of such mitigation measures are not properly explained nor is how such costs will be borne, by whom and over what time period. However, given the flat nature of the land, it is likely to be £10s of millions, not low£ millions;
- . Any such flood mitigation measures will disturb water flows and ground water, increasing the risk of flooding on neighbouring land and properties, as well as increasing flood risk. This may well require even more mitigation measures about which there is no mention at all;
- . Flooding causes insurers their biggest losses by far. Given their heavy losses from increasing floods nationally, insurers are increasingly selective about insuring properties on flood plains and without that mortgages cannot be obtained. **Without good mortgage availability, the East Capel and Northern Paddock Wood developments would simply not be viable. I did not find references in the plans to this key underlying assumption nor to the likely attitude of insurers or the cost of flood insurance.** Flood insurance rates could be high and, after the first flood, might only be obtainable at expensive rates or on unacceptable terms or possibly not at all, leaving homeowners stranded with unsellable homes. This has already happened elsewhere in the UK. As a sustainable infrastructure investor, I am putting increasing weight on the possibility of an asset becoming stranded from such environmental events and will not approve such investments;
- . These houses will be expensive but with the enhanced flooding risk, it is likely that they may have to be sold relatively cheaply, below the forecast prices, to attract. This casts doubt on the financial viability of the scheme but yet again the plan makes no reference to this possibility;
- . As the East Capel and Northern Paddock Wood sites will be developed in phases over 20 years, flooding during that time is inevitable. It is possible that the site might then be only **partly finished** and not developed any further post such flooding. In that event, it is highly likely that planned improvements, infrastructure and facilities will not be completed or built - in other words, the plan as currently envisaged would then only be partially implemented which casts doubt on its objectives being met and

This has not been assessed and so the plan is **not effective and particularly unsound** in this regard.

- . Much is said in the plan about Suds on which only £745,000 is proposed to be spent for 3,450 dwellings but this ignores the fact that the water table is already high and just mimicking nature will not help the water drain away - it will need to be pumped away to be effective, again requiring significant investment and cost which is again not assessed or
- . Finally, following the inevitable floods, TWBC will incur considerable costs dealing with the aftermath g. emergency shelter, displaced families, damaged infrastructure, as will the KCC and the emergency services. With ever more limited financial and human resources, TWBC would do well to avoid this risk and potentially large costs, never mind the reputational impact.

The plan is **not effective and particularly unsound** in the above regards.

Electricity, Gas and Broadband

As no new houses can be connected to the gas grid from 2025, the two developments will need to be powered entirely by electricity. This will require extensive investment in major HV transmission lines and stepdown transformers, particularly as new EV charging infrastructure will be required eventually for some 6,000 cars given that petrol and diesel cars will be phased out after 2030. All the cables will need to be buried. This is a major engineering task in addition to road building, road widening, school building, GP surgery, sports facilities etc. The Capel/PW plan budgets £10.5m and the Tudeley plan budgets £11.5m solely for electricity connections and diversions with no discussion about grid infrastructure or who pays for these or how construction will be phased. In my experience, the cost of the grid infrastructure and substations will be many £millions and will not be installed for several years. If completely new generation capacity and HV systems are needed, I broadly estimate this will cost over £100m for the two developments.

FTTH broadband will be relatively more straight forward to install.

The plan is unclear on this important aspect and so is **not effective and unsound** as a result.

Waste Disposal

The disposal of waste from up to 6,250 new homes will require TWBC and KCC to invest in more waste disposal facilities. This will create yet more heavy vehicle movements on already congested roads and add to the waste already trucked away from North Farm. These additional costs do not seem to be factored into the plans and will be a charge on the annual rates which would rise slowly over time to a total of only some £10m once all 6,250 homes had been built.

Affordable Homes

Although there is a clear and pressing need for affordable homes, it is important to recognize that these may well impose actual and contingent risks and costs on TWBC. As an example, with joint ownership or rent to buy structures, if the tenant defaults in paying rent whether deliberately or through illness or unemployment, it is difficult for any Council to take any action and particularly not evict, leading to losses and costs. The same is true if the tenant does not properly maintain the rent to buy property or ever behaves in an antisocial manner. Through rent to buy, the Council would usually forgo an element of rent and not participate in any increase in the value of the property. Any Council needs to carefully assess such risks and costs which could be particularly significant for 2,500 houses, being 40% of 6,250 new houses, over say the next 30 years.

Financial Overview

As can be seen from the above, neither the Capel/PW nor Tudeley plan properly addresses the financial implications of many important elements arising from their respective development. The plans make a considerable number of assertions and assumptions, the latter both stated and unstated, about how major infrastructure investments will be made and do not properly assess the risks, timings and potential costs. These include:

- . the touching confidence that S106 or CIL payments from the developers will cover many of these costs. These payments will not be applied to the 40% affordable housing element, only to the privately owned 60% element of the 6,250 homes. The Viability Assessment suggests a CIL of £150 per sq metre and that the average house will be around 100 square metres. So the potential total CIL payments could in theory be around £94m £52m for Capel and £42m for Tudeley) but are subject to negotiation which means they could be appreciably less. The developer will probably only pay over time, perhaps of up to 20 years as houses are built so the net present value will be much lower. Since a lot of investment will need to be made in the early years, there will either be a funding shortfall - to be met by TWBC? - or facilities and improvements will only be built over many years with increasing likelihood they will either not be built at all or only at a smaller scale.

The plans do not show detailed cash flow projections or sensitivities and, more importantly, who or how any funding shortfalls will be met and so yet again are **not justified** and may create large contingent liabilities for TWBC.

- . that all the various government bodies, KCC, organisations and utility and other companies will invest heavily to facilitate these two developments. Against the present Covid backcloth and huge debts, it is unlikely that government bodies or KCC currently have the money to make such major investments while utility and other companies will have many alternative, lower risk projects in which to invest offering better risk adjusted returns. Examples in the plans are the bus and rail companies which have already expressed their reluctance to invest or want subsidies .

As explained, by proceeding with these developments, TWBC will be assuming substantial additional risks and costs at a time when it is particularly cash strapped and resource limited. These costs will not be anywhere near covered by the annual rates charge which I estimate will slowly increase up to £10m in year 20, being an average of say £1,500 per annum on 6,250 houses.

The two developments are expected to take some 20 years to be fully completed. However, much of the infrastructure referred to above needs to be installed within the first few years to enable such development. So sewage pipes and systems, HV transmission lines and substations, water mains etc need to be installed before any significant development can be completed. But there will be few paying customers for the first several years, leading to effectively little or no return on the invested capital for many years. The same point relating to timing then arises about cash strapped KCC investing in new schools and the two £multi million (perhaps £100m?) major road investments. These will not be built for years (which puts in doubt if they will ever be built) meaning the plans as drafted are likely to be fiction. The corollary is that there will be further growing congestion and inadequate infrastructure for many years.

Affordability

House prices in TWBC are the second highest in Kent. The plans emphasise that affordability of the houses will be 'very challenging' and suggest a sales price of £650,000 for a small 4 bedroom 150 square metre house on a large mixed housing estate which will be developed for some 20 years. From a financial perspective, this would not be a good investment as price rises will be low as supply continuously increases over time. From an environmental viewpoint, living in a large building development doubly prone to flooding with a big mortgage and construction ongoing for 20 years may not be overly enticing to potential buyers. I have doubts that people will be able - or possibly willing - to afford these prices and, as the viability of the whole development depends on selling the 60% at these prices to pay for the 40% of affordable housing, it raises doubts about whether the developments will ever be completed. The plan is **not effective or justified** accordingly.

Greenbelt

TWBC seem to have focused on two particularly high risk, high cost, long term developments on the first available flat land in the Borough outside the AONB boundaries, notwithstanding this is protected Green Belt on and near flood plain and largely dismissed smaller, significantly lower cost, lower risk opportunities offering considerably more flexibility to meet demand as it gradually arises over time. Instead, TWBC believe in their own forecasts over 20 years and want to go for two big solutions simultaneously. From a financial and risk viewpoint, this is unwise as forecasts are rarely met and, as explained above, there are big costs and risks attaching to each plan. If a small development does not work, the fall out is manageable which cannot be said of the two developments proposed. With local incremental development, infrastructure investment will also be incremental, more likely to be made and more manageable. As such, I do not believe there are sufficient exceptional circumstances to justify declassifying Green Belt land for these two developments and the plans are **not justified**.

Summary

It is clear for the reasons stated above that the Capel/PW development plan is unsound. It has not been properly assessed in a number of areas, is high risk and high cost in many ways compared to the alternatives and creates large and unnecessary contingent costs on TWBC.

The plan should be dismissed accordingly.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

So I may comment on any further consultation on matters raised by the Inspector

If you would like to attach a file in support of your comments, please upload it here. [dh TWBC Plan Capel PW STR SS 1 29 5 21.pdf](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Supporting Information File Ref No: SI_43

Comment

Consultee	David Hughes [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	David Hughes [REDACTED]
Comment ID	PSLP_673
Response Date	29/05/21 16:43
Consultation Point	Policy STR/SS 3 The Strategy for Tudeley Village (View)
Status	Processed
Submission Type	Web
Version	0.5
Files	dh TWBC Plan Tudeley STR SS 3 29 5 21.pdf
Question 1	
Respondent's Name and/or Organisation	David Hughes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 for Tudeley Garden Settlement	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I attach my response in pdf format below Question 8

Introduction

As a local resident, I write to object strongly to TWBC's plans to build 3,450 new homes at Capel and Paddock Wood because the plans are not justified and unsound for the reasons set out below, particularly so alongside 2,800 new homes in a nearby planned 'garden settlement' in Tudeley. I also believe the plan will create considerable risks for and a major long term financial burden on TWBC.

Personal and Professional Background

I have lived in West Kent for almost all my life, living and going to school in Tonbridge and commuting from Tonbridge station. I have known Paddock Wood, Tudeley, Five Oak Green and Capel for nearly 60 years and we have owned a house in the area for some 35 years.

For over 10 years, I have been the Chief Investment Officer of a large, listed sustainable infrastructure group with some 300 infrastructure investments. These infrastructure investments include renewable energy and waste to energy plants, waste processing plants, hydropower, roads, wastewater treatment plants and affordable housing. So, I am experienced in assessing such plans and their risks, particularly from a long term financial view.

When I was a child, Paddock Wood and its environs was prime farming country with quiet country lanes, orchards and hop fields. Over the 60 years, the town and area have lost their farming focus with commuting from and within the area now predominating, with consequent traffic, parking and transport pressures. The lanes are no longer quiet. Tonbridge has grown substantially and similarly developed into a commuter focused town, as has Tunbridge Wells, both again experiencing the same increasing pressures.

Forecast Demand in the Borough

As explained below, many aspects of the Pre Submission Local Plan, the Infrastructure Delivery Plan, the Viability Assessment and the Sustainability Appraisal plus related Appendices prepared by TWBC are, from financial and risk viewpoints, **inadequately assessed and unsound**, some being based on unrealistic and arguably naive assumptions and if implemented could ultimately create contingent

costs and long term financial burdens on TWBC and also significant additional burdens on Tonbridge and Malling BC.

This entire planning process is based on a forecast. The forecast annual demand across the Borough is for 678 houses. In my experience as an infrastructure investor, I have found forecasts are just that, in that they are rarely met, often missed, delayed, based on wrong or false assumptions and are almost always adversely impacted by factors which were either incorrectly assessed or not even considered at all. The same is highly likely to apply to this forecast and the above two development plans. The two plans are essentially large commercial construction projects and, to be implemented effectively, require major support and infrastructure investment from various public and private sector parties over the long term which might only partially be made or not at all.

I shall leave aside any argument about how the considerable potential development profits and potential costs are not shared appropriately with TWBC.

The Alternatives

Through these plans, TWBC are endeavouring to meet a 20 year forecast in two, large, simultaneous steps which is simply unnecessary if only 678 dwellings are required annually.

A more local series of small, incremental, Borough wide, sympathetically designed housing developments, which could include some further gradual development around Paddock Wood, would be much more financially sensible, prudent, more controllable and much lower risk for TWBC and all the other relevant parties and so in practice be more flexible and achievable. The two plans are **not justified** on these bases. The Times recently indicated that 106,000 homes were forecast to be required in the whole of South East England in the next five years, of which no less than 3.2% are proposed in one small area of just one Borough which seems excessive and not necessary.

East Capel and Paddock Wood

The plan for East Capel and Paddock Wood envisages 3,450 new dwellings, of which 40% will be affordable homes. With 2.26 people forecast per dwelling, this implies 7,800 new residents. The Tudeley plan envisages 2,800 new dwellings being built, implying 6,300 new residents, together totalling 14,000 new residents, comprising perhaps 4,000 children (1,800 at Tudeley and 2,200 at Capel/PW) and 10,000 adults, if both proceed. Similarly, in terms of cars, it is likely that these residents will own some 6,000 cars (3,300 at Capel/PW and 2,700 at Tudeley) as some families with a working parent may need two cars while some elderly people may not have cars.

These two capital intensive and high risk projects are concentrated in one small area of the Borough where the existing infrastructure is poor or non-existent at Capel and Tudeley and so completely new infrastructure or heavily upgraded infrastructure will be required. To succeed, all the relevant infrastructure providers will need to agree and coordinate their investment programmes but, because the two projects are so long term, I believe investment returns are unlikely to be considered sufficiently attractive in the first few years to justify the major investment required, casting doubt on their implementation and viability. With two projects, almost double the capital expenditure will be required but by being close to each other, both projects will impinge on the other, potentially slowing the rate of sales (and infrastructure returns) of each. Phasing of all the infrastructure investment will be important and if not done or only partially done, the viability of the projects will again be brought into doubt. **The plans are accordingly not effective and unsound.**

Because of their close proximity, the two plans and their impacts are intertwined hence I have felt obliged to refer to both in the following paragraphs which cover the principal elements of the Capel and Paddock Wood plan which are considered unsound.

Impact on Tonbridge

Neither the Capel and Paddock Wood plan nor the Tudeley plan makes little if any real reference to the impact on nearby Tonbridge or to any consultation about these plans with Tonbridge and Malling BC. Tonbridge is already under much pressure and, as a result of both developments, will experience much heavier congestion, much greater pressure on schools and facilities, greater numbers of commuters and incur considerable additional costs. Parking in Tonbridge is a particular issue already. Tonbridge and Malling BC will bear much of the brunt of the practical issues arising from these developments. If both developments proceed, this will create a Tonbridge/Paddock Wood 'super town.' However, Tonbridge and Malling BC will receive no extra cash to cover these high additional costs.

There is no mention of how this development might impinge on, disrupt or possibly even support the plans of Tonbridge and Malling BC. This is an example of TWBC merely offloading issues and costs

to third parties by not planning properly. Without detailed consultation with Tonbridge and Malling BC, of which there is little evidence, and further investment in Tonbridge, **the plan is not justified or effective and so is unsound.**

Education

With only two primary schools and an expansion of Mascalls proposed, the plans to meet the educational needs of 2,200 children from East Capel/PW are simply inadequate, ignoring the needs of the many children from the other current developments in Paddock Wood itself. The planned provision for nurseries is similarly inadequate. For the 1,800 children from Tudeley, it is proposed to establish one new secondary school and one new primary school and expand Capel Primary School. Even when built, common sense says this secondary school of perhaps 1,000 pupils, new primary school of say 200 children and expansion of the small Capel primary school will be inadequate, and particularly so if both proceed. The remaining children numbering perhaps 1,500/2,000 will need to be driven or bussed daily to either Tonbridge or Tunbridge Wells (at least 50 or 60 busses twice or more each day). There is already incredibly strong existing demand for places in the good local schools in Tonbridge and Tunbridge Wells. It is naive to think that some 1,500/2,000 pupils will somehow be absorbed in the existing schools in these two towns - in practice many pupils will have to be driven or bussed far away to Maidstone or Sevenoaks, all adding to traffic and congestion.. In reality, another two or possibly three large schools will need to be built by KCC if both projects proceed. There will inevitably be children with special needs, the cost burden of which will fall on KCC and TWBC.

Again, TWBC will simply be imposing these education costs elsewhere, displacing the education of children in other Boroughs and creating congestion, particularly in Tonbridge and Tunbridge Wells.

The plans make no assessment of these education and congestion costs or whether KCC can or will agree to fund these new schools. **So, the plans are not effective and are unsound.**

Healthcare

Regardless of whether one or other or both projects proceed, the number of new residents will necessitate new healthcare facilities, the plans envisaging one new GP surgery which will be particularly busy and will require some 6 to 8 doctors plus support staff. If both proceed, there will be 14,000 new residents ultimately requiring these healthcare services. There will be considerable extra pressure and costs imposed on Pembury Hospital which is already strained. As stated in the plan, a significant number of the adults are likely to be over 65 and elderly, some with special needs and as they age, increasing demands will be made on local health services. The same will apply to the up to 4,000 children. All this will impose significant additional and increasing social services costs on TWBC and medical provision costs on the local Health Trust.

The plans do not properly address these issues nor quantify these costs so are **not effective and are unsound** and will impose potentially large contingent costs on TWBC.

Traffic Congestion. Roads. Rail, Parking and Public Transport

With some 3,000 to 6,000 additional vehicles, existing traffic congestion will become appreciably worse. The already busy **A228 road** to Pembury will be heavily used by these new cars and will need widening at considerable cost, none of which appears to be included in the plans. The Capel plan implies only £Gm will spent on improving links to this road. At peak times, there is already considerable congestion on the A228 and the roundabout at Five Oak Green and around Pembury and Tonbridge which will all be exacerbated by these additional vehicles. As regularly evidenced by sirens, the A228 is a major route for ambulances going to and from Pembury Hospital and it is perfectly possible that this congestion will threaten lives.

The already busy Tonbridge/Five Oak Green **B2017 road** will be heavily used by these new cars and is already in poor condition, being originally a country lane. This will be one of two principal access roads to the Tudeley garden settlement (the other being the feeder road from the A228) and as it stands will be totally inadequate when used by 3,000 to 6,000 new cars plus busses plus cyclists plus waste lorries and heavy construction traffic (possibly over 20 years). It is bumpy, windy, narrow in parts, prone to surface water flooding and if a cyclist is in front, prone to delay as you cannot pass. The plans make much of increased cycling but that will become increasingly dangerous on this road. The road has moved and settled over time, suggesting compaction and poor foundations. It will deteriorate further quite rapidly with increased daily use from up to 6,000 vehicles and heavy construction traffic. In other words, it will need to be both widened and effectively rebuilt. The Tudeley plan envisages only £3.1m being spent on widening which is totally inadequate. The proposed much shorter Capel by pass to the Tudeley garden settlement across open fields is estimated to cost £45m (only half the cost

of which is included in the plans) which gives an indication of likely costs which could easily be a multiple of this figure.

The plans are **not effective** in this regard.

With 50% of the working adults likely to **commute to London**, inadequate **parking** at Paddock Wood Station and with parking at Tonbridge normally full, there will be a major increase in journeys and congestion from 'dropping people off from the developments in Paddock Wood High Street or by Tonbridge Station and much illegal street parking in Paddock Wood High Street or Waitrose Car Park waiting for commuter trains to arrive. There is no scope to significantly increase such parking. Similarly the plans say that no extra trains can be made available so about 1,000 new commuters will try to travel at peak times on the few existing trains (which number is equivalent to some two or three additional trains). This will create overcrowding and adverse, knock on effects on other passengers further up the main line.

The plans do not properly address these issues and so are **not effective and unsound** in this regard.

Parking on the East Capel development is inadequate and insufficient for visitors.

The plans refer to making increasing use of **public transport**. In the plans, private bus companies have stated they will not run services at a loss and the plans show £3m of total bus subsidies. If these are insufficient, the costs of the services will contingently and ultimately fall on TWBC. The plans refer to creating **bus lanes and cycle lanes**. These will again necessitate road works and widening at yet again considerable cost to KCC. Again, there is no indication that KCC will bear these costs, casting doubt on timing and viability.

The plans have not been properly assessed and so are **not effective and unsound** in respect to these two aspects.

The Capel/PW plan proposes £5m will be spent on cycling routes and improvements while the Tudeley plan proposes £17.5m. This investment makes big assumptions about the take up of cycling by 14,000 new residents which I think are likely to be overoptimistic given the demographics.

Water and Flooding

The plans acknowledge Kent suffers severe water stress. The water needs of 14,000 people will create further localised stress. The current water supply infrastructure in the area is already inadequate and certainly insufficient to supply 14,000 new residents. The Capel/PW plan envisages only £220,000 being spent on water connection and the Tudeley plan only £154,000. This is another example of both plans simply pushing the cost of building major infrastructure onto another party which may or may not do so in their own time. In the medium term, the water shortage can only be met properly by further investment at Bewl Water or new reservoirs as aquifer abstraction is already excessive. The plans refer to residents reducing water usage to 110 litres per person per day but this is likely to be an unrealistic and possibly naive assumption as water consumption is currently much higher.

Paddock Wood already suffers from inadequate sewage and waste water systems, as demonstrated by several sewage floods to the East of the town over recent years. Because of the flat, low lying nature of East Capel, all water will need to be pumped in and away requiring yet more investment which yet again is not assessed or quantified. The Tudeley and Capel/PW plans have each budgeted only £450,000 for sewage and foul water works which is woefully inadequate for 14,000 people.

The plans are **not effective and unsound** in this regard.

With the River Medway, Kent's biggest river, **flooding** regularly, this has major ramifications for any development around Capel, Paddock Wood and Tudeley. I remember the severe floods of 1968 (with landing craft going down the sandbagged Tonbridge High Street) while other severe floods occurred in 2000, 2001, 2013, 2014 and 2019 despite the Leigh flood barrier being in operation (please refer to the web for pictures and videos). The Medway contains much treated sewage water so any such flooding has other effects.

Surface water flooding in the area is frequent, connected with overflowing streams, drainage and sewage. East Capel is particularly prone to flooding. The small streams are prone to blocking during heavy rain which causes local flooding. Only in January 2021, Badsell Road was blocked by flooding, with an AA van parked nearby for two days to pull out cars from the flood. Nearby Five Oak Green is prone to surface water flooding and I clearly remember the Fire Brigade pumping out houses on occasion in the last few years. In heavy rain the B2017 can be dangerous from surface flooding as I have personally experienced while the A228 near Whetsted suffers similarly. The fields where the East

Capel development is proposed are often waterlogged in Winter. The proposed North Paddock Wood development will be similarly liable to flooding.

Surface water flooding is a bigger problem than fluvial or sea flooding nationally and so the East Capel site is doubly prone. These are major problems which have not been properly considered and **so the plan is not effective and is unsound**. If the East Capel and Northern Paddock Wood development areas regularly flooded, that part cannot be sustainable so **the plan is inconsistent with national policy**.

In other words, the question is when, not if, will the inevitable flooding occur.

The following comments (a) to (g) relate to flooding at East Capel and Paddock Wood:

- . The plan indicates suitable steps will be taken to mitigate the risk of flooding but this will require major investment in bunds, flood gates and barriers, flood storage, drainage and pumps. The plans are not particularly clear referring to £991,000 to be spent on flood defences and a raised platform costing £5.3 million. This will be totally inadequate to protect 3,450 homes on a flood plain which is also prone to surface water flooding. Again the nature and costs of such mitigation measures are not properly explained nor is how such costs will be borne, by whom and over what time period. However, given the flat nature of the land, it is likely to be £10s of millions, not low£ millions;
- . Any such flood mitigation measures will disturb water flows and ground water, increasing the risk of flooding on neighbouring land and properties, as well as increasing flood risk downstream. This may well require even more mitigation measures about which there is no mention at all;
- . Flooding causes insurers their biggest losses by far. Given their heavy losses from increasing floods nationally, insurers are increasingly selective about insuring properties on flood plains and without that mortgages cannot be obtained. **Without good mortgage availability, the East Capel and Northern Paddock Wood developments would simply not be viable. I did not find references in the plans to this key underlying assumption nor to the likely attitude of insurers or the cost of flood insurance.** Flood insurance rates could be high and, after the first flood, might only be obtainable at expensive rates or on unacceptable terms or possibly not at all, leaving homeowners stranded with unsellable homes. This has already happened elsewhere in the UK. As a sustainable infrastructure investor, I am putting increasing weight on the possibility of an asset becoming stranded from such environmental events and will not approve such investments;
- . These houses will be expensive but with the enhanced flooding risk, it is likely that they may have to be sold relatively cheaply, below the forecast prices, to attract purchasers. This casts doubt on the financial viability of the scheme but yet again the plan makes no reference to this possibility;
- . As the East Capel and Northern Paddock Wood sites will be developed in phases over 20 years, flooding during that time is inevitable. It is possible that the site might then be only **partly finished** and not developed any further post such flooding. In that event, it is highly likely that planned improvements, infrastructure and facilities will not be completed or built - in other words, the plan as currently envisaged would then only be partially implemented which casts doubt on its objectives being met and viability.

This has not been assessed and so the plan is **not effective and particularly unsound** in this regard.

- . Much is said in the plan about Suds on which only £745,000 is proposed to be spent for 3,450 dwellings but this ignores the fact that the water table is already high and just mimicking nature will not help the water drain away - it will need to be pumped away to be effective, again requiring significant investment and cost which is again not assessed or quantified.
- . Finally, following the inevitable floods, TWBC will incur considerable costs dealing with the aftermath e.g. emergency shelter, displaced families, damaged infrastructure, as will the KCC and the emergency services. With ever more limited financial and human resources, TWBC would do well to avoid this risk and potentially large costs, never mind the reputational impact.

The plan is **not effective and particularly unsound** in the above regards.

Electricity, Gas and Broadband

As no new houses can be connected to the gas grid from 2025, the two developments will need to be powered entirely by electricity. This will require extensive investment in major HV transmission lines and stepdown transformers, particularly as new EV charging infrastructure will be required eventually for some 6,000 cars given that petrol and diesel cars will be phased out after 2030. All the cables will need to be buried. This is a major engineering task in addition to road building, road widening, school

building, GP surgery, sports facilities etc. The Capel/PW plan budgets £10.5m and the Tudeley plan budgets £11.5m solely for electricity connections and diversions with no discussion about grid infrastructure or who pays for these or how construction will be phased. In my experience, the cost of the grid infrastructure and substations will be many £millions and will not be installed for several years. If completely new generation capacity and HV systems are needed, I broadly estimate this will cost over £100m for the two developments.

FTTH broadband will be relatively more straight forward to install.

The plan is unclear on this important aspect and so is **not effective and unsound** as a result.

Waste Disposal

The disposal of waste from up to 6,250 new homes will require TWBC and KCC to invest in more waste disposal facilities. This will create yet more heavy vehicle movements on already congested roads and add to the waste already trucked away from North Farm. These additional costs do not seem to be factored into the plans and will be a charge on the annual rates which would rise slowly over time to a total of only some £10m once all 6,250 homes had been built.

Affordable Homes

Although there is a clear and pressing need for affordable homes, it is important to recognize that these may well impose actual and contingent risks and costs on TWBC. As an example, with joint ownership or rent to buy structures, if the tenant defaults in paying rent whether deliberately or through illness or unemployment, it is difficult for any Council to take any action and particularly not evict, leading to losses and costs. The same is true if the tenant does not properly maintain the rent to buy property or ever behaves in an antisocial manner. Through rent to buy, the Council would usually forgo an element of rent and not participate in any increase in the value of the property. Any Council needs to carefully assess such risks and costs which could be particularly significant for 2,500 houses, being 40% of 6,250 new houses, over say the next 30 years.

Financial Overview

As can be seen from the above, neither the Capel/PW nor Tudeley plan properly addresses the financial implications of many important elements arising from their respective development. The plans make a considerable number of assertions and assumptions, the latter both stated and unstated, about how major infrastructure investments will be made and do not properly assess the risks, timings and potential costs. These include:

- the touching confidence that S106 or CIL payments from the developers will cover many of these costs. These payments will not be applied to the 40% affordable housing element, only to the privately owned 60% element of the 6,250 homes. The Viability Assessment suggests a CIL of £150 per sq metre and that the average house will be around 100 square metres. So the potential total CIL payments could in theory be around £94m (£52m for Capel and £42m for Tudeley) but are subject to negotiation which means they could be appreciably less. The developer will probably only pay over time, perhaps of up to 20 years as houses are built so the net present value will be much lower. Since a lot of investment will need to be made in the early years, there will either be a funding shortfall - to be met by TWBC? - or facilities and improvements will only be built over many years with increasing likelihood they will either not be built at all or only at a smaller scale.

The plans do not show detailed cash flow projections or sensitivities and, more importantly, who or how any funding shortfalls will be met and so yet again are **not justified** and may create large contingent liabilities for TWBC.

- that all the various government bodies, KCC, organisations and utility and other companies will invest heavily to facilitate these two developments. Against the present Covid backcloth and huge debts, it is unlikely that government bodies or KCC currently have the money to make such major investments while utility and other companies will have many alternative, lower risk projects in which to invest offering better risk adjusted returns. Examples in the plans are the bus and rail companies which have already expressed their reluctance to invest or want subsidies.

As explained, by proceeding with these developments, TWBC will be assuming substantial additional risks and costs at a time when it is particularly cash strapped and resource limited. These costs will not be anywhere near covered by the annual rates charge which I estimate will slowly increase up to £10m in year 20, being an average of say £1,500 per annum on 6,250 houses.

The two developments are expected to take some 20 years to be fully completed. However, much of the infrastructure referred to above needs to be installed within the first few years to enable such development. So sewage pipes and systems, HV transmission lines and substations, water mains etc need to be installed before any significant development can be completed. But there will be few paying customers for the first several years, leading to effectively little or no return on the invested capital for many years. The same point relating to timing then arises about cash strapped KCC investing in new schools and the two £multi million (perhaps £100m?) major road investments. These will not be built for years (which puts in doubt if they will ever be built) meaning the plans as drafted are likely to be fiction. The corollary is that there will be further growing congestion and inadequate infrastructure for many years.

Affordability

House prices in TWBC are the second highest in Kent. The plans emphasise that affordability of the houses will be 'very challenging' and suggest a sales price of £650,000 for a small 4 bedroom 150 square metre house on a large mixed housing estate which will be developed for some 20 years. From a financial perspective, this would not be a good investment as price rises will be low as supply continuously increases over time. From an environmental viewpoint, living in a large building development doubly prone to flooding with a big mortgage and construction ongoing for 20 years may not be overly enticing to potential buyers. I have doubts that people will be able - or possibly willing - to afford these prices and, as the viability of the whole development depends on selling the 60% at these prices to pay for the 40% of affordable housing, it raises doubts about whether the developments will ever be completed. The plan is **not effective or justified** accordingly.

Greenbelt

TWBC seem to have focused on two particularly high risk, high cost, long term developments on the first available flat land in the Borough outside the AONB boundaries, notwithstanding this is protected Green Belt on and near flood plain and largely dismissed smaller, significantly lower cost, lower risk opportunities offering considerably more flexibility to meet demand as it gradually arises over time. Instead, TWBC believe in their own forecasts over 20 years and want to go for two big solutions simultaneously. From a financial and risk viewpoint, this is unwise as forecasts are rarely met and, as explained above, there are big costs and risks attaching to each plan. If a small development does not work, the fall out is manageable which cannot be said of the two developments proposed. With local incremental development, infrastructure investment will also be incremental, more likely to be made and more manageable. As such, I do not believe there are sufficient exceptional circumstances to justify declassifying Green Belt land for these two developments and the plans are **not justified**.

Summary

It is clear for the reasons stated above that the Capel/PW development plan is unsound. It has not been properly assessed in a number of areas, is high risk and high cost in many ways compared to the alternatives and creates large and unnecessary contingent costs on TWBC.

The plan should be dismissed accordingly.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

So I may comment on any further consultation on matters raised by the Inspector

If you would like to attach a file in support of your comments, please upload it here. [dh TWBC Plan Tudeley STR SS 3 29 5 21.pdf](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Version	0.4
Question 1	
Respondent's Name and/or Organisation	Deborah Hughes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Capel: Policy STR/SS 1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

22nd May 2021

Objection to TWBC's Development Plan for Capel and Paddock Wood

STR/SS 1

As a long standing Tonbridge resident and with my mother in care also in Tonbridge and friends and relatives in the area, I am writing to register my very strong objections to TWBC's plans to develop a huge unnecessary estate of 3,450 houses on Green Belt land at Capel on the Medway flood plain. Alongside the nearby Tudeley 'garden settlement,' this will create a Paddock Wood/Tonbridge 'conurbation' or mega town with TWBC benefitting from the rates while we residents and Tonbridge and Malling District Council will carry a lot of the extra costs and have to deal with the major problems which will arise. Many of my friends have expressed similar strong objections to me. TWBC are largely just dumping the adverse effects of both developments on Tonbridge residents and TMDC with very little thought and, I am informed, no proper consultation with TMDC. **The plans have not been positively prepared** as they just push the resulting problems into the neighbouring Borough.

The whole point of Green Belt land is to act as a buffer against encroaching development between towns and protect the environment, nature and landscape yet TWBC seems to somehow think there are exceptional circumstances here to break this important law. The Capel and nearby Tudeley developments ignore other better, cheaper, more practical and sensible options across the Borough. TWBC has simply chosen two easy large solutions, effectively washing their hands of better alternatives. The Capel plan is **not justified** and the policy is **unsound**. With 3,450 homes, the plan has not properly considered many factors and should be scrapped as it simply does not work. Some of these factors are:

Flooding – every longstanding local in Tonbridge and Paddock Wood knows all about Medway flooding. The flat site is right next to the biggest river in Kent famous for its frequent floods and is in prime flooding territory. The plan mentions flood prevention measures but these look totally inadequate - even the Leigh barrier couldn't cope in 2019 with cars and blocks of flats under water as a result. Thinking about house purchasers, I wonder if they will have watched the videos and photos on the web showing the frequent floods in the area. In January this year alone, there was heavy surface water flooding. The site will inevitably flood and the homeowners and TWBC will have to deal with the damage, clean up and future sales of the houses. Not enough attention has been given to these major problems (nor the huge costs of flood prevention measures) and so **the plan is not effective**

and is unsound. I cannot see that the development is sustainable if it is regularly flooded so **the plan is inconsistent with national policy.**

The 60% of private houses will be expensive. I have real doubts that people will buy expensive houses liable to flooding on a huge estate which will be built over 20 years. If they are only partly sold, the whole project will be financially unviable and create major problems for TWBC. The project is **not effective** in this regard.

There will be a huge increase in traffic on the poorly maintained and heavily used Five Oak Green/Tudeley/Tonbridge Road and overloading of the already congested A228, especially in school term and the peak mornings and evenings. I doubt if the widening plans and Capel by pass will be built by KCC which is cash and resource strapped. There will be gridlock at peak times. If the road works are carried out, I believe this will only be done well after the development has commenced. The plan is **not effective** about this major issue.

There will be a large increase in commuting. Parking in Paddock Wood is poor and parking Tonbridge is already inadequate. With more commuters, no extra trains and no extra parking at the station, there will be chaos near the two stations at peak times. The plan is **not effective** in this regard. The faith in more cycling sounds good but will hardly make a difference and I am sure there will be many serious cycling accidents on the busy roads.

The planned investment in two primary schools and expansion of Mascalls will be inadequate for the large number of children from the development which means even greater pressure on schools in Tonbridge and Tonbridge Wells with lots of daily school buses adding to the traffic volumes. There is also likely to be increased demand in the area from the Tudeley development. In reality, KCC are not going to invest in all these schools in one small area given the requirements in the rest of Kent and their own cash shortages so there will be a large shortage in school places. Schools will only be built well after the children are actually living there. **So, the plan is not effective and is unsound.**

There will be huge extra pressure on all other local facilities such as hospitals, social services, elderly care and dentists. The plan assumes the resultant required investment will all just happen and be paid for by someone else.

There are literally no services like electricity and water anywhere near the site – the whole idea of Green Belt – so the cost and length of the project will be much greater than infill or brownfield site developments elsewhere in the TWBC Borough area. **The plan is therefore not justified.**

Kent is desperately short of water and adding the population from Capel and the nearby Tudeley development will create major water supply issues, not forgetting sewage issues, the systems for which are already poor in the Paddock Wood area. The plan is **not justified or effective** in this regard.

Although the plan might look good on paper, it is essentially **flawed and unsound** and should be scrapped. Imagine being there on a cold January night in a storm with the River Medway rising.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

24th May 2021

Objection to TWBC's Development Plan for Tudeley Garden Settlement

Policy STR/SS 3

As a long standing Tonbridge resident, with my mother in care also in Tonbridge and friends and relatives in the area, I am writing to register my very strong objections to TWBC's plans to develop a huge 2,800 housing estate on Green Belt land at Tudeley. This will effectively be a large new suburb of Tonbridge with TWBC benefitting from the rates while we residents and Tonbridge and Malling District Council will carry a lot of the extra costs and have to deal with the major problems which will arise. Many of my friends have expressed similar strong objections to me. TWBC are largely just dumping the adverse effects of this development on Tonbridge residents and TMDC with very little thought and, apparently, no real consultation with TMDC. As a result, **the plan has not been positively prepared** as it thoughtlessly passes its problems on to the next Borough.

TWBC have ignored other cheaper sensible options across the Borough and gone for an unnecessarily high risk big solution on Green Belt land which is a breach of the law as there are no exceptional circumstances for this assessment. **The plan is not justified.** With 2,800 homes, the plan has not properly considered many factors and should be scrapped as it simply does not work. Some of these factors are:

Affordability – the 60% private houses will be small and very expensive. I doubt if people can afford to buy these houses in such volumes and who would want to live on a huge housing estate, with building going on for 20 years? If not sold at these high prices, the viability of the development could be jeopardized. The plan is **not effective or justified** accordingly.

There will be a huge increase in traffic on the poorly maintained and heavily used Five Oak Green/Tudeley/Tonbridge Road and overloading of the already busy roads in Tonbridge, especially in school term and the peak mornings and evenings. There will be gridlock at peak times. **The plan is not effective about this issue.**

Parking on the development is inadequate and makes little provision for visitor parking. Parking in Tonbridge is already inadequate and cannot cope with the likely increase. With more commuters, no

extra trains and no extra parking at the stations, there will be chaos near the station at peak times. **Again the plan is not effective.** I note the emphasis on increased numbers of cycling but this is naïve as it will make little difference - cycling on the busy roads is already dangerous and many accidents will ensue.

The plan fully acknowledges that the northern part of the site is in a high risk flood area. I have seen many floods in the area with some local roads blocked for days because of the Medway flooding. Surface water run off is another problem with local streams often flooding, a problem exacerbated by the sloping nature of the site. These are major problems which have not been properly considered and **so the plan is not effective and is unsound.** If a large part of the development is regularly flooded, that cannot be sustainable so **the plan is inconsistent with national policy.**

One new secondary school and one new primary school combined with a doubling of Capel Primary will be inadequate for the large number of children from the development which means even greater pressure on schools in Tonbridge and Tonbridge Wells with lots of daily school buses adding to the traffic volumes. There will be even more pressure from the large number of children from the Capel and Paddock Wood developments despite the two planned primary schools and expansion of Mascalls. In reality, KCC are not going to invest in all these schools in one small area given the requirements in the rest of Kent and their own cash shortages so there will be a large shortage of school places. Schools will only be built after the children are actually living there. **So, the plan is not effective and is unsound.**

There will be huge extra pressure on all other local facilities such as hospitals, social services, elderly care and dentists. The plan assumes the resultant required investment will all just happen and be paid for by someone else.

There are literally no services like electricity and water anywhere near the site so the cost and length of the project will be much greater than infill or brownfield site developments elsewhere in the TWBC Borough area. **The plan is therefore not justified.**

Kent is desperately short of water and adding the population from the Tudeley development and potentially the Capel development will create major water supply issues, not forgetting sewage issues, the systems for which are already poor in the Paddock Wood area. The plan is **not justified or effective** in this regard.

As can be determined from the above, **the plan has not been thought through properly, is essentially flawed and unsound.**

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Graham Hughes
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Development Plan for Capel and Paddock Wood

As a long standing Tonbridge resident, educated in Tonbridge and with relatives in the town, I strongly object to TWBC's plans to develop a huge estate of 3,450 houses on Green Belt land in Capel on the Medway flood plain. Alongside the nearby Tudeley 'garden settlement,' this will create a Paddock Wood/Tonbridge 'town' with TWBC benefitting from the rates while we Tonbridge residents and Tonbridge and Malling District Council will carry a lot of the extra costs and have to deal with the major problems which will arise. Many of my local friends have similar strong objections. TWBC are largely just dumping the adverse effects of both developments on Tonbridge residents and TMDC with very little thought and I believe no proper consultation with TMDC. **The plans have not been positively prepared** if they just push the resulting problems into the neighbouring Borough.

Green Belt land is a deliberate buffer against encroaching development between towns and is designed to protect the environment, nature and landscape yet TWBC thinks there are exceptional circumstances here to break this important law. The Capel and nearby Tudeley developments ignore other better, cheaper, more practical and sensible options across the Borough. TWBC has simply chosen two easy large solutions, effectively washing their hands of better alternatives. **The plan is not justified and the policy is unsound.** For 3,450 homes, the plan has not properly considered many factors and should be scrapped as it simply does not work. Some of these factors are:

Flooding – I have witnessed many local floods. The flat site at Capel is right next to the biggest river in Kent, famous for its frequent floods and is prime flooding territory. The plan mentions flood prevention measures but these look totally inadequate - even the Leigh barrier couldn't cope in 2019 with cars and blocks of flats in Tonbridge flooded as a result. There are many videos and photos on the web showing the frequent floods in the area. In January this year alone, there was heavy surface water flooding. The site will inevitably flood and the homeowners and TWBC will have to face up to the damage, clean up and inability to sell the houses in future, all resulting from poor flawed decision making. Not enough attention has been given to these major problems (nor the huge costs of flood prevention measures) and so **the plan is not effective and is unsound.** I cannot see this development is sustainable if it is regularly flooded so **the plan is inconsistent with national policy.**

There will be a huge increase in traffic on the poorly maintained and heavily used Five Oak Green/Tudeley/Tonbridge Road and overloading of the already congested A228, especially in school term and the peak mornings and evenings. I doubt if the widening plans and Capel by pass will be built by KCC which is cash and resource strapped. There will be gridlock at peak times. If ever built, the roads will only be constructed well after the development has commenced. The plan is **not effective** about this major issue.

There will be a large increase in commuting. Parking in Paddock Wood is poor and parking Tonbridge is already inadequate. With more commuters, no extra trains and no extra parking at the station, there

will be chaos near the two stations at peak times. The plan is **not effective** in this regard. The faith in more cycling sounds good but will hardly make a difference and there will be many serious cycling accidents on the busy roads.

The planned investment in two primary schools and expansion of Mascalls will be inadequate for the large number of children from the development which means even greater pressure on schools in Tonbridge and Tonbridge Wells with lots of daily school buses adding to the traffic volumes. There is also likely to be increased demand in the area from the Tudeley development. In reality, KCC are not going to invest in all these schools in one small area given the requirements in the rest of Kent and their own cash shortages so there will be a large shortage in school places. Schools will only be built well after the children are actually living there. **So, the plan is not effective and is unsound.**

There will be huge extra pressure on all other local facilities such as hospitals, social services, elderly care and dentists. The plan assumes the resultant required investment will all just happen and be paid for by someone else.

There are literally no services like electricity and water anywhere near the site – the whole idea of Green Belt – so the cost and length of the project will be much greater than infill or brownfield site developments elsewhere in the TWBC Borough area. **The plan is therefore not justified.**

Kent is desperately short of water and adding the population from Capel and the nearby Tudeley development will create major water supply issues, not forgetting sewage issues the systems for which are already poor in the Paddock Wood area. The plan is **not justified or effective** in this regard.

Although the plan might conceptually good on a computer screen, for the above reasons, **the plan is flawed and unsound.**

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Respondent's Name and/or Organisation	Graham Hughes
---------------------------------------	---------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1: The Strategy for Paddock Wood, including land at east Capel

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As a long standing Tonbridge resident, educated in Tonbridge with friends and relatives in the area, I am writing to object strongly to TWBC's plans to develop a large 2,800 housing estate on Green Belt land at Tudeley. This will effectively be a large new suburb of Tonbridge with TWBC benefitting from the rates while we Tonbridge residents and Tonbridge and Malling District Council will carry a lot of the extra costs and have to deal with the major problems which will arise. Many of my friends object similarly. TWBC are effectively dumping the adverse effects of this development on Tonbridge residents and TMDC with very little thought and little apparent consultation with TMDC. **The plan cannot have been positively prepared** if it just pushes the resulting problems into the neighbouring Borough.

TWBC have ignored other better, cheaper sensible options across the Borough and gone for an unnecessarily high risk big solution on Green Belt land which breaches the law – the circumstances here are not exceptional circumstances. The plan is **not justified** and the Policy is **unsound**. For 2,800 homes, the plan has not properly considered many factors and as it simply does not work should be scrapped. These factors include:

Affordability – the private houses representing 60% will be relatively small and very expensive. I doubt if enough people can afford to buy these houses in such volumes and who would want to live on a huge, expensive housing estate, with building going on for 20 years? If high prices are not obtainable, the viability of the development will be thrown into doubt. The plan is **not effective or justified** in this regard.

The plan fully acknowledges that the northern part of the site is in a high risk flood area. I have seen many floods in the area with some local roads blocked for days because of the Medway flooding. Surface water run off is another problem with local streams often flooding, a problem exacerbated by the sloping nature of the site. Nowhere near enough attention has been given to these major problems and **the plan is not effective and so is unsound**. I would not want to own a house anywhere near the bottom part of the proposed site. I cannot see this part of the development being sustainable if it is regularly flooded so **the plan is inconsistent with national policy**.

There will be a huge increase in traffic on the poorly maintained and heavily used Five Oak Green/Tudeley/Tonbridge B2017 Road and overloading of the already busy roads in Tonbridge, especially in school term time and the peak mornings and evenings. There will be gridlock at peak times. The plan is **not effective** about this issue.

Parking on the development is inadequate and makes little provision for visitor parking. Parking in Tonbridge is already inadequate and cannot cope with the likely increase. With more commuters, no extra trains and no extra parking at the stations, there will be chaos near the station at peak times. Again the plan is **not effective**. The emphasis on more cycling will make little difference - cycling on the busy roads is already dangerous and many accidents will ensue.

One new secondary school and one new primary school combined with a doubling of Capel Primary will be inadequate for the large number of children from the development which means even greater pressure on schools in Tonbridge and Tonbridge Wells with lots of daily school buses adding to the traffic volumes. There will be even more pressure from the large number of children from the Capel

and Paddock Wood developments despite the two planned primary schools and expansion of Mascalls. In reality, KCC are not going to invest in all these schools in one small area given the requirements in the rest of Kent and their own cash shortages so there will be a large shortage of school places. Schools will only be built after the children are actually living there. **So, the plan is not effective and is unsound.**

There will be huge extra pressure on all other local facilities such as hospitals, social services, elderly care and dentists. The plan assumes the resultant required investment will all just happen and be paid for by someone else.

There are literally no services like electricity and water anywhere near the site – the whole idea of Green belt – so the cost and length of the project will be much greater than infill or brownfield site developments elsewhere in the TWBC Borough area. **The plan is therefore not justified.**

Kent is desperately short of water and adding the population from the Tudeley development and potentially the Capel development will create major water supply issues, not forgetting sewage issues, the systems for which are already poor in the Paddock Wood area. The plan is **not justified or effective** in this regard.

For the above reasons, **the plan is flawed and unsound.**

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Joseph Hughes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am an 8 year old resident of Tudeley and I have lived here for the whole of my life. I have also attended Capel preschool and I am currently in year 3 of Capel Primary school.

I am writing to you to express my concerns about the proposed Capel development. Do you realise the impact this plan will have to the local area? I want to raise my three key points that I am very worried about and highlight the major issues for these points.

Firstly, I would like to highlight the devastating impact the plan will have on the local wildlife. Some rare species may become extinct and lost from this area. The wildlife will be losing 600 acres of greenbelt land that is their home. Also, the trees and hedgerows will be lost forever and will make some wildlife homeless. I will be extremely upset to see this wildlife disappear for good and never appear again in my garden.

I am also concerned about the quality of the air and pollution from the extra cars, buses and also lorries. The air quality will become awful for everyone living in the area and will be damaged forever. The air may even become deadly and poisonous to humans and local wildlife. Please rethink your plans as we cannot let people die from this extra pollution. We must try to keep the air clean for the future generations.

Do you think it is wise to build thousands of new houses on a flood plain? The flood risk will increase for the existing and new houses and they may all flood as a result. With climate change the glaciers are melting which means more rain will fall and rivers and streams locally will overflow more regularly. A road close to my house, Sherenden Road, has a history of flooding with flooding of the roads and adjacent fields up to 3 feet deep in places and this will be in the heart of the Tudeley village. Do you want my house to flood along with the rest of them in Tudeley?

In conclusion, I would like you to carefully consider my comments I have raised in this letter. The threat to local wildlife will be at its highest that it could ever be if the area is developed. I am also concerned about the air quality because of pollution and its effects for future generations. Finally, I have highlighted the effects of flooding in the area and how this will get worse if the development goes ahead. Please do not turn our beautiful countryside garden into a garden village

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	.	No, I do not wish to participate in examination hearing session(s)

We have lived in Tudeley in our 'country cottage' for the past 15 years and our Son attends Capel Primary which is a small village school with a one year intake. We are concerned about many aspects of the proposed local plan but we have highlighted a few of the issues that are of particular concern to us as a family.

The traffic on the B2017 can sometimes be congested back to where we live due to traffic congestion in Tonbridge and with traffic that is travelling to the Somerhill schools site. I was commuting by car to work in Tunbridge Wells pre Covid (and will return to this in due course) and used to experience congestion on most days getting either round Tonbridge or actually getting into Tunbridge Wells so surely the proposed garden village will just make this congestion far, far worse. The primary school is also on the B2017 and the traffic speed and volume outside the school in the morning and at end of school is dangerous enough. We have witnessed several near misses so the increase in traffic and a proposed secondary school next to the primary school is just going to make this issue worse and the children's safety at even more of a risk. I also like to go running from our property and had a near miss in November last year with a car. I have only now just gained the confidence to go out again but I feel like I am taking my life in my hands every time I go out the door based on the traffic now. Most of the residents that will move into these proposed new properties will drive privately owned cars and will not use the bus or cycle use that we are lead to believe by TWBC. There are currently 2,452 people living in Capel. This will increase with the proposed local plan to 13,700 plus people. How is this sustainable and the impact on the air quality will be damaging for generations to come. There has been no consideration to the pressure that Tonbridge and Paddock Wood Railway Stations will see when a good proportion of the new residents are commuting to their employment in London. These properties will not be affordable to the local people on local pay, they will be affordable to the persons who work outside of the area.

Large parts of the developments will occur on the Medway floodplain with flood risk assessments based on old data that does not fully consider the impact of climate change. Flood mitigation measures may help, but I believe that flood risks will increase. Covering farmed fields with houses and roads will make the Medway flood more often and cause increased flood risk not only in Tudeley but in Golden Green, East Peckham, Tonbridge and Yalding. The Five Oak Green Road itself is like a river when we experience high rainfall and floods at several points which makes it an extremely dangerous road and no doubt that some of the new houses would flood if the local plan goes forward. This happened in January and February 2020 when we had several storms sweep through the area and gave rise to flooding in Five Oak Green and along Alders Road. This problem will just get worse if you take away the farmland and concrete over this.

Creating so much housing in Capel Parish will require the destruction of woodland, hedgerows, meadows, and farmland that is Green Belt land and should be protected. It will spoil the landscape and kill wildlife that is very special to the area, including rare species. This area should remain rural with agricultural land. We regularly have deer and wild boar in the field to the back of our property.

Our bird visitors include woodpeckers, green woodpeckers, buzzards, hawks, robins, blue tits, chaffinches, bullfinches, goldfinches, doves. Other animals include weasels, stoats, foxes, adders and

we had a visit recently from a little owl. Bats are also seen at dusk flying round the garden in the summer months. These will all decrease in numbers or disappear completely. Our property is in green belt and AONB. The AONB is to the rear of our property, green belt to the front. If the local plan goes ahead what is going to stop TWBC then looking to build on AONB in future years? Also TWBC stopped us years ago extending our property due to the location being on green belt land so how can TWBC plan to build 1000's of houses on green belt land? This green belt land stops the urban sprawl between Tonbridge and Paddock Wood, this plan will effectively join both together.

There is no set infrastructure plan from TWBC ? When are these plans going to be released? Once building has started? Surely the infrastructure should be in place to support a new 'town' prior to the development. It should not as an afterthought especially with the known pressures we have already with traffic. The local plan proposes 15 plus years of large construction sites active in the Capel area with enormous infrastructure issues. There is also no logic to the plan in terms of the distribution of planned dwellings as 51% of the local plan housing is being forced on Capel parish where only 2% of the TWBC population live. Capel is the easy option with one landowner and looking at brownfield sites seems to have been de-prioritised by TWBC.

For the above reasons the local plan needs to be stopped in it's current form.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As a long standing Tonbridge resident, educated in Tonbridge and with relatives in the town, I strongly object to TWBC's plans to develop a huge and unnecessary estate of 3,450 houses on Green Belt land in Capel on the Medway flood plain. Alongside the nearby Tudeley 'garden settlement,' this will create a Paddock Wood/Tonbridge 'conurbation' or mega town with TWBC benefitting from the rates while we residents and Tonbridge and Malling District Council will carry a lot of the extra costs and have to deal with the major problems which will arise. Many of my local friends have expressed similar strong objections to me. TWBC are largely just dumping the adverse effects of both developments on Tonbridge residents and TMDC with very little thought and, as far as I have heard and can tell, no proper consultation with TMDC. **The plans have not been positively prepared** as they push the resulting problems onto the neighbouring Borough.

The whole point of Green Belt land is to act as a buffer against encroaching development between towns and protect the environment, nature and landscape yet TWBC seems to somehow think there are exceptional circumstances here to break this important law. The Capel and nearby Tudeley developments ignore other better, cheaper, more practical and sensible options across the Borough. TWBC has simply chosen two easy large solutions, effectively washing their hands of better alternatives. **The plans are not justified and the policy is unsound.** With 3,450 homes, the plan has not properly considered many factors and should be scrapped as it simply does not work. Some of these factors are:

Flooding – every longstanding local in Tonbridge and Paddock Wood knows all about Medway flooding. The flat site is right next to the biggest river in Kent famous for its frequent floods and is in prime flooding territory. The plan mentions flood prevention measures but these look totally inadequate - even the Leigh barrier couldn't cope in 2019 with cars and blocks of flats under water as a result. Thinking about house purchasers, I wonder if they will have watched the videos and photos on the web showing the frequent floods in the area. In January this year alone, there was heavy surface water flooding. The site will inevitably flood and the homeowners and TWBC will have to deal with the damage, clean up and future sales of the houses. Not enough attention has been given to these major problems (nor the huge costs of flood prevention measures) and so **the plan is not effective and is unsound.** I cannot see that the development is sustainable if it is regularly flooded so **the plan is inconsistent with national policy.**

There will be a huge increase in traffic on the poorly maintained and heavily used Five Oak Green/Tudeley/Tonbridge Road and overloading of the already congested A228, especially in school term and the peak mornings and evenings. I doubt if the widening plans and Capel by pass will be built by KCC which is cash and resource strapped. There will be gridlock at peak times. I believe only

some of the road works will be carried out and then well after the development has commenced. The plan is **not effective** about this major issue.

There will be a large increase in commuting. Parking in Paddock Wood is poor and parking Tonbridge is already inadequate. With more commuters, no extra trains and no extra parking at the station, there will be chaos near the two stations at peak times. The plan is **not effective** in this regard. The faith in more cycling sounds good but will hardly make a difference and I am sure there will be many serious cycling accidents on the busy roads.

The planned investment in two primary schools and expansion of Mascalls will be inadequate for the large number of children from the development which means even greater pressure on schools in Tonbridge and Tonbridge Wells with lots of daily school buses adding to the traffic volumes. There is also likely to be increased demand in the area from the Tudeley development. In reality, KCC are not going to invest in all these schools in one small area given the requirements in the rest of Kent and their own cash shortages so there will be a large shortage in school places. Schools will only be built well after the children are actually living there. **So, the plan is not effective and is unsound.**

There will be huge extra pressure on all other local facilities such as hospitals, social services, elderly care and dentists. The plan assumes the resultant required investment will all just happen and be paid for by someone else.

There are literally no services like electricity and water anywhere near the site – the whole idea of Green Belt – so the cost and length of the project will be much greater than infill or brownfield site developments elsewhere in the TWBC Borough area. **The plan is therefore not justified.**

Kent is desperately short of water and adding the population from Capel and the nearby Tudeley development will create major water supply issues, not forgetting sewage issues, the systems for which are already poor in the Paddock Wood area. The plan is **not justified or effective** in this regard.

The plan is fundamentally flawed and unsound.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Tudeley Policy STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to TWBC's Development Plan for Tudeley Garden Settlement

Policy STR/SS3

As a long standing Tonbridge resident, educated in Tonbridge and with relatives in the town, I particularly object to TWBC's plans to develop a huge 2,800 housing estate on Green Belt land at Tudeley. This will effectively be a large new suburb of Tonbridge with TWBC benefitting from the rates while we residents and Tonbridge and Malling District Council will carry a lot of the extra costs and have to deal with the major problems which will arise. Many of my friends have expressed similar strong objections to me. TWBC are largely just dumping the adverse effects of this development on Tonbridge residents and TMDC with very little thought and, as far as I have heard and can tell, no proper consultation with TMDC. **The plan has not been positively prepared** as it just pushes the resulting problems into the neighbouring Borough.

The whole point of Green Belt land is to act as a buffer against encroaching development between towns and protect the environment, nature and landscape yet TWBC seems to somehow think there are exceptional circumstances here to break this important law. The Tudeley development ignores other better, cheaper, more practical and sensible options across the Borough with TWBC choosing one large excessive solution, effectively washing their hands of better alternatives. The plan is **not justified** and the policy is **unsound**. With 2,800 homes, the plan has not properly considered many factors and should be scrapped as it simply does not work. These include:

The northern part of the site is in a high risk flood area. I have seen many floods in the area because of the Medway flooding including near to where I used to live. Surface water run off into local streams often creates flooding, a problem exacerbated by the sloping nature of the site. Nowhere near enough attention has been given to these major problems and so **the plan is not effective and is unsound**. I cannot see the lower part of the development being sustainable if it is regularly flooded so **the plan is inconsistent with national policy**.

There will be a huge increase in traffic on the poorly maintained and heavily used Five Oak Green/Tudeley/Tonbridge Road and overloading of the already busy roads in Tonbridge, especially in school term and the peak mornings and evenings. There will be gridlock at peak times so yet again the plan is **not effective**.

Parking on the development looks inadequate for residents and makes little provision for visitors. Similarly, parking in Tonbridge is already inadequate and will be worsened by the huge increase in vehicles from the development so yet again the plan is **not effective**.

Affordability – the private houses representing 60% will be relatively small and very expensive. I doubt if enough people can afford to buy these houses in such volumes and who would want to live on a huge, expensive housing estate, with building going on for 20 years? If high prices are not obtainable, the viability of the development will be thrown into doubt. The plan is **not effective or justified** in this regard.

A large increase in commuting will be inevitable and as a longstanding commuter, I know only too well the current day to day practical difficulties. With more commuters, no extra trains and no extra parking at the stations (and I simply do not believe the words in the plan about more cycling – try cycling on the Tudeley/Tonbridge road), there will be chaos near the station at peak times.

One new secondary school and one new primary school combined with a doubling of Capel Primary will be inadequate for the large number of children from the development which means even greater pressure on schools in Tonbridge and Tonbridge Wells with lots of daily school buses adding to the traffic volumes. There will be even more pressure from the large number of children from the Capel and Paddock Wood developments despite the two planned primary schools and expansion of Mascalls. In reality, KCC are not going to invest in all these schools in one small area given the pressures across the rest of Kent and their own cash shortages so there will be a large shortage of school places. Schools will only be built years after the children are actually living there. **So, the plan is not effective and is unsound.**

There will be huge extra pressure on all other local facilities in the area such as hospitals, social services, elderly care and dentists. The plan assumes the resultant required investment will all just happen and costs be paid for by someone else.

There are literally no services like electricity and water anywhere near the site so the cost and length of the project will be much greater than infill or brownfield site developments elsewhere in the TWBC Borough area. **The plan is therefore not justified.**

Kent is desperately short of water and adding the population from the Tudeley development and potentially the Capel development will create major water supply issues, not forgetting sewage issues, the systems for which are already poor in the Paddock Wood area. The plan is **not justified or effective** in this regard.

Although the plan might look good on some planning architect's drawings, it is essentially **flawed and unsound**.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

I am a new resident of Paddock Wood, I live in Maidstone Road and have been here for four months. I disagree with the plan to remove vehicle access over Paddock Wood railway bridge, as this will effectively cut the town into two parts and reduce ease of access for residents and visitors, and cause a lot of chaos on nearby roads.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

My name is Sharon Hunt and I have lived in Tudeley for 14 years. I moved here because of the Green Belt, Dark Skies, AONB and to be part of a village community and not part of a new town. I have worked at Tunbridge Wells Hospital in Pembury as a medical secretary for a cardiologist for the past 8 years.

I am writing to you to raise my strong objections to Tunbridge Wells Borough Council's recently published Local Plan proposal to build over 4000 homes in the Parish of Capel in both the areas of Tudeley and East Capel. I live in the village of Tudeley and work at Tunbridge Wells Hospital.

Healthcare

Tunbridge Wells Hospital is a new hospital only opened in 2011/2012 and it is already too small for the area that it serves. Since opening the hospital has already had to add three new wards to cope with the increase in population. The hospital is struggling now to see people who have been referred on time so that they do not breach government set targets patients are waiting months for appointments, this is risk to life. This problem has now been exacerbated due to the Covid-19 pandemic and the waiting lists are very long as clinics, investigations and elective surgeries had to be cancelled during the height of the pandemic. The hospital does not have enough staff now let alone enough beds and even if they did have enough beds there would be no staff to look after the patients. Already during the winter many elective surgeries are cancelled this will only become a bigger problem with 2,800 more homes - possibly at least an extra 5,900 people. GP surgeries are closing throughout the borough and some are combining and my own surgery is struggling to employ GPs and exists on a trail of locums, a garden village is supposed to have everything it needs within its boundaries if we can't get GPs for already existing surgeries or doctors and nurses for the hospital in this area how can a whole new surgery and the existing hospital be fully staffed.

Agriculture

Capel is a rural Parish that sits within the green belt and the High Weald AONB, there are currently approx 900 homes in the Parish. CA1 and East Capel are mainly agricultural land, including orchards which I believe are protected, mostly grade 2 and 3 agricultural fields (which are in short supply in Tunbridge Wells borough as a whole) and not poor agricultural land as has been claimed by Tunbridge Wells Borough Council, many of these orchards and fields growing much food for this country for multi-national companies such as Ribena who buy substantial amounts of blackcurrants from Sherenden Farm. CA1 if built on will deprive the nation of some 6,175 tonnes of produce over 5 years. We should be aiming to be a self-sufficient borough and country not cover good agricultural land with concrete particularly now that we have left the EU, surely we need to grow more food and protect our excellent agricultural areas to feed our nation.

GeologyThe geology of the site (CA1) would appear to make it an illogical choice it comprises heavy clay susceptible to expansion when wet and shrinkage when dry increasing the risk of subsidence, in turn this would lead to high build costs. Any deep foundations for retaining structures could damage

the sensitive mud and sandstones which lie over and control the natural aquifer. Puncturing of these mudstones and sandstones may have very serious consequences to groundwater equilibrium. Building to allow water to pass under foundations would only lead to movement of the structure.

Biodiversity

An agreement was signed and reached with 190 countries including the UK to halt the loss of biodiversity by 2020 (DEFRA) and to ultimately increase biodiversity, this development clearly goes against DEFRA's agreement as there can only be a loss of biodiversity if this huge development is built, despite claims that there will be a net biodiversity gain, I fail to see how this is possible when woodlands, fields, agricultural land and streams will clearly be greatly affected by this development not to mention birdlife, mammals, reptiles, insects, fish and other organisms all important to the protection of our village, town, borough, country and world as a whole. Diverse wildlife including many red list species, yellowhammers, skylarks, lapwings, house sparrows, swifts, all species of Owl and EU protected species such as Great Crested Newts, Dormice and bats (many species of bats). A news item on BBC Southeast News on 13 November stated that dormice are now in danger because of loss of habitat and climate change in the south east, we should be striving to protect our species not deprive them of valuable habitat.

The government has spent some £6 million on research into Ash dieback, there are many ancient, veteran and mature healthy Ash trees in both CA1 and East Capel. There are also some 30 veteran Oaks and a huge number of mature and newly growing Oaks and Ash trees along with ancient woodland which will suffer if this development goes ahead as the ecosystem will not remain as it should as mammals, bird, reptiles, insects and other organisms will leave these ancient woodlands and the woodland will suffer from this loss. The balance of nature is fragile and we constantly distress and destroy it instead of protecting it.

Domestic Animals and their Impact on Wildlife / Wildflowers / Ancient footpaths

A development of this size 2,800 homes would also introduce a significant number of household pets, particularly dogs and cats. 25% of the UK population own a cat and equally 25% own a dog. This will introduce at least 700 cats and 700 dogs (best case scenario as many people own more than one dog or cat) the numbers are not per household but per adult so potentially many more dogs and cats, my figures are conservative (PDSA.org). This will have a significant effect on wildlife, cats enjoy hunting even when well fed, they will travel several miles from their home to hunt, they will also just maim and not kill leaving prey in agony and potentially young without adults to care for young birds, mammals, reptiles etc. Dogs will also affect ground nesting birds if off lead, this will lead to ground nesting birds leaving their broods and chicks being lost. If dog faeces are not cleared up this will have a detrimental effect on wildflowers and will increase the growth of nettles and thistles to the detriment of rare flowers such as the orchid and true fox sedges etc. (SWT.org) 700 dogs being walked twice a day on ancient footpaths will have a severe effect on these old walkways. These footpaths are part of the openness of the greenbelt and the open views will be lost to concrete. As a footnote it should be taken into consideration that since the Covid-19 pandemic pet ownership throughout the country has increased by 11% so we can add a further 11% more dogs, cats and other pets to this scenario - these numbers encompass all pets but the majority being cats and dogs (Pet Manufacturers Association)

Heritage

Capel has a unique culture and heritage. There are two Grade 1 listed churches All Saints and St Thomas a Becket, All Saints being famous worldwide for being the only church in the world with windows all created by Marc Chagall who so loved the location and light created by the setting of this church that he chose to design all of these windows after being asked to do one memorial window for the Goldsmid family, how sad he would be at this legalised vandalism of our greenbelt. The proposal to build such a huge number of homes would have a significant impact on the churches, the rural landscape, environment, community and wildlife, changing the Parish beyond all recognition and in effect wiping out two small and happy communities. Tudeley which currently has around 96 homes would effectively no longer exist as a historical village, by building 2,800 homes, this would also cause the loss of the all important green belt buffer from Tonbridge, which would result in urban sprawl development from Tonbridge to Paddock Wood.

Flooding and Water Supply

The suggestion of so many homes in this location is not sustainable as there is no infrastructure and will lead to a greater risk of flooding both locally and further along the River Medway floodplain, putting at risk other built up towns and villages and villages that already have a flood problem such as Yalding and East Peckham to name just two, this is clearly a danger to life. There is already a problem with supplying water for homes in this area with 2,800 new homes this will be an impossibility. In 2013 CA1, East Capel, Tonbridge and surrounding villages flooded badly, again please think about the danger to life. In 2019/20 there was significant flooding in both Five Oak Green and Tudeley, so much so that someone was actually able to swim down the middle of the road in Tudeley (Hartlake Road) - a significant danger to life.

Transport

The trains from Tonbridge and Paddock Wood are already at capacity, you are lucky to get on the train let alone get a seat, the service would not be able to cope with the additional commuters, and they will be commuting as there are not enough jobs in this area to sustain the huge number of people expected to live in these developments and the council would be naïve to think this is not the case. Already the homes in Paddock Wood are being marketed in London with season tickets paid for by developers as the incentive for moving to Paddock Wood from London. Homes for local people will clearly not. The train company have already advised that they are not able to put on any more services or extra tracks and no further station will be built. This train line is a two track rail line to London and the coast and this cannot be changed as there is at least one two track tunnel to London. The developers and Tunbridge Wells Borough Council have already been told that the rail company will not be putting a station in at Tudeley Garden Village as this will affect the timetables significantly because the trains will not be able to get up enough speed to keep the train timetables as they are, the line is not long enough to warrant another station between Tonbridge and Paddock Wood and the cost would be huge in £. Most commuters will drive to Tonbridge or Paddock Wood stations to get to London the car parks are already full, of course some people will cycle but not everyone and anyway with everyone cycling where will they park their bikes the station is already full of push bikes.

Housing Needs

Increased housing should be developed in proportion to existing population numbers across the borough. There are brownfield sites and other sites which already have infrastructure in place, there are over 100 brownfield sites that are known to the council, there must be many many more. There were 450 sites offered in the call for sites, 20 homes on each site would fulfil the government's 2014 methodology requirements for housing in Tunbridge Wells, some of this number having already been built. However, Tunbridge Wells Borough Council should be working with the 2016 methodology as the 2014 methodology was found to be incorrect due to NOS as advised by the government, if the council worked with the 2016 methodology as required and instructed by the government it would need to build 4,000 **less** homes than this local plan has decreed need to be built, thereby negating the need for these two new towns in Tudeley and East Capel. Much of the land proposed in Capel for development has a single landowner and the simplicity in developing that land should not come before the significant detrimental impact it would have both on greenbelt and also the impact the development would have on the High Weald AONB which borders the proposed site.

Impact on Neighbouring Borough – Tonbridge and Malling Part of the site of the proposed development sits at the very edge of the Borough next to the border with Tonbridge and Malling. Any increase in population within Capel would result in a significant demand upon the neighbouring Borough without the plan or infrastructure to cope and without the benefit of the added council tax. This development would have little or no impact on Tunbridge Wells town itself but all the monetary gain. Tonbridge and Malling Council have questioned the Soundness of Tunbridge Wells Borough Council's local plan and have put in their objection and asked for Tudeley Garden Village to be removed from the plan.

Government's Garden Village Criteria

Under the Government proposals for garden Villages and settlements they recommend that they are not built where there are existing settlements but should be new and discrete, the government also advise that brownfield sites should be built on before greenbelt, there are enough brownfield sites in Tunbridge Wells Borough to satisfy the housing needs / numbers expected by the government. There

is nothing discrete about the proposed plans which would be situated in existing settlements and as previously stated effectively wiping out the village of Tudeley. The Government also advise that garden villages and settlements should have local support, I would suggest that this is clearly not the case in the Tudeley Garden Village proposal. In addition, it is likely that the existing railway line would dissect the proposed site at Tudeley which does not support garden settlement principles but actually creates two villages (towns). The village will not initially be self sufficient as there will be no school, no station, no shops so the idea of a garden village that has everything is not feasible - people will have to leave the village for work, shopping schools etc.

Road Network, Pollution and Climate Change

The roads are already severely congested so presumably another road would have to be built which would cross greenbelt and AONB, this is just unacceptable and may move transport through the development area more quickly but will just end up polluting and congesting Five Oak Green, Capel, Tudeley, Tonbridge and surrounding towns and villages to an even greater extent than they are congested now, Tonbridge in particular is a town full of small, narrow roads. The pollution caused by all this additional traffic in a greenbelt area will just add to the problems of climate change and building on greenbelt where many trees, ancient and veteran (the lungs of the world) exist will be devastating for our clean air. There would be significant light pollution from this development and will have a considerable impact on the AONB as currently this area enjoys dark skies and clearly this would be lost as 2,800 homes will produce considerable light pollution.

Costs

The Council have already wasted £10 million of Tunbridge Wells' taxpayers hard earned money on a vanity project in Calverley Park which has now been voted out and abandoned. How much has been wasted thus far on this ill thought out local plan for a new town, another vanity project using the wrong methodology in assessing numbers required, use the right methodology (2016 not 2014), this would be the professional and correct way forward. The council and employees, planners, etc are paid by local taxpayers and as such should be representing the needs of the constituents of this borough, clearly they are not representing us at all just trying to make a 'name' for themselves with another badly thought out 'vanity project' to try and attract people from London, not housing for local people to be able to stay in their own villages. We do not need 2,800 houses in Tudeley to house our local people.

General Comments

This proposal it is ill thought out and unsustainable and is detrimental to both local residents' health, physical and mental. I believe this is a lazy plan and has only been proposed so that the council do not have to deal with multiple landowners and just have to deal with one in Tudeley, (this site was not on the first call for sites and as such not planned for as rigorously as should be) this should not be a reason for this development. This is not a special circumstance ! The council have also not advised what their 'very special circumstance' is for building on greenbelt and greenbelt that is excellent agricultural land as there should be a special circumstance as required by the NPPF, and I have to ask why not !

The plan preparation process did not include Tudeley until after the issues and options process in 2017. This means that the largest housing area in the plan did not go through most of the plan preparation process. There is no greenbelt study, no landscape assessment, no biodiversity assessment, the Local Plan isn't complete enough to be ready for The Inspector when these two areas (the biggest development in the borough) have not had the same level of assessment as the rest of the plan. The issues and options process led to most people – some 60% - wanting a growth corridor led approach, less than half wanted a garden settlement and that was when they did not know a garden settlement would involve the destruction of many acres of precious greenbelt and have a significant impact on the AONB. Protection of greenbelt was a key priority for people who participated in the issue and options consultation the plan should be re-written to implement a growth corridor led approach to protect green belt and I stress again that the correct methodology should be used 2016 as instructed by the government!

DO THE RIGHT THING – PROTECT OUR GREENBELT – PROTECT OUR CLEAN AIR – PROTECT OUR DARK SKIES – PROTECT OUR WILDLIFE – PROTECT OUR WILD FLOWERS - PROTECT OUR ANCIENT TREES – PROTECT OUR FOOD PRODUCTION - PROTECT OUR HISTORIC VILLAGES - PROTECT OUR FUTURE

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To make this plan sound two other sites should be considered Castle Hill which already has significant infrastructure available, including schools, shops, offices, workplaces, buses and a train station along with very quick access to the A21 without driving through small Kentish villages.

Another site is the old Blantyre Prison which is standing empty and could be utilised for many many houses, this is a brownfield site.

There is also a large site in the centre of Tunbridge Wells where the old cinema used to be that has been standing empty for many years, surely this could be utilised within the plan.

Tunbridge Wells Borough has enough brownfield sites within the borough to satisfy the governments figures for housing development without building on our precious Greenbelt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I wish to voice my strong objection to the proposal in your local plan to make Hartlake Road a no through road.

The distress and upheaval to residents of Tonbridge, Tudeley, Capel, Hadlow, Golden Green and East Peckham will be horrendous. The extra traffic on other roads especially at peak times is not acceptable. How are parents expected to get their children to school? What will be the impact on restaurants such as The Poacher and Partridge and The Bell Inn? This proposal is totally unacceptable and I urge you to reject it.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

I wish to register my objection to this proposal. I regularly use this road. It's closure will have a significant detrimental impact on all of the surrounding areas and local businesses. This was clearly demonstrated when the road was closed due to flooding.

Question 1	
Respondent's Name and/or Organisation	chris twynam
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS 3 Tudeley village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

For 36 years my wife and I have lived on Hartlake Rd in Tudeley Hale. We are just outside the edge of the proposed Tudeley village development. Being retired now, twice every day I walk from my house in all directions through this beautiful part of the Medway valley with its open vistas, large skies and extensive bird and insect life. 2800 houses and their residents will affect everything in no positive way. For the people and wildlife who gain so much from this unique valley I totally oppose the Tudeley village plans as a simply dreadful idea.

Assuming Tunbridge Wells Council have to build 2800 houses somewhere in their Borough (this itself is dubious), let's look at the Pros and Cons of choosing Tudeley as the location for the new village/town.

Pros: (reasons to build here)

- 1 One landowner makes it easier for the Council to deal with.
- 2 There's a mainline railway through the middle of the site so the Council can pretend (against statements from British rail), that residents can use a train and not drive anywhere.
- 3 The site is sloping and just above the Medway flood plain so only existing residents and villages such as Yalding downstream will receive the runoff from roofs and tarmac while the new houses should be OK.
- 4 The site is right on the edge of the Borough so income will go to Tunbridge Wells and problems to Tonbridge at only 2 miles away.
- 5 The site is Green Belt so easier to build on than the AONB just across the road.

Cons: (reasons to build elsewhere)

- 1 Its a very green an beautiful slope down to the flat and lush Medway valley. The construction will be obvious to all from the North East with views of it from most of Hartlake Rd, Golden Green and Three Elm lane, the Medway itself and all the way up to East Peckham old church. A 300 acre eyesore visible for miles.
- 2 Transport. The road from Five Oak Green to Tonbridge is a winding country road already stationary at times. Residents will be driving to Tonbridge and then trying to access the services there or driving to reach the A21 corridor for Tunbridge wells and Sevenoaks. I live here and use that road for 70% of my journeys. The road is not suitable for more traffic and the access into Tonbridge is very slow even at quiet times. Tonbridge is a busy town with the car parks and roads already near their capacity. Not all the children are going to attend the proposed school, with such excellent other schools nearby as options. The new village would be an urban extension of Tonbridge as the old village is a rural extension now. Amazon deliveries alone from the A21 will be a challenge. A railway station which is most unlikely is not going to make this village in any way sustainable.
- 3 Cooperation of neighbouring Borough. Tonbridge Council demanded a robust objection to the Tudeley village (meeting 17 May 2021). It would be a disaster for Tonbridge and would alter the very nature of this lovely market town.
- 4 Noise pollution. I can hear the skylark and buzzards from my garden. They and many others will have to move away.

- 5 Air pollution. Forcing a village of residents to drive to get anywhere or most things will add pollutants to the countryside air. Never mind all the gas and oil boilers.
- 6 Light pollution. The Poacher pub is the main light polluter in Tudeley. It can be seen from a fair distance at night. The village will be like a beacon in comparison extending to areas of countryside which have next to no light pollution now.
7. Agriculture. PSLP EN20 The loss for ever of 300 productive acres of grade 2 and 3 land is a travesty if it can be avoided and goes against current Government ethos.
8. Alternative site. The proposed development option of 1800 houses next to Tunbridge Wells Retail park would seem far more suitable as residents could walk or cycle to the park and High Brooms railway Station. It also has easy access to the A21 corridor and cannot be seen from most directions. Also the land is grade 4 agricultural land and although AONB is difficult to compare favourably with Tudeley.
- 1 Community. The railway splits the proposed village into 2 halves with just one existing narrow tunnel lane joining them at the present time. The cost and disruption to a mainline railway of building more tunnels make their future existence questionable failing the whole village plan.
- 2 Biodiversity. PSLP EN9. DEFRA's biodiversity 2020 a strategy for England's wildlife aims to halt overall biodiversity loss. This area of Tudeley is rich in biodiversity. KMBRC records show 53 bird species considered to breed here. 70 species of bird regularly rely on the Tudeley site to overwinter or breed. TWBC promise a 10% increase in biodiversity once they have built 2800 homes on 300 acres and let loose 800 cats, 1000 dogs and numerous rats on the surrounding area. They are just playing with figures and not reality.
- 3 Local housing need. Does that mean drawing people from London to come and live in the new urbanised countryside.
- 4 Urban sprawl. The new village simply reduces the green belt breaker between Tonbridge, Five Oak Green and Paddock Wood. What we need is green corridors not urban ones.
- 5 New link Rd. The local plan shows a link road from Capel school to the A228. Straight through green belt and next to AONB to try to get traffic to and from the proposed village to Tunbridge Wells. From experience most traffic will wish to reach Tonbridge or Maidstone and M20 rather than the congested streets of Tunbridge Wells. How many houses will need to be built before this road materialises and breaks up another rural area.
- 6 Litter pollution. Since the lockdown many more people are making use of the footpaths along the Medway here in Tudeley. Unfortunately previous unspoilt picnic places are now suffering from left cans and packaging. It is good to see people especially younger members of society getting outside. The litter and group sizes of picnickers along the river is manageable at present but I fear the river will be overrun with an additional 6000 people within walking distance of it. Too little rural space left for the population.
- 15 .Church. The grade 1 church of all saints at Tudeley is world famous and visitors can enjoy the Chagall windows and view the church overlooking a green idle. The new village will extend down behind the church for as far as you can see.

The whole plan for Tudeley village is **unsound, unsustainable and unrealistic**. The village would destroy an area mentioned in the Domesday book for ever.

The local council elections showed the lack of faith and lack of agreement the populous of the Borough and certainly Capel, have for the Council. The chairman has been forced to resign and the Conservatives have lost their majority against the general tone in the Country.

The Tudeley village plan should be removed from the Local Plan saving this area for the enjoyment of the future residents of Tonbridge and Five Oak Green for ever

For 36 years my wife and I have lived on Hartlake Rd in Tudeley Hale. We are just outside the edge of the proposed Tudeley village development. Being retired now, twice every day I walk from my house in all directions through this beautiful part of the Medway valley with its open vistas, large skies and extensive bird and insect life. 2800 houses and their residents will affect everything in no positive way. For the people and wildlife who gain so much from this unique valley I totally oppose the Tudeley village plans as a simply dreadful idea.

Assuming Tunbridge Wells Council have to build 2800 houses somewhere in their Borough (this itself is dubious), let's look at the Pros and Cons of choosing Tudeley as the location for the new village/town.

Pros: (reasons to build here)

- 1 One landowner makes it easier for the Council to deal with.
- 2 There's a mainline railway through the middle of the site so the Council can pretend (against statements from British rail), that residents can use a train and not drive anywhere.
- 3 The site is sloping and just above the Medway flood plain so only existing residents and villages such as Yalding downstream will receive the runoff from roofs and tarmac while the new houses should be OK.
- 4 The site is right on the edge of the Borough so income will go to Tunbridge Wells and problems to Tonbridge at only 2 miles away.
- 5 The site is Green Belt so easier to build on than the AONB just across the road.

Cons: (reasons to build elsewhere)

- 1 Its a very green an beautiful slope down to the flat and lush Medway valley. The construction will be obvious to all from the North East with views of it from most of Hartlake Rd, Golden Green and Three Elm lane, the Medway itself and all the way up to East Peckham old church . A 300 acre eyesore visible for miles.
- 2 Transport. The road from Five Oak Green to Tonbridge is a winding country road already stationary at times. Residents will be driving to Tonbridge and then trying to access the services there or driving to reach the A21 corridor for Tunbridge wells and Sevenoaks. I live here and use that road for 70% of my journeys. The road is not suitable for more traffic and the access into Tonbridge is very slow even at quiet times. Tonbridge is a busy town with the car parks and roads already near their capacity. Not all the children are going to attend the proposed school, with such excellent other schools nearby as options. The new village would be an urban extension of Tonbridge as the old village is a rural extension now. Amazon deliveries alone from the A21 will be a challenge. A railway station which is most unlikely is not going to make this village in any way sustainable.
- 3 Cooperation of neighbouring Borough. Tonbridge Council demanded a robust objection to the Tudeley village (meeting 17 May 2021). It would be a disaster for Tonbridge and would alter the very nature of this lovely market town.
- 4 Noise pollution. I can hear the skylark and buzzards from my garden . They and many others will have to move away.
- 5 Air pollution. Forcing a village of residents to drive to get anywhere or most things will add pollutants to the countryside air. Never mind all the gas and oil boilers.
- 6 Light pollution. The Poacher pub is the main light polluter in Tudeley. It can be seen from a fair distance at night. The village will be like a beacon in comparison extending to areas of countryside which have next to no light pollution now.

7.Agriculture. PSLP EN20 The loss for ever of 300 productive acres of grade 2 and 3 land is a travesty if it can be avoided and goes against current Government ethos.

8.Alternative site. The proposed development option of 1800 houses next to Tunbridge Wells Retail park would seem far more suitable as residents could walk or cycle to the park and High Brooms railway Station. It also has easy access to the A21 corridor and cannot be seen from most directions. Also the land is grade 4 agricultural land and although AONB is difficult to compare favourably with Tudeley.

- 1 Community. The railway splits the proposed village into 2 halves with just one existing narrow tunnel lane joining them at the present time. The cost and disruption to a mainline railway of building more tunnels make their future existence questionable failing the whole village plan.
- 2 Biodiversity. PSLP EN9. DEFRA's biodiversity 2020 a strategy for England's wildlife aims to halt overall biodiversity loss. This area of Tudeley is rich in biodiversity. KMBRC records show 53 bird species considered to breed here. 70 species of bird regularly rely on the Tudeley site to overwinter or breed. TWBC promise a 10% increase in biodiversity once they have built 2800 homes on 300 acres and let loose 800 cats, 1000 dogs and numerous rats on the surrounding area. They are just playing with figures and not reality.
- 3 Local housing need. Does that mean drawing people from London to come and live in the new urbanised countryside.
- 4 Urban sprawl. The new village simply reduces the green belt breaker between Tonbridge, Five Oak Green and Paddock Wood. What we need is green corridors not urban ones.
- 5 New link Rd. The local plan shows a link road from Capel school to the A228. Straight through green belt and next to AONB to try to get traffic to and from the proposed village to Tunbridge Wells. From experience most traffic will wish to reach Tonbridge or Maidstone and M20 rather than the congested streets of Tunbridge Wells. How many houses will need to be built before this road materialises and breaks up another rural area.

- 6 Litter pollution. Since the lock down many more people are making use of the footpaths along the Medway here in Tudeley. Unfortunately previous unspoilt picnic places are now suffering from left cans and packaging. It is good to see people especially younger members of society getting outside. The litter and group sizes of picnickers along the river is manageable at present but I fear the river will be overrun with an additional 6000 people within walking distance of it. Too little rural space left for the population.

15 .Church. The grade 1 church of all saints at Tudeley is world famous and visitors can enjoy the Chagall windows and view the church overlooking a green idle. The new village will extend down behind the church for a far as you can see.

The whole plan for Tudeley village is **unsound, unsustainable and unrealistic**. The village would destroy an area mentioned in the Doomsday book for ever.

The local council elections showed the lack of faith and lack of agreement the populous of the Borough and certainly Capel ,have for the Council. The chairman has been forced to resign and the Conservatives have lost their majority against the general tone in the Country.

The Tudeley village plan should be removed from the Local Plan saving this area for the enjoyment of the future residents of Tonbridge and Five Oak Green for ever.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove Tudeley village from the local plan and add Castle hill development

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR 1 Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

STR 1 Development strategy

Exceptional Circumstances

Paragraph 11 of NPPF states 'it does not make meeting identified needs for housing and other uses a requirement: rather it advises that the protection of assets of particular importance, which include both AONBs and Green Belt may provide 'a strong reason for restricting the overall scale, type or distribution of development in the plan area'. AONB covers approximately 70% of the borough, 22% is Green Belt, and 7% of land is in Flood Zone 3 & unsuitable for development.

The Council have chosen not to use these 'exceptional circumstances' (PSLP 4.11) for not meeting housing needs within the borough.

For this reason the PSLP is unsound and not justifiable.

Local housing need assessment

NPPF states this should be 'conducted using the standard method in national planning guidance –**UNLESS exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals**'.

TWBC had the opportunity to reduce the housing numbers by following advice in the NPPF by taking into account the 'exceptional circumstances' ie the large proportion of AONB and Green Belt coverage.

The population projection of an overall borough increase of 6,155 (5%) for the plan period was calculated using out of date data from the Office for National Statistics.

TWBC are aiming to achieve 12,204 dwellings, but claim that the allocated sites in the PSLP along with existing allowances will yield up to 13,444 dwellings. This is way beyond that 'needed' to accommodate the predicted population growth in the borough.

This method of development will produce a 'false' demand for houses by encouraging movement of population to the south east away from the more expensive housing areas of London and its suburbs at the expense of green belt, AONB and quality agricultural land.

The Pandemic and Brexit are also 'exceptional circumstances' and 'justify' an 'alternative approach' to 'reflect current and future demographic trends and market signals'.

Housing requirements should be re-calculated using current population projections and this PSLP should therefore be re-considered.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Housing requirements should be re-calculated using current population projections to reflect any change brought about by The Pandemic and Brexit and consider the 'exceptional circumstances' of AONB, Green Belt & Flood Plain not to meet current housing need in the borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

STR/SS 1 Paddock Wood including land at East Capel

Green Belt PSLP 5.160 Green Belt has several purposes including: assisting in urban regeneration, to check unrestricted sprawl of large built up areas, to prevent neighbouring towns merging into one another and to assist in safeguarding the countryside from encroachment. (In the 'Assessment of Green Belt Sites' the contribution to GB purposes for STR/SS1 scored 'strong' for safeguarding the countryside, from encroachment. In this case Green Belt in East Capel prevents Paddock Wood merging with Five Oak Green and ultimately Tonbridge. The overall harm from release is recognised as 'high'. Comparing this with other allocated sites, which all (except STR/SS3) scored less on 'overall harm', it appears that no weight is being given to Green Belt criterion.

The NPPF paragraph 136 states that, once established Green Belt boundaries should only be altered in exceptional circumstances are fully evidenced and justified. that 'there should be no inappropriate development on Green Belt unless very special circumstances can be demonstrated to show that the benefits of the development will out weigh the harm caused to the Green Belt'.

Releasing land from the Green Belt for development is not 'sustainable'- it is a finite resource. TWBC have yet to provide a good case for the 'exceptional circumstances' and the justification for releasing Green Belt.

The PSLP is therefore 'unsound'.

PSLP Policy EN 20Agricultural Land

The NPPF 2019 states that Local Planning Authorities should protect the best and most versatile (BMV) agricultural land from significant, inappropriate or unsustainable development proposals and protect all soils by managing them in a sustainable way. Policy EN 20 of the TWBC PSLP reinforces that statement.

The land at East Capel is Agricultural Land Classification ALC Grade 3 (source Provisional Agricultural Land Classification 1977 Mapping). This is considered as some of the 'best and most versatile land in the country (BMV).

It is land capable of consistently producing moderate to high yields of a range of arable crops, especially cereals, or moderate yields of crops including: cereals, oil seed rape, grass, potatoes, sugar beet and less demanding horticultural crops.

PSLP Paragraph 6.243 states that it is important to use areas of poorer quality agricultural land in preference to that of higher quality, but goes on to explain that 'quality' may be determined by more than the ALC grade. The 'economic and other benefits' such as infrastructure, fragmentation, and access, as well as the contribution land may make to wider ecosystem services and natural capital, are important considerations in relation to the effects of development on agricultural land. Natural capital is "that part of nature which directly or indirectly underpins value to people, including ecosystems, species, freshwater, soils, minerals, the air and oceans, as well as natural process and function".

The Government Policy 'A Green Future: Our 25 Year Plan to improve the Environment 2018' sets out the government's 25-year plan to improve the health of the environment by using natural resources more sustainably and efficiently. It plans to:

- . protect the best agricultural land
- . put a value on soils as part of our natural capital
- . manage soils in a sustainable way by 2030

Planning applications that would result in the loss of best and most versatile agricultural land will need to justify why the loss of the agricultural land is acceptable and also assess the impact of the loss of the agricultural land on the wider farming resource, natural capital, and ecosystem services.

If TWBC are following Government Guidelines (NPPF) and their own Policies it transpires that land at East Capel should not be developed as it is Grade 3, BMV and productive land. TWBC appears to have offered no justification for losing this finite resource which is not only invaluable in contributing to the UK being self-sufficient in food production but also important in providing other important 'ecosystem services' such as a store for carbon and water, as a reservoir of biodiversity and as a buffer against pollution (EN 20 6.238). It is not a 'sustainable' option, nor does it put a value on soils as part of our natural capital.

Food Policy Experts are warning that with Brexit & Climate Change threatening UK food imports, self-sufficiency should be taken more seriously. The NFU are asking for food security, which has been pushed into the spotlight by the pandemic, to be at the heart of wider government policies. In the mid-1980's the country produced 78% of our food today that figure is 64%. TWBC's plans for Capel will add to the decline.

The UK has an ideal temperate climate for growing food, but if our BMV land is covered in concrete this will be out of the question. If the land in East Capel continued to be farmed, food production could go on ad-infinitum and in essence contribute significantly to the self-sufficiency of the UK.

TWBC are taking the easy, short-sighted option by using large areas of Green Belt, good quality, agricultural land to fulfil their housing requirement for the PSLP. This is not 'sustainable' development contrary to Government Policy advice.

For this reason the PSLP is unsound.

Flood Risk PSLP EN 25

There is policy emphasis in the NPPF (paragraph 155) to steer housing development away from areas with higher flood risk defined as being Flood Zone 3.

A proportion of the potential development area at East Capel is Zone 3 and much of it is Zone 2 and consequently prone to flooding.

The Development Strategy Paper for the PSLP page 84 Paragraph 6.227, tells us that 'the relatively extensive areas of land available for potential housing development in Zones 1 and 2 within the borough has made it possible to align the selection of housing land when performing the Sequential Test, so that all potential new housing sites can be located on land zoned outside of the high-risk flood zone (zone 3).' TWBC are determined to ignore this advice by including the land at East Capel in the PSLP with no good justification other than perhaps the unrealistic ambition of flood risk 'mitigation' and 'betterment'. The erratic weather patterns created by Climate Change can only worsen the risk of serious flooding in this area. Common sense would also tell us that it would be prudent to avoid building homes in East Capel to lessen the potential risk of the misery of flooded homes to residents in the future.

For this reason the PSLP is Unsound and the allocated site at East Capel should be removed from the plan.

Biodiversity PSLP EN 9

NPPF Paragraphs 170 -183 give guidance on 'conserving and enhancing' the natural environment including sites of biodiversity, by 'minimising impacts on and providing net gains for biodiversity'. The process of building 2,000 homes in East Capel can only cause significant harm through direct removal of habitat and indirectly through noise, vibration, light and chemical pollution, to the existing flora and fauna in this area. The ensuing effect from all these factors plus the impact from domestic pets will be devastating on the wildlife.

To calculate Biodiversity losses and gains, planning applications will use DEFRA's Biodiversity Metric 2.0. The metric takes into account factors such as habitat distinctiveness and condition to give an overall score, known as 'biodiversity units.' TWBC are one of the early adopters of Net Gain policies in advance of national rollout. As the methodology is very much in its infancy several research projects (Durrell Institute of Conservation and Ecology, Lancaster Environment Centre) are underway assessing the true long-term effects on ecology in development sites.

The biometric has come under criticism for being based heavily on habitat rather than species, and weighted towards habitats such as deciduous woodland rather than cropland which is considered of low-ecological value and subsequently being lost. This could have devastating consequences for the significant populations of UK declining field bird species such as Lapwings, Linnets, Yellowhammers and Skylarks observed on the Capel farmland.

Looking at the 'Biodiversity Evidence Base Update of February 2021' it is apparent that the 'desk-based' reviews, which at the moment appear to be the only ecology assessments of the area, have only used data up to 2018. Since then many local residents have recorded sightings of flora & fauna. The KMBRC themselves also state "...the lack of information for a geographically defined area does not automatically imply a low biodiversity value for that area: it may simply be under recorded." Taking into account the use of out of date data and the likelihood of 'under recording' of flora & fauna, the initial baseline that Ecologists will be using to calculate the biometric and consequently the 10% biodiversity net gain, will not be a true reflection of the biodiversity at East Capel.

Many of the bird species recorded by the Kent & Medway Biological Records Centre (KMBRC) in the East Capel region are 'red-list' Birds of Conservation Concern and some of 'Principal Importance'.

The preliminary desk-top assessments on ecology concluded the following:

"Phase 2 Surveys: Surveys for protected and notable species potentially present within the Site and detailed botanical surveys (potentially including hedgerow and woodland survey) will be required to establish the ecological baseline for the site. Surveys are seasonal and should be completed early in the project programme to ensure pertinent information is available to inform masterplanning"...and;

"Master-planning Input: In order to protect key ecological resources and demonstrate biodiversity net gain, early ecological input to the scheme design is needed to ensure suitable mitigation for designated sites, habitats and species is embedded."

As yet there appears to be no on-site surveys available for scrutiny, contradictory to Stantec advice of 'early ecological input', which is necessary for demonstrating biodiversity net gain. Apparently the comprehensive Environmental Impact Assessment is not required until the Planning Application stage. This must be fundamentally wrong with development on this scale and will surely contribute to the worldwide loss of species.

The removal of and disturbance of habitats is contrary to the following policies and worldwide agreements:

- . The Tree Health Resilience Strategy 2018 to increase and encourage healthy woodland.

- . DEFRA's Biodiversity 2020: a strategy for England's wildlife and ecosystem services aims to '...halt overall biodiversity loss, support healthy well-functioning ecosystems and establish coherent ecological networks.'

- . The Global Agreement for the halt of biodiversity loss 2010–20 set an ambition to halt overall loss of England's biodiversity, and is mirrored by the

- . EU Commission's Biodiversity Strategy 2010–20 and the UN Convention on Biological Diversity: Strategic Plan Targets for 2020.

The NPPF Paragraph 175.(C) states ' development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be REFUSED, unless there are wholly exceptional reasons AND a suitable compensation strategy exists.....

The area at East Capel has ancient woodland, old hedgerows and streams supporting a myriad of wildlife including protected species such as Great Crested Newts, Dormice and Bats. There is little detail yet of the planned mitigation measures to protect these species. The Durrell Institute of Conservation and Ecology question the delivery of Biodiversity net gain and the ability to hold developers to account in their words 'unfortunately, our analysis also shows that the governance might not be there to

Ensure these promises are kept for habitats delivered within the footprints of proposed development' . There is no mention by TWBC in the PSLP of a governance mechanism in place to ensure biodiversity is monitored and achieved.

Taking into account all the above factors the TWBC promise of a 10% increase in biodiversity on site is unrealistic. For this reason the PSLP is unsound.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The harm to the Green Belt and biodiversity as well as the increase risk of flooding within the East Capel allocated site outweigh the questionable 'exceptional circumstances' that TWBC have used to justify its inclusion in the PSLP.

The allocated site at East Capel should therefore be removed from the plan.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

STR/SS 3 Allocated site for Tudeley Village

I object to the inclusion of STR/SS 3 as an allocated site for development in the PSLP. It is unsound, not legally compliant.

For the following reasons:

- . At the Draft Plan stage the Tudeley Site had not been included in the thorough appraisal that other allocated sites within the borough had. There was no Green Belt Study, no Landscape Assessment and no Biodiversity Assessment.

It hadn't been put forward as a site for assessment at the initial Issues and Options Stage, where the majority of people favoured a 'corridor led approach' to development. Less than half wanted a garden settlement. Protecting the Green Belt was found to be a priority for most.

This meant that the largest housing proposal in the area did not go through the full plan preparation process, meaning that residents didn't have the comprehensive information for making representations at the Regulation 18 stage of the process.

- 1 The PSLP paragraph 4.80 states 'Engagement in planning, especially of larger more complex sites, is critical. The greater the engagement with the local community, as well as the Council and other key stakeholders, the more weight can be given to any master planning approach. There has been very little community engagement.

At Regulation 18 TWBC received over 1,000 objections to the Plans negative impact on Capel Parish. In 2020 even more dwellings have been added to Capel. Residents are certainly not being 'listened to', contravening paragraph 4.80 and the advised contribution to a 'master planning' approach.

The PSLP is therefore not legally compliant.

Garden Village & Master Planning approach.

The Tudeley Village is being promoted as a development designed on Garden settlement principles, which is claimed to be an appropriate, sustainable and effective means of meeting housing needs.

This is debatable. 5.174 of the PSLP states 'a sustainable community' includes the following qualities
1. Clear identity: a distinctive local identity as a new garden community 2. Sustainable scale: built at a scale which supports the necessary infrastructure ..

The location at Tudeley is unlikely to be a 'stand alone' community as it is located only 2 miles from the centre of Tonbridge. The population will gravitate towards Tonbridge for services, particularly the station for the easy commute to London.

The site is divided in to 2 by the railway line and in effect is '2' developments. with limited means of crossing the railway and the planned 'phasing' of the development through the plan period and beyond, it isn't going to be a 'sustainable community' with for many years. Meanwhile it has a huge negative impact on West Kent, particularly Tonbridge with the potential of an extra 4,000 vehicles on the roads.

The PSLP is therefore unsound.

Transport & Infrastructure

The plans for Tudeley Village are based on Garden Village principles which encourage the use of public transport and in this case rely on a railway station within the development site. British Rail are against a station as it will be too close to the stations of Tonbridge & Paddock Wood. It will not be built within this plan period and unlikely to be permitted after 2038.

This major development cannot be justified on a railway station that will never materialise; this is 'unsustainable' contravening the NPPF (paragraph 10). Therefore the PSLP is unsound.

Although the purpose of the master planning approach is to combine development with improved infrastructure, there is no guarantee that this will materialise and no timescale for their completion. New roads come at a very high environmental cost. The new Five Oak Green link road and Colts Hill by-pass will be taking Green Belt, BMV agricultural land and border the AONB and encouraging vehicular usage all of which contribute to 'unsustainable' development and contravene government policies.

The additional traffic created by development in Tudeley will add to the heavily congested roads in Tonbridge, which can already be grid locked at certain times. Tonbridge & Malling Borough Council (TMBC) are very concerned about the effect on the town. Their response to Regulation 18 includes 'However, the proximity of some of the major development proposals to the borough boundary and specifically, the south east of our main settlement of Tonbridge, is a matter of serious concern due to the potential impact on the local highway network, rail services and other community infrastructure including health care and education, particularly when combined with planned developments in Tonbridge as part of our own Local Plan.'

At a recent TMBC Extraordinary meeting of the Planning and Transportation Advisory Board Meeting (17th May 2021) the Councillors were very vocal in their request for writing a 'robust' objection to the proposed scale of development in Tudeley. The only person who was prepared to 'soften' this response was Ian Bailey the Planning Policy Manager for TMBC, who gave the impression that it was a case 'if we scratch their (TWBC) back they (TWBC) will scratch ours..', when he reminded the Councillors that TWBC would need to cooperate with their own Local Plan. No doubt this would be to fulfil the 'Duty to Cooperate' as a legal test of soundness of TMBC's Plan.

This is not a good reason for justifying the removal of 180 ha of green belt, BMV agricultural land when other options are available.

The PSLP is therefore unsound.

Biodiversity PSLP EN 9

NPPF Paragraphs 170 -183 give guidance on 'conserving and enhancing' the natural environment including sites of biodiversity, by 'minimising impacts on and providing net gains for biodiversity'. The process of building 2,800 homes at Tudeley can only cause significant harm through direct removal of habitat and indirectly through noise, vibration, light and chemical pollution, to the existing flora and fauna in this area. The ensuing effect from all these factors plus the impact from domestic pets will be devastating on the wildlife.

To calculate Biodiversity losses and gains, planning applications will use DEFRA's Biodiversity Metric 2.0. The metric takes into account factors such as habitat distinctiveness and condition to give an overall score, known as 'biodiversity units.' TWBC are one of the early adopters of Net Gain policies in advance of national rollout. As the methodology is very much in its infancy several research projects (Durrell Institute of Conservation and Ecology, Lancaster Environment Centre) are underway assessing the true long-term effects on ecology in development sites.

The biometric has come under criticism for being based heavily on habitat rather than species, and weighted towards habitats such as deciduous woodland rather than cropland which is considered of low-ecological value and subsequently being lost. This could have devastating consequences for the significant populations of UK declining field bird species such as Lapwings, Linnets, Yellowhammers and Skylarks observed on the Tudeley farmland.

Looking at the 'Biodiversity Evidence Base Update of February 2021' it is apparent that the 'desk-based' reviews by Stantec, which at the moment appear to be the only ecology assessments of the area, have only used Kent & Medway Biological Records Centre (KMBRC) data up to 2018. Since then many local residents have recorded sightings of flora & fauna. The KMBRC themselves also state "...the lack of information for a geographically defined area does not automatically imply a low biodiversity value for that area: it may simply be under recorded." Taking into account the use of out of date data and the likelihood of 'under recording' of flora & fauna, the initial baseline that Ecologists will be using to calculate the biometric and consequently the 10% biodiversity net gain, will not be a true reflection of the biodiversity at Tudeley.

Many of the bird species recorded by the KMBRC in the proposed site at Tudeley and its environs are 'red-list' Birds of Conservation Concern and some of 'Principal Importance'.

The preliminary Stantec desk-top assessments on ecology concluded the following:

"Phase 2 Surveys: Surveys for protected and notable species potentially present within the Site and detailed botanical surveys (potentially including hedgerow and woodland survey) will be required to establish the ecological baseline for the site. Surveys are seasonal and should be completed early in the project programme to ensure pertinent information is available to inform master planning"...and;

"Master-planning Input: In order to protect key ecological resources and demonstrate biodiversity net gain, early ecological input to the scheme design is needed to ensure suitable mitigation for designated sites, habitats and species is embedded."

As yet there appears to be no on-site surveys available for scrutiny, contradictory to Stantec advice of 'early ecological input', which is necessary for demonstrating biodiversity net gain. Apparently a comprehensive Environmental Impact Assessment is not required until the Planning Application stage. This must be fundamentally wrong with development on this scale and will surely contribute to the worldwide loss of species.

The removal of and disturbance of habitats is contrary to the following policies and worldwide agreements:

- * The Tree Health Resilience Strategy 2018 to increase and encourage healthy woodland.

- * DEFRA's Biodiversity 2020: a strategy for England's wildlife and ecosystem services aims to '...halt overall biodiversity loss, support healthy well-functioning ecosystems and establish coherent ecological networks.'

- * The Global Agreement for the halt of biodiversity loss 2010–20 set an ambition to halt overall loss of England's biodiversity, and is mirrored by the

- * EU Commission's Biodiversity Strategy 2010–20 and the UN Convention on Biological Diversity: Strategic Plan Targets for 2020.

The area in Tudeley supports a myriad of wildlife including protected species such as Great Crested Newts, Dormice and Bats. KMBRC records show four species of bat (common pipistrelle, soprano pipistrelle, brown long-eared and noctule) all EU protected.

KMBRC have records of Great Crested Newts, an EU protected species near Bank Farm, the centre of the development site. I have also registered sightings in our garden which is approximately 300m from the edge of the proposed Tudeley Village. The likelihood is that they also inhabit the deep drainage ditches around Sherenden Farm. The Stantec 'Desk Top' Ecology Report also verifies this "...*there is the potential for this species and other amphibian species to be present within on-site and nearby off-site ponds/ water bodies and to use terrestrial habitats within the site during their terrestrial phase (for the great crested newt the core terrestrial area is c. 50m around pond, and this species can use habitat up to 500m from breeding ponds).*" Significant measures need to be put in place pre-development, such as translocation and additional mitigation. Such measures can be astronomically costly anything between £2,200 and £100,000 per newt (as quoted in press releases), depending on what is deemed necessary, this might contribute to questioning the viability of the development. There is little detail yet of the planned mitigation measures to protect these species apart from minimal 15 m buffer zones around habitats which are not enough to protect the Great Crested Newt.

The land at Tudeley is rich in bird life KMBRC records show;

-
- . 70 species of birds regularly rely upon the Tudeley site, over winter or during the breeding season.
- . 53 bird species are considered to breed within the proposed site.
- . 12 breeding species are **Species of Principal Importance** as listed in the Natural Environment & Rural Communities (NERC) Act 2006.
- . 10 species breeding within the site are also on the **Birds of Conservation Concern Red List**, the highest conservation priority, largely due to significant population decline as a result of habitat loss and change in agricultural practices.

Yellowhammer, linnet, lapwing and skylark (all Species of Principal Importance and Red List) occur within the proposed site in high densities and all three species are undergoing significant population declines. The proposals can only exacerbate this decline through the loss of suitable fields. Indeed, with the proposals and gravel excavations, habitat will be squeezed from all sides, leading to a further and inevitable decline in numbers; a loss not just for the area but nationally.

The following bird species have also been observed (by sight or sound) by residents of Capel Parish:

*Key: UK Red List: red or amber/UK Biodiversity Action Plan Species: **

- . Blackbird / Blue Tit
- . Carrion Crow / Chaffinch / Chiffchaff / Collared Dove / Common Buzzard
- . Goldcrest / Goldfinch / Great Tit / Green Woodpecker / Greenfinch / Great Spotted Woodpecker
- . House Sparrow* / Kestrel / Linnet* / Magpie / Robin
- . Skylark* / Song Thrush* / Starling* / Stock Dove / Swallow / Swift
- . Whitethroat / Wood Pigeon / Yellowhammer*

Bullfinch*/Cuckoo* /Dunnock* /Fieldfare/Grey Wagtail /Heron /Jackdaw/Kingfisher /Kestrel/Lapwing* /Lesser Spotted Woodpecker*/Little Egret /Martin (Sand &House) /Meadow Pipit /Mistle Thrush /Nightingale /Nuthatch /Peregrine Falcon /Pheasant /Pied Wagtail /Red Kite /Redwing /Reed Bunting*/Short-toed Treecreeper /Sparrow Hawk/Spotted Flycatcher*/Stonechat/Tree Sparrow*/ Turtle Dove*

Four species of owl also occur in the area – Tawny, Little, Barn and Long-eared - itself an unusually diverse number. Note: There are few long-eared owl breeding pairs recorded in Kent; any loss would be a serious conservation concern.

Onsite Ancient Woodland, hedgerows and ponds not only provide habitat for various fauna but also flora. Of particular significance is a large population of Early Purple Orchid plants growing in the Ancient Woodland south of the railway line. The species is threatened by destruction of habitat. Encroachment by increased footfall to these woods can only add to its loss.

The NPPF Paragraph 175(C) states ‘ development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be REFUSED, unless there are wholly exceptional reasons AND a suitable compensation strategy exists.....

The scale of this development results in removal of habitat, creates fragmentation of the existing ‘green infrastructure’ with new roads and houses. Combine this with minimal mitigation measures can only add to the demise of species, undermining all the government policies to halt biodiversity loss.

The Durrell Institute of Conservation and Ecology question the delivery of Biodiversity net gain and the ability to hold developers to account in their words ‘unfortunately, our analysis also shows that the governance might not be there to ensure these promises are kept for habitats delivered within the footprints of proposed development’ . There is no mention by TWBC in the PSLP of a governance mechanism in place to ensure biodiversity is monitored and achieved, despite a requirement (PSLP Section 6; Development Management Policies (E9 Biodiversity Net Gain) stating it should be ‘for the lifetime of the development’.

The cumulative effect of development on biodiversity across the whole parish should be taken very seriously. Capel Parish totals 5228 acres, including Five Oak Green. The proposals would see development on 600 acres, or over 11% of the Parish, to accommodate 4,800 homes, or a third of the entire Borough’s supposed housing requirements. Paddock Wood is targeted for thousands more, bringing the total in one area to over 65% of the Borough’s development plans.

Development proposals will almost join Tonbridge , Tudeley, Five Oak Green and Paddock Wood together creating an urban sprawl across a rural Parish, all of which is in the Metropolitan Green Belt. The problem is exacerbated by Kent County Council (KCC) authorising gravel extraction in Capel on a further 200 acres. With additional plans for a Five Oak Green by-pass and partial Colt’s Hill by-pass proposal, Capel will lose well over 15% of its countryside to development of one type or another.

The cumulative environmental impact is likely to be far greater than if each proposal is considered in isolation.

TWBC continues to view the developments as separate, and neither Borough or County councils have discussed the wider impact of their plans upon the parish, despite stating in the PSLP EN14 6.179 “*In making decisions about the acceptability and location of new development, the Council will seek to avoid and reduce habitat fragmentation*”.

It must be apparent that any such assessment would demonstrate that the proposals, if viewed together will have greater negative consequences. This would be true not just for biodiversity, but for other matters, including flooding, the historic landscape, pollution, and so on.

Natural England’s 2005 research paper “**Going, going, gone? The cumulative impact of land development on biodiversity in England (ENRR626)**” [1] states, “Cumulative impacts threaten many of the government’s sustainable development objectives. Development that ignores the threat of cumulative impacts cannot be called sustainable because it is contributing to a net reduction of biodiversity in England.” (p.6 point 5). The main types of cumulative impact are listed as: habitat loss, habitat fragmentation (the breaking down of habitat into smaller units), disturbance (such as noise, light, vibration, recreational activity, pet predation), and chemical or biotic pollution. All of these aspects will feature heavily given the significant size of the proposals across Capel.

TWBC promise of a 10% increase in biodiversity on site is unrealistic; combine this with failure to acknowledge the unsustainable effect of cumulative impacts on biodiversity and the PSLP is unsound.

PSLP EN 20 Agricultural Land

The NPPF 2019 states that Local Planning Authorities should protect the best and most versatile (BMV) agricultural land from significant, inappropriate or unsustainable development proposals and protect all soils by managing them in a sustainable way. Policy EN 20 of the TWBC PSLP reinforces that statement.

To help inform LPA decisions on appropriate and sustainable development the agricultural land classification (ALC). ALC is graded from 1 to 5. Grade 1 being the highest and most consistent yielding with less input and it has the widest range and versatility of use. BMV agricultural land is graded 1 to 3a.

-

The land to be developed in Tudeley is Grade 3 (185 acres of productive land) to the south of the railway line and Grade 2 (121 acres) to the north (source Provisional Agricultural Land Classification 1977 Mapping). Contrary to the SHELAA for the Draft Plan at Regulation 18, page 8 which states that the land is all Grade 3. This is wrong and misleading information on which councillors were making a decision to vote on the DLP. **This factor alone makes the PSLP unsound.**

Grade 2 is 'very good quality agricultural land' with the potential to grow a very wide range of agricultural and horticultural crops giving high and consistent yields. Crops commonly include: top fruit, for example tree fruit such as apples and pears, soft fruit, such as raspberries and blackberries, salad crops and winter harvested vegetables.

Grade 3 is land capable of consistently producing moderate to high yields of a range of arable crops, especially cereals, or moderate yields of crops including: cereals, oil seed rape, grass, potatoes, sugar beet and less demanding horticultural crops.

According to 6.241 only 4.4% of land in the borough is Grade 2 and above, (meaning that land north of the railway line is particularly valuable), while 78% is Grade 3. However, some of the Grade 3 land also has agricultural constraints due to topography and other factors, but to lose even some of the best quality land in the Borough at a time when food production is so vital, and when there are alternative poor-quality alternatives available, seems locally and nationally negligent.

Paragraph 6.243 states that it is important to use areas of poorer quality agricultural land in preference to that of higher quality, but goes on to explain that 'quality' may be determined by more than the ALC grade. The 'economic and other benefits' such as infrastructure, fragmentation, and access, as well as the contribution land may make to wider ecosystem services and natural capital, are important considerations in relation to the effects of development on agricultural land. Natural capital is "*that part of nature which directly or indirectly underpins value to people, including ecosystems, species, freshwater, soils, minerals, the air and oceans, as well as natural process and function*".

The Government Policy 'A Green Future: Our 25 Year Plan to improve the Environment 2018' sets out the government's 25-year plan to improve the health of the environment by using natural resources more sustainably and efficiently. It plans to:

- . protect the best agricultural land
- . put a value on soils as part of our natural capital
- . manage soils in a sustainable way by 2030

Planning applications that would result in the loss of best and most versatile agricultural land will need to justify why the loss of the agricultural land is acceptable and also assess the impact of the loss of the agricultural land on the wider farming resource, natural capital, and ecosystem services.

If TWBC are following Government Guidelines (NPPF) and their own Policies it transpires that land at Tudeley should not be developed as it is Grade 2 and Grade 3 BMV and productive land. TWBC appears to have offered no justification for losing this finite resource which is not only invaluable in contributing to the UK being self-sufficient in food production but also important in providing other important 'ecosystem services' such as a store for carbon and water, as a reservoir of biodiversity and as a buffer against pollution (EN 20 6.238). It is not a 'sustainable' option, nor does it put a value on soils as part of our natural capital.

Food Policy Experts are warning that with Brexit & Climate Change threatening UK food imports, self-sufficiency should be taken more seriously with the NFU asking for food security, which has been pushed into the spotlight by the pandemic, to be at the heart of wider government policies. The UK has an ideal temperate climate for growing food, but if our BMV land is covered in concrete this will be out of the question. In the mid-1980's the country produced 78% of our food today that figure is 64%; TWBC's plans for Capel will add to the decline.

The area to be developed at Tudeley in an average year has the potential to yield the following: 129 tonnes of blackcurrants, 265 tonnes of Bramley apples, 216 tonnes of pears, 207 tonnes of wheat, 155 tonnes of barley, 87 tonnes of oil seed rape and 175 tonnes of field beans. (*Sources: 'DEFRA Magic Maps' used to calculate the areas in cultivation (Tudeley 312 acres) and observation in the field for assessing local farming practices with information from 'assets.publishing-service.gov.uk' for average crop yields*).

In addition there is a very successful Livery yard providing a leisure service to local riders and access to the countryside via Toll Rides off-Road Trust (TROT).

If the land at Tudeley is continued to be farmed, this production could go on ad-infinitum and in essence contribute significantly to the self-sufficiency of the UK. It should be noted that the soil to the north of the railway line is particularly good and has produced exceptional crops of blackcurrants.

-

An alternative site south of the A21 at Castle Hill (also within the Capel Parish and proposed as an alternative site to Tudeley Garden Village) benefits from good existing infrastructure and is Grade 4 poor quality agricultural land but has been omitted from the PSLP. If however TWBC adhere to 'A Green Future: Our 25 Year Plan to improve the Environment 2018' and prioritise BMV, this site should be considered even though it is AONB.

TWBC are taking the easy, short-sighted option by using large areas of Green Belt, good quality, agricultural land to fulfil their housing requirement for the PSLP. This is not '**sustainable**' development contrary to the Government Policy requirements.

The allocated development site at Tudeley is unsound and should be removed from the PSLP

Flood Risk PSLP EN 25 The vast majority of the Tudeley Village site falls inside Flood Zone 1, with a small parcel of land to the north located in Flood Zone 2.6.276 of the PSLP states 'It is essential that new development across the borough does not increase flood risk, and that any new development proposed in areas that are vulnerable to flood risk 'build in' additional local capacity in terms of flood mitigation and provide 'betterment' where possible'.

6.278 The Council will therefore discourage inappropriate development in areas at known risk from flooding and, as the Local Planning Authority, will take account of flooding risks in all matters relating

to development management/control, including within the Local Plan and individual planning applications, in accordance with the NPPF.

Living on the edge of the Medway flood plain and bordering the Tudeley Garden Village I am justifiably concerned about the increase flood risk, not only to our home and those nearby, but also the wider area, the villages of East Peckham and Yalding, plus the Hartlake Road and Sherenden Road. Climate change and unpredictability of today's weather patterns make it difficult to know the extent of the flood mitigation required. It only needs winters like 2013 and 2020 when the Leigh Flood Barrier was at capacity and excess water flooded Tonbridge, the Hartlake Road and further down stream, plus additional run off from the vast area of impermeable tarmac/concrete from the Garden Village to cause extensive damage.

Stephen Baughen , Head of Planning refused planning of 6 B& B units at The Poacher Pub in July 2018 he said "it has not been demonstrated that the occupiers of the development would not be at risk from flooding or that the development would not increase flood risk elsewhere. Therefore the development is likely to result in a risk to human life from flooding and is contrary to policies EN18 of the Tunbridge Wells Borough Local Plan 2006 and Core Policy 5 of the TWB Core Strategy 2010, guidance in the National Planning Policy Framework 2018 and the Planning Practice Guidance." The application was considered to be fundamentally contrary to the provisions of the Development Plan and the NPPF and there were not considered to be any solutions to resolve this conflict.

One year later and a town with 2,800 homes is proposed within the same area. Even with mitigation measures how can this be 'sound' planning.

Inclusion of STR/SS 3 in the PSLP is therefore unsound.

Rural Landscape PLSP EN.184.118 of the PSLP states ' plans should contribute to, and enhance, the natural, built, and historic environment of the borough in accordance with the guidance set out within the NPPF. Policy should seek to ensure that the delivery of new development is balanced against the need to conserve and enhance the character and distinctiveness of the borough's natural and built environment, in terms of the intrinsic character and diversity of the landscape, its biodiversity, and heritage assets.'

The Landscape Character Assessment 2017 in chapter 5 says 'the description of the landscape character areas within the borough will assist in assessing whether development is acceptable in a particular location'.

The Tudeley site is in Character Area 13. The report for the area includes features and qualities considered to be of particular landscape and visual value to the character area including:

"4) Areas which retain a sense of the historic landscape, where the irregular and sinuous field boundaries are overlaid on more undulating slopes, divided by hedgerows and trees – particularly around the small hamlets of Tudeley and Capel.

5) The hamlets of Tudeley and Capel which retain strong vernacular character as well as views to the surrounding countryside."

Strategy also states "The Local Character Area should be considered in the context of the High Weald AONB, particularly the role the character area plays in the setting of the AONB. The valued features and qualities of the landscape should be conserved and enhanced.

- . Respect the vulnerability of the slopes rising up to the south to new developments/land use change. New developments can be highly visible over a wide area on these slopes and detract from the essential countryside character"

The Tudeley Village is located on a south slope of the River Medway and will be visible from the north slope up to 12 miles away as such it has a major adverse visual impact and will detract from the essential countryside character. It will also harm the scenic beauty and setting of the adjacent AONB.

Development in Tudeley will create irreparable harm to the landscape therefore the PSLP is unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Strategic Housing and Economic Land Availability Assessment considered the Development site at Tudeley to be 'deliverable' and achievable because it is in 'single ownership'. This should be no justification to release Green Belt, BMV Agricultural Land, increase the risk of flooding in the area, destroy biodiversity, cause congestion on the roads, add to pollution in the vicinity and harm the countryside character because it is the 'easy option' to fulfil TWBC housing requirement. Development should be distributed throughout the borough, rather than placing 51% of the Local Plan housing need in Capel Parish.

It is an opportunity to create homes and take employment to more deprived areas of the borough, to re-vitalise Royal Tunbridge Wells with more accommodation and re-consider the more accessible, sustainable site at Castle Hill.

The Tudeley Village Site should be removed from the Local Plan and housing allocation reduced within the Parish of Capel in line with a small percentage increase of its present population. Site allocation in Capel should be decided with 'community engagement'.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Section 5 STR/SS3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

At the time of the first consultation, there were a great number of objections raised and the TWBC have chosen to ignore all these comments and approved a plan that is fundamentally flawed. The proposal for 2800 new homes on green belt land is quite inappropriate. It will cause significant congestion and there are concerns over the potential for flooding. The infrastructure will not be sufficiently developed despite assurances given by the existing landowner/developers.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Although I acknowledge there is some need for housing, Tudeley is certainly not the right location and there are more suitable sites, such as the Castle Hill proposal, which has been give full consideration by TWBC.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The new housing development will only generate more transport movements, including car usage, which will have a detrimental impact on the environment.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Having moved from central London over 30 years ago, I am dismayed that an area of green belt is going to be over developed by 2800 new houses. During this recent period of lockdown, never have green spaces been more important to our emotional and mental well being. TWBC's proposal to develop the land at Tudely has completely ignored the extensive opposition from both local residents and those living further afield upon whom it will impact.

Due to the local proximity of existing schools, the roads are currently grid locked at peak times and this new proposal will only exacerbate matters with no guarantee that the road network will be improved.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should consider alternative proposals such as utilising existing brownfield sites and give greater consideration to the Castle Hill proposal before committing such an extensive and insensitive development in Tudeley.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy H 6 Housing for Older People and People with Disabilities
Paragraph No(s) 6.347, 6.349, 6.350, 6.352, 6.357

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please find enclosed representations made pursuant to the Pre-Submission Local Plan on behalf of Inspired Villages. This representation specifically responds to Policy H6 of the draft Local Plan. I also attach a Local Plan representation document for your attention which discusses specialist housing for older people, the Use Class (C2) and should be read alongside the below response.

Who is Inspired Villages?

Inspired Villages is a developer and operator of retirement communities in the UK. We are majority owned and fully funded by Legal & General. We currently have six operating villages, with a further 14 sites legally secured with a number of those under construction, consented or in planning/pre-planning. Our business plan is to have 60 operational villages within the next ten years providing purpose built housing for 12,000 residents.

A retirement community falls under the extra care model and our developments are within the C2 use class. Inspired Villages is a member of Associated Retirement Communities Operators (ARCO) and we encourage Tunbridge Wells Council to engage with ARCO to assist with your understanding of the Retirement Community Sector, and would recommend you view their website:- <https://www.arcouk.org/what-retirement-community>

Recent consents we have secured / or resolution to approve include:-

- . Land at Chandlers Ford in Test Valley Borough Council – LPA accepted development as Use Class C2 (construction starts in 2021)
- . Land at Leeds village in Maidstone Borough Council – LPA accepted development as Use Class C2 (under construction)
- . Land at Turvey Station in Bedfordshire Borough Council – LPA accepted development as Use Class C2 (under construction)
- . Land at Caddington in Central Bedfordshire Council – LPA accepted development as Use Class C2 (under construction)
- . Land at Kingswood in Reigate & Banstead Borough Council – LPA accepted development as Use Class C2 (construction starts in 2021)
- . Land at Frant in Wealden District Council – LPA accepted development as Use Class C2 (construction starts in 2021)

We request that you review the eight recommendations in the attached document set out at Page 5 and request that the Local Plan is amended in line with the attached representation.

[TWBC: the above text is from the covering email sent to TWBC by Inspired Villages]

Representations were previously made on behalf of Inspired Villages by planning consultants, Turley, to the Regulation 18 version of the Local Plan these were dated 15 November 2019. The comments and recommendations made within our previous recommendations have not been considered in the preparation of the Pre-Submission version of the Local Plan.

Paragraph 6.347 acknowledges the Planning Practice Guidance (PPG) related to specialist housing for older people, which is a positive step. Later at paragraph 6.349 sets out some of the different kinds of housing for older people as referenced in the PPG. This includes retirement communities also known as 'continuing care retirement communities' or 'extra care' of which Inspired Villages is one of the leading operators and developers in the UK. However, at paragraph 6.350, the Council has determined that only care homes and end of life care come under use class C2. Inspired Villages would dispute the classification of extra care accommodation under use class C3.

Extra care accommodation should be included within the Use Class C2 (residential institutions). We have received Counsel Opinion on our development which confirms we fall within the C2 Use Class and this is what underpins our applications, including recent consents in Reigate & Banstead, Wealden, Bedford Borough, Central Bedfordshire, Maidstone, etc. We have previously submitted this evidence to Tunbridge Wells Borough Council in our Regulation 18 response and would direct you to refer to this. We would also draw your attention to the enclosed representation document which gives further justification at paragraph 2.16. An Inspired village has a high level of care and a significant amount of facilities. The level of communal facilities (non-saleable floorspace) provided in an extra care development can be as much as 25% of the total floorspace whereas a housebuilder just builds homes (i.e. they are 100% efficient vs 75% efficient for extra care). This has a significant effect on build cost. All residents are also required to undertake a qualifying person assessment prior to moving into any units.

Further, as noted in Paragraph 6.352 of the pre-submission local plan, developments falling under Use Class C2 are normally exempt from providing affordable housing as per the requirements of Policy H3: Affordable Housing. It is not viable for a retirement community / extra care development to deliver 40% affordable housing. Furthermore, 40% is inappropriate given the tenure profile for older people is towards owner occupations. The supporting text and policy will need to insert specific text for retirement community / extra care development to state that affordable housing is not required in acknowledgement of the viability issues faced by C2 uses, including extra care housing and retirement communities.

Furthermore, a retirement community is a single planning unit – the communal and care facilities and units are integrally linked, one cannot exist without the other. Legal & General retain the freehold ownership of the land and Inspired Villages is the operator. This means there is a long term interest in the operation of the village and the care of residents. It is not possible to subdivide a village to provide on-site affordable housing given the single planning unit and residents' obligations to pay service charge to contribute towards the provision of the facilities, staffing, etc.

Our form of development falls squarely within the C2 Use Class, therefore, under Policy H6 a retirement community should not be required to provide on-site affordable housing. We would direct you to understand the key ways in which specialist housing for older people differs in a number of ways that affect its viability as set out in the attached representation document. We would encourage the Council to take a proportionate approach to the requirement of affordable housing contributions from specialist operators such as Inspired Villages. Where retirement housing / age restricted housing is proposed, and which falls within the C3 use class (i.e. it provides housing with little if any facilities) then it is understood affordable housing may be sought – however, this is not the case with a retirement community as proposed by Inspired Villages.

Further, the estimated older persons housing need is calculated at 431 extra care units in the borough by 2038, as per paragraph 6.357 of the Pre-Submission local Plan. The general housing need calculated elsewhere in the draft Local Plan, for the borough is 678 units per annum or 12,200 units per year. As such, the extra care housing need target produced at 431 units to 2038 represents just 0.04% of the total housing need. This does not reflect positive preparation of the local plan and we would recommend this figure is revisited, removing reference to the SHOP@ toolkit. The SHOP@ toolkit has been withdrawn from general access following it being expressed in the PPG (Paragraph: 004 Reference

ID: 63-004-20190626). The PPG notes there are a range of toolkits, including the More Choice, Greater Voice and the Housing in Later Life, and not just the SHOP@ toolkit. The Planning Practice Guidance advises that plan-making authorities “could also provide indicative figure figures or a range for the number of units of specialist housing for older people needed across the plan area throughout the plan period” (Paragraph: 006 Reference ID: 63-006-20190626). This emphasis is in accordance with the PPG identifying that the need to provide housing for older people is ‘critical’, the only group identified as such in national policy guidance (Paragraph: 001 Reference ID: 63-001-20190626). We would recommend Tunbridge Wells Borough Council to commission an older persons housing need assessment to fully understand the current provision of different forms of housing for older people, and projected demand across different tenures and types, including retirement communities. Following such an assessment, the Council should include a specific policy identifying a minimum provision of specialist housing for older people.

Whilst it is positive that some allocations have been made for specialist housing for older people at paragraph 6.364, further clarify should be included in Policy H6 upon which sites the Council will support the delivery of extra care outside of this small number of allocations. Examples of such policies are included on page 12 of the enclosed representation document.

[TWBC: for representation document, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 The Council should include extra care accommodation in those development typologies falling under the Use Class C2.
- 2 Policy H6 should specify that development falling within Use Class C2 are exempt from the need to provide affordable housing as per the wording of Paragraph 6.352 of the Pre-Submission Local Plan.
- 3 Policy H3 should also include wording confirming that developments under the Use Class C2 are exempt from the provision of affordable housing and Policy H3 only applies to Use Class C3.
- 4 The method through which older persons housing need has been calculated at paragraph 6.357 should be reassessed given the SHOP@ tool has been removed from use. We would recommend the Council appoints an industry expert to undertake an older persons housing need assessment such as Contact Consulting. This target should be included in the wording of Policy H6 and monitored through the Annual Monitoring Report to ensure delivery.
- 5 Policy H6 should include details of which sites the Council would support the delivery of extra care.
- 6 Finally, Policy H6 should consider the many and varied benefits specialist housing for older people can provide. These include savings to the NHS and social care services, improved mental and physical health for residents, as well as the freeing up of family homes.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you would like to attach a file in support of your comments, please upload it here.

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 3: Vision and Objectives

[TWBC: the full representation attached has been divided between Policy STR/PW1 (PSLP_1988), Policy STR/SS1 (PSLP_1989), Vision and Objectives ((PSLP_1990), Policies STR1 (PSLP_1991), STR3 (PSLP_1992), STR4 (PSLP_1993), EN1 (PSLP_1994), EN3 (PSLP_1995) and ED2 (PSLP_1996)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.5.4 The Pre-Submission Local Plan (PSLP) is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: PSLP Vision duplicated - see full representation attached].

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives duplicated - see full representation attached].

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment and other supporting opportunities across the borough.

1.5.9 The master-planned approach to the strategic expansion of Paddock Wood is also welcomed.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Policy STR/PW1 (PSLP_1988), Policy STR/SS1 (PSLP_1989), Vision and Objectives ((PSLP_1990), Policies STR1 (PSLP_1991), STR3 (PSLP_1992), STR4 (PSLP_1993), EN1 (PSLP_1994), EN3 (PSLP_1995) and ED2 (PSLP_1996)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies

1.5.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 1: The Development Strategy

1.5.11 We **SUPPORT** the aims and objectives of Policy STR 1, especially in relation to the proposed major, transformational expansion of Paddock Wood.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies

1.5.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 3: Brownfield Land

1.5.12 We **SUPPORT** this policy which provides in principle support for the effective use of redundant, disused or under-utilised brownfield land and buildings in sustainable locations. The under-utilised parts of the Paddock Wood Garden Centre site clearly fall into this category.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 3 Brownfield Land

[TWBC: the full representation attached has been divided between Policy STR/PW1 (PSLP_1988), Policy STR/SS1 (PSLP_1989), Vision and Objectives ((PSLP_1990), Policies STR1 (PSLP_1991), STR3 (PSLP_1992), STR4 (PSLP_1993), EN1 (PSLP_1994), EN3 (PSLP_1995) and ED2 (PSLP_1996)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies

1.5.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 4: Ensuring Comprehensive Development

1.5.13 We have **NO OBJECTION** to the aims and objectives of Policy STR 4, which seeks a holistic and fully integrated approach to the urban expansion of Paddock Wood.

1.5.14 We would however **COMMENT** that whilst the principle of masterplanning the expansion of the town is agreed, it is noted that the initial masterplanning work already undertaken by David Lock Associates, to which we have also contributed, it is proposed to undertake further work which will result in the publication of Supplementary Planning Documents (SPDs) in due course.

1.5.15 The Paddock Wood Garden Centre site is a relatively small site, which is proposed in the Strategic Sites Masterplanning and Infrastructure Main Report for additional retail and/or employment uses. Given that the site is already in garden centre retail use, and that the proposals for the site are effectively to make best use of existing brownfield but open land within the site, there is no planning reason why such development should be prevented from coming forward in the short term.

1.5.16 So long as the proposed development remains broadly in line with that set out in the initial Strategic Sites Masterplanning and Infrastructure Main Report, if necessary this site should be able to come forward in advance of the publication of a future SPD, so long as:

- the proposals are generally in accordance with the aims and objectives of existing masterplanning work and the emerging Local Plan, unless there are good planning reasons to depart from these; • the proposals do not conflict with the aim set out at PSLP paragraph 4.77 of the PSLP, which states that “the key requirement should be to ensure that a coordinated approach to new developments which have a clear inter-relationship is taken to achieve the efficient use of land, providing for different land uses in most appropriate places, and overall good planning.”

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Place Shaping Policies

1.5.17 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

Policy STR/PW 1

1.5.18 Policy STR/PW 1 sets the Strategy for Paddock Wood and states that approximately 3,490-3,590 dwellings and accompanying infrastructure will be delivered via the planned extension to Paddock Wood.

1.5.19 Policy STR/SS1 sets the detailed strategy and states, amongst other things:

[TWBC: wording of Policy STR/SS1 duplicated here and Extract of proposed proposal map for Paddock Wood - see full representation attached].

Comments in relation to Paddock Wood Garden Centre

1.5.20 Inter Leisure **SUPPORTS** the inclusion of the site within Paddock Wood strategic growth area, and its identification within the Strategic Sites Masterplanning and Infrastructure Main Report, where it is shown on Figure 2 as a potential allocation site for new retail/employment, and is described throughout the document as being a “draft allocation”.

1.5.21 The Council’s Site Assessment Sheets note that the site is outside, but well connected to the Limits to Built Development. It is noted as being previously developed land providing commercial uses, and concludes that it is suitable for the continuation of this use, whilst making more efficient use of the site where the opportunity arises. It is therefore concluded to be suitable as a potential Local Plan allocation.

1.5.22 The PSLP no longer proposes to include individual site allocations within the strategic development area, and so the site is no longer proposed as a specific allocation. The Policies Map does however show the site to be contained both within the strategic development area and the provisional Limits to Built Development as shown below.

[TWBC: for Policies Map extract see full representation attached].

1.5.23 My client **SUPPORTS** in principle the employment proposals for Paddock Wood and confirms that in relation to this site, it is deliverable for additional retail and/or employment uses over the plan period. My client’s proposals will help to deliver additional high quality employment in the manner envisaged, including a mix of employment types and sizes in order to support the balanced economic and employment growth of Paddock Wood.

1.5.24 In particular, my client **SUPPORTS** the inclusion of the Paddock Wood Garden Centre site within the proposed Policy STR/SS1 allocation and within the Provisional Limits to Built Development as shown on the Policies Map.

1.5.25 However, whilst the aims and objectives of the policy as a whole are fully supported, the policy as drafted makes no reference to the site itself, or to proposals for employment uses outside of the proposed new employment areas at Lucks Lane and Transfesa Road, my client **OBJECTS** to the current policy wording. This objection could be overcome either by specifically identifying the clear in the text that employment and small scale retail proposals would be acceptable at other locations within the strategic allocation, including at the Paddock Wood Garden Centre site.

1.5.26 Inter-Leisure also **OBJECTS** to Map 28 in that it does not carry across the proposed identification of this site for employment use as shown on all four of the Structure Plan options set out in the Strategic Sites Masterplanning and Infrastructure Main Report. Given that there appears to be full agreement

in all of the background documents that the site is suitable for such development, there is no clear reason as to why this designation has been removed on Map 28.

1.5.27 It is also noted that Map 28 is incorrect in that the site has been excluded from the development boundary, which is inconsistent with the draft Policies Map and the Strategic Sites Masterplanning and Infrastructure Main Report. It is hoped that this is simply a drafting error, but it needs to be addressed satisfactorily in order for us to be able to remove our objection.

1.5.28 Finally, whilst the benefits of Design Review are recognised, and we do not object to the use of Design Review Panels being encouraged through policy, we do question whether their input at both the pre-application and post-submission stages for all applications within the SS1 masterplan area should be mandatory in all cases, regardless of the scale and nature of the proposal – which appears to be the case as Policy STR/SS1(5) is currently worded. For example, in this case the amount of development proposed would be relatively modest, and Design Review would not normally be required for proposals on this scale. This aspect of the policy should be re-worded accordingly.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Place Shaping Policies

1.5.17 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

Policy STR/PW 1

1.5.18 Policy STR/PW 1 sets the Strategy for Paddock Wood and states that approximately 3,490-3,590 dwellings and accompanying infrastructure will be delivered via the planned extension to Paddock Wood.

1.5.19 Policy STR/SS1 sets the detailed strategy and states, amongst other things:

[TWBC: wording of Policy STR/SS1 duplicated here and Extract of proposed proposal map for Paddock Wood - see full representation attached].

Comments in relation to Paddock Wood Garden Centre

1.5.20 Inter Leisure **SUPPORTS** the inclusion of the site within Paddock Wood strategic growth area, and its identification within the Strategic Sites Masterplanning and Infrastructure Main Report, where it is shown on Figure 2 as a potential allocation site for new retail/employment, and is described throughout the document as being a “draft allocation”.

1.5.21 The Council’s Site Assessment Sheets note that the site is outside, but well connected to the Limits to Built Development. It is noted as being previously developed land providing commercial uses, and concludes that it is suitable for the continuation of this use, whilst making more efficient use of the site where the opportunity arises. It is therefore concluded to be suitable as a potential Local Plan allocation.

1.5.22 The PSLP no longer proposes to include individual site allocations within the strategic development area, and so the site is no longer proposed as a specific allocation. The Policies Map does however show the site to be contained both within the strategic development area and the provisional Limits to Built Development as shown below.

[TWBC: for Policies Map extract see full representation attached].

1.5.23 My client **SUPPORTS** in principle the employment proposals for Paddock Wood and confirms that in relation to this site, it is deliverable for additional retail and/or employment uses over the plan period. My client’s proposals will help to deliver additional high quality employment in the manner envisaged, including a mix of employment types and sizes in order to support the balanced economic and employment growth of Paddock Wood.

1.5.24 In particular, my client **SUPPORTS** the inclusion of the Paddock Wood Garden Centre site within the proposed Policy STR/SS1 allocation and within the Provisional Limits to Built Development as shown on the Policies Map.

1.5.25 However, whilst the aims and objectives of the policy as a whole are fully supported, the policy as drafted makes no reference to the site itself, or to proposals for employment uses outside of the proposed new employment areas at Lucks Lane and Transfesa Road, my client **OBJECTS** to the current policy wording. This objection could be overcome either by specifically identifying the clear in the text that employment and small scale retail proposals would be acceptable at other locations within the strategic allocation, including at the Paddock Wood Garden Centre site.

1.5.26 Inter-Leisure also **OBJECTS** to Map 28 in that it does not carry across the proposed identification of this site for employment use as shown on all four of the Structure Plan options set out in the Strategic Sites Masterplanning and Infrastructure Main Report. Given that there appears to be full agreement

in all of the background documents that the site is suitable for such development, there is no clear reason as to why this designation has been removed on Map 28.

1.5.27 It is also noted that Map 28 is incorrect in that the site has been excluded from the development boundary, which is inconsistent with the draft Policies Map and the Strategic Sites Masterplanning and Infrastructure Main Report. It is hoped that this is simply a drafting error, but it needs to be addressed satisfactorily in order for us to be able to remove our objection.

1.5.28 Finally, whilst the benefits of Design Review are recognised, and we do not object to the use of Design Review Panels being encouraged through policy, we do question whether their input at both the pre-application and post-submission stages for all applications within the SS1 masterplan area should be mandatory in all cases, regardless of the scale and nature of the proposal – which appears to be the case as Policy STR/SS1(5) is currently worded. For example, in this case the amount of development proposed would be relatively modest, and Design Review would not normally be required for proposals on this scale. This aspect of the policy should be re-worded accordingly.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 1 Sustainable Design

[TWBC: the full representation attached has been divided between Policy STR/PW1 (PSLP_1988), Policy STR/SS1 (PSLP_1989), Vision and Objectives ((PSLP_1990), Policies STR1 (PSLP_1991), STR3 (PSLP_1992), STR4 (PSLP_1993), EN1 (PSLP_1994), EN3 (PSLP_1995) and ED2 (PSLP_1996)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Management Policies

1.5.29 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.5.30 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.5.31 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. Furthermore, many aspirations result in inevitable conflict. On this basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.5.32 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.5.33 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to be succinct and instead are overly prescriptive.

1.5.34 We therefore **OBJECT** to **policies EN1 and EN3** on this basis.

1.5.35 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Management Policies

1.5.29 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.5.30 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.5.31 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. Furthermore, many aspirations result in inevitable conflict. On this basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.5.32 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.5.33 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to be succinct and instead are overly prescriptive.

1.5.34 We therefore **OBJECT** to **policies EN1 and EN3** on this basis.

1.5.35 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy ED 2 Retention of Existing Employment Sites and Buildings

[TWBC: the full representation attached has been divided between Policy STR/PW1 (PSLP_1988), Policy STR/SS1 (PSLP_1989), Vision and Objectives ((PSLP_1990), Policies STR1 (PSLP_1991), STR3 (PSLP_1992), STR4 (PSLP_1993), EN1 (PSLP_1994), EN3 (PSLP_1995) and ED2 (PSLP_1996)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Management Policies

1.5.29 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.5.30 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.5.31 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. Furthermore, many aspirations result in inevitable conflict. On this basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

Policy ED2

1.5.36 We also have concerns about the wording of Policy ED2, which seeks the retention of existing employment sites and buildings across the borough as a whole, not just within Key Employment Areas.

1.5.37 Whilst we do not object to the general principles behind the policy, as currently worded the policy sets a strong series of tests which would appear to apply to the redevelopment or conversion of every employment building in the borough, irrespective of the proposed new use, and irrespective of the quality of the existing building.

1.5.38 Whilst the first part of the policy does allow for some analysis of the quality/usefulness of the building or site, as worded the second part then applies to every building or site regardless of its quality or the proposed use. At present, if this policy is strictly applied as worded, a redevelopment of the garden centresite, even for a new employment use, could require my client to provide marketing evidence and an independent assessment of viability for various uses.

1.5.39 Furthermore, the policy would appear to still apply to sites which have been clearly identified in the plan as being suitable for alternative uses.

1.5.40 We therefore **OBJECT** to the current wording. There is no good planning reason for this policy to be applied where the Council agrees that, due to the circumstances of the site, a non-employment generating use would be acceptable. Furthermore, there is no need to restrict the redevelopment of such sites where an alternative employment-generating use is proposed.

1.5.41 This objection could be overcome by:

(a) Additional wording should be provided at the start of the policy to state: "Except where sites have been identified as being suitable for alternative uses in an adopted development plan document..." (b) Before "Applicants seeking to redevelop...", the following wording should be inserted: "Where existing sites are assessed using the above criteria to be retained in an employment-generating use..."

(c) The next part of the same sentence should be amended to read: "...applicants seeking to redevelop/convert existing employment sites for non-employment generating uses must demonstrate..." (d) If there is evidence to satisfactorily meet criteria (b) or (d) then there is no additional benefit derived from delaying development proposals by 18 months in order to await the marketing of premises which have already been established to be unsuitable/unviable. The policy should be reworded accordingly.

1.5.35 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate

development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Comment

Consultee	Colin Inwood [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Colin Inwood [REDACTED]
Comment ID	PSLP_155
Response Date	10/05/21 12:12
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Email
Version	0.7

Question 1	
Respondent's Name and/or Organisation	Colin Inwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_155, PSLP_156 and PSLP_157]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 **Community involvement. EN1: this requirement has not been respected.**

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds,

sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these

reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that “an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.” No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these

policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the

village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Comment

Consultee	Colin Inwood [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Colin Inwood [REDACTED]
Comment ID	PSLP_153
Response Date	10/05/21 12:12
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.6
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Colin Inwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

Paragraphs 5.410 to 5.470

Policies AL/BE3 and AL/BE4

Inset Maps 17 and 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_151, PSLP_153 and PSLP_154]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Comment

Consultee	Colin Inwood [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Colin Inwood [REDACTED]
Comment ID	PSLP_156
Response Date	10/05/21 12:12
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email

Question 1	
Respondent's Name and/or Organisation	Colin Inwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_155, PSLP_156 and PSLP_157]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 **Community involvement. EN1: this requirement has not been respected.**

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds,

sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these

reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : “....*In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.*”

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that “*an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.*” No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these

policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the

village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Comment

Consultee	Colin Inwood [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Biddenden [REDACTED]

Question 1	
Respondent's Name and/or Organisation	Colin Inwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_155, PSLP_156 and PSLP_157]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 **Community involvement. EN1: this requirement has not been respected.**

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds,

sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these

reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : “....*In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.*”

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that “*an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.*” No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these

policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the

village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Comment

Consultee	Colin Inwood [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Colin Inwood [REDACTED]
Comment ID	PSLP_154
Response Date	10/05/21 12:12
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.6

Question 1	
Respondent's Name and/or Organisation	Colin Inwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

Paragraphs 5.410 to 5.470

Policies AL/BE3 and AL/BE4

Inset Maps 17 and 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_151, PSLP_153 and PSLP_154]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Consultation Point	Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road (View)
Status	Processed
Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Tom Ireson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy No. AL/RTW5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- ☐ It is not justified
- ☐ It is not consistent with national policy

Question 5

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I object to new Policy AL/RTW5 that was introduced into the PSLP at stage 19 of the Local Plan delivery process. Namely the removal of land, at former Caenwood farm to the south of Speldhurst road and west of Reynolds lane, from the Green Belt.

The proposed development will impact on air quality and traffic safety at the site and in the surrounding area. It threatens the separation of Southborough from Royal Tunbridge Wells. I also contend that the loss of the open land would be followed by relentless pressure to release more green belt land for development.

Moreover the ancient woodland adjacent to the site would be severely diminished by exposure to the development; the protected evergreen treeline and hedgerow that separate the Speldhurst road to the field could also be irrevocably damaged by the development and the extensive flora and fauna of the woodlands and meadows would be lost.

In normal circumstances local residents such as myself would have been able to make our representations at the stage 18 public examination, but the planning process did not allow that.

The site was not in the previous draft plan The assessment that informed the omission of the Caenwood and Dandara lands south of Speldhurst Road from the DLP was published in 2019.

The site comprises the three meadows at the north-east corner of the Green Belt between Southborough and Royal Tunbridge Wells. At this time, this site was rated unsuitable for inclusion in the DLP. There was particular concern for harm to the remainder of the Green Belt should the top corner of this protected area be lost to development.

The DLP was then subjected to the stage 18 public examination. Public interest at the examination was generally concentrated on the allocated sites as included in the published Plan. The rejected sites received little public focus.

Caenwood Estates and Dandara engaged DHA to submit a strong joint representation against the omission of their lands from the DLP later that year in November 2019.

The TWBC in February 2021 approved the removal of 5.6 hectares of green belt to accommodate provision of approximately 100 residential units

I submit that due to the late allocation, it did not allow for full public consultation as would have been possible under Reg.18 Consultation and, therefore, deprived the public of adequate presentation or scrutiny. This is exacerbated by Reg. 19 Consultation being conducted under Covid-19 isolation or partial isolation conditions.

I do not accept this judgment as sound in that the evidence base from GBS2 before Nov 2019 had described the whole of the Caenwood Farm parcel as being too sensitive to release and we believe that GBS 3 was provided to support the change of use and cannot be justified to support the Local Plan on a strategic basis. Therefore, the removal of AL/RTW5 from the GB cannot be justified and therefore, the Plan is unsound

HIGHWAY SAFETY OR HARM TO THE HIGHWAY

Requirements 1 to 5 of Policy AL/RTW5.

We refer to para 109 of the NPPF and Policies TP1 to 4 in paras 6.539 to 6.568 of the PSLP. These documents require that “no development must compromise the safe and free flow of traffic or the safe use of the road by others”.

The location of this proposed allocation would create a severe impact on Speldhurst Road which is narrow at the proposed access site. There is no footway on the adjacent road which is bordered by trees, hedges and only one gate into the field. That leads to a public footpath that runs south across Caenwood Farm and then turns east towards Reynolds Lane.

Therefore, any traffic emerging from the Caenwood development site would be impeded by traffic using Speldhurst Road and contribute to that heavy traffic flow. Traffic comes to a virtual standstill during peak commuting times now without the addition of potentially hundreds of vehicles wishing to join in order to get to the A26 junction where there are now two sets of traffic lights with very complicated sequencing for pedestrian and vehicle crossing. The A26 coming from the south (the Town Centre of RTW) is a two lane carriageway enabling left turns into Speldhurst Road at the junction but continues as a single carriageway into Southborough London Road after the second set of lights. This causes heavy congestion during peak travelling hours.

Furthermore, traffic continuing north on the A26 is then joined by a second junction with Yew Tree Road on the right (and a third set of traffic lights) carrying heavy traffic from the Industrial Estate.

We submit that requirements 1 to 5 of Policy AL/RTW5 do not prevent unacceptable impact from the proposed site on the surrounding road network. The already critical parking situation in Southborough will be worsened by loss of roadside parking along Speldhurst Road, necessary to create a viable access to the site.

Suggested provision of parking within the site for outside residents cannot be expected to function effectively. Overall, the development will fail to ensure “a high-quality built environment” that enhances the character of the area and avoids adverse impact on the amenity of the neighbouring settlement of Southborough.

THE GREEN BELT AND OTHER ENVIRONMENTAL POLICIES.

Requirement 13 of Policy AL/RTW5

This requirement requires mitigation of the impact of the development in accordance with Policy STR/RTW 1. Section 7 of that policy allows reductions to the Green Belt only “where exceptional circumstances warrant this, and where an effective long-term Green Belt is maintained”.

We submit that the land at this site is clearly more connected to the countryside and the adjoining open fields and its loss will have a much greater impact than “negligible”.

The policy objective of Green Belt designation is to keep the land permanently open. A visual assessment of the land on this site will see that it is open and as such must therefore make a strong contribution to the purposes of Green Belt.

The garden boundaries along Reynolds Lane were not considered weak and inappropriate in 2008 and should not be classed as such now. The three meadows of site AL/RTW5 play an important role in protecting the Green Belt on the slopes below. Moreover, they give some isolation to the Ancient Woodlands, even considering the existing footpath that runs through them. If a major housing project and amenity area were established alongside there is no question that the special nature of the woodlands would be damaged, with a consequent negative impact on the wildlife.

Site AL/RTW5 is presently very definitely rural and with a rural feel. It is not some semi urban scrub land, It is renowned for the breeding of cattle. Should it be developed, this would all change.

The area would become urban, with urban sprawl stretching down the hill from Speldhurst Road to the buffer zone. The pressure to release more greenbelt once this happens will be huge

BIO-DIVERSITY

A summary of the bio-diversity of the site is as follows:

Animal wildlife – Polecats, foxes, roe deer, rats, mice, voles, shrews, frogs, toads and grass snakes.

Birds – Pheasants, wood pigeons, magpies, crows, jackdaws, blackbirds, starlings, sparrows, bluetits, bullfinches, dunnocks, wrens, goldfinches and green woodpeckers. Tawny owls inhabit the neighbouring woods, and the occasional heron is spotted.

Insects – The wide variety of insects to be found includes Emperor dragonflies, and Meadow Brown and Red Admiral butterflies.

Flowers – These are concentrated around the periphery of the wooded areas. Varieties present include: bindweed, meadow buttercup, marsh marigold, cow parsley, yarrow, bird's foot trefoil, ox-eye daisy, creeping thistle, spear thistle, wild rose, stitchwort, bluebells, daisy celandine, dandelion, bugle, violet, bittersweet, common vetch, milkmaid, herb Robert, plantain, ragwort, sorrel, cuckoo-pint, clovers, nettles and many more.

Berries – Wild strawberries, elderberry, blackberry, haws from hawthorn, rose hips, woody nightshade, holly, and white bryony.

Trees – Policies EN1 and EN13 will not allow development if it would damage or destroy one or more trees protected by a TPO. Furthermore, Para 170 NPPF states that planning decisions and policies should contribute to and enhance the natural and local environment. I see a tension between the developer's vague commitment to improve the traffic situation by widening the Speldhurst road and the protection by TPO of evergreen trees and hedgerow separating the road from the proposed area for development. These are absolutely essential to the character and appearance of the fields as a whole,

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We consider that removal of Policy AL/RTW5 from the PSLP is necessary for the plan to be compliant with the NPPF.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I wish to exercise my right to an oral representation

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/HO 1 The Strategy for Horsmonden parish

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The LBD for Horsmonden as shown on the Draft Inset Map for the village should include the land shown on the plan attached to these comments.

This land immediately abuts the existing LBD for the village. In addition, it forms part of the former route of the 'Hop Pickers Line', for which the Council is seeking to encourage initiatives that would enable it to be used as part of a "wider green infrastructure corridor".

In practical terms this land can never be reinstated as part of a public access corridor for recreational purposes based on the old hop pickers line for two main reasons. Firstly, it is in private ownership, and secondly the northern end of the land is enclosed and blocked by the rear gardens of two existing residential properties (Boundary Cottage and Maythorn). The Inset Map excludes part of the curtilages of these two properties, which is misleading. The path could not continue through this land to the north.

There is a public footpath running along the eastern side of this parcel of land, leading from Back Lane to the recreation ground to the north-east. From the recreation ground there is a link through to the B2162. While this footpath link exists, it is somewhat restricted in width and only of basic standard, and there would be an opportunity to significantly enhance it if some of the adjoining former route of the railway line were used. This could then link into the new public access route proposed for the former railway land to the south, which is part of one of the proposed housing allocations for Horsmonden.

If the land shown on the attached plan were to be included in the LBD for the village a limited number of dwellings could be provided to help meet the housing need for the area, and at the same time a key link within the Hop Pickers line strategic corridor could be safeguarded and greatly enhanced. This a

much more positive initiative and would achieve more planning benefits for the village than the unsound approach currently proposed

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The proposed allocation of the former Gas Works Site at Sandhurst Road under **Policy AL/RTW7** for housing is supported by JMS and SGN. As noted in accompanying text, the Gas Works was decommissioned some years ago and now lies largely vacant, with the exception of a small compound area. The disposal and redevelopment of the former Gas Works is part of SGN's rolling programme of decommissioning gas holder sites across the country and replacing these with underground gas infrastructure. It is anticipated that the acquisition of the site by JMS from SGN will be completed over summer 2021 with a planning application pursued shortly after. JMS hope to commence development in 2022.

The site lies within the urban area and close to the mainline station at High Brooms (within 150 metres walking distance) and within easy reach of Tunbridge Wells town centre and key employment areas. It is therefore a highly sustainable location for new housing, in line with the strategic objectives and spatial strategy of the New Local Plan (e.g., Policies STR 1 and STR 3).

The site is therefore readily available, offers a suitable location for development now, and can be brought forward for delivery within the first five years of the new Local Plan. Its identification as a specific, deliverable site for years one to five of the Plan (in accordance with paragraph 67 of the NPPF), is therefore appropriate, meeting the NPPF's tests of soundness.

The proposed allocation of the site for "approximately 170-200 dwellings" is also supported, as is the recognition in Clause 2 of the Policy that the site has the potential to be developed at a range of heights, which might include taller buildings. In this respect, the Policy reflects the opportunity this site offers for achieving higher densities and the investigations and design work undertaken by JMS/SGN to date. JMS and SGN support the principles set out within the rest of the Policy as being appropriate to the site, with any wider contributions being subject to the relevant policy tests.

Notwithstanding the above support, JMS and SGN have outstanding concerns regarding the wider approach to parking standards set out in Policy TP 3 of the Pre-Submission Local Plan, which could unnecessarily and negatively impact on the delivery of optimum densities on the Gas Works site (see also JMS and SGN's response to proposed Policy TP 3). The respondent is therefore requesting that a bespoke approach to parking be adopted for the site, given its unique location and accessibility.

The former Gas Works site sits on the doorstep of a mainline rail station with links to major urban centres, including Tunbridge Wells (4 minutes journey time), Tonbridge (7 minutes) and London (40-55 minutes). It is close to other sustainable transport links and shops, facilities and employment opportunities, which include key employment areas at North Farm/Longfield Road and Southborough/High Brooms. These can be easily accessed on foot, bicycle or by bus.

The site is therefore uniquely located to benefit from sustainable travel options. As can be seen in the Residential Parking Standards Topic Paper for Pre-Submission Local Plan (February 2021), the site already lies in an area of relatively low car ownership and a higher proportion of train travel; transport measures would be adopted to support this characteristic and to further encourage sustainable transport choices. In addition, the likely nature of development on this site which, given its locational characteristics, is expected to comprise a higher proportion of smaller units, meaning that occupants of these units are likely to have lower levels of car ownership (as confirmed within the Topic Paper).

The site would lie within the proposed 'Zone B' area for the purposes of the parking standards (i.e., for developments inside the 'Limits to Built Development' of the urban areas), where minimum parking requirements are proposed. For the Gas Works site, these standards would fail to take account of the characteristics of the site and the nature of development and are likely to impose a level of parking that exceeds the number required, to the detriment of the site's development. The requirement for at least one space per residential unit (not including visitor spaces) – including one space for every one-bed unit, which the Topic Paper shows have an average 0.61 car or van ownership per apartment – would necessitate a minimum of 170 car parking spaces across the site, with negative consequences for the balance of development, resulting in a site that is dominated by car parking spaces at the expense of other communal and amenity spaces.

The exceptional circumstances set out in proposed Policy TP 3 would not allow for a bespoke approach, except where an SPD or neighbourhood plan allows this, which is not appropriate for this site. Alternatively, the policy allows for departures from the minimum standard where viability considerations demand. These would not however allow for a bespoke approach to reflect particular accessibility levels, or the nature of development, or a package of transport measures that would suppress car ownership. JMS and SGN believe this is required for this site.

Notwithstanding any revisions to Policy TP 3, in order to reflect the unique site-specific circumstances, JMS and SGN therefore request that Policy **AL/RTW 7 be amended to require that: ... "A bespoke approach to the provision of residential car parking be adopted that balances parking provision with the accessibility of the site and the delivery of a package of sustainable transport measures to be agreed with the Local Planning Authority."**

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To ensure the intentions of this site allocation are not undermined, JMS and SGN propose that Policy AL/RTW 7 be amended to incorporate the requirement that: ... **"A bespoke approach to the provision of residential car parking be adopted that balances parking provision with the accessibility of the site**

and the delivery of a package of sustainable transport measures to be agreed with the Local Planning Authority.”

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 9 Biodiversity Net Gain

Paragraph Number 6.135

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

It is considered that **Policy EN 9 Biodiversity Net Gain** and the accompanying text at **paragraph 6.135** are too restrictive in terms of allowing biodiversity net gains (BGN) to be delivered off-site where in the best interests of achieving biodiversity enhancements.

JMS and SGN agree with the overriding objective behind Policy EN 9 that development should contribute towards delivering biodiversity enhancements and note that this approach is endorsed by the NPPF and within draft legislation.

Paragraph 6.135 states that “*only in exceptional circumstances and in the interests of biodiversity will ‘off-site’ proposals be considered acceptable.*” In some instances, however, it is likely that off-site biodiversity enhancements could achieve greater gains than those that would be achieved on site – for example, where contributing to larger scale, centralised or linear/connected habitat creation. The application of an ‘exceptional circumstances’ policy could, in these circumstances, lead to the delivery of on-site biodiversity contributions that are of lower overall long-term value, potentially at the expense of achieving development that meets needs in the local area (e.g. as delivered through site allocations policies). It would therefore be appropriate to adopt a more flexible approach to achieving BNG on- and off-site so that, when development is brought forward, a balanced judgement can be made as to the most beneficial way of achieving BNG, rather than applying an exceptional circumstances test that is skewed towards on-site provision whether or not this provides the greatest net gains.

JMS and SGN would therefore promote a Policy approach that allows for off-site contributions towards achieving BNG by agreement with the Local Planning Authority where in the interests of biodiversity and would request that an “exceptional circumstances” test be removed.

Recommended changes to the policy and supporting text are set out below. It is also requested that criteria 1(b) of the policy be clarified to recognise that the 10% requirement would be applied once the relevant legislation is enacted.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The following changes are requested to Policy EN 9 to ensure that a balanced judgement can be taken in considering the location of biodiversity net gains in connection with specific developments.

Proposed amendment to Policy EN 9 Biodiversity Net Gain:

“... a. net gain shall be provided on, or adjacent to the site, except where off site proposals are accepted by the local planning authority in the interests of biodiversity. Where provided off site, net gain shall, in terms of location and type, be in accordance with the supporting text or as otherwise required by supplementary planning guidance; b. the percentage of net gain shall be a minimum of 10% as required by legislation (once enacted) or greater where required by supplementary planning guidance....”

Proposed amendment to Paragraph 6.135:

“The Council will expect developers to provide mitigation, compensation, and enhancement measures for biodiversity on, or immediately adjacent to, a site for all new major development proposals (10 dwelling plus, 1,000sqm plus of floorspace, new build or conversion or outline proposals capable of accommodating either) except where off site proposals are accepted by the local planning authority as being appropriate in the interests of biodiversity. For non-major development ...”

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	J Murphy and Sons Ltd and SGN
Question 2	
Agent's Name and Organisation (if applicable)	Richard Hopkinson Architects
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy H 3 Affordable Housing

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy H 3 Affordable Housing sets out the overall approach to provision of affordable housing within residential developments, with Clause 3 relating to the timing of on-site affordable housing provision. It requires that a minimum of 50 percent of the affordable housing to be delivered on-site be completed and transferred to a Registered Provider prior to occupation of a maximum of 50 percent of the open market units to be provided on site.

JMS and SGN understand the reasons for this requirement. They would, however, request that some flexibility be incorporated in the implementation of this requirement to allow it to adapt to potentially complex build and sale programmes and so that the final details of timing can be agreed through the s106 process. It is also recommended that this clause be adjusted to recognise that there are alternative delivery bodies to Registered Providers, as noted in paragraph 6.319.

It is therefore requested that Clause 3 be adjusted to state:

"3. Timing of affordable on-site housing provision: a target of 50 percent of the affordable housing to be delivered on-site will be expected to be completed and transferred to a Registered Provider (or appropriate alternative) prior to occupation of a target maximum of 50 percent of the open market units to be provided on-site..."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To ensure Policy H 3 offers appropriate flexibility in relation to the delivery on complex sites, it is requested that Clause 3 be amended to state:

“3. Timing of affordable on-site housing provision: a target of 50 percent of the affordable housing to be delivered on-site will be expected to be completed and transferred to a Registered Provider (or appropriate alternative) prior to occupation of a target maximum of 50 percent of the open market units to be provided on-site...”

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Policy TP 3 Parking Standards

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

JMS and SGN consider the **Policy TP 3 Parking Standards** imposition of minimum residential parking standards across much of the Borough – and in particular within the proposed Zone B area - to be too constrained and fails to properly take into account the full range of evidence to support its approach or properly give account to changing circumstances. Moreover, the potential requirement for more parking than is necessary in association with development could undermine sustainable transport strategies and run counter to strategic objectives of the New Local Plan to encourage active travel and reduce impact on the highway network (see Policy STR 6).

The NPPF, at paragraph 105, requires that:

“If setting local parking standards for residential and non-residential development, policies should take into account:(a) the accessibility of the development;(b) the type, mix and use of development;(c) the availability of and opportunities for public transport;(d) local car ownership levels; and(e) the need to ensure an adequate provision of spaces for charging plug-in and other ultra-low emission vehicles.”

As set out in paragraph 6.553 of the Pre-Submission Local Plan, the proposed parking standards are based on ‘existing’ local car ownership levels in Tunbridge Wells, drawn from 2011 Census Data. The standards do not adequately consider the wider range of issues of site accessibility and opportunities to maximise active travel and/or sustainable transport choices, or fully reflect how the varying forms of residential development will impact on travel and car ownership.

The blanket approach in the three zones fails to take into account any diversity of situations within these areas or the potential of new development to change or influence patterns of car ownership, either through the type of development or the measures used to encourage sustainable transport choices (as encouraged elsewhere in the Plan). In this sense, it would reinforce the existing situation rather than influence travel patterns.

The requirement to deliver a minimum parking standard (at least one space per unit) in the Zone B urban areas could stifle the ability to achieve the optimum density of development and have significant consequences for achieving an appropriate design approach, resulting in sites that are required to deliver more parking than necessary. This is demonstrated by the analysis in the Residential Parking

Standards Topic Paper that shows that one-bedroom units have an average car or van ownership level of 0.61 per household (flat, maisonette or apartment) or 0.8 per household (house or bungalow). JMS and SGN have raised this as a particular issue for the former Gas Works Site at Sandhurst Road in their response to Policy AL/RTW 7, where proximity to a mainline station would justify lower levels of parking, having regards also to car ownership levels and travel to work patterns.

While the Policy allows for potential deviation from the car parking standard for developments in Zone A, this flexibility is not extended to other sites within the urban area, for example, those with high levels of accessibility. Given the recognition in paragraph 6.552 that a ... *"single approach to the provision of car parking is not therefore appropriate for all developments"*, it would be appropriate to extend this flexibility to Zone B developments.

It is helpful that the Policy recognises that there may be exceptional circumstances where departure from parking standards could be allowed. However, the subsequent criteria do not cover all potential circumstances where lower parking levels might be appropriate. For example, they do not give full regard to individual site circumstances or to the importance set out in planning policies of making optimum use of accessible brownfield sites as a planning benefit that, in itself, could override the requirement to deliver the full minimum parking standards.

JMS and SGN would support the simplification of the policy, such that it recognises that certain circumstances may justify lower levels of car parking on a site-by-site basis. This would be supported by greater flexibility in the standard.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To ensure that the Policy is effective and justified in the context of national policy, proposed residential parking standards should reflect a wider range of issues beyond existing car and van ownership levels.

Within Table 14, this would necessitate that the 'parking standard definition' for residential development within Zone B include the words, ... *"unless lower provision can be robustly justified"*.

The policy wording should then explain that ... *"Lower levels of car parking provision within the Zones would be considered by the Local Planning Authority where there is robust justification based on a detailed analysis of site accessibility, the form and type of residential development proposed, the availability of opportunities for active travel or public transport and potential enhancements to this (including access to car club membership), and car and van ownership levels."* Such a change would preclude the need for an exhaustive 'exceptional circumstances' policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1

Respondent's Name and/or Organisation JAC Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy H 1 Housing Mix

Paragraph Numbers: 6.308 - 6.310

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWBC sets out the demographic change that the population forecast shows at paragraph 2.16. The estimates are set into three groups which broadly represent children up to 14 year old, older children and people of working age, and those over 65 years old. The forecast for the next 18 years shows a decline in the numbers of children to 88.5% of current numbers. Those of working age show a slight reduction to 99% of current numbers. However, the 65+ category shows a significant change to 140% of today's number. The Housing Mix Policy does not reflect the significant demographic change and is spineless. The policy should be prescriptive to define a proportion of homes that are suitable for this age group. A Housing Mix Policy should dictate the mix that the authority is looking for, even in broad terms. There can be a caveat to allow flexibility on a case by case basis, so it need not be entirely rigid. However, what is the point of researching an evidence base only to have a flimsy policy that will do nothing to exert change over major developers who will continue to build a range of small and moderate sized family homes, with scant consideration for the ageing population?

NPPF para 59 requires that 'the needs of groups with specific housing requirements are addressed' and para 61 requires 'the size, type and tenure of housing for different groups in the community should be reflected in planning policies...'

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The Local Plan Process is dominated by large organisations and I suspect that most are content with this flimsy policy requirement. I would like to challenge the local authority to justify why they are not aligning their housing mix with their population change.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy H3 Affordable Housing. Bullet point 1 states that the affordable housing percentage is 40% and that where the number is not a whole number, it shall be rounded up. Not only is this an unusual accounting practice, but moreover it disproportionately penalises smaller developments. Although we are only talking about a single unit, TWBC should recognise the effect this has on the actual numbers required under this policy for small sites produced by small developers. An 11 unit scheme will require 5 AH units which equates to 45.5% (or 25% more than the 40% requirement). A 13 unit scheme requires 6 units which equates to 46.2% (or 20% more than the 40% requirement). A 16 unit scheme requires 7 AH units which equates to 43.8% (or 17% more than the 40% requirement). An 18 unit scheme requires 8 AH units which equates to 44.4% (or 14% more than the 40% requirement). The government is trying to encourage small developers to flourish and compete in the marketplace. TWBC should be doing the same. Calculating the requirement in the normal way where figures are rounded up if greater than half and rounded down when lower than half will not penalise smaller development schemes. For larger schemes there is virtually no difference whichever way the accounting happens, so it is categorically unfair to introduce a policy that penalises smaller developments.

Para 6.330 Whilst the council recognises the government identifies multiple type of affordable housing, it is not clear why it is excluding some forms of affordable housing from consideration. It is suggested that 'given the affordability pressures the borough faces, the two types of intermediate housing [] are considered the most appropriate' with Shared Ownership being the favoured tenure for ownership. It is not clear what evidence TWBC has used to determine this, and if there is such evidence it simply cannot be reliable. Whilst I am fully supportive of the need to provide AH, it is imperative to use all possible routes to achieve the delivery of such homes. To exclude any routes to provide AH is unjustifiable. TWBC has suggested that Shared Ownership is preferred due to 'affordability' and that purchasers can buy a share of 25-75%, however, this model charges the buyer a rental cost for the proportion owned by the Housing Association. For a buyer who can afford a 75% share, they will have to pay rent on the remaining 25%, but if the same property was available through Starter homes, Discounted Market Homes or Other affordable routes to home ownership (all of which are on the definition of Affordable Homes within Annex 2 of the NPPF), then there would be no additional rental cost to the buyer. It is therefore perverse to justify Shared Ownership on the basis of affordability. I am not advocating the removal of Shared Ownership, rather that the other routes must be included too. These other routes are important in helping the delivery of AH generally.

Para 6.332 **Starter Homes** are identified in the NPPF as a type of affordable housing. However, the Council is concerned that the applicable discount cannot be secured in perpetuity and starter homes may not be affordable to local people. Actually, it is very simple to secure the applicable discount in perpetuity. A simple method which I have used, is to have a restriction in the legal title which dictates the percentage level of discount and this works in perpetuity. A legal agreement can be agreed with the council at planning stage to require the first sale and subsequent resales to be to persons qualified

by the Housing Officer at the authority, so they may determine that the buyer meets the agreed criteria. This type of restriction can apply to any of the routes to home ownership outlined in the NPPF.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The provision of Affordable Housing is dominated by Housing Associations and more recently, large profit making investors. I doubt there are many people or organisations that have considered the alternative routes to Affordable Housing. I represent a number of smaller companies who work locally and could assist in generating additional affordable housing to help meet the need. Better understanding and support from the policy makers can enable increased delivery of affordable homes to a much greater number of people within the borough.

Policy H 6 Housing for Older People and People with Disabilities

Paragraph Numbers: 6.349 to 6.353

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Housing for people with care needs is variously described by many different terms. There is no defined standard set of terms used and this makes it difficult to properly assess and separate the various types of accommodation for those with care needs. By setting out the headline groups in para 6.349, TWBC has made an effort to define the individual use types.

The housing types can be easily separated into those which are providing care and those which are simply age restricted. I therefore question the categorisation shown in para 6.350. Extra Care Accommodation (also known as assisted living, close care or continuing care housing) has been included as C3 housing. Whilst the PPG recognises it is for the LPA to decide whether a particular development falls within one Use Class or another, I would highlight to the authority that the defining characteristic of Extra Care is that there is a care provision, so it is more closely aligned with C2 than with C3. There is a qualifying process to be eligible for Extra Care Housing which requires the applicant to be in need of care, so it is not possible for those without a care need to use such accommodation.

Extra Care Housing is more expensive to produce than market housing and does not achieve a greater market value, so by placing it into Use Class C3, there is much less likelihood that such schemes will be attractive to developers and landowners. Even where authorities properly define Extra Care Housing within C2, there is still a significant battle to achieve any growth within the sector. For example, Maidstone Brough Council does define Extra Care Housing as C2 and yet they have not made any progress towards their total need of 1000 bed spaces over their 20 year period...In fact, we are 9 years into that period and they have a negative number because an existing site was redeveloped and resulted in the loss of a few units.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Amend 'Extra Care Housing' to 'Use Class C2'

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I wish to challenge TWBC on the point of having a type of development which requires users to have a care need as being separated from other care needs developments, and instead grouped with more general market housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Carolyn Jackson [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Benenden Road Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Carolyn Jackson [REDACTED]
Comment ID	PSLP_844
Response Date	27/05/21 14:13
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.9
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Carolyn Jackson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_844 and PSLP_849]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectarage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the

explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards

and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance

when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Carolyn Jackson [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Benenden Road Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Carolyn Jackson [REDACTED]
Comment ID	PSLP_849
Response Date	27/05/21 14:13
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.4
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Carolyn Jackson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_844 and PSLP_849]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the

explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards

and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance

when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Robert Jackson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_952 and PSLP_953]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the

Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);

- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and

this was of concern even when only 24 houses were proposed for the site. “You will see from KCC’s comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new

primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site’s historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites

158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Email Address	[REDACTED]
Address	[REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	R & C Jackson and N Heath [REDACTED]
Comment ID	PSLP_952
Response Date	26/05/21 14:37
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Robert Jackson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_952 and PSLP_953]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the

Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);

- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and

this was of concern even when only 24 houses were proposed for the site. “You will see from KCC’s comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new

primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site’s historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites

158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	Mr Sam Jackson
Question 2	
Agent's Name and Organisation (if applicable)	Kember Loudon Williams
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The plan as drafted contains an anomaly with respect to the allocation of land for development at Paddock Wood that means that it is not 'sound'. This anomaly relates to the precise position of the boundary for the proposed development east of Paddock Wood. Firstly, the proposed allocation excludes a small area of land fronting Queen Street that has recently been the subject of a planning application for residential development and which should clearly be included in the overall allocation. Excluding this area of land creates an unfortunate anomaly in the development area, and it would be much better if it was included so that the whole area can be developed in a properly comprehensive way. The owners of this land are fully supportive of it being included in the development area. The area in question is shown on the location plan submitted with this form. [TWBC: see site location plan attached].

Secondly, one of the maps in the draft plan (Map 27 - Masterplan Area) does actually include the land referred to above in the development area, whereas the other indicative maps in the plan exclude it. This is clearly an anomaly that means that the plan is not 'sound' and needs to be amended. It would make much more sense to include it so that the whole area can be dealt with comprehensively, and this unfortunate exclusion is avoided.

The Brackens, Queen Street, Paddock Wood

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see comments in section 5 above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	<input type="checkbox"/> No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy H9 and specifically the Greenfields Farm allocation which seeks to allocate further land for a travellers/gypsy site.

The Plan is not sound because insufficient consideration has been given towards the resultant traffic impacts, suitability of the site and other Local Plan conflicts. As such it has resulted in a Plan which is unsound not effective and not justified. Nor is it consistent with Planning Policy. The following explains the objections in more detail.

It is noted in the draft Plan as a footnote on page 415 that the Greenfields site is a new site submitted after the Regulation 18 draft Plan. It has no context in terms of being a historic gypsy site and as such must be considered on the basis of a new allocation in the countryside.

On behalf of the objector's we take the view that the site is wholly unsuitable for residential uses of the type envisaged based on the character of the area. It will be clear on the site visit that the access is narrow and already serves a number of non conforming land uses such as a scrap yard (Scrapco Metal Recycling and waste transfer business), CJ Enterprises which specialise in material processing including bulk deliveries and export of materials with HGV's, a car body repair business (Riverdale Body Repair Centre), various other automotive companies, including Osmonds a road planings company that results in heavy plant using the lane, and other HGV Transport and tyre services. Although there are some residential properties along the access lane, they experience noise and disturbance that affects their residential amenity. The scrap metal recycling business is adjacent to the proposed site and this is a B2 industrial use, incompatible with a residential area. The site is therefore clearly unsuitable for further residential uses such as a gypsy or traveller sites on amenity grounds and the Plan is therefore unsound.

The level of traffic along this access road is significant and the access is unsuited to additional traffic generated by the allocation given its single width character. The nature of the traffic along this access

road comprises HGV's, high sided vehicles and skip lorries at very regular intervals. There is a shooting club, which uses a site off this access and generates significant traffic. The sheer volume of traffic is such that the access and junction is at over capacity. Congestion along this access road and especially at the junction where large vehicles cannot pass results in an unsafe existing situation. This, together with the limited visibility on the 60mph Pearsons Green Road leads us to conclude that any further intensification of the access and junction by this allocation is wholly undesirable and puts highway safety at issue. The proposed allocation is not supported by a road safety audit to confirm that both Pearsons Green Road and the access track/junction is safe for the additional traffic proposed and neither is there evidence that the roads have sufficient capacity by way of a Transport Assessment. In the absence of this information, the site cannot reasonably be allocated as it would result in an unreasonable intensification of the uses.

The Policy criteria of H9 fail to consider either the amenity of those expected to use the Traveller site or the suitability of the access. In the absence of these criteria it is the case that this Policy is unsound and not effective.

The site that is to be allocated is significantly larger than the 3 pitches that are allocated in Table 11. This suggests that the draft Policy is not sound. It invites additional pitches notwithstanding criterion 1 of Policy H9.

The site is unsustainable in its location. There is no opportunity to access local facilities or public transport and although the site is for a Travellers site there should be an expectation that some services and facilities could be accessed by foot. Shopping and schools would require additional car journeys. The NPPF explains that sustainability comprises both environmental, social and economic matters and in all respects the site does not comply with these guiding principles.

Localised flooding also occurs around the access to the site and this would indicate that the site should not be identified for any residential type uses such as a Traveller or gypsy site. In the absence of evidence addressing flood risk the allocation should be deleted.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify H9 and Table 11 to delete the proposed allocation at Greenfields Farm (Inset Map 82) and to consider additional land at the other sites to compensate.

To amend Policy H9 to require residential amenity and highways access safety and capacity to be specific criteria for this Policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Given the extensive amenity, highway, flood risk and sustainability objections, the sustainability appraisal ought to direct that the site should be considered unsustainable and that it should not be allocated.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Jarvis Homes
Question 2	
Agent's Name and Organisation (if applicable)	Rachel Maguire - Lee Evans Partnership
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/LA 1

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation has been prepared on behalf of Jarvis Homes. A planning application is currently being prepared, following a positive pre-application with the Council's planning department, for residential development as prescribed in the draft allocation policy. During feasibility it has become apparent that there will be significant obstacles to criteria 3 of the draft policy, in particular the "Provision of a pedestrian footway from the site westwards along Sand Road...", as explained below.

A 1.8m footway on Sand Road, meeting KCC's desired standard, would not be feasible for a number of reasons. The main reason is that the existing highway verge is relatively narrow, with a pinch point of 1.2m that extends over a distance of approximately 60 metres. This highway verge also appears to have been encroached onto by neighbouring private properties and reclaiming this back could be a long and challenging process if legal action was required.

A feasibility exercise has been carried out to understand whether a 1.8m wide footway could be extended into the carriageway, with the carriageway narrowed to a minimum of 4.8m. However, as the carriageway is already relatively narrow and close to a bend this would likely be unfeasible for vehicle/pedestrian conflict and safety reasons. Discussions with KCC have also raised issues with narrowing the carriageway relating to highway maintenance, as the whole road would need to be closed for any work or maintenance to be completed, and in a separate review by KCC last year the same finding was made that a footway is not feasible at this location.

It is submitted that criteria 3 should be amended given that as it stands, it is not deliverable. We would propose wording to the effect "3. Ensure good pedestrian connectivity from the site to the wider footway

network". Provisions outlined in criteria 4 can be delivered, meaning pedestrians will have access to adjacent public rights of way, which in turn lead to links to the village. It is acknowledged that interconnectivity and the ability to travel by foot or public transport is important to new development and it is fortunate that in this case a good network of footways, PROW's and bus stops already exist. It must be remembered that the Council and KCC Highways will be able to input into pedestrian connections during the course of the planning application, where an approach can be agreed between all parties.

We would also comment on criteria 4, which requires "pedestrian (and cycle) linkages to Public Right of Way WT388 to include sensitive lighting and surfacing of footpath". This is currently ambiguous in what is being sought by the Council. It is submitted that the residential development of the site "include connections to Public Right of Way WT388 for use by pedestrians and cyclists" – the PROW runs through the site so it is accepted that it should be integrated into the development. It would be appropriate to also surface the PROW given its integration into the development. However, for the same reason it is submitted that it does not require its own lighting. Successful urban design will ensure that the PROW benefits from natural surveillance and lighting from the development itself and this can be ensured during the planning application process. Unnecessary, excessive lighting will conflict with the principles of AONB protection.

Wording for criteria 4 could be "Integration of Public Right of Way WT388 into the development, to include surfacing of footpath, as well as a connection to WT380 to provide ready pedestrian (and cycle) links to Scotney Castle estate, in liaison with the National Trust about how these links could be delivered".

To summarise, it is submitted that criterion 3 and 4 should be amended.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is submitted that criteria 3 should be amended given that as it stands, it is not deliverable. We would propose wording to the effect "3. Ensure good pedestrian connectivity from the site to the wider footway network". Provisions outlined in criteria 4 can be delivered, meaning pedestrians will have access to adjacent public rights of way, which in turn lead to links to the village. It is acknowledged that interconnectivity and the ability to travel by foot or public transport is important to new development and it is fortunate that in this case a good network of footways, PROW's and bus stops already exist. It must be remembered that the Council and KCC Highways will be able to input into pedestrian connections during the course of the planning application, where an approach can be agreed between all parties.

We would also comment on criteria 4, which requires "pedestrian (and cycle) linkages to Public Right of Way WT388 to include sensitive lighting and surfacing of footpath". This is currently ambiguous in what is being sought by the Council. It is submitted that the residential development of the site "include connections to Public Right of Way WT388 for use by pedestrians and cyclists" – the PROW runs

through the site so it is accepted that it should be integrated into the development. It would be appropriate to also surface the PROW given its integration into the development. However, for the same reason it is submitted that it does not require its own lighting. Successful urban design will ensure that the PROW benefits from natural surveillance and lighting from the development itself and this can be ensured during the planning application process. Unnecessary, excessive lighting will conflict with the principles of AONB protection.

Wording for criteria 4 could be "Integration of Public Right of Way WT388 into the development, to include surfacing of footpath, as well as a connection to WT380 to provide ready pedestrian (and cycle) links to Scotney Castle estate, in liaison with the National Trust about how these links could be delivered".

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Land at Sharps Hill Farm, Queen Street, Sandhurst, Cranbrook, Kent, TN18 5HR

Representation to the Local Plan Regulation 19 Consultation

INTRODUCTION

These representations have been prepared by Kent Planning Consultancy Ltd ('the planning agent') on behalf of our client Jarvis Homes Ltd (hereafter referred to as the 'Appellant') in respect of Tunbridge Wells Borough Council's (the Local Planning Authority – hereafter referred to as 'TWBC') Regulation 19 'Pre-submission Local Plan' public consultation, and to the land known as Sharps Hill Farm, Queen Street, Sandhurst, Cranbrook, Kent, TN18 5HR (hereafter referred to as 'the Site'). The site matches that known within the Pre-submission Local Plan as draft allocation 'Policy AL/SA 2', 'Sharps Hill Farm, Queen Street'.

The Pre-submission Local Plan subject to this consultation was agreed to take place at Full Council on 3rd February 2021.

The report submitted to the Full Council in support of making progress in the Local Plan through the Regulation Consultation acknowledges that Tunbridge Wells is ultimately aiming to meet its housing need as calculated by the Standard Methodology, a position both Jarvis Homes and Kent Planning Consultancy support.

In Sandhurst, the Council are seeking to allocate two sites, AL/SA 1 and AL/SA 2, both of which are proposed to deliver between 10 and 15 units within the Local Plan. Jarvis Homes and Kent Planning Consultancy believe that the AL/SA 2 site is capable of providing a higher figure than that allocated. The 2019 submission initially included some 31 dwellings, and had broad support from Officers' at pre-app, however, during the application stage this was reduced to 16 to reflect consultation comments.

The purpose of these Representations is to promote the continued support by the Local Authority of the site AL/SA 2 within the Local Plan.

Despite the recent refusal of 19/01493/OUT, the reasons for which are reviewed and addressed within these Representations, it is considered that the site is clearly deliverable, and that it can meet the higher end of the target figure or above, which will assist the Council in meeting both its standard methodology requirement, and secure its buffer, which is considered a necessary component of the Local Plan.

These Representations do not seek to revisit the planning application currently at Appeal nor repeat the submission of the Appeal, but seek to support the continued allocation of the site, and will do so using the existing documentation available, much of which inevitably comes from the previous submissions. Further assessment of the heritage and landscape impacts have also been made, and are appended to this submission for information.

The site is clearly deliverable, being promoted by a housing developer with the ability to deliver the site itself. The developer has shown clear interest in delivering the site having submitted an application to the Council in 2019, and is able to deliver the site early in the Local Plan period.

SITE HISTORY

The site history contains a number of proposals relating to householder development,, however, the primary history relating to this development is as follows:

19/01493/OUT - Outline (all Matters Reserved except Access) - Residential development of up to 16 no. dwellings with associated parking, amenity and landscaping – Refused – 05/02/21

An Appeal by Written Representations is ongoing in relation to this matter.

The reasons for the refusal given by the Committee, which focused primarily on landscape impact to the Area of Outstanding Natural Beauty, and impact on heritage assets, are addressed further in these Representations. Additional supporting information is also provided to support the continued allocation of the site.

In accordance with Para.16 (b) of the NPPF, the site remains deliverable.

SITE CONTEXT

Immediate

The draft allocation site consists of approximately 1.54 hectares and is located on the south side of Queen Street (A268) in the Sandhurst Parish of the Borough. The site comprises a detached dwelling known as Sharps Hill Farm, its residential curtilage and agricultural/paddock land that hosts two, relatively small, stable like structures. The agricultural/paddock land is currently divided and in use as private paddock land for the keeping of horses associated with the current owner of the dwelling. The site is largely grasses surfaced, other than small areas of hardstanding around the dwelling and stable structures. The land level slopes upwards from Queen Street towards the south of the site.

The boundaries of the site are marked largely by trees and hedging. A pond is located towards the north east corner of the site and there is a stream which runs along the east boundary of the site. The site is largely overgrown and unmaintained in parts particularly to the eastern boundary of the site where a relatively dense woodland area lies. Outside of this woodland there are a small number of trees within the site, otherwise the site is largely open in nature.

The site has two access points from Queens Street; a shared residential driveway, located towards the north of the site, which serves both Sharps Hill Farm and the neighbouring property of Sharps Hill Oast and a field gate access leading in the agricultural land, located further to the south, which appears

to have been disused for some time. The lawful use of the majority of the site is agriculture which does not constitute Previously Developed Land (PDL). However, where the existing dwelling and defined residential curtilage lie, this part of the site would be considered to constitute PDL. Therefore the site partly comprises PDL.

Surrounding

The site is located Outside of the Limits to Built Development (LBD) and within an Area of Outstanding Natural Beauty (AONB). The site is however adjacent to and immediately to the west of the defined LBD boundary of Sandhurst. The site also falls within an Archaeological Potential Area and parts of the west of the site fall within an area of Potentially Contaminated Land.

Approximately 60m to the west of the site lies a grade II listed building (Bayford House) and the Sandhurst Conservation Area is located approximately 170m to the east of the site. The neighbouring property of Sharps Hill Oast would also be considered a non-designated heritage asset. Approximately 185m to the west lies designated Ancient Woodland. Approximately 120m to the west of the site lies a Public Right of Way (WC288) which runs from Queen Street and heads in a southerly direction.

Immediately to the east of the site lies the LBD and Stream Pit Lane which comprises predominantly semi-detached properties, a number of which back onto the application site. To the north and opposite the site lies a small number of detached properties of varying scales and styles. This includes the site occupied by the property known as Pinyons located at the west end of this row of properties. The site to the west of Pinyons, known as Land West of Pinyons, was recently the subject of application 18/02225/OUT which sought consent for the erection of 27 dwellings. This application was refused and has not been appealed. This application is discussed in greater detail in the appraisal section of the report.

To the immediate west lies the property of Sharps Hill Oast and beyond that lies the property of Bayford House. To the south of the site lies agricultural land in association with Oaklands Farm that hosts a small number of buildings including a poultry unit. Oaklands Farm has recently been granted consent for an agricultural workers dwelling to replace a temporary mobile home under 19/01635/FULL.

The site is defined on the Sandhurst draft Policies Map of the Council's Draft Local Plan (Regulation 19) for residential development under Policy AL/SA 2. The site is provisionally allocated for residential development providing approximately 10-15 dwellings, of which 40% shall be affordable dwellings.

DRAFT ALLOCATION

The pre-submission Local Plan currently allocated the site for between 10-15 units, under the Policy reference AL/SA 2 'Sharps Hill Farm, Queen Street'

The policy reads:

'This site, as defined on the Sandhurst Policies Map, is allocated for residential development providing approximately 10-15 dwellings, of which 40 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *A single point of access should be provided to Queen Street, as shown indicatively on the site layout plan, and be supported by a transport assessment submitted with the planning application;*
- 2 *The setting of the settlement character, Bayford House, Sharps Hill Oast, and the Sandhurst Conservation Area shall be maintained, including through the layout and design of the development being informed by a landscape and visual impact assessment and heritage assessment;*
- 3 *Regard shall be given to existing hedgerows and mature trees on site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and landscape and visual impact assessment. Any trees removed as part of the vehicular access should be replaced along the northern site boundary;*
- 4 *The layout and design of development should be informed by a landscape and visual impact assessment, and should respond positively to the existing settlement pattern and the well-treed character of the site. The scheme shall give full consideration to the site's edge-of-village location, providing a suitable and sensitive urban edge to the settlement, including provision of landscape buffers to ensure a soft approach to the village; development in the south-west corner of the site shall be of low density;*
- 5 *Contributions are to be provided to mitigate the impact of the development, in accordance with Policy PST/SA 1.*

A supporting map has been provided as part of the draft, and this is considered below.

Comments

Jarvis Homes and Kent Planning Consultancy have reviewed this draft allocation and make the following comments with respect to each of the five 'requirements' for the site to accord with:

- 1 The proposed site access is from Queens Street, and a Transport Assessment has been submitted, and updated, to reflect that suitability of this access. During the application stage, this TA was amended to reflect the reduction in units to 16, and this was supported by Kent County Council Highways, who raised no objection, and asked for a £1000 contribution per unit to local services and highways improvements. There is no objection to this contribution from the developer. This part of the draft policy is considered supportable.
- 2 A Landscape Assessment was submitted with the previous application, and this was continually updated to reflect changes to the proposal, including the final 16 unit iteration considered by the Development Management Committee. The Assessment concluded that the impact on the wider landscape would be compensated for with satisfactory planting and large site buffers. The Council's Landscape Officer came to support this view towards the end of the process, and despite limited concerns of the indicative layout, was satisfied. The layout can be addressed through further submissions and is not considered a material barrier to the principle of development, where the size of the site and the relatively low numbers allocated provided for a wide range of alternate layouts.

The supporting map for the draft allocation shows the northern (Queens Road) eastern and southern portions of the being retained as open space and landscape buffer. The proposal submitted for 16 units demonstrates that not only is this possible, but that the development could be achieved within a smaller portion of the site, making the site not only deliverable, but also potentially able to deliver a greater portion of homes, or, with a significant larger landscape buffer than required to achieve the primary aim of protecting neighbouring heritage assets and the AONB.

The final aim is to ensure that there is a 'soft approach to the village', within which the Conservation Area is focused, and it is clear that this aim can be achieved by the development.

- 1 With the area of development required to meet the 10-15 homes target for the site, and even with the larger number demonstrated as being possible, there is clear scope for the site to retain the vast majority of its existing mature trees, in particular those at the boundaries.

Those on the northern boundary are sought for protection because they soften the entrance into the village and the Conservation Area. Whilst some are necessarily removed to facilitate the entrance to the site, the site plan in the allocation allows for ample additional provision on the northern boundary of the site.

Large landscape buffers are achievable on all four sides of the site, with particular regards given to any visual impact from the south, where a large tree and hedge line can be achieved alongside public open space.

Further buffering on the western boundary of the site could be achieved through the removal of the need to contain a buffer of the eastern side of the site. Whilst it would appear that there is a desire from the Council not to upset neighbouring residents, there are no strong planning grounds to prevent the development abutting the eastern boundary, save for the need to protect existing trees, which is achievable.

- 1 Building on point 3, point 4 seeks to prevent the development acting as a hard entrance to the village, which is a key concern of the Council, given that the site is situated both within the AONB, and the extent of the village Conservation Area, the setting of which the Council seeks to preserve. It has been demonstrated through the previous submission that a soft boundary can be created, with existing trees on the northern boundary of the site added to, to increase the level of screening and reduce any sense of suburbanisation of the village entrance. The site entrance road, being to the north-west of the site, has previously been designed to the standards required by Highways, but in a way that has the most minimal visual impact.

The current draft policy concludes that 'development in the south-west corner of the site shall be of low density'. Not only has it been demonstrated that this can be achieved, it has also been demonstrated through previous submissions that the south-west corner can avoid being developed at all without compromising the allocation numbers. In the opinion of Jarvis Homes and Kent Planning Consultancy, the aforementioned acts to demonstrate that the allocation numbers could be increased without detriment to the overall aims of the draft policy.

- 1 For completeness, all parties agree that the development should provide suitable contributions to mitigate any impact of the development.

Given all of the above, Jarvis Homes and Kent Planning Consultancy support the draft allocation and its wording. However, it remains that the site could clearly provide a larger proportion of the Borough's need, and the more localised need of Sandhurst, and it is our opinion that the site allocation could be increased to approximately 25-30 units to reflect the above analysis.

The below site review further outlines and addresses the primary planning constraints for the site, and demonstrates that these can be overcome, in order to further support the continued allocation of the site.

SITE REVIEW

The Council will be aware that an application for the development of the site had previously been submitted in 2019 and, after several iterations, was refused by the Development Management Committee in February 2021. The reason for Refusal given was:

"The proposed development would not constitute sustainable development in the context of the National Planning Policy Framework in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon nearby designated heritage assets. The benefits of the proposal would not outweigh this harm and therefore the proposed development is contrary to Paragraphs 8, 11, 130, 172, 193, 194 and 196 of the National Planning Policy Framework, the provisions of the National Planning Policy Guidance, Core Policies 4 and 14 of the Tunbridge Wells Borough Core Strategy June 2010 and Policies LBD1, EN1, EN5 and EN25 of the Tunbridge Wells Borough Local Plan 2006."

It is noted that the Officer's recommendation to the Committee was to approve the application, and that the reasons given for the recommendation were:

- . In the absence of a five year supply of housing, the housing supply policies (including those related to the Limits to Built Development (LBD) are "out-of-date". Paragraph 11 and Footnote 7 of the National Planning Policy Framework (NPPF) requires that where relevant policies are out-of-date that permission for sustainable development should be granted unless specific policies in the NPPF indicate that development should be restricted (and all other material considerations are satisfied);
- . The proposal would result in the delivery of sustainable development and therefore, in accordance with Paragraph 11 of the NPPF, permission should be granted, subject to all other material considerations being satisfied. The proposal is considered to accord with the Development Plan and Local Policy in respect of these material considerations;
- . The proposal would result in harm to the AONB and character and appearance of the countryside through the development of this predominantly greenfield site which contains some PDL; however, the adverse impacts of the proposal would be outweighed by the contribution the proposal would make to the Borough's housing need; the provision of 40% affordable housing and financial contributions towards community services/facilities and demonstrates that the development is in the public interest.
- . The proposal would result in less than substantial harm to the setting of the Sandhurst Conservation Area, a nearby listed building and non-designated heritage asset. However, this harm is considered to be outweighed by the public benefits set out above;
- . The proposal would secure several contributions to nearby facilities;
- . The number of residential units are considered to be appropriate to this site and its locality;
- . The proposal would not cause significant harm to the residential amenities of surrounding and nearby neighbouring properties.
- . The traffic movements generated by the development can be accommodated without detriment to highway safety and the proposal includes adequate car parking provision;
- . Other issues raised have been assessed and there are not any which would warrant refusal of the application or which cannot be satisfactorily controlled by condition.

Understandably, at this stage neither the officer nor the Committee gave any weight to the emerging Local Plan, for which this Regulation 19 consultation would not have started, nor would Full Council have approved its publication.

Given both the Committee decision and officer report, it is clear that both focus heavily on the Heritage impact, and the Area of Outstanding Natural Beauty.

In support of this draft allocation, and in support of the on-going Appeal for the site, Jarvis Homes and Kent Planning Consultancy, a Landscape & Visual Assessment ('LVA') (Oct 2020; Appended), and a Heritage Impact Assessment ('HIA') (Feb 2021; Appended), have been produced.

Landscape and Visual Assessment

The report produced by Hill-Wood & Co. (Kent) Ltd ('HW&Co'), dated October 2021, makes an assessment of the site's potential impact upon the surrounding landscape.

As the site is situated within the AONB, it is important to ensure that the site does not have a significant or prominent impact upon the wider landscape, to such an extent in particular that it would distract from the overall character of the Area of Outstanding Natural Beauty and be harmful.

However, it should be remembered that that human built form can, and does, form a key part of the character of any Area of Outstanding Natural Beauty, and of course this is no less the case within the High Weald AONB. AONBs are 'cultural landscapes'; human intervention in the landscape is a key factor in the overall appearance of the landscape. Further, these landscapes are not, and should not be, landscapes in which time has come to stand still. Much of the development within the High Weald AONB, and no less in Sandhurst itself, has happened within the last 100 years, and form a key part of the character of the landscape.

The High Weald Management Plan 2019-2024 does little to recognise the impact of existing urban settlements within the AONB, focusing primarily on a historic reflection on the landscape. It does however, to an insufficient degree, demonstrate an understanding that the High Weald AONB is heavily influenced by modern development (C20), as well as historic development.

In assessing the impact of the proposed development, HW&Co have undertaken an assessment based on the later proposed 16 units development, however, the content of the assessment could, in the opinion of Jarvis Homes and Kent Planning Consultancy, extend reasonably to almost any scheme where a suitable landscape buffer to the site boundaries can be achieved, and particularly within the area indicated suitable for residential development within the AL/SA 2 draft allocation.

In reviewing the site, HW&Co drew a 2km site buffer, and used a mixture of local geological patterns and landscape patterns, but excluded built form and woodlands as a visual impairment, to produce a 'Zone of Theoretical Visibility' ("ZTV"). Even at this high base level, the report demonstrates that, far from being highly visually exposed in the landscape, there is a very limited area, primarily to the north of the site, from which the site could theoretically be seen. The ZTV is almost entirely within 1km of the site.

Within the ZTV, the A258 and public rights of ways ('PROWS') WC268 (heading south from the site), WC297 (to the north east of the site, from the eastern side of the village centre heading north), and to a far more limited extent (at a distance of nearly 2km), WC298, provide the only 'publicly accessible' views from within the landscape itself.

As the HW&Co assessment goes further, it becomes apparent that the site is already heavily screened from long views by existing vegetation and built form.

Without repeating the content of the document, it is clear that the site's visual impact is likely to be extremely limited. The report concludes that retaining, enhancing and reinforcing existing boundary planting will be sufficient in providing a high level of screening to the site. Enhancements, such as the use of dispersed non-deciduous species within landscape buffers, could further reduce any visual impact.

Overall, it is clear that the site can preserve and enhance the AONB and the broader landscape, and that the allocation of the site within the Draft Local Plan does not have an inherently detrimental impact on the landscape.

Heritage Impact Assessment

A Heritage Impact Assessment ('HIA') report, produced by CornwallisRumley, dated February 2021, has been produced to support the submission of these representations to the Regulation 19 consultation.

It is unclear from the reason for refusal on the 2019 application what heritage assets are the subject of concern with regards to the impact from the development. The HIA provides a clear map of the local Conservation Area, and Listed Buildings. There is no conservation Area Appraisal, so it is not clear precisely what the historic character and appearance that is to be enhanced and preserved actually is.

The closest heritage asset to the property is Bayford House, to the site's west, and Sharps Hill Oast is identified by the Conservation Officer in comments received in relation to 19/01493/OUT as a non-designated heritage asset.

It is worth noting that the Conservation Officer did not object to the application, and suggested that there was 'less than substantial harm to heritage assets'; this was outweighed by the benefits of the site, all of which would remain were the site allocated.

The HIA appended to this application is considered able to speak for itself in supporting any planning application and the allocation for the site, and given the comments by the Planning Officer for 19/01493/OUT and the Conservation Officer on the same application, it is considered largely evidence that the allocation of the site does not have a significant detrimental impact of heritage assets, and is capable of conserving these assets. However, it should be noted that the HIA identifies the following findings:

- It is considered that with good management practices in place from the Local Planning Authority, to control and manage the delivery of any future scheme, to ensure that it is appropriate in both its scale, form and appearance and that it adheres to the Site Allocation Policy together with all the remaining policies set out in the Local Plan, the planned development will provide will provide a high quality and responsive development to the site's heritage context. It is suitably distanced from the Sandhurst Conservation Area, key buildings, features and elements whose individual significance and setting will be wholly conserved by the planned development.

- The planned development will occur on the western edge of Sandhurst village which has previously been subject to low-medium scale development. The planned development on this one edge of the village will be set in the backdrop of intervening built and landscape form and screened by a buffer zone of trees.

- The planned development will have a minor impact on the heritage assets, particularly as the topography of the site is falling eastwards away from these two heritage assets the impact is even lessened.

- With good development management practices and through a future scheme that should adhere to the site's context, constraints and opportunities, it can be reasonably envisaged that the planned development would be responsive to the established character and scale of the site and the surrounding landscape

KCC Archaeology also highlighted that there is also some archaeological potential to the site, and requested conditions on any consent. This is not considered a barrier to allocation.

ALLOCATION SIZE

The report submitted to the Full Council in February 2021, in support of making progress in the Local Plan through the Regulation Consultation, acknowledges that Tunbridge Wells is ultimately aiming to meet its housing need as calculated by the Standard Methodology; both Jarvis Homes and Kent Planning Consultancy support this approach.

Nevertheless, the report to Council acknowledges that, as the standard method caps housing need at 40% above household creation projections, the total target provision of 12,204 is actually circa 10% lower than it would otherwise be, circa 13,500. This is broadly in line with the 2014 household creation projections, which expected a household growth of 16,000 between 2014 and 2039. Part of this demand has of course already been met, and the figures extend beyond the Plan period. Whilst aspirational, the household projections should be used as a 'stretch target' by any aspirational Council looking to meet its own need.

The Local Plan contains a 'buffer' of circa 1,050 dwelling by the Council's own measure, and seeks to provide 13,059 and 13,444 dwellings over the plan period, but his relies partly on the coming forward of some circa 1300 units 'small sites' windfall, amongst existing allocations and extant permissions, which the Council is also assuming will come forward. Overall, the total provision sought remains just below household projections, and relies partly on unproved supply in the form of windfall and extant permissions; without these, the number of dwellings provided over the plan period falls short of the standard methodology as well as the uncapped household projections figure.

Tunbridge Wells is a heavily constrained borough, and the Council's Plan is considered ambitious, however, it relies heavily on each of the site's allocated, totaling between 8,076 and 8,461 dwellings, coming forward. Whilst the coming forward of each of these sites would appear likely, it is paramount

that every site allocated within the plan remain, in order to provide a reasonable buffer to allow both non-delivered sites, in order to ensure that the housing need as measured by the standard methodology is met, and that the Council has any hope of meeting its household projections 'stretch' target.

The Council are seeking to spread the housing need identified across the Borough, whilst reflecting the constraints of the Borough, particularly the Area of Outstanding Natural Beauty.

In Sandhurst, the Council are seeking to allocate two sites, AL/SA 1 and AL/SA 2, both of which are proposed to deliver between 10 and 15 units within the Local Plan. Jarvis Homes and Kent Planning Consultancy believe that the AL/SA 2 site is capable of providing a higher figure than that allocated. The 2019 submission initially included some 31 dwellings, and had broad support from Officers' at pre-app, however, during the application stage this was reduced to 16 to reflect consultation comments.

Despite the recent refusal of 19/01493/OUT, it is considered that the site is clearly deliverable, and that it can meet the higher end of the target figure or above, which will assist the Council in meeting both its standard methodology requirement, and secure its buffer, which is considered a necessary component of the Local Plan.

In order to maximise delivery, and best secure the total delivery targeted, each allocation should seek to make the most efficient use of the land allocated.

NPPF Chapter 11: 'Making Effective Use of Land' (para 117-123) Paragraph 117 states that planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions.

Planning policies and decisions should, amongst other matters, encourage multiple benefits from both urban and rural land areas which take the opportunity to achieve net environmental gains such as proposals which would enable new habitat creation or improve public access. Planning decisions should promote and support the development of under-utilised land and buildings, particularly where available sites could be used more effectively (Paragraph 118). Support shall be provided for development that makes effective use of land through achieving appropriate densities and ensuring that developments make optimal use of the potential of each site.

Paragraph 122 sets out that decisions should support development that makes efficient use of land taking into account factors such as the identified need for different types of housing and the availability of land suitable for accommodating it (para. 122a), the desirability of maintaining an area's prevailing character and setting (para. 122d) and the importance of securing well-designed, attractive and healthy places (para. 122e).

Clearly, the need to make efficient use of land must be balanced against the other aims of the Council's Local Plan and wider planning policy, and that includes the protection of heritage assets and the AONBs. Further, a suitable mix of homes makes efficient use of land by creating a mixed community.

During the consultation process for 19/01493/OUT, under the initial proposal of 31 dwellings on the site, the Campaign for the Protection of Rural England ('CPRE') were invited to respond to the application, and their comment dated 24/07/2019 read:

'The Council has been pressing for 30-40 dwellings per hectare, which is the minimum necessary to avoid unnecessary loss of greenfield land to meet the Government's housing targets, and this version still falls short on that: 31 dwellings on 1.5 hectares is not numerically high, and without information on how many hectares the "developable" part of the site consists of it is difficult to assess whether the proposed development complies with the density requirements of Paragraphs 122 and 123 of the NPPF. If the Council is minded to approve this application, it should insist on its density requirements being met.'

As noted by CPRE, the allocation site AL/SA 2 is approximately 1.54ha in area.

Respectively, Para's 122 and 123 read:

- 1 Planning policies and decisions should support development that makes efficient use of land, taking into account:
 - a) the identified need for different types of housing and other forms of development, and the availability of land suitable for accommodating it;
 - b) local market conditions and viability;

c) the availability and capacity of infrastructure and services – both existing and proposed – as well as their potential for further improvement and the scope to promote sustainable travel modes that limit future car use;

d) the desirability of maintaining an area's prevailing character and setting (including residential gardens), or of promoting regeneration and change; and

e) the importance of securing well-designed, attractive and healthy places.

1 Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site. In these circumstances

a) plans should contain policies to optimise the use of land in their area and meet as much of the identified need for housing as possible. This will be tested robustly at examination, and should include the use of minimum density standards for city and town centres and other locations that are well served by public transport. These standards should seek a significant uplift in the average density of residential development within these areas, unless it can be shown that there are strong reasons why this would be inappropriate;

b) the use of minimum density standards should also be considered for other parts of the plan area. It may be appropriate to set out a range of densities that reflect the accessibility and potential of different areas, rather than one broad density range; and

c) local planning authorities should refuse applications which they consider fail to make efficient use of land, taking into account the policies in this Framework. In this context, when considering applications for housing, authorities should take a flexible approach in applying policies or guidance relating to daylight and sunlight, where they would otherwise inhibit making efficient use of a site (as long as the resulting scheme would provide acceptable living standards).

Although the initial figure of 31 dwellings was reached following pre-application discussions with the Council, the proposed development under 19/01493/OUT was subsequently reduced to 16 dwellings to take into account comments made by internal and external consultees to the Council, please the Landscape and Biodiversity Officer.

Given a second chance to respond to the proposal, now for 16 units, CPRE commented:

'The revised proposal for the site is based on reducing the number of houses by almost half. The land is outside the LBD and in the AONB. It is the view of CPRE that any such land sacrificed to housing, if unavoidable, must be used efficiently, both in terms of the density of housing and the provision of the top priority affordable housing. The revised proposal is completely inefficient in both terms. The overall density is almost halved – this means that to achieve the Borough's housing target another portion of land, almost equal to the developed area here and inevitably greenfield, will need to be sacrificed. This would be a shocking waste. The reduction of the number of affordable homes is also a serious weakness in the revised proposal. CPRE recognises that meeting the Borough's housing target requires some sacrifice of greenfield land. Urge TWBC in this and other cases to ensure that a density of at least 30-35 per hectare be achieved. This is perfectly achievable with the help of higher density of affordable housing.'

These comments represent a highly pragmatic approach by CPRE and one that should be supported by the Council. This is to say that the best way to protect the broader countryside, including the AONB, is to maximize and secure the efficient use of land, where there is a clear understanding that some greenfield land must be developed to deliver the required housing numbers imposed upon an area. Making efficient use of one parcel of land protects the need to develop another.

Following various iterations and negotiations, the developable area subject to 19/01493/OUT equated to less than half of the site, with the balance struck being that the need to protect both heritage and landscape features, as well as create a 'soft' entrance to the village, necessitated the developable area shrinking to the centre of the site.

Approximately 0.8ha of the total site area was proposed for development under 19/01493/OUT, and with a total of 16 units proposed, this equates to approximately 20 dwelling per hectare. The Officer's report for 19/01493/OUT calculates an even lower figure of 10.3 dwellings per hectare.

Notably, the proposed development that gained support from officers', but was subsequently rejected by the Committee, did not include the entire area currently shown as 'residential' within the draft Local Plan subject to this Regulation 19 Consultation.

In line with the comments from CPRE, and as identified within the supporting HIA and LVA submitted within this submission, it is considered more than possible that the site could accommodate a greater number of dwellings than 16, through both increasing the developable area to 1.ha (to include the south-west corner, but notable at a reduced density in line with the draft policy), and increasing the density. Even without a density increase, the site could accommodate 20 units on the area coloured for residential development on the draft plan. If the density were increased to fall in line with the lower end of the Council's target figure of 30-35 dwellings per hectare, the site allocation could be increased to 30 units. The initial submission demonstrated that this was more than possible, and feasible.

Given the above, Jarvis Homes and Kent Planning Consultancy are of the opinion that a reasonably achievable figure, taking into account the need to protect the AONB, landscape and local heritage, is 25-30 dwellings, and the allocation should be amended to reflect this, however, the current allocation numbers are considered reasonable if these can be taken as a minimum.

CONCLUSION

These representations to the Regulation 19 consultation on the draft Tunbridge Wells Borough Council Local Plan have been made in support of the continued allocation of site AL/SA 2.

Notwithstanding the recent refusal for 16 units on the site, it is considered clear that the site is more than capable of delivering in excess of the draft allocated unit numbers whilst also achieving the Council's broader strategic aims, of conserving landscape and heritage features in the surrounding area, namely the Area of Outstanding Natural Beauty and heritage features including the Sandhurst conservation area and nearly listed building and non-allocated heritage assets.

It has been demonstrated, through the submission of supplementary documentation including a new Heritage Impact Assessment, and the Landscape and Visual Assessment, that the site can be well contained, having minimum impact outside of the site itself.

Whilst Jarvis Homes and the Kent Planning Consultancy support the ambitious aims of Tunbridge Wells Borough Council to provide its own need when calculated using the Standard Methodology, it is considered paramount that the Council ensure that allocated sites provide the most efficient use of land, and aim for appropriate densities, to reduce any need to fall back on wind-fall provision, which is an unproven supply. As such, we have demonstrated that site AL/SA 2 is capable of providing, with absolutely minimal impact on landscape and heritage assets, and within the confines of the draft allocation itself, a provision of up to 30 units, and recommend that the allocation be redrafted to reflect this, although Jarvis Homes are happy to accept the current allocation if these can be taken as a minimum.

[TWBC: for full representation and appendices, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Kent Planning Consultancy Ltd support the emerging Plan and consider it to be sound, legally compliant and that it meets the duty to cooperate.

This representation fully supports the current Site Allocation at Sharps Hill (Ref: AL/SA 2) and in support of the plan, Jarvis Homes and Kent Planning Consultancy, submit a Landscape & Visual Assessment ('LVA') (Oct 2020; Appended), and a Heritage Impact Assessment ('HIA') (Feb 2021; Appended) based on the existing quantum allocated, produced to demonstrate the continued 'suitability' of the site to accommodate the current housing allocation proposed and more. Kent Planning Consultancy Ltd considers there is an opportunity for an uplift on the current quantum of housing allocated for the Site, based on the supporting evidence submitted with this representation.

Please refer to the accompanying 'Representation to the Local Plan Regulation 19 Consultation' Report May 2021 for full details.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

I'm writing to object to the closure of heartlake road within your plan.

I'm a resident of north tonbridge with one child attending a local primary school Woodlands, a toddler attending family childcare in tudeley and my work location based in East Peckham. The road closure of heartlake road (which has occurred due to road works) would make my morning commute a nightmare. This journey due to school drop off and childcare drop off already takes approximately an 1 hour 15 mins. These plans never look outside the traditional commute to work of one person traveling to one point/place of work.

With all the additional traffic pushed towards the town of Tonbridge my commute to work would take so much more additional time it would be impossible to complete my employment role before collecting my children. Many residents including myself work in local villages these roads enable us to get to work as there is such limited transportation outside of the main town.

Road traffic plans always look to push residents into walking or using public transport. However this isn't viable. The public transport outside of the town is very poor, there are limited if not no footpaths which would be extremely dangerous with multiple children.

The closure of this road would cause a huge impact to residents of local villages who use these roads for all domestic and social purposes. Local village businesses would lose passing customers/trade and possibly employees.

I wish to be kept updated on this matter.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_500 (Vision and Objectives), PSLP_501 (Section 4: Policy STR1 - the Development Strategy and PSLP_502 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr N Wickham in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation. Mr Wickham is a local landowner with various interests, including land at Gate Farm, Hartley which is within the control of Fernham Homes.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.3.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.3.5 The vision is set out below:

'Growth in new homes, jobs, and supporting infrastructure will be achieved over the plan period in a manner that respects the distinctive qualities of the borough. The Council will work with stakeholders to maintain and improve overall living standards and access to employment, leisure, and cultural opportunities for all the borough's residents. In particular, the Council will improve access to suitable, especially affordable, housing, including for local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities. Important local services, infrastructure, and amenities will be retained and, where necessary, improved, in line with community needs. Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character. Local ambitions are: • for Royal Tunbridge Wells and Southborough, to maintain their role as the main urban area, with a mix of housing, employment, leisure, and cultural developments, including by making effective use of urban land, whilst protecting their respective distinctive natural and built environmental qualities;*

• for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding; • for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design; • for other settlements, to retain their essential local character, with high-quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs; • for the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise'.

1.3.6 In order to deliver the vision the plan sets a number of strategic objectives:

(1) To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough; (2) To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population; (3) To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments; (4) To promote high-quality and well-designed development that contributes to the local identity and character and creates attractive environments; (5) To achieve the timely delivery of all forms of infrastructure that meets the needs of development and supports the vitality of communities; (6) To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology; (7) To ensure that the borough is vibrant, culturally rich, and economically buoyant;

(8) To conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature; (9) To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests

are met;(10) To support the goal to make the borough carbon neutral by 2030, and minimise the impact of climate change on communities, the economy, and the environment;(11) To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

1.3.7 Response

1.3.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'.

1.3.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.7 Response

1.3.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'.

1.3.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_500 (Vision and Objectives), PSLP_501 (Section 4: Policy STR1 - the Development Strategy and PSLP_502 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr N Wickham in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation. Mr Wickham is a local landowner with various interests, including land at Gate Farm, Hartley which is within the control of Fernham Homes.

Development Strategy and Strategic Policies (Policy STR1)

1.3.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.3.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances trends and market signals.

1.3.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.3.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated

taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.3.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: for copy of Local Plan Figure 5 Key Diagram see full representation attached].

1.3.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 has been duplicated here - see full representation attached]

1.3.18 By way of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.3.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.3.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.3.21 The full proposed distribution of development is set out below.

[TWBC: for copy of Local Plan Table 4 Distribution of housing allocations see full representation attached].

Response

1.3.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider the review process should cease and a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.3.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.3.24 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.3.25 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.3.26 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.3.27 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.3.28 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.3.29 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases we delivered at lower rates given the need to front load infrastructure.

1.3.30 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend beyond 2038.

1.3.31 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.3.32 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.3.33 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley.

1.3.34 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.3.35 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

1.3.36 Indeed, it can be seen by the Core Diagram that the proposed strategy is to direct development to the west of the borough with far more limited growth to the east.

1.3.37 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the eastern of the borough that can deliver quickly and require limited intervention or major infrastructure.

Green Belt vs AONB Release

1.3.38 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.3.39 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

1.3.40 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.3.41 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of Exceptional Circumstances.

1.3.42 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release vs that of AONB land.

1.3.43 From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.3.44 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than four times double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is distinctly possible to channel much of the development beyond this designated area.

1.3.45 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.3.46 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.3.47 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.3.48 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.3.49 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.3.50 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met.

1.3.51 Turning to the requirements of paragraph 172, there is an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.3.52 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.3.53 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.3.54 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.3.55 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.3.56 Given the above constraints, it is acknowledged that planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the Green Belt and AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.3.57 Ultimately it is our view that the Council has wrongly taken the AONB designation and treated it as a 'higher bar' or more significant constraint to development than Green Belt. We consider this approach to be wrong and inconsistent with the NPPF.

1.3.58 As a fundamental principle of planning, there is no barrier to development within AONB. It is a landscape designation and indeed much of the AONB is characterised by built up areas, including villages and towns such as Matfield, Hawkhurst and Cranbrook that are washed over by the designation. In planning terms it is entirely possible to develop within, or adjacent to these (and other AONB) settlements and have development sensitively integrate within the protected landscape. In contrast, Green Belt is an absolute constraint and exists to fulfil a strategic planning role. Once encroachment occurs, of any scale or quality, permanent harm is caused.

1.3.59 The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing

land within the Green Belt the ability to mitigate the impact does not exist in the same manner as it does within the AONB.

1.3.60 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

1.3.61 The over estimation of harm to the AONB, and under estimation of the strategic impact of Green Belt release, is such that this matter can only be addressed through main modification and the redistribution of some of the proposed growth.

1.3.62 Finally, it is important to address that demographically the eastern AONB extent of the borough, characterised by rural villages, represents some of the most affluent part of the borough. Accordingly, there is a risk that the strategy as drafted seeks to concentrate development to the more deprived areas so as to preserve the status quo in the more affluent villages.

Housing Delivery

1.3.63 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.3.64 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.3.65 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.3.66 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing housing completion rates 2010 to 2015 see full representation attached].

1.3.67 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times to ensure the new plan is sufficiently flexible.

1.3.68 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing housing completion rates 2015 to 2020 (statement of common ground) see full representation attached with table note as follows: 1 The completions data for 2019/20 is yet to be formally published until the next Authority Monitoring Report 2020 is complete. However, the number of confirmed housing completions has been provided by the LPA as 474 for this latest monitoring year.]

1.3.69 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.3.70 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.3.71 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.3.72 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.3.73 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.3.74 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing information extracted from the LPA's published supply statements see full representation attached].

1.3.75 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.3.76 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery therefore the plan fails the test of being both positively prepared and effective. Affordable Housing Need 1.3.77 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs. 1.3.78 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.3.79 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.3.80 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.3.81 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.3.82 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.4.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.4.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.4.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Mr N Wickham in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.81 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.3.82 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_500 (Vision and Objectives), PSLP_501 (Section 4: Policy STR1 - the Development Strategy and PSLP_502 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr N Wickham in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation. Mr Wickham is a local landowner with various interests, including land at Gate Farm, Hartley which is within the control of Fernham Homes.

Place Shaping Policies

1.3.83 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

1.3.84 Policy STR/CR1 sets the proposed strategy for Cranbrook and Sissinghurst parish and states that Approximately 415 to 429 net new dwellings will be allocated. This represents a substantial reduction on the 718-803 new dwellings that were proposed as part of the Regulation 18 plan. Furthermore, the draft allocations for Hartley have been removed in their entirety.

[TWBC: for extract of proposed proposal map for Cranbrook see full representation attached].

1.3.85 Based on the above context, the place shaping aspects of the strategy are unsound and require modification, including the redistribution of housing proposed at Tudeley to genuinely deliverable sites in sustainable locations such as Hartley and Cranbrook.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.4.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.4.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.4.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Mr N Wickham in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
5.91, 5.92, 5.93, 5.94	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the

River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.² *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

1 *Adequate servicing and parking to serve the expanded commercial use on the site;*
Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems:

- 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.
- 2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.
- 3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.
- 4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan;*
Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common;* The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.⁷ *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Introduce a pedestrian footpath on the garden centre side of the Eridge Road

Make clear what been the compensatory improvements to the remaining Green Belt

Eliminate the North secondary and emergency access as there are no known local precedents have been set for a requirement of a secondary and/or an emergency access.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)
---	---

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/SP 1 Land to the west of Langton Road and south of Ferbies

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Submission to Regulation 19 Local Plan consultation

The landowners welcome the inclusion of site 231 as a residential allocation assigned policy reference Policy AL/SP 1 within the Regulation 19 Local Plan. The plan has been prepared in accordance with all legal and procedural requirements, and the plan meets the prescribed tests of soundness.

Associated commentary on general matters is presented under suitably-titled headings below.

1 Delivery of a small-scale site in a sustainable location

The final version of the revised NPPF (2019) requires Local Planning Authorities to accommodate at least 10% of their housing requirement on 'small and medium sized sites' (up to one hectare) through their development plans and brownfield land registers.

Speldhurst is a sustainable settlement that can, and should, accommodate a proportionate amount of growth to ensure its vitality is maintained into the future. Specifically, site 231 benefits from being within convenient walking distance of local services and facilities, to include a community shop that includes a post office and general store, a doctor's surgery, a primary school and a children's nursery, village hall, and a church and a further chapel. In terms of access to public transport, Speldhurst benefits from a service linking the village with Royal Tunbridge Wells on weekdays and Saturdays. There is

also a school bus service that runs to the Weald of Kent Grammar School in Tonbridge. The allocation of site 231, therefore, is guided by both the Development Strategy for the Local Plan, alongside the requirement for small and medium sized sites to contribute towards the overall mix of housing sites.

The Housing Supply and Trajectory Topics Paper profiles the delivery of units on site 231 across 2023/24 and 2024/25. In November 2020 the landowners entered into an Option Agreement with a prestigious local developer, Calverley Estates Ltd, and so a high degree of confidence can be placed in the delivery of residential dwellings on site 231. Indeed, based on conversations between the two parties involved, it is expected that the first occupation in the 2023 calendar year would represent a realistic expectation.

It is important that the local planning authority is provided up-to-date and accurate profiling of anticipated site build out rates in order to maintain certainty over the forward housing supply position in the context of the 5-year housing land supply, and in this regard Site 231 shall make a meaningful contribution towards the reported annual position across the period that occupations occur.

1 Change of speed limit to Langton Road on the approach from the west

The landowners are cognisant that some local residents have raised concerns through a number of channels (for example representations made into the emerging Local Plan and via meetings of the Speldhurst Parish Council Highways Committee) regarding the speed at which vehicles users are moving through the Langton Road 20mph zone.

As part of the supporting evidence to the promotion of the site in conjunction with the emerging Local Plan, the landowners have previously commissioned two traffic surveys to record speeds at the proposed point of access for a period of a week during what is a traffic neutral period accepted by the local highway authority. The traffic survey data captured details of vehicle type, speed and volume. The speed data was used to calculate the visibility splay requirements, and a satisfactory access can be achieved without any intervention to the local speed limit regime. Visibility splay calculations over-provide for vehicle stopping distances, as the standardised values applied by local highway authorities do not account for the demonstrable improvements in vehicle braking technology over the past few decades. It is expected that Manual for Streets is soon to be updated to bring, amongst other things, visibility splay information 'in sync' with the latest vehicle technology.

Although a suitable and safe highway access to serve the site can be formed with no changes to the existing speed limit regime, the implementation of the site for residential use could reasonably require the implementation of necessary traffic calming measures to Langton Road in accordance with the relevant criteria of policy AL/SP1, as repeated below.

[TWBC: For the relevant extract from the PSLP, please see full representation attached as a supporting document]

1 Open space, amenity and play space

Policy OSSR 2 of the emerging Local Plan establishes the criteria for the provision of publicly accessible open space and recreation. The policy directs that for new housing or mixed use development sites, the Local Planning Authority will seek to deliver the following categories of publicly accessible open space, sports, and recreation provision in accordance with the specified minimum standards, as set out below.

[TWBC: For table, please see full representation attached as a supporting document]

The standards require no on-site provision for developments of up to 19 dwellings. In accordance with policy AL/SP1 the site is allocated for between 10-12 dwellings, with a median value of 11 dwellings. The site would, therefore, fall within the category of not requiring onsite provision. It is noted that improvements to existing (off-site) provision might be required in accordance with Policy OSSR 2.

1 Biodiversity net gain

One of the landowners attended the full meeting of Speldhurst Parish Council held virtually on Wednesday 5th May 2021, and the draft minutes of that meeting are enclosed to this correspondence. One issue discussed at some length during the public open session was biodiversity net gain and the practical requirements of meeting the associated target through allocations set out in the Regulation 19 Version of the Local Plan. Concern was expressed by certain members of the Parish Council as to the compliance of the Local Plan with the National Planning Policy Framework (NPPF) in respect of biodiversity net gain, and the associated implications for site 231 and the Local Plan more broadly.

In response the landowners contend that the Regulation 19 Local Plan contains extensive coverage of Biodiversity Net Gain as set out in paragraphs 6.131 to 6.142. Paragraph 6.134 establishes further work to be undertaken by the Council, as follows:

6.134 The Council will, in due course, provide further detailed guidance on this policy in the form of a Supplementary Planning Document which will set out the requirements for on-site and off-site net gain for:

- . conservation objectives;
- . long term management and monitoring;
- . funding arrangements and costs for any local or strategic offsetting schemes.

The wording of Policy EN9 'Biodiversity Net Gain' of the Regulation 19 Local Plan is presented below.

[TWBC: For the relevant extract from the PSLP, please see full representation attached as a supporting document]

Within England under the National Planning Policy Framework (NPPF), biodiversity net gain is strongly encouraged. As the government moves towards including a mandatory net gain requirement as part of the new Environment Bill, which will introduce changes to the Town and Country Planning Act 1990, Biodiversity Net Gain will move from a best practice ideal to a legal requirement in England. The Regulation 19 Local Plan makes provision for arrangements until such time that an SPD is adopted, as set out in paragraph 6.139.

6.139 Until such time as a SPD is adopted, reference will be made to the latest government guidance, Biodiversity Net Gain – Principles and Guidance for UK Construction and Developments (CIEEM, CIRIA, IEMA, 2016), British Standard BS42020 Biodiversity – Code of Practice for Planning and Development, and BS8683 – Biodiversity Net Gain or subsequent revisions.

It is contended that the Local Plan provides full and appropriate consideration of Biodiversity Net Gain.

Moreover, the Regulation 19 Local Plan comprises a suite of evidence base documents that provide extensive coverage of the biodiversity interest of the sites to be allocated.

Paragraph 5.20.9 of the Grassland Assessment Survey prepared by consultants Greenspace Ecological Solutions Ltd on behalf of Tunbridge Wells Borough Council clarifies:

*"The site Speldhurst SP1 supports grassland of **Low** botanical interest and is considered of **Low** ecological importance."*

The landowners shall work proactively with the developer in order to ensure a future scheme of development is in full adherence with policy EN9 of the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I (or my associates) would only seek to participate in hearing sessions if there were relevant matters, issues and questions raised by the appointed inspector(s) relating to the site allocation made in accordance with policy AL/SP 1. I would be satisfied to submit written representations to the examination.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I write to confirm my objection of the proposed closure of Hartlake Road. This will have a knock on effect onto Tonbridge as outlined in TMBC's official objection. This is an ill-conceived idea that does not take anything into account other than forcing through the Capel development of which there is no support locally.

Wake up and listen to your residents and surrounding councils. You should be representing your constituents not alienating them.

Question 7

I have been a resident in Five Oak Green for 20 years, our 3 children have been born in this time & we have a strong connection to the local community. During lockdown it became all too clear how much through-traffic usually comes along the one main road when the road was deserted. Traffic is now back up to the usual peak & in the 20 years we have been here it is noticeable how it has increased. Even with a small village school here there is considerable disruption either end of the school day with additional cars parked along the road. This will only increase with the proposed development and this is of huge concern to me. Not least because of the increase in population but also due to the lack of planned infrastructure.

It concerns me with the volume of housing proposed how badly the air quality will be permanently affected from an increase in the number of cars & increased population alike. We all saw the effect lockdown had on air quality & this planned development of disproportionate amount of houses will see a permanent & irreversible change in our climate & our environment not only to us as residents but to the animal & plant population too. TWBC has a duty to maintain the bio-diversity of our land. With this proposed development, there is none.

There is also the devastating amount of light pollution from this vast number of houses to consider too.

I have severe concerns over increased flood risk with this development. There is no doubt that with a development of this size the risk of flooding will be heightened. We will also be part of a much larger urban sprawl linking Paddock Wood, Five Oak Green, Tudeley & Tonbridge. There is no consideration to the loss of greenbelt & productive farmland. In a time when as we leave the EU we need to consider being more self-sufficient with our land, surely we should be using our farmland for the purpose it's intended to provide crops & not give it up for poorly considered housing.

There is also no affordable housing. In fact, my own children who have lived & grown up here will not be able to afford to live here. They will be forced to look to live elsewhere in favour of those who are able to buy into the county from the larger cities.

TWBC have considered no alternatives to this site but have selected the 'easy' option of negotiating with just one landowner. This is lazy & is not showing a duty of care to the current residents of the borough. Meanwhile, Tunbridge Wells town centre is falling on its knees with empty shops & lack of focus on regeneration. This housing development is not sustainable & is unsound.

I have lived in Five Oak Green for 20 years. Our 3 children have been born here & we have a strong connection to the community.

I have concerns over the proposed development of Tudeley Village. I am concerned over the disproportionate amount of housing planned on Greenbelt land with no consideration having been given to the environment, the effect on the climate nor the infrastructure needed to name three. There is no consideration for affordable housing, so my 3 children & all those in the village currently will not have the option to live locally. They will financially be pushed out in favour of those being able to buy into the area from wealthier parts of the county/country or cities.

The plan shows a train station yet Network Rail have confirmed that this will simply not happen, there just isn't enough track space between Paddock Wood and Tonbridge to facilitate another station & the required need to slow down in order to stop at that station. This is misleading on the plan, so what else is there on the plan that is also a non-starter?

Building on such a scale will have a detrimental & irreversible affect on the plant and animal life. The air quality will be significantly worsened affecting not just the people but again plant and animal life and there will be devastating amount of light pollution from this vast number of houses.

We all saw the effect lockdown had on air quality and this planned development will see a huge permanent and irreversible change for the worse in our climate and our environment not only to us as residents but to the animal and plant population too. It is clear there has been no consideration towards our environment or the effect on climate change. TWBC have a duty to protect the bio-diversity of our borough. With this proposed development they have not.

This proposed development of houses will obviously increase the population, increase the number of cars on the road & increase the pollution. There is just one road through Five Oak Green & during lockdown it was evident how much quieter the traffic was. In the 20 years we have been here never was it quieter than during the lockdowns & now it is back to its usual peak. Even with just a small village school there is considerable traffic disruption outside the school at either end of the school day with additional cars parked along the road. This will only increase in number with the proposed development & planned secondary school and this is of huge concern to me that the safety of this has not been carefully considered. There is a lack of planning in the infrastructure here & it will have serious repercussions.

There is also the increase in flooding that this development will bring.

Five Oak Green will become part of a much larger urban sprawl linking Paddock Wood, East Capel, Five Oak Green, Tudeley Village & Tonbridge. There is no consideration to the loss of greenbelt and productive farmland. In a time when we're leaving the EU we need to be more reliable on our own land for our own produce. Our farmland needs to be used for the purpose it's intended - to provide crops - it should not be given up for poorly considered developments.

TWBC have not properly examined any alternative sites but have selected the easy option. This is lazy and not showing a duty of care to the current residents of the borough. Meanwhile Tunbridge Wells town centre is being ignored - there are dozens of empty shops and there is a lack of focus on regeneration here.

I strongly believe this development is not sustainable and is unsound.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Having lived in Tudeley for 27 years, I feel that I am well qualified to state my concerns about the proposed development and its lasting impact.

It is planned that the proposed development is built entirely on Green Belt. The purpose of Green Belt includes: 'To prevent neighbouring towns merging into one another'. The proposed Tudeley village would result in the merging of Tonbridge and Paddock Wood with no distinct countryside between the two towns. Another purpose of Green Belt is: 'To assist in safeguarding the countryside from encroachment'. The proposed development will destroy 170 hectares of beautiful and diverse countryside situated in Green Belt.

Green Belt should only be used for housing in exceptional circumstances when there is no alternative land available for development. TWBC has offered to take on housing allocations from other bordering BCs (Sevenoaks) which contradicts the fact that TWBC believes that there is a lack of non- Green Belt/AONB sites in TWBC available for housing and therefore the council believes exceptional circumstances preside in TWBC. Green Belt should only be used for housing development after all brownfield and non-Green Belt/AONB sites have been exhausted. There are several sites of significant size within TWBC which are not situated in Green Belt or AONB that have been identified and assessed within the SHELAA but have been rejected for development. Site Reference: 144, Horsmonden and Site Reference: DPC3 Blantyre House (both sites totalling approx. 130 hectares) were proposed but rejected. Both sites are outside of Green Belt and AONB and therefore should be utilised for housing prior to the site proposed for Tudeley village. In addition, it would be more logical to split the main new housing stock for the TWBC across 2 sites in the middle of the BC and not have it concentrated at one end of TWBC in area directly adjacent to another Borough Council's border.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Green Belt should only be used for housing development after all brownfield and non-Green Belt/AONB sites have been exhausted. There are 2 alternative sites to Tudeley that would be suitable for large housing developments within TWBC which are not situated in Green Belt or AONB. Both these sites have been identified and assessed within the SHELAA but have been rejected for development:

Blantyre House

Blantyre House prison and the surrounding land are owned by the government. The SHELAA only assessed Blantyre House prison buildings and its immediate surrounding land which is 11.40 hectares. The complete government owned site is approximately 79 hectares. This site was considered as reasonable alternative for a garden village but was rejected as it was thought to be too small, if the complete site had been considered this fact would not stand. In addition the Goudhurst Neighbourhood plan supported the development of the site. The site is 3 miles from Cranbrook. Cranbrook is a small town in TWBC with 2 secondary schools, shops and various other facilities. The nearest rail station is 3.8 miles from the site with links to London and Ashford International. Unlike the site proposed site for the Tudeley development, this site has an existing road system connecting it to both Cranbrook and the nearest rail station. There is currently an existing bus service that could serve this development. If this site were to be developed it would be utilising brownfield and derelict buildings and no Green Belt would be destroyed to either build houses or to better the existing road structure.

Horsemonden

Site ref: 144, Horsmonden, approx. 50 hectares (622 – 1,243 houses) was proposed for development. Despite not being in Green Belt or ANOB, this site was rejected for development for the following reason: 'This would be a very large scale strategic allocation that would be disproportionate to the size of the settlement with concern about the landscape and heritage'. The rationale behind this statement is not valid for a number of reasons; 1) TWBC is proposing a development in Tudeley consisting of 2800 houses which will destroy 170 hectares of Green Belt containing ancient woodland and listed buildings and is in close proximity to 3 historic sites; Tudeley church, Somerhill House and Hadlow Tower. 2) There are approximately 2600 residents in Horsmonden PC and 2500 residents in Capel PC which includes only around only 100 residents in Tudeley. Considering this, how can TWBC justify building 2800 houses in the village of Tudeley? This development would be majorly disproportionate to the size of the settlement. 3) Site ref:144 is attached to the Horsmonden therefore is an extension of an existing conurbation, therefore its development would not cause neighbouring towns merging into one another. 4) Site 144, unlike the proposed Tudeley development, will not be destroying additional Green Belt to create transport links as it will be able to utilise the existing road structure and bus service that currently serves Horsemonden.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am 61 years old and lived in the parish most of my life, my father was born in Tudeley and lived all his life there, I went to school at Capel. I bought a house on the Whetsted Road at Stone Castle in 1985 and feel able to comment on the effects that further building will have in this area.

Roads - even back in 1985 this road was fast and busy. It is the link between the two main hospitals and also Maidstone and Tunbridge Wells. Even back in 1985 the slightest hold up on Colts Hill (dustbin men, broken down car) lead to major tail backs and congestion. Nowadays with the increased use of the road, no road improvements, more houses in Maidstone and Tunbridge Wells the road is always blocked at the hopfarm at rush hour and Colts Hill comes to a standstill every time two lorries meet.

The road between Paddock Wood and Tonbridge is always busy, now that Paddock Wood has grown into a town you have to take your life in your hands just to cross the road anywhere in Five Oak Green. There are very few footpaths and the bus service is dreadful, hence people are forced into using their cars.

Quarry - There was NO quarry when I lived there, now not only is there a quarry, but plans are afoot to increase the quarry and up to 100 HGV's will be using the already congested road daily. This is again destroying the farm land and wildlife habitats.

Farm Land - This area has always been good farm land, hence the hop farm (which was a working farm when I was a child), it grew and dried the majority of hops for the Whitbread Empire. With the demise of the brewing industry the land was laid to cereal crops as its good fertile soil. We as a country need to grow our own food - Why build on good farming land???

Flooding - The area from the Medway down to the Hop Farm has always been flood plain, the stream at Tudeley Brook Farm also floods, as the whole of Five Oak Green has flooded why make the matter worse by building more houses, cutting down trees and concreting on land which helps soak up the water.

Sewerage - All the sewerage from Paddock Wood (which was a village and is now a large town) is pumped through Five Oak Green to the Sewerage works in Tonbridge. Nothing has been done to improve the system, even with the increase in houses. Everytime it rains hard, the pump is disabled, pumping lorries are in Five Oak Green twenty four hours a day pumping the sewerage, these lorries have their engines running day and night, another damaging environmental disaster!

Water - Where is the water for the proposed new houses coming from? None of the reservoirs have been increased, there are no new ones, and the old one in Pembury flooded our home in February last year when it became dangerously high and at risk of breaking its banks, so they allowed water to flow out, flooding 29 homes in Five Oak Green.

Brown Field Sites - There are so many Brown Field sites in the borough and so many empty shops, the old cinema site, John Lewis site and many more around Tunbridge Wells which would be perfect for housing, instead they are going for the easy option, using virgin farm land!

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Brown Field Sites - There are so many Brown Field sites in the borough and so many empty shops, the old cinema site, John Lewis site and many more around Tunbridge Wells which would be perfect for housing, instead they are going for the easy option, using virgin farm land!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Linda Jorden
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My father was born in Tudeley and lived there all his life, I am 61 and have lived in the parish most of my life, living in Five Oak Green Village for the past 25 years. My brother (59yrs) still lives in Tudeley as too does my mother in law.

Tudeley has always been a rural hamlet between Tonbridge and Paddock Wood, it used to be a Hop, Apple and Corn growing area with most of the farms being owned by the Goldsmid family (now Hadlow Estates) and tied farm worker cottages.

Over the years as agriculture has changed the farms have amalgamated and the whole area is now laid down to growing corn crops such as wheat, barley and rape.

The historic church of All Saints not only has the Chagall windows but dates back hundreds of years and attracts many tourists, along with the common wealth graves in the graveyard; not to mention my own family grave.

By building around the church the tranquility of the area and its historical lure will be lost for ever!

Views - The views from Tudeley across the Medway valley are stunning, the rolling farm land and wealden hills in the distance are stunning, by just building one house, these views will be lost forever.

Traffic - As a child I could cycle to Five Oak Green or Golden Green safely, however, the road has not been improved and it is like a death trap, it is scary in the car even with the 40 mile an hour speed limit, the volume of traffic is too great for the road, the drains are continually collapsing and it only takes one broken down car or set of roadworks to grid lock the whole area, especially on a work day.

My mother in law (living just off Hart Lake Road) and brother (living in the village) both struggle to get onto the main road and have to live their lives around the busy times by not using the road at this point.

Transport - There has never been a good bus service in the village, even last week I wanted to get to Tonbridge for 6pm without using the car, the last bus is 4.45pm!!! There are no pavements and cycling is out of the questions. I often walk across the fields using the many well used footpaths to get from Five Oak Green to either Tudeley or Tonbridge. Going to Paddock Wood means crossing the very fast Whetsed road which is too dangerous.

Flooding - Hartlake Road to the Poacher always floods, the water comes from both directions, from the Medway and also gushing down from the fields around the church and Crockhurst street. The water also flows the other way down towards Alders Road, this is at a time when the fields can absorb the water along with the many ponds and ditches, what happens when these go?

My own house has nearly flooded twice with water coming into the garden, then in February 2020 it did flood, it was devastating, we were homeless for six months, lost so many possessions and although we had good insurance, we will never view the house, our home, in the same way again. Why build on flood plains?

Sewerage - Already the pipe between Paddock Wood and Tonbridge carrying all the sewerage cannot cope and everytime it rains hard the pump fails in both Five Oak Green and at the pumping station in

Tudeley. The road in Five Oak Green becomes blocked with pumping lorries, we have to have traffic lights and endure lorries running their engines 24 hours a day to pump the waste, its an environmental disaster and keeps us awake at night.

Phones - Mobile phones do not work in the area, the singal is awful no matter what provider you are with, smart meters the same.

Water - Where will the water come from for all these new houses? there are no new reserviors and no work has been carried out to the ones which do exist?

Land - The land is good quality soil which for centuries has grown the food to feed the nation, nowadays more than ever we need to keep hold of our land and grow sustainable crops to feed us all. Why build on good land when there are so many empty factories, shops and offices around. Once you start to build on virgin land there is no putting it back to how it was.

Nature - The whole area has a great diversity of wildlife and wonderful wild flowers, bluebell woods, primroses, orchids, badgers, hedgehogs, deer and foxes to name but a few. Where will the wildlife go? the flowers will be lost forever, what sort of area will my grandchild see?

Quarrying - There are quarries planned along the Medway linking up with those already there and on into Tonbridge. The whole area will become disused quarry lakes and houses with no land between.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

There are many brown field sites in the borough, TWBC appear to feel these are too expensive to use, while building on virgin farm land, making land owners richer, is the easy option.

The cinema site in the town is perfect for housing, the victoria centre is empty of shops, why not move the handful of remaining shops into the empty shops in the precinct and use this site for housing? Not to mention all the empty factories and offices around the borough.

The plan is an environmental disaster!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/PW 1 The Strategy for Paddock Wood

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Would you please note my comments regarding the above proposal.

I am against closing the railway bridge as I use Paddock Wood for both the railway station and shopping and live in Yalding to the north.

The alternative route is via the hop farm, to Five Oak Green then Paddock Wood. An additional 3 or 4 miles, increasing traffic on that route and adding pollution.

The station car park has more capacity on the southern side and the northern side is often full earlier. This will necessitate a 4 mile round trip for a commuter to park their car after arriving at the station.

This will impact businesses based in Paddock Wood as shoppers will go elsewhere.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated
